

ProgressSoft

During a period recognized as the launch of the computer age in the region, ProgressSoft has placed a particular emphasis on new technologies and established a new path in Arabization and image processing. In this regard, ProgressSoft developed Terminal Emulation, Document Archiving and Signature Verification Systems; products in which we have enjoyed great recognition for our expertise and innovation.

This focus has put us in a good position to offer quality software for users who are interested in the latest technologies and who need something to depend and rely on. ProgressSoft systems included a lot of high tech features that are indicative of the new generation of software.

ProgressSoft will always be a leader in providing quality products that offer excellent value to the users.
