THE VIDEO GAME INDUSTRY'S DIRTIEST LITTLE SECRET...

FOR SOME TIME NOW, I have been personally

concerned about what Sega, Nintendo and Sony will do to launch the Saturn, Ultra 64, and PlayStation respectively. Although both the Sega Saturn and Sony PlayStation exhibit strong potential to become the standard bearer of the later '90s, and the SGI graphics demos that Nintendo runs at the shows sure look nice, there is a DRTY LITTLE SECRET in this industry that exists as equal parts marketing strategy and competitive gamesmanship.

I'm talking about the retail price of these new mega machines. There's a lesson to be learned from the experiences that 3DO has endured in its short history. After riding high the wave of speculation that a common standard could be created and licensed out to various manufacturers for mass consumption, the final product has had its problems at retail. **3DO HAD THEIR DUCKS IN A PERFECT ROW**, with multiple licensees, little risk to publishers in manufacturing costs or inventory, and a truly state-ofthe-art piece of equipment on which to program. Despite all of these facts, the system still had difficulty gaining widespread acceptance due in large part to one thing: its cost.

Although the 3DO was a better machine with the most cohesive vision of what entertainment in the future should be like, the company could not convince casual gamers and parents that their system was \$600 better than your average Sega or Nintendo 16-Bit. Furthermore, the fact that the manufacturers of the 3DO hardware like Goldstar and Panasonic had no immediate interest in software revenues—an area that Sega, Sony, and Nintendo all enjoy—it became difficult for the price of the 3DO to come down as rapidly as required because the manufacturers of the hardware had **NO OTHER REVENUE** sources from which to offset the proposed losses that went hand-in-hand with reducing the unit's price.

This fall we'll see the first effects of 3DO's initial launch. All three of these game systems were created to cash in on what was perceived to be a slam dunk entry into the market by 3DO. When at least one of these units was in the design stages, it was considered "OK" to come in over \$400. "Heck," I'm sure the developers reasoned, "we'll still be \$300 less than that successful 3DO machine."

There are encouraging signs. RUMORS ARE RAMPANT that both Nintendo and Sony are willing to take

mammoth losses on the hardware—as much as \$100—to get them into players' hands at a reasonable price. Expect to see a daily war of tit-for-tat between all three system providers at the upcoming E³ show in Los Angeles where all three machines are to debut. Hopefully the free market will prevail and we'll see low-priced PlavStations and Saturns alongside \$250 Ultra 64s.

The can simply be no alternative. Even 3DO has learned that lesson, gaining the attention it originally deserved two years ago.

And Who Will Be Left After The Dust Settles?

LETTER OF THE MONTH

Dear EGM,

Okay, I'm sure you guys at EGM are totally sick of getting letters that go something like this, "I want to get a PlayStation/Jaguar/Satum/Ultra 64, but which system

is the best?" With all of the nextgeneration systems coming out, I guess everyone just

has a natural curiosity as to which one will be the best. Personally, I'm getting kind of sick of the whole thing. I mean, come on! Some of these systems aren't even out yet! Who knows who will have the best system? I think a lot of people are getting kind of freaked out about the whole thing even though they haven't seen any of the games yet. We shouldn't pass judgment on systems we haven't even tried. Just remember: Half the fun of all this is

the fact that we can't predict the future. Let's not jump to any conclusions! Time will tell.

> Garrett Barnes Indianapolis, IN

We couldn't agree more, Garrett! If I had a dime for every letter we get asking our opinion on which of the next-generation systems is the best, I'd be a very rich person! Although some of these systems are "hot" right now. let's not forget what will decide which system will be the best: the games. You could launch a 64-Bit system that has so much muscle that it should blow everything right out of the water. Problem is, if you don't have the names, the public will not even pick it up, (We gamers are a smart bunch, vessirree!!) After the initial launch of these next-generation systems, wait a few months to draw your own conclusions as to which one best suits your individual needs. Look at the available software, and

make your analysis based on your

own research. With the price of some systems approaching, and in some cases exceeding, the \$400 mark, you wouldn't want to

make a snap decision based on nothing more than expectations of what a particular machine could do. After all, you wouldn't buy a house for \$1 million if you didn't like the neighburhood! Anyway, I guess the moral of the story is to hold your horses and don't believe all of the crud you hear about how this system is better than that system. Make your own choices and remember; Use your nound

Great letter, Garrett. Your Acclaim Dual Turbo joysticks are on their way.

MORE DEBATE ON The Jaguar

Dear EGM,

I got a Jaguar almost a year ago thinking that it was going to be the best thing on the market and have tons of games. I'm sure you can see why I feel like a fool. Why is Atari making such poor games? You would expect more from a 64-Bit system. Why is Atari doing this to their fans? How did they manage to screw up a game like Bubsy? Why didn't they improve Flashback's graphics? I'm really disappointed because I think that most of the games stink! C'mon Atari, before it's too late!

Jahide McAllister Jersey City, NJ

Dear EGM,

I am a proud owner of an Atari Jaguar, and I love it! Notice that I used the word "proud." The games are, for the most part, excellent. Alien vs. Predator is probably one of the best games I've ever played on a home system.

 With games like Syndicate, we may yet hear the Jaguar roar.

Hopefully, Atari will keep releasing games like this. I know that many people are disappointed in this fine system, but I think that the future looks quite bright for the Jaguar. With some of the new titles coming, I can't wait to see what 1995 will hold for Atari. I feel confident that the gaming world will feel the power of this highly underrated system. You can have your Saturn, PlayStation, 3DO and 32X. Make mine a Jaguar any day of the week!

Thomas Philian Seattle, WA

It deesn't happen too often but we make mistakes just like everyone. On the last cheat sheet for Killer Instinct, there were a few typo errors. Sorry about any confusion. Here are the correct methods for the specified characters and moves that were incorrect.

OVERSEAS FOLLIES AND AMERICAN GAMES

Dear EGM,

I am writing to you about the problem of not getting all of the good Japanese games over here in the U.S. I am an anime freak, and I wish more games like Macross and Dragon Ball Z would come out over here. I do have what I hope will be a solution to this dilemma. You may have noticed that a while ago Blockbuster brought over and translated Final Fight: Guy. They allowed you to rent it and later sold copies of it for \$14. If Blockbuster could bring out this game, they could surely bring out others that would be more popular.

> Jordan Sanderson Lincoln, NE

You bring up a great point. The only problem we can foresee with this is that the casings of the cartridges would have to be changed to fit into the American Super NES. This may sound like a minor quibble, but don't forget, that costs money. We'd love to see more of this kind of Japanese-to-American crossover take place, but we doubt that it will happen anytime soon.

I HAVE AN INTERNET ACCOUNT AND I'M COOL...

Dear EGM,

This letter is in response to the letter emailed, no excuse me, XMailed to you and printed in your March 1995 issue of *EGM*. It reads as follows:

"Dudes, I'm XMailing you from my XBand! I seem to have full Internet mail access! It's pretty cool to be able to send e-mail from my Genesis."

Dan Bennion via the Internet

I am writing this letter from my dial-up UNIX cash Shell account, the way the Internet was started and the way it should stay! Dial-up services like America OnLine with their "pointyclicky" interface and ignorant Newbie

users are making the Internet worse each day! The last thing the Internet needs is little 12-year-old kids sending

Chief Thunder: Humiliation- D,F, F Quick kick Glacius: Humiliation F,F,B, Mediumkick melt&uppercut: B,D,F Kick Orchid: Humiliation: F,D,B Fierce Punch Frog Fatality: D,F,B, Quick kick flame-mail from their Genesis or Super NES. The worst thing for the Internet is little kiddies running around wasting bandwidth. You published a moronic letter from an XBAND loser, perhaps you could find a place for a letter from a REAL Internet user, who actually has a point.

Christopher Nelson drs@netcom.com

I'm yoing to try to keep my cool ... Tell me Chris, how much practice would it take for someone like me to be as cool as you? I'll het it would take a lot! For your information Buck-O, the reason that the Internet is so great is because anyone, and I mean ANVONE, can contribute to the wealth of electronic information that is found on the Net. There are no prerequisites for using the Internet, are there? If there were, the Internet would probably be comprised mostly of self-righteous, pseudo-intellectual geeks who have nothing better to do than spew endless streams of bile about how cool they are because they know some UNIX commands. Get a life! There, I kept my cool ... kind of.

