Depression hurts. Fighting Force and Tomb Raider II can help.

SIGNS AND SYMPTOMS OF DEPRESSION

- **Persistent sadness and or irritability.**

- **Recurring thoughts of how much better life would be if you had Fighting Force or Tomb Raider II.**

- **Statements such as, "I'm bad. I'm stupid. No one likes me."**

When depression strikes, immediately seek the help of a trained professional at your local video game store.

Wiping secretions

Research shows that the leading cause of depression among gamers is a noticeable lack of Eidos games.

Fortunately, this deficiency can be treated both safely

and effectively with games like Fighting Force

or Tomb Raider II. But early intervention is crucial. Or else, it's only a matter of time before they threaten to do something really stupid, like go to therapy.

Editorial

By Dan Hsu • dan_hsu@zd.com

In last month's editorial and in recent special features (Back to the Future—issue #103 and Video Game Timeline—issue #104) we took a brief trip back in time and revisited famous moments in video-game history. But what does the future have in store for us?

One of the most eagerly awaited games in quite a while is the upcoming Legend of Zelda: The Ocarina of Time (as it is called in Japan...we'll call it Zelda 64 for now). A lot of us can't help but get excited at the thought of playing a Zelda game on the Nintendo 64. Who could blame us? It's the latest chapter in the long-running series that has captured the hearts of countless gamers. How about a real 32-/64-bit Sonic game or a Metroid 64? The thought of these hypothetical games is enough to make us drool with anticipation.

Something, however, is the matter here. All of the titles I mentioned are sure to be big hits (with good reason), but is that all the industry can throw at us gamers to get us excited: sequels and reshaves? I'm worried that it might be.

Programmers have settled into a Laz-E-Boy of complacency. They take yesteryear's hits and pump them up with new graphics and sounds, stick in a few new features, and ship them off to the stores. It's the easy thing to do: Game designers can skip racking their brains for original concepts and simply improve upon documented hits.

Hey, I'm not complaining (well, I am complaining, but hear me out). I love Super Mario 64 for the Nintendo 64. I love Castlevania: Symphony of the Night for the PlayStation. I love Saturn Bomberman for the Saturn. These games are absolutely incredible. But wouldn't you agree with me that they aren't really original? Super Mario 64 is incredible, but it is exactly what I'd expect a Mario game to look like in 3-D. Symphony contains pretty much the same gameplay that every previous Castlevania offered. Saturn Bomberman is the best Bomberman game out there—because it gives us more of the same. These games are all great, but they're all modern updates of past successes.

I do miss the old days—the days when I'd be playing a new and revolutionary game for the first time. I'd be sitting there, amazed as hell at what I was playing. If you were young like me, you were giddy with excitement when you first played Super Mario Bros. (I still remember thinking how awesome the game was, with its excellent control and plethora of secrets). Same with Intellivision's NFL Football (with the first-ever playbook), Zelda (a magical action-RPG like nothing seen before) and Tetris (do I even need to say why?). Remember seeing Street Fighter II in the arcade and witnessing Honda's too-Hand Slap or Dhalim's Fireball for the first time? (OK, so SFII is a sequel, but you gotta admit, you've never seen anything like it before.) I remember. I remember playing these games, wide-eyed and jaw-dropped, thinking that whoever made these games were true geniuses.

So I'm sitting there today, playing a great Street Fighter EX Plus Alpha, but my mind fondly wanders off. I think back to my college days when I threw my first Sonic Boom, and I wonder, "Am I ever going to be amazed again?"

Are all the good and original ideas taken up? Let's hope not. While I'm sure I'll have fun playing the next Mario or Sonic game, I'll eagerly await the next fresh concept that's not based on an older one. Who knows what will be the next game that cannot be classified as a Doom-clone, head-to-head fighter or yearly sports game update? We get a few standouts once in a while, like the entertaining PaRappa the Rapper and Monster Rancher, but these games are too few and far between. We need some innovative game designers to come up with some innovative ideas. We need someone to pleasantly shock and surprise us again.

Is anyone out there up to the challenge?

egm letters

Mode is 2-D, Shawn. Try playing it instead of watching the advertisements. Oh yeah, I don't know if Dan was all there either.

Mike Neace—Richmond, KY

Let's see. You say Bomberman 64's Multiplayer Mode isn't 3-D? The same Bomberman 64 Multiplayer Mode that has stages with different heights? The same stages where you can throw bombs from higher altitudes? The same stages where you can climb up and down stairs? Yeah, we guess you're right. That doesn't sound 3-D at all.