KUDOS AND MORE TO SNK

Dear EGM,

After purchasing the February issue of *EGM*, I read with great interest the letter from Heh-Kyu Lee of SNK. It is truly gratifying to see that some of the industry representatives understand that players want the home version of a game to be as close to the arcade version as possible. With the technology getting better and better, arcade-quality games in the home are a reality. Anyway, I doubt that Ms. Lee will have any use for the Dual Turbo Wireless Remote System, but I would. So if she doesn't want the prize ... er ... umm ... [1] take it!

J.P. Alioto via the Internet

Yup. We've gotten quite a few letters praising SNK for their landmark decision to give a blood code for Samurai Shodown II. It seems that about 99.9 percent of the gaming public supports the use of something like a code to activate blood and gore in a home video game. It's strange that the debate about violence in video games has all but disappeared. Hmmm...

coming out, how much longer will the 16-Bit systems be supported? Joel Pearson Dallas, TX

A: There is little indication of how long the 16-Bit systems will be around. Usually, in times like this, there will still be support for the "old" systems anywhere from one to two years after the introduction of new systems.

Q: How many games do you guys at EGM have at your office? Pete Vanderhause Columbus, OF

A: Too many. We have so many games, that we had to redesign our offices to accommodate them. Some of the games are collecting dust, especially the old 8-Bit NES carts. We're beginning to run out of room?

Q: How long does it take to develop a game from beginning to end? Robert Sharet Waupaca, Wi

A: It all depends. First of all, if a company has 10-15 people working on a title, the amount of time it takes to make a game is less than if they had, say, five people working on it. Also, the type of game being developed has a lot to do with the amount of time it takes. A game like Donkey Kong Country would take more time than a game like Madden, because Madden is essentially the same game from year to year tweaked by the programmers.

MK III AND YOUR Cheatin' heart

Dear EGM,

After reading your MK III article in issue #67. I felt like dropping you some mail. My specific grievance is with the section entitled "Kombating the Internet." Roger Sharpe describes the Internet as something akin to an international spy ring out to rob Midway of all its secrets, and to bring about its financial ruin. It also leads one to believe that the game itself is not as enjoyable if one doesn't find all of the secrets by oneself. Both of these statements are simply untrue. The distribution of moves/secrets/ fatalities/etc. on the Internet is not taking away anything from the game, but in my opinion, adding to it. In order for

Will MK III be ruined by the Internet?

me to have figured out and/ or discover all of the information that has been discussed or distributed on the Internet, I would have spent over \$400! To me that's not enjoyable that's borderline insanity! When MK II was released in its initial version (1.0) the game was not complete. People

Is it fair to learn secrets from gamers?

who spent a lot of money to learn some of the secrets of the game, came away upset because there were few to be found in the revision. People posted and shared their findings of the game on the Internet and interest in the game skyrocketed! This trend continued throughout all of the revisions. The only reason I see for Midway to complain about the distribution of the game's secrets through the Internet is that it takes away from their revenue! When people learn the secrets, they stop dropping endless amounts of money into their machines trying to find them. OH NO!!! Lost revenues!!! C'mon Midway, the game is good enough to stand on its own without all of its secrets. The Internet is not going to ruin you.

> Adam Hacker Ottawa, Ontario

Greetings from Hong Kong!

Dear EGM,

I bought a Sega Saturn here on Nov. 22-the day that it was released. It was a tad bit more expensive than I'd expected. Anyway, I've been kinda disappointed by the type of games they've released. I was especially disappointed in Gail Racer ... geez, that game reeked! The graphics were laughable and the sounds were disgusting, I mean. I know that it's only been out for a couple of months, but still. I was hoping for the great arcade games that made me want to buy it in the first place-Davtona USA. Desert Tank, Wing War, etc. The Virtua Fighter that was released is below par. Can you tell me if Sega is working on Virtua Fighter 2, Desert Tank, Virtua Cop, Wing War or any other kick-butt games for the Sega Saturn?

David Martin Hong Kong, China

Virtua Cop will probably hit the Sega Saturn later this year. As for the other Sega arcade games that you mentioned, chances are that they'l be debuting on the Sega Saturn sometime in the near luture. As for game quality, expect the Sega Saturn games to improve substantially with age. Remember David, the Sega Saturn is still relatively new, so don't expect any mind-blowing games in its first few months on the market. By this time next year, however, we'll be seeing impressive stuff!

Astal will help pump the Sega Saturn.

JUST BOUGHT A 3DO

Dear EGM,

Just after I bought my 3DO, it occurred to me what a great deal I had just received. This tiny machine turned out to have so many uses, I was overwhelmed with all of the possibilities. It dawned on me that I could achieve stardom with this jewel of a machine. The first idea came along when I witnessed the groovy warps displayed when I played my audio CDs. I said to myself, "Dude, this is a vision from beyond. I could bring back the '70s with this gizmo." All I need is for all those companies to agree with my idea. Just imagine an interactive FMV of Saturday Night Fever or maybe the Bee Gees! 3DOs would sell like polyester. You know, in case no one has found this out vet, the 3DO makes a wild lava lamp, I just know that everyone will love it. Well, have to run, I gotta host a fondue party.

Louis Noll Chattanooga, TN

Hmmmm ... Bee Gees? A \$300 lava lamp? Fondue parties??!! Whoa Louis, have you been reading one of those other gaming mags? Shame on you, you naughty boy!

Whoa, like, this is sooo psychedelic, man!

MO' MEGS?

Dear EGM,

I have noticed in past issues that some of the Jaguar games don't have as many megs as some 16-Bit games. What's up with that?

Sean Hartley via the Internet

Just because a system is 64-Bit, it doesn't mean that the games necessarily have to contain more megs than its 16-Bit competitors. Because of the differences in its hardware, the Jaguar is capable of producing more detailed graphics and better sounds. Because of its processor's muscle power, the Jaguar can do things with 4 megs that other games couldn't do with 32!

Your magazine contributes awesome poetry to our

society today. I know poetry when I see it. I take part in four poetry classes every week and am the captain of my high school's varsity poetry club. Every sentence that I read in your magazine causes me to tremble with excitement. You hide poetry throughout the entire magazine. In honor of your magazine, I would tike to contribute two poems of true meaning that I feel may someday win the Nobel Prize. It took me two weeks to reach into my inner self and pull out these intense norms.

EGM ON CD-ROM?

Dear EGM,

I have collected and saved every issue I can get of *EGM*. My only problem is that I am running out of room to save them all and it is hard to look up info in past issues. Would it be possible for you to put a year of *EGM* onto a CD-ROM? It would make it easier to store and might be easier to find info if a Search Option was included. It would be a great service, and you could give it to subscribers for free as a token of your appreciation, or even sell it at the end of the year for around \$25. Please consider what I've said, because I'd hate to have to throw out old issues.

Dan Shapiro West Nyack, NY

Great Idea, Dani But as luck would have it, we are already working on that idea even as you read this. We'll keep you posted on the development.

THE GOOD, THE BAD AND THE GONE

Dear EGM,

Joel Simone

Dublin, California

Just recently I got the February issue of *EGM* and to my surprise I was very disappointed. The reason, you ask? The changes to the Fact File section of course. What happened to The Good, The Bad and The Ugly? While this isn't really a major deal, it was really nice to get an initial feel as to how a game was going to turn out. It also added a nice touch of humor (not that your magazine didh't already have humort).

Brian Parker via the Internet

Usually once a year, EGM goes through a metamorphosis of sorts. We try to give you, the reader, more bang for your gaming buck, in doing this year's redesign of the magazine, we decided to do away with The Good. The Bad and The Univ to try to cram more information on our pages. (GASP! Kill off The Good, The Bad and The Uply? Have you no shame?) Granted, TGTBATU was cool, and it gave you some idea of what a game was going to be like, but it just didn't give you the kind of hard-hitting information that you've come to expect from *Electronic Gamina* Monthly, Believe me, we've notten letters screaming because we killed it, and letters praising us for doing so. Sometimes you gotta do what ya gotta do. So as you take a look at this month's issue, take note of some of the changes we've put the old dog through. Let us know if you like 'em, hate 'em or just don't care! We'd love to hear from you!

TO XRAND OR NOT TO XBAND

Dear EGM.

The XBand sounds awesome and I would like to get one. Problem is, I live in a rural area. My town is about the size of two football stadiums, and the population is approximately 200. The closest city is Kansas City which is about 200 miles to the north. I was wondering, if I get an XBand, how will it work? Will we be hooked up via Kansas City? Here in rural areas such as mine. there isn't much to do but play video games. Please help me out!

Charles Moore Biythedale, MO

You'll have to dial an access number that is provided for your area. I'm not sure where that number will be. If you must go through Kansas City, your phone bill will probably be astronomical. Also, odds are if you want to play someone in say. California, you might have to pay for more than just the call to the access number. Just to be sure, you should give the people at XBand Customer Support a call at (716) 871-HELP between noon and 9 n.m. Pacific Time. Happy modem gaming!!