Evil Gross Magazine

My son John has been receiving your magazine for 12 months now. I want to explain a concern that I have with your magazine. John is a teenager. He likes your magazine. The problem is the offensive pictures you draw of women. They are too explicit, and they unrealistically portray the female body. Every time your magazine arrives, I take a felt tip pen and color "clothes" on the women.

Please realize that your cartooning is considered pornographic to me and that I want to protect my son from this kind of artwork. John enjoys your magazine, and I do not want to cancel the subscription. I want you to be more sensitive to your young reading audience. John buys your magazine because of the information in it. It is not necessary to expose him to the filth of pornography.

I know that if I am of this mind set, many other people are as well. As I said, I do not want to cancel the subscription, but I must protect my son. Please change your drawings; women are not toys.

Bonita Grabinski—Tacoma, WA

Please cancel my subscription immediately. As a mother of a 12- and 13-year-old, I am appalled at the gross and sexually revolting advertisements you have allowed on the pages of your publication. You should consider changing your name to *EGM: Evil Gross Magazine*. In recent issues, I have seen themes of Satan worship, sexual bondage and just plain violence! The straw that broke the camel's back was the Spawn ad with the guy's arm ripped off. If you guys are looking for shock value, you just succeeded in shocking yourself right out of a subscriber.

Just for your information, I have shared this knowledge with all the parents and school officials I know. You are sick. You are appealing to a young, preteen audience, and you should be ashamed of yourself for exposing young minds to images so extremely violent, sexual and evil.

Sharon Stewart—Flora, MS

While we wouldn't go as far as to say that *EGM* is pornographic or evil, we do understand your concern as a parent. We certainly appreciate you watching out for your children. We try to keep an eye out for some

overtly offensive ads (believe it or not, we have turned away a few ads that were deemed too explicit). But if you don't want your kids reading *EGM*, well then, that's your call.

We are well aware of our younger readers, but please keep in mind that *EGM* is read by a predominantly older audience (our average reader is 24 years old, according to marketing studies). We also feel that our magazine is pretty tame compared to the stuff you can see on TV or read in the paper. We feel our readers are mature enough to handle a busty (computer-rendered, mind you) Lara Croft when *Baywatch* babes are strutting the real stuff on television. Well, OK, maybe not entirely "real"...

We asked our resident artist Shawn Smith to draw up a conservative Lara Croft...maybe something in a Catholic school girl outfit—you know, nice and conservative. Check out his handiwork on page 18.

Ewww...this picture from the Spawn ad is evil gross.

Desperate

If I send you guys 1,000 messages a month for the rest of my life, I wonder what the odds are that one of them will get printed. Please let me know what my chances are—a statistical breakdown would be nice. jenyart@thomas.butler.edu

The only way to prevent me from sending 10,000 letters a month is to publish one of them. I am desperate to see my name printed or my letter considered for "Psycho Letter of the Month" (oops, that's in the past!). If you print my letter, then I'll ease down a little (maybe 500 letters a month). PLEEEAAAASSEEE!

Dave89820@aol.com

Nope. Absolutely not. Your futile attempts at getting your letters printed will not work on us. We...um...er... D'OH!

EGM: Fair To All Sexes

I've noticed that there have been a lot of letters sent to you concerning sexism in your magazine. Well, if the writers of these letters would care to read issue #104, they would be in for a big surprise. I counted at least 15 naked Yoshis in that magazine, not including the one on the cover! I may not be an expert on anatomy, but I'm quite sure those Yoshis were male! So please, stop complaining! BlairPars@aol.com

We just don't get it. How can our female readers complain about the lack of scantily clad males? We have WCW's Giant (see last issue's Letters section) and now, an orgy of nude Yoshis. What more could you possibly want from us?

Question of the Moment

What are your thoughts on the big chains discontinuing Saturn products?

It's unfair to all the Saturn gamers, who already have a hard enough time finding games.

scfan3@juno.com

It's a good decision. They need to make room for Dural.

Segalcon@aol.com

It sucks. The Saturn is just as good as the PlayStation and is better than the N64. Sega just has bad management.

Frank9888@aol.com

Looks like no sign of life on Planet Saturn. Smart move.

AlecTronik@aol.com

Stores do what they have to do in order to make a living. If oranges don't sell as well as apples, then why not bring them down in price to get rid of them before they rot?

Dogballs@aol.com

If SoA's management had a brain to market games like Grandia in the U.S., this wouldn't be happening, would it? Could you imagine Grandia commercials that use the same technique Sony used with FFVII? GhalionOne@aol.com

"10"

When was the last time the Review Crew gave a perfect "10" to a game? If memory serves me right, the last game to get a "10" was Final Fantasy III.

Allen Ragasa—Ranma1269@webtv.net

Nope. FF3 scored straight 9's. The last game to get a 10 was Sonic & Knuckles for the Genesis [December 1994, issue #65]. The month before that, Donkey Kong Country (Super NES) scored a 10. Both perfect ratings were given by Ed Semrad, former EGM editor in chief.

It's been over three years since the tough-as-nails Review Crew has handed out a perfect score. The current Crew is the toughest yet. Who knows what it'll take to impress them that much.

Here's A Story...

As I was reading the Video Game Timeline [issue #102], a vision slowly but surely formed in my mind. The video game industry for the past five or 10 years can be seen as the Brady Bunch.

Atari is Jan Brady. We can look at Atari's record and see whiny lawsuits and pointless attempts at industrial sabotage. They just can't stop screaming, "Marshal Marshal Marshal!" They've always got some zany plan or crazy plot to get rid of that darn Nintendo and put themselves on top.

Of course, this means that Nintendo is Marsha. Pretty, but far too often empty. Nintendo and Sega could have been the parents of the video game industry, as they showed us through the 8- and 16-bit years, but with their spats and backstabbing, they showed they were no Mike and Carol Brady.

This would mean that Sega is Peter. Every time you think Peter's geared up for something big... BAM! His voice cracks. "Duh, gee, should we support this here new chunk of hardware that people have put down \$200 for? Nah."

Sony is, of course, Greg—so professional and cool. Sony's taken [crap] and turned it into lemonade. They've done some ankle-biting commercials, but they've not done any direct acts of sabotage against another company (like Atari has) or against themselves (like Sega continually does).

Where does this lead the rest of the family? I figure Tiger Electronics is like Bobby. Recently the actor who played Bobby got into a wreck for drunk driving and was arrested. He's a fat, ugly slob these days. I doubt the Game.Com has any better a fate than poor ol' Bobby. NEC is Alice cause damn she's not much to look at, but she's as tough as two Jan Renos put together! This leaves Tiger the Dog (not to be confused with Tiger the game company). Tiger (the dog) would be Panasonic cause they've tried and tried to get into the gaming industry, and always failed. \$100 million for a chunk of hardware no one will ever see on the market. What a bunch of losers! Yeah, yeah, I realize that I passed up a really easy Alice/Tiger/Dog joke, and that I left out Cindy. Cindy got married to a porn star and now drives trucks for a living, so I really couldn't think of much to stick there. Bite me.

stokkillers@earthlink.net

OK. We realize this letter only makes about 10 percent sense, but it made us laugh. We thought we'd share Stokkillers' sickness with the rest of the world.

OOPS

Last issue, we said we'd have a role-playing-game feature for this month. At the last minute, we decided to hold back the story to get in the most up-to-date information on some hot new games (which we're getting in too late to include in this issue). We apologize for the delay, but we're sure you'll be happy when you see what we have in store for you next month. If you're an RPG fan, don't miss out on this exclusive feature next issue.

In fact, nothing in EGM Letters should ever be considered a "gag." This is a very serious section, folks.

Fast, Cheap and Out of Control

Out of nowhere comes Project X, setting the tone early for the next wave of consoles

Throughout the past few months, VM Labs' Project X hardware has been the target of a lot of speculation, rumor and wonder. At the Winter CES in Las Vegas this past January, we were given a firsthand look at the hardware behind closed doors, and are now able to share some of the details with you. There's much more to the story, which EGM will be sharing with you in the coming months.

First of all, Project X is a new video game system in the broadest sense of the word. Project X hardware will be manufactured by a handful of Original Equipment Manufacturers (OEMs). VM Labs' partners are top consumer electronics companies and household names, however specific names cannot be revealed at this time.

One of the biggest features of the system is that it is capable of incorporating many next-generation graphics rendering algorithms into video games. The polygonal standard which has been so prevalent in the current generation of video games will continue with Project X, but during the demonstrations we were shown, there was literally no sign of the characteristics

usually associated with them—no breakup and no sharp edges anywhere in sight.

For example, one of the demos shown at the Winter CES was of a dancer created by AnimaTek, dancing around using the system's real-time voxel-rendering capability. Not only is it fast, but the character moves in smooth motions, with zero sharp edges. This same AnimaTek demo, running on a PlayStation, would run at approximately two frames per second. The possibility of games with characters looking as good as those rendered FMV intros on the PlayStation and the Saturn is certainly an amazing proposition. Imagine Resident Evil with characters and zombies that look as good as the rendered intro, or even a Tekken or Toshinden-like fighting game with smoothly rendered fighters and arenas.