MK II-PC STYLE!

Dear EGM,

I am a huge fan of Mortal Kombat II. I am also a big fan of PC games. My question is, how come MK II hasn't come to the PC? The first Mortal came to the PC and it was pretty good. What's going on with this?

Raymond Amberg via the Internet

This is an easy one! MK II for the PC is in the stores as we speak. Word is on the street that it is a good translation of the original arcade blockbuster that we all love, but don't look for any new additions!

SEGA CHANNEL IS OFF TO THE RACES

Sega Channel held their first on-line contest recently. In the Great Earthworm Jim Bace, subscribers had a chance to test their skills by racing against players from across the country in a special version of Earthworm Jim put together by the Shiny Entertainment team and Playmates Interactive Entertainment. The first 200 gamers who reached the hidden room buried deep within the Earthworm Jim dame saw a 1-800 number and a secret code displayed on their screen. If they called the special number and gave the operator the secret code, they won one of four great prizes.

Vince Salvi, 21, of Pittsburgh, PA, won the contest by creaming the competition in a playing time of under 40 minutes.

"I've been a subscriber to the Sega Channel since it came to town, and was really psyched when I found out about the contest. I play Earthworm Jim all the time. This special version was really 'phat' and a little harder than the original, so I was blown away when I found out that I had won," Saliv said.

For his victory, Vince Salvi won a trip to Shiny's Laguna Beach headquarters to look around Earthworm Jim's inner sanctum and talk with members of the Shiny team.

MORTAL KOMBAT ARENA SHOW TO HIT THE ROAD THIS JUNE

David Fishal Presents

hat could very well be the most popular fighting game of all time is being made into the theatrical event of the decade. Gamers get ready for MORTAL KOM-BAT: THE ARENA SHOW.

The idea came from a phone call between Larry Kasanoff, producer of *Mortal Kombat: The Movie* and world-renowned, live-show producer David Fishof.

"At first when Larry and I began talking about putting the project together, I wasn't too sure that I wanted to do the project. But when I went home that night I talked to my son Josh and I asked him what he thought about Mortal Kombat. He told me that he and his friends follow the games and are very interested in and overwhelmed by the entire Mortal Kombat story line. I was encouraged by my son's comments and that's when I decided the Arena Show would be a great idea and something we should pursue." Fishof said. "This tour will be unlike anything ever seen before; there will be magic and interaction with the audience. After each match, audience members will be able to vote and determine the outcome of each show using a specially designed device made by Nocturn and Sonv just for the Mortal Kombat live arena show."

"The members of the

audience will decide whether they would like to see a Babality, Friendship Fatality or some new special moves that are being added to Mortal Kombat III.

"Ed Boon and John Tobias of Williams have made special codes for Mortal Kombat III. exclusive to the tour. Not only will fans of the game who attend the tour have a chance to play Mortal Kombat III on a huge screen before the performance, but they will also be able to learn exclusive codes that will help them find hidden items and perform super moves. These will only be given out during the Mortal Kombat: The Live Tour as it makes its way across the country."

The show will be making its

way to your neck of the woods in what will be the first live show based exclusively on a video game and the live audience participation will also be a first.

The tour will start in June and feature one of the most extensive cross-promotional packages in the history of live tours.

The Mortal Kombat franchise extends to over 50 licenses and features such big names as Acclaim, Tiger Electronics, Malibu Comics, Berkeley Books and Hasbro. The companies will not only be sponsors, but they will feature show information on their toy packaging.

"The Mortal Kombat Live Tour will be based on the world's bet-selling video game, which to date has sold in excess of 7 million copies and has made close to \$500,000 overall.

Mortal Kombat III is the third video game in the Mortal Kombat series and will be initially released sometime this summer on the Sony PlayStation, distributed by Sony Electronic Entertainment.

David Fishof is currently speaking with sponsors and putting together the \$2.5 million show and plans to take the tour to 100-plus cities. State-of-the-art special effects, lasers and illusions from some of the world's best magicians are a few of the things that are planned.

For instance, you may remember last Thanksgiving when a master illusionist made the Space Shuttle disappear in a big-time network magic show, Franz Harary, the illusionist who made it happen, is being recruited for the show along with more than 20 martial artists, some of whom were in the Mortal Kombat Movie and a few who played the parts of the characters in the video game versions of Mortal Kombat II and Mortal Kombat III.

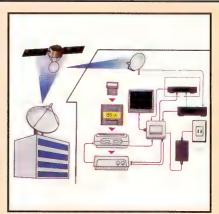

The Mortal Kombat Arena Show is being co-executive produced by Danny Simon and Larry Kasanoff, producer of *Mortal Kombat: The Movie.* The show will be directed by Jeff Lee, director of such hits as *Joseph and The Arnazing Technicolor Dreamcoat* and *Cats.*

David Fishof is responsible for some of the most lucrative tours in the industry, including The Monkees Reunion Tour, the Dirty Dancing Concert Tour, Ringo Starr and his All-Star Band and The American Gladiators Live Tour.

He's currently planning several cross-promotional tieins with the numerous current and ever-increasing Mortal Kombat opportunities.

Discount coupons for the tour will be packaged with Mortal Kombat home video products and tag lines for the live show will run on the arcade versions of the game. Over 50,000 Mortal Kombat arcade units are in entertainment centers around the world and now the legend of the ultimate fighting battle is on its way to your home town.

We will be tracking the show's every movement, from when the actors step on stage for their first performance to when the show will be coming to your area. Keep it here for the latest tour information

EWJ CARTOON IN THE WORKS

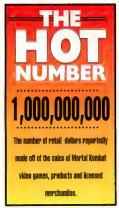

Shiny Entertainment has a new hook for their Earthworm Jim character. The Earthworm Jim cartoon series will air on the new Warner Bros. Kids Network. Earthworm Jim creator David Perry is hopeful kids will take to the new cartoon series just like they took to the game.

The cartoon will be produced by a team of animators headed by Jim Graziano. head of production for Universal Cartoon Studios.

ALL ABOARD THE CRYSTAL DYNAMICS' GFX EXPRESS

Get ready to catch that lizard. There's a lizard on the loose and GEX is about to take the gaming world by storm. The hottest gaming license to hit the 3DO since Street Fighter Turbo Edition is slamming into the 3DO head-on, like a runaway freight train, picking up fans for the 3DO as it passes. You'll need a ticket to ride on this fast-moving train and it will be available free for a limited time as a pack-in for buyers of the Panasonic REAL 3DO Interactive system beginning in April.

Until GEX is ready, gamers will receive a free copy of Crystal Dynamics' Total Eclipse at the time of purchase, plus a coupon for a free copy of GEX by mail.

GEX, from Crystal Dynamics, lets players control the adventures of a hyperactive gecko lizard, brought to life by the digitized voice of comedian Dana Gould, star of his own HBO Comedy Special. This 3-D lizard tosses out one-liners, shimmies up and down buildings with his suction-cupped paws and tailwhips the bad guys to get out of trouble as he tries to escape the Media Dimension-a land where pop culture. B movies and cheesy television shows reign supreme. The game features photorealistic, hand-rendered backgrounds and smooth character animations.

'GEX has a star quality that's bound to make him the lead-

ing character on the video game scene," said Gene Kelsev, assistant general manager of Panasonic.

"Crystal has been at the forefront in the development of 3DO software, and this unique game justifies their reputation as a 32-Bit leader.

GEX will be another star character and another all-star attraction for the 3DO.

GARE OF. **IONTH** release date: category: action now challenget back-up: moderate none

I've got to start out by saying that the opening animations are great. This is worth buying if you don't already own EWJ, or renting if you do. The new levels are not as good as old ones, but the changes to the original are pretty cool. The little additions, like more voices and better mus.c enhance this CD. You han even find a new weapon EWJ Special Edition is a fun game for the hardcore gamers out there

Well, look at this. A game for the Sega CD that's actually worth buying EWJ isn't just the same plo cartridge version with new tunes added. The extra levels alone are worth the purchase and the additional weapoo really packs a wallop. Of course, you still get an excellent-playing game with one of the most unique characters around. If you still have that Sega CD, scrape the layers of dust off and have a ball with EWJ:SE

I'm not big on cartridge-to-CD translations. Most are exactly the same as the cartridge, just with enhanced music, making the game not much of an upgrade. Well, the makers of EWJ obviously feel the same way I do and took care of this game. They added new levels along with the existing ones. New weapons and funny animations have also been included alm is deficiously slimier than ever!