Next, we saw a demo of the Mandelbrot set (fractals) calculated and rendered in real time which could be zoomed in and out, transparently recalculating each move. They had one demo with all of these demos and a live video feed all textured onto rotating cubes. One side of the cubes was a mirror, which showed the reflections of other cubes while each were moving in different directions.

VM Labs had two game demos up and running at the show as well. In two days, one of VM Labs' programmers ported the source code to Doom to the system, using only 15 percent of the system's power, outputting to an RGB buffer and then converting to their own internal format before display on a TV monitor, completely unoptimized. While a tad unpolished, the code was playable. Doom will never actually be released for the system, but it shows that the

Recent reports state that Project X may have real-time ray-tracing capabilities. Above (not from Project X) is an example of ray tracing.

The founding members of VM Labs set their sights on the future of interactive entertainment.

system can handle PC ports easily and quickly. Multiplayer Internet gaming and Net surfing are also possible via Project X's Modem.

Next was a demo of Jeff Minter's latest game, the name of which will be familiar to fans of his previous work. The game shows off some of the new types of rendering effects capable thus far only with Project X.

The one web we were shown moved in a smooth, wave-like motion with plenty of baddies on the screen at a time. We were also told that Minter may be working on an updated version of his Virtual Light Machine, which originally appeared on the Jaguar CD for the Project X.

Audio specs include a 32-Voice Wavetable synthesizer, with a smorgasbord of audio effects. All of this means a whole lot more tools available right off the bat to developers supporting Project X. There have recently been reports within the media that the machine may include real-time ray-tracing capabilities, a technique which is not possible with any speed on the current crop of PCs and consoles. Another

Tale of Three Tournaments

Celebrities and NFL Players Square Off on EA and Sony Football Games

The Super Bowl is well-known (and sometimes criticized) for the two full weeks of hype preceding the event, and Electronic Arts and Sony were more than happy to join in the festivities engulfing San Diego. In previous Super Bowls, Electronic Arts had a monopoly on pre-game tournaments with its long-running annual Madden Bowl, but times have changed, and that is no longer the case. The marketplace has shifted a bit in the last few years, and with the strong emergence of NFL GameDay comes Sony's very own contests. Besides, who says there isn't room for a little more hype preceding the world's most watched event?

The tale of three tournaments started at Planet Hollywood in downtown San Diego. Held on the Thursday before the Super Bowl, Electronic Arts' Madden Bowl '98 was presented with panache. Thirty-two participants, comprised of NFL players and entertainers, squared off in a playoff-style tournament. High-profile players such as running backs Garrison Hearst and Herschel Walker were eliminated along with

performers such as Coolio, setting up a showdown between finalists Kevin Mitchell (TE, New Orleans Saints) and actor Morris Chestnut (*Boyz n the Hood*). Mitchell, trailing for most of the game, rallied late to take a 37-34 lead with less than a minute left. Chestnut received the ball, then completed a dramatic 8-yard touchdown reception to win the game 41-37 in grand fashion. It marked the first time an entertainer emerged victorious in the Madden Bowl.

Not to be upstaged, Sony held two separate events before the Super Bowl. Perhaps symbolic of the rivalry between the two football games, Sony's first event was held the same day and time as the Madden Bowl. It consisted of a compelling showdown between Super Bowl participants Robert Brooks (WR, Green Bay Packers) and Terrell Davis (RB, Denver Broncos, later to be named Super Bowl MVP). Entitled "The Game Before the Game," the event proved to be eerily prophetic, as Terrell Davis handily beat NFL GameDay '98 spokesperson Robert Brooks by a score of 20-0.

Next, Sony held "The Locker Room Challenge" on the eve of the Super Bowl at a stage situated inside the PlayStation NFL Players Party at Embarcadero Park. Sixteen NFL players participated, including Garrison Hearst (amusingly, he attended both EA and Sony's tournaments), Hardy Nickerson and Terrell Owens, and GameDay '98 spokesperson

Surprisingly, the winner of Madden Bowl '98 wasn't an NFL player, but rather an actor by the name of Morris Chestnut.

Eddie George. Using quick games that normally only gave each player one possession a piece, the field of players gave way to Bob Whitfield (OL, Atlanta Falcons) and Edgar Bennett (RB, Green Bay Packers), who might have had a little more time to practice due to his season-ending ACL knee injury.

Showing loyalty to their teams, each player used the club he played for in real life. The game was scoreless throughout the contest and was finally decided at the end in dramatic fashion by a late field goal by Edgar Bennett to win the game by a score of 3-0. Whitfield even went so far as to call a timeout before the decisive kick in a last-ditch effort to "ice" Bennett, but obviously the play didn't succeed.

www.easports.com
www.playstation.com

Packers' running back Edgar Bennett boasts his trophy won at Sony's Locker Room Challenge.

rumor has the machine utilizing DVD, which would give the machine a considerable amount of power.

From what we saw at CES, we were very excited about the machine's possibilities. Currently, VM Labs is getting development systems out to interested parties. At press time, that was about a dozen different companies. As word of the system grows, hopefully that number will grow. The company is projecting that the first Project X systems will show up on store shelves in late 1998, along with at least a half dozen games.

The only question that remains is: Will big-name developers support the machine? VM Labs hasn't yet revealed the list of companies that are working on games. But, it's hard to imagine with a system this powerful, that companies wouldn't want to work on games for it. At the right price, with the right software developers, Project X could be what the next generation of video game consoles is all about.

Shutting Off the Power

Namco may pull the plug on revival of their mall-based arcade

Namco Cybertainment, the arm of Namco Hometek Inc. that operates over 370 mall-based arcades in the U.S., may seek protection under Federal Bankruptcy statutes, according to the company's president, Kevin Hayes.

Citing "declining mall traffic" at its arcade locations, Hayes confirmed reports currently circulating in the industry that during recent lease negotiations, Namco Cybertainment has repeatedly informed mall owners that if terms favorable to Namco are not offered, the company would seek Federal Bankruptcy protection.

"We're out there talking landlords times have been better in arcades," Hayes said. "Should the company in fact seek reorga-

nization protection under Chapter 11 of the Federal Bankruptcy statutes, it would put Namco Cybertainment in a more favorable position to seek reduced or same-cost lease agreements with mall owners—and would also allow the company to shed itself of current lease obligations far more easily (and cheaply) than otherwise.

Tidbits...

30 Million PS, 5 Million FFVII

Sony announced that as of the end of January, 30 million PlayStation have been shipped worldwide. The breakdown is 10.65 million units shipped in Japan, 10.75 million in North America and 8.6 million in Europe. Additionally, it was revealed that Final Fantasy VII has sold 5 million copies worldwide, an amazing feat for an RPG. The jump to the 5 million mark is attributed to the game's release in Europe in November.

Favre Signs to QBC '99

Acclaim has signed Green Bay Packers QB Brett Favre to be the spokesman for the company's '99 installment of Quarterback Club, which will be released this fall. He will again contribute to the game's development and appear on the packaging.

"From his input into the development of the game to his appearance in the TV spot, Brett brought out the best in everyone on the Acclaim Sports team," said Bob Picunko, Acclaim Sports marketing director. "It's an honor to be working with Brett again."

Bugs Takes Over Games

Bugs Bunny and his pals are set to return to the video game screen in five different games between the Nintendo 64, the PlayStation and Sega's next console. Under a recently signed agreement with Warner Bros., French software developer Infogrames will develop the games, starring many of the most popular Looney Tunes characters. More than 250 Looney Tunes characters are covered under the agreement.

Kings of the Video Game Hill

Depending on who you ask, Nintendo and Sony both won 1997

Any way you look at it, 1997 was an outstanding year for the video game industry. Nintendo and Sony went for the throat at retail—with only one major hardware price drop (in March '97 from both Sony and Nintendo) during the year. For the first time, the price of software made more of a difference than the price of hardware. Sega, on the other hand, dropped out of site, keeping only their current Saturn fan base happy with a steady stream of games.

But the real question is, who ended up on top in 1997? Both Sony and Nintendo claimed victory, but to really judge, you have to look at each company's line.

Sony was the first to claim victory, announcing that they sold an unprecedented 3.8 million PlayStation units during the fourth quarter, bringing total U.S. hardware sales to 8.7 million units. According to Sony, they racked up \$2.4 billion in retail sales in '97, and SCEA execs were eager to boast about their success. During a media conference call, SCEA's CEO Kaz Hirai told those on the line that the "PlayStation is

not only the dominant leader in North America, but is the undisputed system of choice worldwide...we're continuing to increase the gap between ourselves and our nearest competition."

A few days following Sony's announcement, Nintendo announced their own statistics, claiming to have captured 48.8 percent of the 32-/64-Bit console market, with Sony at 47.1 percent and Sega clinging to 4.1 percent. Nintendo Chairman Howard Lincoln said that '97 was "the best year we've had, and that was in spite of product delays."

Nintendo's weak point is definitely delays. Slamming this point home, Jack Tretton, vice president of sales for SCEA said, "One of the key contributing factors to [our] success has been our ability to deliver the hits, as promised and on time."

So who won? Sony's hardware sales are impressive—2.4 million units in December alone. But

Nintendo is also correct, racking up multiple million-selling titles during the year.