If you liked the cart version, you'll love it on CD! This new version is just that-new. There are new weapons, new levels, new types of animations etc. The good part is that they added all the new stuff in addition to the old. The graphics, game play and sounds are as excling as they ever were. Hats off to one of the first products to real-ly improve and add new teatures to a CD translation

METAL WARRIORS

Konami rarely puts out a bad game, and this one keeps with the general level of quality. While very reminiscent of Cybernator, it's a completely different game. This one is loaded with all sorts of nifty things. I like, There's a Battle Mode, you can destroy almost everything and the cinemas are cone in a pseudo-Japanination style. The game play is great, and it's even possible to leave your mechs. This one is hard, but fun to play.

Although Metal Warriors offers nothing really new in terms of game play, the entire concept is so well executed that the game is just pure fun to play Looking like a carbon copy of Cybernator. Metal Warriors offers blast-a-holics pure, destructive fun. Just when you think you've seen it all, press the Select button and hop on the mech to explore previously unoble nable areas. A solid game that offers a great challenge.

Mechs, mechs, mechs! Metal Warriors is a mechlover's delight! This game is loaded with 'em al with super-duper, him-powered weaponry! While all this is very coor stuff, it isn't the main draw to the game. Like with many good games, players will find the control simple. They'll jump right into this and start blasting away. I son I forget to mention the good graphics, sound, huge stages and nteresting story line. Now go buy this game!

The look is reminiscent of Cybernator and that's a very good thing. It has several big mechs to choose from and cots of weapons to help you blast your way through big levels. Sure, the graphics and sour ds are good, but the game play is just great Add good control with plenty to do and shoot and you have yourself a winner. New abilities such as leaving your suit and the Twoplayer Mode make it a must play.

"Nintendo Gets Gelusive With once a Gere Inser 1: 2 Coming Soon ... The Kong Clan Gres Coin-Op ... PlayStation 2 Is Heroed Our Way ... Earthworm Jim Sits Big-Time ... Namco Gets Chungele With Sony...

...It's time to part the Red Seas of gaming once again with I, the keeper of the Q, back once again from the rumor mill. I've climbed the big mountain and gotten the best gossip in gaming once again, kiddles, straight from the source's mouth. While other so-called gossip evangelists stand on their soap boxes and spew out specs on the Ultra 64 and rewrite gossip that I have written about in the past, the Q delivers yet again with a special edition of gossip set to fill you in on everything the hardware heads have planned for you in the year to come...

...The first bit of big news comes out of the Nintendo Ultra 64 camp. Seems Software Creations out of England is just finishing up the sound tools to create the music for the Ultra 64 development systems and the Ultra 64 itself. Up until now only Acclaim, Software Creations, Williams, Spectrum Holobyte and Rare have had Ultra 64 development kits and for good reason: The kits are loaded with Silicon Graphics Onyx Reality engines clocking these babies' cost upward of \$250,000, not the paltry \$25,000 others have wrongly stated. Smaller development systems may come in at the \$25,000 threshold, but the main system has a nuclear price tag.... The Q-Mann has also learned of a rumor that Nintendo is try-company developing for the Ultra 64 will be required to give the machine a 12-month exclusivity window (thereby locking the competition out). The Q doesn't think the provision will stick, unless Nintendo is satisfied with the handful of licensees it currently has.... Another rumor surrounding the Ultra 64 has Nintendo concentrating on software themselves. At least two other companies that the Q has talked with indicate that Nintendo has frozen them out of the licensing frag....

...Still on the subject of the Ultra, Nintendo's Howard Lincoln and Peter Main recently stated during an on-line conference that they were confident about the Ultra 64 hitting stores at the target price tag of under \$250 in time for the holidays this year to "blow away the competition." Strong words for something nobody has even seen to be sure.... Switching gears to the softs, the Q-Minator has also learned that Nintendo's currently hard at work on Killer Instinct 2 which they may release as a home version exclusively for the Ultra 64. (Do I hear someone saying pack-in?) Furthermore, the Q has learned from sources close to the development that KI2 may hit store shelves with an incredible 64-Megs of power!... Who's this John DeLancie guy?... The Q has discovered, by way of a few overseas phone calls, that Donkey Kong and his ballcap-loving sidekick Diddy may be making their way to the arcades in the not-too-distant future. Williams has also been involved in talks about using Donkey Kong Jr. and Diddy in an arcade or a pinball adventure. Don't be surprised if you see a DK cartoon show and more licensed merchandise in the not-too-distant future...

...As Sony readies for the launch of the PlayStation, their tech-heads are slaving over the specs of a new version of the PlayStation tentatively called the PlayStation 2. This new machine (which is profiled in this issue of *EGM*) comes complete with expanded memory and a new feature that will provide users the option to play movie video CDs. The system is scheduled to be released two years after the U.S. PlayStation hits ground zero... In other PlayStation news, Namco is snuggling up to Sony and acting like a silent partner. They've joined forces with the big 'S' brand name to sharpen their competitive edge and get on a level playing field with Sega, their major competitor in the arcade market... Staying on the subject of the PS-X, the Q hears that the first 150,000 Japanese PlayStations that didn't melt due to faulty plastic on their components do not have any territorial protection on them, enabling users to load up games from both the U.S. and Japan on the same system!.... The Q hears his cousin Hey-Q is set to deliver a baby Q. Could this be true?...

...In other gossip, the Shiny team is negotiating with Williams about the possibility of making an arcade and/or a pinball game featuring everybody's favorite worm. The dirty worm with super powers will also be blasting his way onto the comic-book scene and he may even be on his way to Hollywood to star in his own motion picture, depending on how well the cartoon series does when it lands on the new Warner Bros. Kids Network this September. A tip of the Q-Mann's sombrero goes to DP and the rest of the Earthworm Jim crew for giving us the next X-Men.... Although Capcom of Japan originally announced that Darkstalkers would be going to the PS-X and that their X-Men coin-op would land on the Sega Saturn (with both machines getting *Street Fighter: The Movie*), the powers that be looked at the demos and fielded angry calls from gamers in the Land of the Rising Sun and have since decided to launch both games for both systems. Also, look for a new Darkstalkers adventure in arcades later this year as well as a Darkstalkers action show. What?...

...Till we part the Red Seas of gaming once again, the Q reminds you to do unto others as you would have them do unto you, unless of course you're playing the Versus Mode on Mortal Kombat III. Later...

FROM YOUR WORLD TO

EGM gives you the latest info before the bomb drops...

The MK II Kountdown Kontinues!

s the clock ticks away the few remaining weeks until MK III's big release, EGM has got the latest info straight from the makers (Ed Boon and John Tobias). Everything is exposed about the year's most anticipated sequel...

Ever since the first word of Mortal Kombat III reached the ears of gamers, a powder keg of anticipation has been building. MK has always been known as the game of secrets, tricks and hidden surprises, and the expectations for the third are overwhelming. The big question is, "Can the makers of the MK myth deliver a game as big as the hype?"

If you look back to the transition from the original Mortal Kombat to MK II, you know that the masters of MK are capable of just about anything. After talking to Ed Boon, there is no doubt that the jump from two to three will be even larger than the previous upgrade. The new features that will make the latest Mortal Kombat simply *outrageous* will be seen by players in Chicago in early March. One month later, the completed version will be released nationwide—and that's when the rumors will run rampant.

Although MK was one of the first games to draw so much attention and controversy, MKIII will prove that it wasn't the last. Since the first installment and the secret discoveries of hidden moves and secret characters, the mystic of Mortal Kombat was secured. And with new MK mechanics, secrets, and special moves, you can bet the third installment will secure the top spot on charts the moment it's released.

The elements found in this new version are said to be so stunning that other games will be forced to borrow from it. And with the home version virtually guaranteed to rocket Williams to the top, you can bet that the quality and pure presence of MK III will make an impact felt for years to corne.

THE REAL STORY

In the first installment, the honorable tournament was turned by the victory of the evil Shang Tsung and his henchbeast Goro. The second battle continued in the Outworld where Shao Kahn sought to destroy the Earth warriors by his own hand. Now the war has come full circle and Earth is the last battleground for the climactic conclusion!

After Shao Kahn's apparent victory in the Outworld, it appeared that the evil ruler would at last be at ease. The one thing he couldn't win back, however, was his dead wife. Long ago the Khan lost his bride and throughout the years he has searched for a way to bring her back, yet even he was unable to do so ...until now. With the help of sorcerers such as Shang Tsung, he has discovered a way to revive her. The only catch is that she cannot be restored in the Outworld. Therefore, Shao Kahn must ing a hole in the dimensional fabric to opt to Earth - the one olace his

get to Earth - the one place his wife may be revived.