Hard to compare? Yes. From a hardware-only standpoint, Sony's at the top. In software, Nintendo wins. Rest assured the competition will continue through 1998.

There's Never Enough Bass In Space

EGM checks in with the dynamic duo of funk, ToeJam & Earl, after a long absence

During the Sega Genesis' heyday in 1991, there was a little game called ToeJam & Earl. Many who were into gaming at the time fondly remember the duo of funk's adventures as one of the best two-player games at the time. The first ToeJam & Earl game was released in October 1991, followed up in 1993 with a sequel, Panic on Funkotron.

Funkotron didn't get the attention the first game did (they're very different games), and Sega neglected the duo for years since. ToeJam and his funky pal Earl were created by the programming team of Mark Voorsanger and Greg Johnson, who together developed the original in 1990. Mark's credits include Imagic's redesign of Fathom for the Colecovision/Adam, Demon Attack for the

Tandy Color Computer and Night Trap. Greg previously has worked on Starflight 1 and 2 and Caveman Ugh-lympics, all published by Electronic Arts. Currently, Greg and Mark are involved with a start-up technology company in California called Electric Planet. "They have some pretty hot new technology that is on the cutting edge of where I believe computer interaction is going," Greg says.

In 1995, the two teamed up again to develop Orly's Draw-A-Story, a creativity CD-ROM for kids on PC and Mac, released in early 1997. Orly drew critical acclaim from the likes of *Computer Life* and *Newsweek*, but has not been a market success. A demo of the game is available at www.orlystory.com.

During the years following the release of the two ToeJam & Earl games, Sega owned the rights, so releasing the game on other platforms was impossible. In 1995 the two regained the rights to ToeJam & Earl. So is a new game in the works? Mark says, "YES!"

Greg and Mark are interested in hearing from fans on what they'd like to see in a new version: what platform (PC, PlayStation, N64, etc.), and whether you liked the first or second game more. Hopefully the

response will encourage them to do an updated installment and a publisher to release the game.

You can e-mail comments@tjande.com, or send snail mail to ToeJam & Earl Productions, 6 School St., Suite 200, Fairfax, CA 94930. www.tjande.com

The original is considered a classic by many with its two-player cooperative play.

The second TJ&E game, Panic on Funkotron, was the last time we'd heard from them.

Game Boy Lights Up

Nintendo finally adds the Game Boy's second most-wanted feature

Nintendo Co. Ltd. will launch a new Game Boy model called the Game Boy Light in April. Like the name implies, the Game Boy Light has a backlight feature for the screen so now you can play your Game Boy in poorly lit places (it's still not color though). There's a switch on the top so you can choose backlit or regular display before and during gameplay. The Game Boy Light plays all current GB games.

A bit larger than the GB Pocket, but smaller than the original Game Boy, it weighs about 190g (with batteries).

It requires two AA batteries and lasts 12 gameplay hours with the backlight on and 20 hours without it, according to Nintendo.

In the spirit of the Game Boy Pocket series, there will be two colors available at launch, gold and silver.

Game Boy Light will be launched April 14, for 6,800 yen. Nintendo also announced that it is lowering the price of the standard Game Boy Pocket to 5,800 yen beginning Feb. 14. At press time, Nintendo of America had not announced whether the Game Boy Light is planned for a U.S. release.

Tidbits...

Sega Kicks Off New Year

At Sega's annual New Year's party in Japan, Sega Enterprises Chairman Isao Okawaka officially announced that Sega and Microsoft are indeed co-developing Sega's new console.

Surprising no one, Okawaka was not forthcoming about specific details, saying only that, "We have joined with Microsoft in the development of [our] next console system."

Bill Gates reportedly made an appearance at the party via video attesting to his company's commitment to the project.

The new console is believed to be based on Microsoft's Windows CE operating system and has a communications link feature as well.

In other Sega news, Nikkan Kougyou Shimbusu says that Sega is secretly developing a portable gaming console for simultaneous release with its next system.

The portable is believed to have a data connection feature to exchange information with the new Sega console. Sega is reportedly thinking about the same kind of plan that Nintendo is using with its 64GB Pak to transfer data from portable to home games.

Saturn Gets Resident Evil 2

According to Capcom of Japan, Resident Evil 2 (called Bio Hazard 2 in Japan), is headed to the Saturn in the not-too-distant future, and will use the Saturn's 4 MB RAM cart.

Sales of the PlayStation version in the U.S. topped 380,000 during its first weekend of release, and is doing better in Japan.

In other Capcom news, the planned PlayStation release of D&D Collection has been shelved so that the company can focus on other projects within the company.

A PlayStation Monopoly

Sony comes under fire for allegedly breaking fair trade law in Japan

In January, a Japanese anti-monopoly watchdog group ordered Sony Computer Entertainment Inc. to cease price control of its retail software for the PlayStation.

Basically, the Fair Trade Commission (FTC) in Japan contends that Sony violated Japanese law by forcing retailers to sell PlayStation games at fixed prices, in an attempt to curb the used game sales. Other alleged violations include a Sony restriction forcing retailers to only sell to consumers and wholesalers to retailers. If a client violated this restriction, Sony would terminate its contract or cease shipments to that client.

The FTC has given Sony until Jan. 30 to follow through with the order. No information was given as to what the FTC would do if Sony didn't comply with the order. A Sony spokesperson said, "We are confident that our business practices do not violate anti-monopoly laws, and we do not plan to accept the FTC's order."

In early February, Enix, makers of the Dragon Quest series announced that they will add a clause in their contract with retailers barring them to buy or sell secondhand game titles. The company will switch to direct distribution of their own titles in April.

Pikachu In My Pocket

Nintendo's little yellow bundle of epileptic joy goes virtual

Nintendo Co. Ltd. is entering the market for virtual pets with their first product in the category, Pocket Pikachu. Players can feed and pamper their very own Pikachu, who incidentally is the most popular character in the Pocket Monsters line of Game Boy titles.

But don't mistake Pocket Pikachu for your standard virtual pet—this thing's high-tech. Aside from feeding and taking care of Pikachu, you can also help him grow by giving him a workout—he grows according to the distance you walk. Pocket Pikachu has a built-in pedometer,

which makes little Pikachu walk on screen with his user. Pikachu also brushes his teeth in the morning and takes a bath at night.

Pocket Pikachu will be released in Japan on March 27 for 2,500 yen (about US \$19). The company says it has no plans to sell the game outside of Japan.

DECAPITATO^{EGM}

(dē • cap • it • ā • tō)

RINGS OF DEATH

So you want a Decapitato? There are three ways you can land yourself one. You can simply go to a store and search for it, you can guess how many April Fools' gags are in this issue of *EGM* (not including anything in the Sushi-X Files by the way) and possibly win one, or you can use this handy pattern below and make your own. You'll need a piece of heavy-duty, rubberized plastic for the job.*

START
CUTTING
HERE

TOP-SECRET RULES OF PLAY:

True, Decapitato has long been shrouded in mystery. The Ancient Aztecs played Decapitato to see which tribe's chief was strongest. Instead of flexible (but deadly) plastic, they used giant stone discs. While the French Revolution was winding down, a steel version of Decapitato replaced the guillotine for public executions. During the first World War, the allied forces used Decapitato to take down snipers from afar. Consequently, those same troops used Decapitato as a form of entertainment when the War ended—many a great soldier was lost due to the unforgiving edge of Decapitato. Then Decapitato came to the States and remained an underground sport for some time...that is, UNTIL NOW! Yes, the editors of *EGM* have long played the game that is as deadly as it is fun, but few knew what it was or how to play it. Well, with a little legal work and a lot of luck, we're finally able to disclose the rules of this award-winning game! Here's how it breaks down...first you need a flying stunt disc of some kind (perhaps one that's shaped like a ring). Next, you need to find a long, narrow and dimly lit hallway (preferably where there's low traffic—or high if you're feeling especially dangerous). Of course, no game of Decapitato would be complete without a group of close friends and enemies gathered at each end of the hallway. Now, one side has the Decapitato and throws it toward the other team. Since it's dark, they can't see what's about to hopefully hit them. If someone gets hurt (or hit), your team gets one (1) point. Now it's the opposite team's turn. The first team to reach ten (10) kills...er, points, wins. Two Decapitos are optional and greatly increase the odds of a decapitation*. Good luck, and as Decapitato professionals say, "heads off to you, chum." Send your stories of Decapitato action to:

Sushi-X Files
1920 Highland Ave. Ste. 222
Lombard, IL 60148.

*EGM cannot and will not be responsible for any injury or injuries sustained from playing the aforementioned Decapitato. Remember that this is a game played by highly trained professionals. If you do play it though, do so in good fun without evil intentions. It's kind of a joke, so be careful for crying out loud.

SEGA hard stuff

Day 42. The standoff continues. Suspect presumed paranoid. Has been known to roam dungeons and consort with bandits and sprites in **Shining Force III**. Believed to be mutilating and blowing heads off zombies in **House of the Dead**. Purported member of **Panzer Dragoon Saga** cult, which claims that ancient, morphing "dragon friend" holds the key to salvation from evil. Approach with extreme caution: suspect known to use thumbs when threatened.