Needless to say, when the Outworld ruler comes to Earth, he is quick to take control. His first action is to turn our beautiful planet into a replica of the Outworld (which was itself a vibrant planet as well before Kahn's presence). His next evil act

> Shao Kahn and his bride take a break after a hard day of destruction Actually, it's more like a hard day of filming, but both are equally taxing in the world of Mortal Kombat III.

as an overseer of Earth is to plot the capture - with the exception of a few - of everyone's soul. The gods (such as Raiden), won't let Shao Kahn take the planet unimpeded. There are certain rules to planet-wide conquest and, consequently, the few who are worthy of the challenge must face Shao Kahn before he overtakes the entire planet. The Khan sends a henchman (who doubles as a Boss) to destroy the remaining few who can oppose his authority.

THE EXTRA BUTTON THEORY

EGM was the first to mention the possibility of an extra button being added for the latest MK III, even though many have declared it to be untrue.

Now EGM can report that the guessing has come to an end! Players will find an extra button guaranteed to change the way MK III is played. This new button is dubbed the Run button, allowing players to dash back and forth at lightning speeds. The designers reasoning behind adding this button was to keep the action moving at a fast pace. It has long been Ed Boon's goal to stop people from playing a defensive game and force them into the action. This extra speed will help players cover ground as well as accomplish moves more rapidly. Other possible uses for this button will be different moves, such as a quick elbow rather than a slow but strong hit. Players may even find that this button increases the available combination moves, providing extra speed and new types of multi-hit combinations.

MORE SECRETS

Long considered a game of secrets and hidden strategies, the third MK will carry the tradition forward with more surprises than can be believed. The third chapter includes special techniques that will be accessed in a whole new way.

A majority of the secrets will now be performed through the VS screen by entering codes or sequences of buttons or joystick combinations! This screen is sort of like a locker that accepts many different combinations. Each unique code will open the locker, but can reveal something very different. Look for plenty of hidden surprises in the game itself, but the VS screen will be a magic slot machine full of secrets.

This is the place where tons of secrets will be discovered for a while to come The VS screen is the primary location for secret codes and untold surprises.

THE WHO'S WHO OF MK III

Mortal Kombat III will now boast the largest cast ever - 14 characters in all. The new crew will be composed of characters from the past as well as seven new ones. The first two warriors date back to the original Mortal Kombat: Kano (played by the original Richard Diviso) and Sonya. As most of you can remember in MK II, they were prisoners of Shao Kahn (shown on the throne stace beside him). Somehow these two

adversaries have jumped through the portal Shao Kahn created to come to Earth. Not much is known about these two original favorites except that Kano isn't a warrior chosen to fight for Earth. It appears he has made a side deal to spare himself from the same fate as the others; losing their soul. The next group of five

Sub-Zero, both in red and yellow.

characters are revisions of some of the best from MK II. The first is the familiar Jax with a set of new metal arms. Apparently his original appendiges were torn off by his own fatality, perhaps by his alter ego. The next two combatants are the Shaolin masters Liu Kang and Kung Lao. Liu Kang makes his third appearance (although played by a different actor) and he is ready to fight for honor and peace alongside his

Shaolin brother played by the original Kung Lao (Anthony Marquez). Also returning but played by a different actor is the mighty morphing Shang Tsung, Lastly there is the new Sub-Zero. The former ninja has left his deadly clan due to a double cross, however, you can't turn your back on a ninja clan. The Luien Kien clan have dispatched two of their best ninjas to retrieve him. These ninjas are featured in the new game as two of the new characters. (Shown left). They are robotic and endowed with high-tech gear. Both characters have the same look but different colors and attributes, like Reptile and Scorpion. Another new character is a Native American (bottom right cormer). He will supposedly have a bow as well as a tomahawk and is a very dif-

ferent character from any seen in the MK universe so far. The next character is a survivor of Shao Kahn's chief henchmen. This ragged warrior is connected to life courtesy of a variety of machanical implants. Speaking of Shao Kahn, his wife is one of the plavable characters as depicted on the previous page. Another new character is a riot-officer (above). He was present before Shao Kahn entered the portal and was one of the people trying to keep order as the portal created its chaotic aftermath. Finally, the last and perhaps most excitina new character is a female warrior of Goro's race! This totally new character is aoina to be animated like her brethren before her. She is sure to be a new favorite in an MK world that may be at its end.

THE LEGENDS OF FIGHTING STREET RETURN!

EGENDS

They all asked for it. They said it wouldn't happen. They were wrong. Who are *they*? What is *it*? They are you, and no, the game, is not Street Fighter III. *It* is Street Fighter Legends and it's ready to bring the MK house down!

So what is this new edition to the SF family? Let's take a trip in time (insert dreamy sound clip here)... Back in the early fighting era, we had a

marvelous game called Street Fighter. No "2" on this one, no siree! It was also known as Fighting Street in Japan and on the Turbo CD. You could play as Ryu or Ken, and had the same standard three special attacks: fireball, Hurricane Kick and Dragon Punch. Each hit scored chopped one third off your foe's energy. A wellplaced Dragon Punch could wipe out any opponent!

That's all fine and dandy, but what's this new game? Well, recently Capcom of Japan snuck in a tiny preview of the next Street Fighter title on their demo tapes! This title, though not having legible sound, shows off what appears to be a Street Fighter game based on the classic Fighting Street, but with pumped-up graphics and techniques! There isn't much on our clips, but what it shows is amazing. The backgrounds are detailed, digitized images. Each character

has a Special Meter that charges up at least three times! Each character has been redrawn. The original Bosses seem to be back in full force; I can

account for Adon and Birdie at least. Nash is a new character with Guile-style attacks. Chun Li, Ken, Ryu and Sagat are all featured on the demo in larger-thanlife graphics. Sagat now looks like the awesome buff artwork we've seen for years. Adon, the second-to-last Boss from Fighting Street looks meaner than ever, and still has the same reverse Flash Kick that was so deadly before. Birdie, from England, appears to have mutated slightly into a cyberpunk muscle-head.

Not everything has changed, since it is apparent that the special attacks from SSF2 Turbo are intact. Ryu has dash-punches, Ken has crazy kicks and Chun Li's Triple Kick is the same. Hopefully, more of the old and new characters made the transition to the hereby dubbed, "SFL" or "SF0," How would Retsu look after all these years? Is Akuma waiting in the shadows? I guess we'll have to wait and see....

SOMETHING OLD ...

Fans of Fighting Street should recognize these pictures. First, we have Ryu sporting his red hairdo and white headband*. Below right we have Adon, the toughest Boss next to Sagat himself! Below left is a menacing shot of Birdie, the punk from England.

SOMETHING NEW ...

You can't have a new game without all-new techniques! Sagat has a rather handy way of dealing with Ryu! Nash (below left) is a new character with Guile-like tendencies. The ever-fashionable Ken now has a ponytail! Not pictured is the triplepower Special Bar!

SOMETHING BORROWED

If you've played Super Street Fighter II Turbo, you'll remember these popular attacks! Ken still packs a Flaming Dragon Punch and a wide variety of kicks. Ryu's rushing punches are deadlier than ever, and Chun Li's trademark Triple Kick is still hot!

SOMETHING BLUE.

Okay, now the gripes. What happened to Ryu's red shoes from Fighting Street? How did Sagat get the chest scar if this episode takes place during the Fighting Street era? Why does Ken keep getting closer in appearance to *EGM's* rendition of Sheng Long?

THE FINAL QUESTION: WHEN STREET FIGHTER 3?

Airighty then! I'll bet the one question nagging all of you faithful World Warriors still remains: Where is Street Fighter III? Good question. Let's take a moment and remember that though Street Fighter Legends may not be SF3, it contains many of the features gamers around the world have been begging for, most notably the reap pearance of the foes from Fighting Street. This game is what some players have been asking for. Redrawn graphics. New attacks to go with the old Larger characters. Old exemiter with a makeover.

I only wish I could comment moabout how amazing it is to see this ame come into fruition. Actually, I can. It's not often that a game compny quite literally makes a title of this stature based on players' requests amoieas. Sure, many listen to feedback from gamers, but how many build the entire game around those ideas? So you feel the need to bash or flame capcom for not bringing out Street Fighter III, keep in the second se

After seeing these eany pictures, can't wait to see the final game! Of ourse, that means SF3 would have be spectacular if Capcom would release this title and not deem it wor my of the SF3 moniker. It appears that me MK series has some competition and that the lines may pile up in the arcades once again. Just remember this tip: Save a quarter to call your morn. She'll miss you out there...

Are You Ready For the PlayStation2?

Before the PS-X Even Hits, EGM Learns There Is Another...

ever has the hype surrounding the launch of a new game system been as red-hot as the buzz for Sony's impending premiere of the Sony PlayStation mega-machine. Boasting a 32-Bit RISC Processor, special polygon engine and the ability to display millions of graphic characters in over 16 million colors, have left developers eager to dig in with a system they'll be hard pressed to push to the limits. Using a CD-ROM storage medium, the PlayStation is a dream machine for publishers who will no longer have to worry about huge cartridge inventories—or the guesswork associated with estimating how many copies of a particular product will sell. CD-ROMs can be produced in days to whatever order numbers your local retailers place, at a fraction of what Nintendo and Sega charge for cart production.

Recently, however, Sony Computer Entertainment—the company responsible for the launch of the PlayStation around the world—held a meeting that tipped Sony's cards just a bit and gave the gaming industry its first glimpse of Sony's long-term battle plans.

While this meeting was ostensibly held to get current and potential PlayStation developers together to learn some of the ins and outs of the new system, there was hard information about Sony's future blueprints for the PlayStation brand name. In addition to sounding quite confident that there would be no problem getting the PlayStation into the hands of retailers by the proposed September launch date (a fact that *EGM* has independently confirmed with several game-store chains), Sony Europe presenter lan Hetherington took a few jabs at one of the PlayStation's most outspoken critics, Trip Hawkins. "People look at us as a consumer-electronics company," explained Hetherington, "and some use that 'Sony doesn't know how to' argument. Unfortunately for Trip, 1 think we do." Hetherington no to say that he feels 3DO's attempts to obtain a portion of the video-game market have come and gone.

The most stunning news from this introduction, however, was the announcement by Sony that they intend to release a new PlayStation hardware unit in 1997 to upgrade the architecture being introduced this year in PlayStation One. Dubbed the PlayStation Two, this system appears to be poised to introduce a real link between the typical gamer platforms and a true interface with the Information Superhighway. How the system will accomplish this task, whether or not it will be downwardly compatible to PlayStation One games, as well as additional enhancements over Sony's first deck were not discussed, and Sony officials contacted by *EGM* offered no other relevant details.

If that's not enough, Sony also announced that they plan to unveil a PlayStation Three in the year 2003 that will be designed to take them to the year 2011. While one can speculate that a PlayStation Four would subsequently be forthcoming, Sony's confidence (an eight-year user life would set a new record for video games and most other electronic goods) has to be admired.

AS FOR THE NEW FIGHTERS...

It's spring again! As the leaves start to bud on the trees, we head back to Japan for the AOU Amusement Expo. This year was loaded with surprises from the usual heavy-hitters. To start off, there was Fatal Fury 3, the latest in the favorite fighter saga from SNK. Just when Samurai Shodown was the Meg king (202 Meg), FF3 comes in at 266! Where Fatal Fury Special had 15 fighters, FF3 drops to a total of 10: five veterans and five brand-new characters. Of the new characters, Bob Wilson is an agile kickboxer; Blue Mary is a street fighter, Hon-Fu uses his trusty nunchackas for his many attacks.

Franco Bash relies more on brute force than anything else (just like Big Bear) and finally, Mochizuki, a mysterious man who uses a long staff (he wouldn't happen to be related to Nicotine from Samurai Shodown II?) The most notable change in the game: Instead of simply a foreground and background, there are three fighting fields: front, middle and back! All the characters have been graphically redone, with new backgrounds and new fighting moves that will keep fans coming back for more. The game is slated for a late April release in Japan. Stay tuned to EGM for more info!

Mortal foes Geese Howard and Terry Bogard battle it out for fighter supremacy.

This game has three fighting planes: Front, Middle and Rear fields!

Whether the FDA approves or not, your eating habits are about to change. Meet GEX ", your tongue-snapping, SMART-ASS alter ego. With this Recko's gravity defying grip and thrashing tail, you'll prowl a twisted world of TV-villains and B-movie scoundrels, hurling Wicked one-liners and fireballs. It's one brain-frying, TV-land trip, where dining out means Crunchy dragonflies, juicy

grasshoppers, tasty fleas and caterpillars. Not exactly the colonel's snack'n pak, but lip-Smackin' good, just the same. Without these skanky nuggets o'bug guts to munch for power, you're roadkill, baby. Oh, you'll bust a few of Miss Manners' rules in

this 32-bit battle. But hey, only WUSSIES worry about good taste, right?

Dana Gould inperactive star of his own HBO* cable comedy special, lends tons of digitized voice and attitude to GEX.

Each world inspired by either Kung Foo, Shmuck Rogers, that Indiana dude, Boris Carloff, and Rojer Rabbit. (Legal weasels require we be vague.)

Call 1-900-737-4767 gst/min. 18 or older touch-tone phone only to hear Dana Gould's hilarious GEX routines. Yeah, it'll cost you a little, but you'll cough ug a lung as he sends you reeling with side-splitting laughter like only a guy who CD'd on 70's TV can.

Yo gamers, here's Nob coming at you with some last-minute updates from the Land of the Rising Yon. it seems enough people succaled about the unavailability of Dark Stalkers (or X-Men) for their chosen 32-Bit system, so Capcom has announced that Satura will get OS, and PSX will get X-Men after all. No release dates have been announced but both are sure to deliver on Capcom's traditional fighter theme using characters from both cartoon series.

While we're on the subject, Vampyre Hunter, the arcade sequel to DS, will be unveiled at the AOU Show right after this deadline. For news about this monster inrawliest, check out the incredible layouts in EGRM² #10!

Action		Unknown Price	

Here's proof that the next level isn't just about polygons and computer graphics. This side-scroller features beautiful graphics that put many TV cartoons to shame. Being the first game of this type for Sega Saturn, Astal uses huge sprites, some filling a third of the screen, that could not be handled by 16-Bit systems. If this one- or-two player game plays half as good as it looks, then it will be a masterpiece!

Travel through this wondrous land with your great strength and attacking pet bird.

Filled with absolutely breathtaking graphics, Astal shows a future that isn't all polygons!

BloodStorm Hits Home!

In the last issue of LECH²⁷ we gave service a sin all peek at B sodStorm in a rayStation and Segs atum. Tracing its origins back to ules like SF2, this conventional fighting game is loaded from start to finish with lots of combos and secret warriors to fight. One unique feature is the ability to acquire the powers of your defeated foes. Authough it went flat in the arcades, the game does as some interesting feature is that make unique.

The macaine fighting game BloodStorm is on its way!

Time Warner Primal Rage Super NES Fighting

Time Warner is in the middle of cooking up a Super NES translation of one of the gnarliest arcade games around. Primal Rage is your typical fighting game, except that the fighters are prehistoric creatures.

While it is still very early, it's easy to tell by these pictures that it will be a close translation of the arcade. Every snarl and flick of a tail will be in this cart. Only time will tell if the "volleyball" trick with the humans in the background will be possible.

The fighters range from ferocious dinosaurs to two apes that really pack a punch. You can play as the nimble Talon, a raptor-like dino with a penchant for bloody maneuvers. The two T-Rexes, Diablo and Sauron, are both deadly, and they have a wide variety of maneuvers. There is the bizarre, hypnotic Vertigo who quiles his foes, then strikes with great speed. The two apes, Chaos and Blizzard, are ready to step in and take control of Urth with their new abilities. Last but not least, is the mighty Armadon, who combines all of the spiny dinos into one sharplooking critter.

Primal Bage sure heated up the arcades, and now you will be able to experience it at home. If you've ever wanted to battle against the giant beasts of the past, here's your chance!

From the opening title to the end credits, Primal Rage will assault you with intense graphics and in-your-face action.

From these pictures you can see how good the attention to detail is.

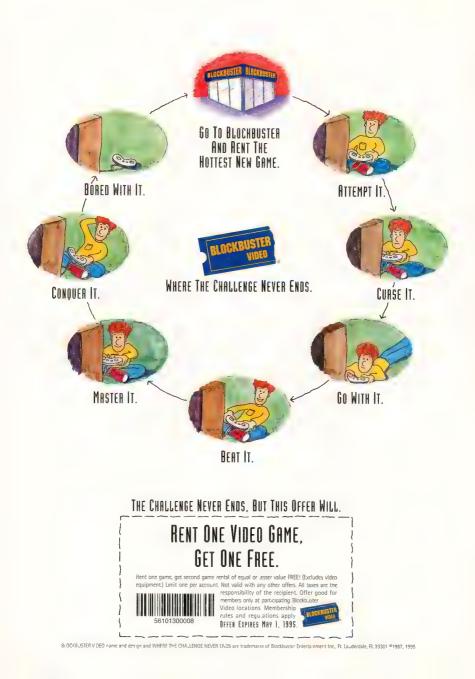

Like the arcade game, the dinos will be animated with great detail.

It's currently unconfirmed which version (1.0 or 2.0) this one will be.

UBI Soft is currently in the process of porting their Atari Jaguar title, Rayman, over to the 32X. It's essentially a side-scrolling Mario-type game that abounds with secret warps and hidden goodies.

What really makes Rayman stand out in the crowd of action games is the attention to graphic quality. Everything looks like it was hand painted, and the character animation is as smooth as silk.

While this one's still guite early. from the pictures we've seen, Rayman can certainly be a contender for one of the better action games on the 32X.

Time Warner Primal Rage Game Gear Fighting

For the Sega fanatics out there. Time Warner is developing a translation of Primal Rage for the Game Gear. Surprisingly close in terms of both looks and game play, fans of the arcade should be pleased.

Primal Rage takes the standard one-on-one fighting game format and gives it a Jurassic twist. Players have a variety of dinosaurs to choose from (plus two apes). each with a number of set powers.

Six of the warriors can be played in all, giving you a dose of portable dino action. If you enjoyed the arcade, this is sure to become one of your favorites.

Primal Rage re-creates all of the ferocious fighting of the arcade.

A mean uppercut can take most enemies out of the air.

Crystal Dynamics Solar Eclipse Shooter Saturn

In a style very similar to their earlier game Total Eclipse, comes Crystal Dynamics' latest shooter. Solar Eclipse. Like the other game, SE is a 3-D shooter, where you control a spaceship that can be powered-up, through level after level of enemy fighters and other nasty defenses. It's a top-notch shooting fest.

The Grid, your colony's main computer, has gone haywire, and has now set its sights on eradicating Earth. You've got to stop the Grid before it's too late! With a backdrop like this, it's easy to see that this one will be hot!

Fight your way into heavily quarded enemy facilities.

Giant explosions and thunderous laser shots erupt on the screen.

Solar Eclipse is done in the same style as Total Eclipse.

Crystal Dynamics Dragons Of The Square Table Adventure Saturn

Dragons of the Square Table is a zany new adventure that twists Arthurian legends to new levels.

........................

You must guide the hero, a young dragon named Flicker, in a quest to stop the evil Sir George and save the race of dragons from destruction. Along the way Flicker will find objects and people who will help him out. With five hours of real voices, players will get to hear the action through the ears of a dragon. With the help of Terry Jones (Monty Python), expect lots of off-the-wall humor. This is certainly a strange adventure for the Saturn.

With the humor of Monty Python. this game is loads of fun.

Evil characters will tempt you and try to lead you astray.

What is up with the giant mechanical dragon? It can't be good.

In the far future, a surprising number of robots have gone havwire. As a cyborg, you are the only one with a chance at defeating them before mankind is destroyed.

Rise of the Robots is your typical fighting game, although special moves are a bit hard to find. You have your punches and kicks to maul your opponents, mano a mano

The face of your enemy is cold steel. You will fight against innocuous mechs like a power loader, but eventually much nastier things like combat droids will spring to life.

Rise of the Robots is filled with lots of rendered graphics. Even the cinemas look cool. Unlike other versions, the 3DO game has much more of a plot, given to you in the form of the cinemas.

While it may not compare to the arcade-style fighting games, this one does have a certain charm to it. Also, fighting games aren't very plentiful on the 3DO, so fighting fans might want to test their skills with this one.

Impressive cinemas adorn this action-packed fighting game.

Rise of the Robots uses the standard fighting game format.

Crystal Dynamics Rasehall 3-N Saturn Sports

Crystal Dynamics is preparing their Sega Saturn titles even as you read this. One such game is 3-D Baseball '95. Using articulated. 3-D polygon players and SGIrendered stadiums, this could prove to be the most realistic baseball game ever. There are different angles to the action, so you feel as if you're on the field. There are cinematic displays, and the animation of the players is so lifelike, it's spooky,

3-D Baseball '95 ushers in a new era of sports games. No other baseball game compares to it.

3-D Baseball '95 has some really cool angles to show off the game.

The field looks really good, even from way back in the outfield.

The most important scenes will scale in to show what's really happening.

Time Warner Primal Rage Game Boy Fighting

If you've been wondering what the latest fighting cart for the Game Boy is, look no further. Primal Rage is a translation of the arcade game of the same name.

Prepare to dish up some damage as you choose from one of six prehistoric-type fighters, and battle it out. You have the usual complement of special moves, ranging from fireballs to freezing maneuvers. There are also hidden tricks and combos to find.

All in all, little has been lost in the Game Boy version. You'd be wise to check it out.

Six of the vicious warriors from the hot arcade game are here.

Chaos has a pretty long reach with his gigantic, primate arms.

Armadon is covered with a lot of protective spikes.

For winning the contest, DelaRosa got to get in the face of Houston Rockets allstar Hakeem "The Dream" Alaiuwon after a Rockets practice. We've had a great run here at Team EGM and the Iceman and I are dishing off the rock in all-star fashion as we go head-to-head on the various sports games.

This month is no exception as we are rocking the rim and going toe-to-toe in the many boxing venues of EA Sports Toughman Boxing contest. We'll also be checking out Sporting News Baseball from Hudson Soft.

There might not be any real baseball so your favorite teams and players may only be seen on your favorite Genesis or Super NES baseball title.

Sporting News Baseball has some interesting features and this game gives an insider's a view of America's pastime. Players can choose from any one of their favorite American or National League teams. All of baseballs big names are in here ready to play—too bad this game isn't a reflection of reality.

From there, we head to NBA Hangtime from Sony Imagesoft for the Sega CD. You can take to the court with fast, two-on-two action as you battle in the paint with three top players from each NBA team. The game carries an NBA Player's Association and NBA team license.

Venturing onward, we put on our inline skates, grab our hockey sticks and take to the cement with the fastest growing sport of the decade. Roller Hockey is sweeping

the nation and ex-NHLers own teams and are participating in the league. Roller Hockey has some big-name sponsors like Bauer skates and Koho hockey sticks as well.

Many of the rules of hockey apply, but the game isn't played on ice—it's played on cement. A bone-jarring check has new meaning when your opponent does a face plant into the concrete.

Also check out our awesome reviews of World Series Baseball from Sega and NBA Jam for the Super NES and the Genesis. Crystal Dynamics is working on two basketball games and an awesome 3-D baseball game for the Saturn.

The polygon-based baseball game looks very hot and it is being worked on as we speak. Stay tuned for more information as it develops, and look for some pictures of the game in this month's Next Wave section.

Acclaim is also working on NBA Jam T.E. and Quarterback Club 32X. We have an exclusive contest with some very cool prizes that we will be unveiling in the coming months.

This section is so hot you'll think summer has come early! Until next month, play it hard!

ROLLER HOCKEY RUMBLINGS

This is one sport that's taking North America by storm. It's a fast-action brand of hockey that gives die-hard hockey fans a chance to see a version of their favorite sport in the summer.

The game is played on cement or a plastic surface called a "Sport Court" and there are no blue lines. The game is played with a specifically designed speed puck.

Each team has five players per side. High-sticking and fighting aren't a part of this game. On a pass, the

ROLLER HOCKEY '95

puck must precede the players over the center line. If the puck is carried over the center line, all players are on-side. If the game is tied at the end of regulation, (four five-minute or four 12minute periods), the game will be decided by a shootout.

Five players from each team are chosen to try to score, using a penalty shot format. If the game is still tied, the second round is

Sudden Death (next goal wins). The game is officially sanctioned by Roller Hockey International, the governing body of roller hockey and the world's only professional roller hockey league.

You can choose to play in Exhibition, Regular Season or Playoff Mode. In the Exhibition Mode, you can develop your skills by playing one game at a time against another player or the computer. You can also

choose to play in a Twoplayer Mode.

In the Regular Season, if vou qualify in a 22-game regular season to compete for the championship you'll go to the Playoffs. The computer will choose your opponent from the 24 teams in the league's four different divisions. Before and after each game, a League Standing Screen appears

with team updates that include team wins, losses and total points.

In the Playoffs, a best-ofthree game format is played out and the win-

ner moves on to the next round. Before and after each game, a playoff free screen will

SUPER NES

appear to update you on your team's progress toward the championship.

Round up all the NBA teams, take each one's top three players and you get NBA Hangtime '95, playing two-on-two with real players from the league.

Remember the old computer game called Jordan Vs. Bird? Well this is similar to that perspective-wise, but with today's up-to-date technology, you can expect more. First of all, let's introduce you to your host, Dan Patrick, ESPN's anchor/ reporter. He'll be your commentator throughout the game, giving you insights on the players' moves and performances.

After going through the introductions, you'll get to

As you know, Exhibition is only one game, Season is the entire basketball season and as for the Playoffs, you get to go directly to the NBA Playoffs. Difficulty settings can be adjusted to your ability of the game. Length of quarters

can be changed as well, to two-, five- and 12-minute periods. Straight ball comes in place as you can choose from Winners or Losers outs. This determines who gets the ball after someone scores a basket. In a halfcourt game, the ball must be cleared on the change of possession if it has hit the backboard. If you don't do this and score a basket, the basket will not count,

resulting in a

turnover. The game can be accessed by up to two players. The Tag Mode enables you to switch over to the defender nearest the ball. On the offense side, you switch automatically to the person you've passed the ball to. Tag Mode can be turned on and off.

TOUGHMAN BOXING

∴ 32X /

DUKE IT OUT WITH THE VERY BEST

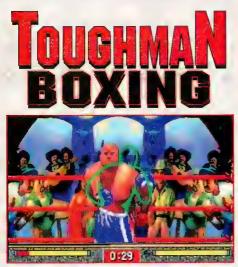

Here's a game that will knock you out of the ring, literally. Toughman Boxing is not your ordinary boxing match—anything can happen in the ring.

As you begin, you must pick which region you want to fight in. Then pick from the 24 characters the game has to offer. Each fighter has different fighting attributes, three special punches that he can use anytime during the match and a unique fighting style. If you're not happy with the special punches your character has, you can change the punches by picking from the 15 special punches.

The region that you pick determines where you will fight, as there are five unique arenas built into the game.

Each has different sized crowds, sound effects and noticeable animations taking place in the backgrounds. Of course, there will be ring girls showing which round it is.

Now the dirty work comes into play: Offensive and defensive moves are crucial to the game. There are three regular punches: jabs, hooks and uppercuts. These are basic punches, but still have to be mastered to defeat your opponents. You must use them wisely in attacking

vour opponent. If you miss or mistime your punch, your opponent can do twice the damage to you! Every dodge, punch and jab will determine the outcome of the match. There are special punches ranging from the Popeye Punch to the Windmill Wind-Up. There are a total of 14 special punches. These are the most damaging punches if they are used in combination with other punches. The more combinations you create the more damage you inflict. Each special punch needs precise timing. If not, your opponent may end up doing the damage to you.

Defense is essential also. Blocking, dodging and ducking are your best defenses. Be patient with your punches. When you find the opening or weakness of your opponent, that's when you let him have it.

There are three ways to win the Toughman Contest: the KO, TKO and the Decision. At the end of a fight (if it does go to the decision), the judges will post their scores for the three rounds you fought. The scoring is based on the "10-point

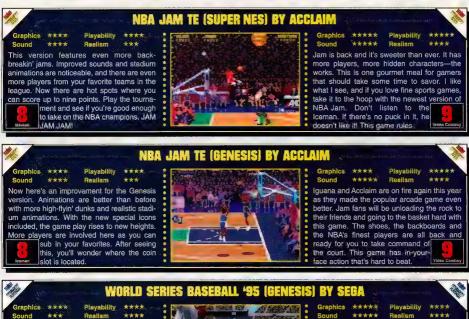

must" system, the winner in each round receiving up to 10 points. The points are determined by your boxing performance in each round. The way things work: The more likely you soll win the match. After defeating your opponent, you move on to the next fighter who is stronger and more skilled.

Just keep practicing your punches and you'll eventually reach the top to become the toughest man around.

This is baseball at its best. I really loved the behind-the-batter perspective and I'm glad they kept it in. Hey, if you want to see a real baseball game, this is the closest you can get to real teams, real players, real stadiums. What more do you want? Okay, you'll find out, as this one is packed with other goodies. I consider this to be one of the best baseball games of the year

Real ism The best baseball game of all time has been made better. The only thing the programmers at Sega Sports couldn't put into this game is the smell of the hotdogs and the natural grass. Who needs the real game when you can play World Series Baseball on your Genesis? The boys of summer can stay on strike forever as long as there aren't any power outages.

PLAYER'S NOTES

Being a fan of Spider-Man from way back, this game was exciting to play because of the nostalgic feeling it gave me. The thought of battling supervillans like Dr. Octopus and the Rhino gave me something to look forward to.

BEST FEATURE

You and your team find vourselves on a strange, new world after passing through the ancient StarGate. Now you face an ancient enemy by the name of Ra. Ra has used his power to enslave the people of this world. He orders them to mine for guartz which powers the machine that keeps him eternally youthful. As Colonel Jack O'Neal you are determined to free these oppressed people, find your men and take them home. All you have to complete this mission is your radio, machine gun and hand grenades that you find along the way.

ICONS!

These are some of the icons that you can collect throughout the game to help you find your men and free the people of this world.

Grenades

These are your strongest weapons, but you don't have many.

Supplies

These are the supply boxes you have to find on the first mission.

Health

These health packs will keep your energy high.

Ammunition

This icon will raise the firepower of your machine gun.

Extra Life

This gives you another chance at completing the mission.

PLAYER'S NOTES: FIRST IMPRESSION

The thing that I first noticed about this game was the attention to the animation of the main character. Another thing that hit me right off the bat was the loose control. To be fair, I must say that once I got used to the control, it got a lot better.

BEST FEATURE

The animation and the story line are the two best things about this game.

WHAT'S MISSING

I played through a lot of the game and I never faced any Bosses. I think that the lack of Bosses really hurts the structure of the game, because you're not really sure if you completed a level or not.

WILL YOU LIKE IT?

If you liked the movie, you will probably like the game. It's always cool to take on the role of someone who is a hero in the movies. Also, if you're into cool character animation you might want to check this out. —Paul Oleda

You have a lot of different abilities like being able to shoot your machine gun while hanging off of this rope with one arm. This guy is good!

One of them will then open the east gate for you so that you can go on with the rest of the game.

The last elder is in this building near the end of the level. After you find him, head to the east gate to get back out to the desert.

FIND THE MARNES

After the elders let you through the gate, go to the desert where you will find one of your men. He tells you that five of the soldiers are lost in the caves and that they need the supplies you collected in the first level. He also tells you that one of the men is probably dead. The fast-paced chase scene at the beginning sets an exciting tone to the game. I personally enjoyed the movie that the game is based on and was relieved to find that seeing the movie didn't ruin the game.

BEST FEATURE

I hate to beat this aspect to death, but the unique idea of combining items to form new ones takes the cake.

WHAT'S MISSING

The lack of a save feature was disappointing, but was not entirely necessary. The game could have used more of the items you need to combine. I found that I didn't need to use all that many to make it through the game.

BEST FEATURE

Personally, I enjoyed the webslinging fun. It was cool to swing over enemies' heads and block aser fire with a ball of web.

WHAT'S MISSING

I definitely think there are enough villains in the game. Spidey could use some more acrobatic movements: He's a little stiff at times. The game could also use a few trap doors and fallen objects for a little more kick!

PLAYER'S NOTES: FIRST IMPRESSION

My first impression was that this was a cute idea that didn't go very far. The graphics were moderately impressive, and it seemed nice to have so many characters to choose from Other than that, it didn't strike me as particularly impressive.

BEST FEATURE

The best feature could also be considered its worst feature. In order to learn your special moves, you need to win matches. While this can be rewarding. it can also be frustrating, considering you start the game with no special moves and the computer has all of its attacks.

WHAT'S MISSING

The most important test of a fighting game (no, not blood!) is how well it controls. Brutal lacks a crisp feel.

WILL YOU LIKE IT? Possibly. Gore fans won't like it (no blood) and fighting game ourists probably won't either (playability isn't great), but if you want something a bit different, give it a shot. -Jason Morgan

WHEN YOU DIE,

IT'S NOT YOUR LIFE

THAT FLASHES

BEFORE YOUR EYE

IT'S A CATTLE PROD.

Why observe laws when you've got an all-time favorite like the club to solve your problems?

Ditch these cops and they'll take to the air in their helicopters, ready to bust your chain wielding butt.

If you think a couple of punches to the head blurs vision, check out the mace.

The cattle prod and six other weapons will get you pumped up for some serious nipple surfing.

Terrorize seven international roadways and learn to say road pizza in the local tongue.