Quartermann

Hello Quarterfans, welcome to another dramatic installment of Quartermann, the meanest, most risk-takin', death-defyin' scaffolding-swingin' bullet-avoidin' gaming spy in all the land. Now although the Q has put his life on the line several times in the past (all in the name of gaming), never before has the fear of the almighty shivered through my nervous system as it has since the Q-crew broke the story on the 64DD last month. Now we all sleep at night with bullet-proof vests affixed to our paranoid, quivering bodies, only to wake up in a pool of cold sweat....I guess it's better than a pool of something else....

QUARTERMANN ON THE ENDANGERED SPECIES LIST?

(Redmond, Wa) It seems that certain parties that be at Nintendo of America flipped their collective lids when they caught wind of the Q's report that the 64DD might not (I repeat, might not) make it to the U.S. in 1998. To hear them describe it, the mere thought of the 64DD not making its 1998 U.S. launch is totally preposterous....how dare I report such absurd rumors....OK, fine, but that still doesn't explain why mysterious little red laser sights have been pointed toward my skull recently. So what do I do? I march straight into Terry Aki's office and ask him again, "Are you sure the 64DD won't come out this year in the U.S.?" And again, he said that for at least in Japan, the soonest we would see a U.S.-friendly killer-app game for the 64DD is mid-1999, and by then it may be too late. So unless someone other than NCL (say, Rare for example) can produce a 64DD game with enough universal appeal to see the upgrade in mass quantities, the unit is still on life-support no matter what NoA says. Now if DKC6a makes an appearance on the 64DD at this year's E?...well, that changes everything....

Lido 239 UNVEILED AT LAST

(Kyoto, Japan) As you may or may not already know, the Q was first to report on Lido 239 (Nintendo's top-secret hardware project) back in issue 100. Terry Aki (EGM's Japanese spy stud) put his life on the line to give you, our loyal readers, the latest gaming gossip out of Japan. As it turned out, Lido 239 is a satellite hardware joint-venture between Nintendo of Japan (NCL) and Kyocera Corp. For those of you who don't know, Kyocera is a "global producer of high-technology solutions in such fields as metal processing, automotive components, communications, optics, medicine, energy and semiconductors" and with 29,000+ employees in more than 20 countries, Kyocera is one of Japan's biggest electronic manufacturers. So what does this have to do with Nintendo and project Lido 239? Lots. As NCL looks to strengthen their position as much as they can toward the new millennium, they know better than anybody else the future of gaming ain't in cartridges. The only problem is that Nintendo has limited experience in optical software formats (CD-ROM, DVD-ROM, etc.). However, one thing Nintendo does know better than Sega, Sony or anyone else is digital satellite gaming technology (in Japan, Nintendo introduced a successful satellite gaming service for the 16-Bit Super Famicom). Digital satellite gaming has the potential to supersede the capacity of a cart, CD, DVD or anything else on the foreseeable horizon. Nintendo and Kyocera each invest a cool 6 billion yen into St. Giga, which is Japan's premiere satellite music provider. Due in Japan around the year 2000, the Lido 239 upgrade will "attach to a Nintendo console" (whether or not that "Nintendo console" refers to the M64 or its successor remains to be seen). Players will then be able to access not only the latest Nintendo games but music programs, gaming tips and much, much more...for a nominal fee...of course. I smelled a rat, so I dug deeper.... Check this out....the reason Lido 239 was shrouded in so much infra red-detectin', hidden camera-watchin', Doberman-joint security is because Nintendo announced a similar satellite "joint venture" with Microsoft earlier this year. Gates and Co. were apparently unaware that NCL and Kyocera were having an affair behind Microsoft's back. I suppose NCL didn't want Bill to know the bridge underneath him was being burned....

- 64DD: lots of power, no games
- MD game system from Sony?

HYBRID HARDWARE HEAVEN FROM...SEGA?

(Tokyo, Japan) The latest buzz around the development community involves the recent sightings of near-final Sega Dual (also known as Katana) development systems. Q-spies indicate that not only are the Katana specs pretty much now set in stone, but that Sega has been quietly shipping beta dev kits to select developers. From what we hear, certain Japanese third-party companies have selected licensing rights to develop Katana software. They include: Hudson, T&E Soft, ASCII, Capcom, Konami, Artdink, MCS Masaya, JVC/Victor, Warp, Microcabin, Climax, Compile, Enix, Human, Genki, Attus, Treasure, Taito, Acclaim Japan, NEC and...believe it or not...Namco. Now, although this list doesn't represent all the Japanese third-party developers that have obtained licenses to make Katana games (Sega has racked up more than 40 Japanese licenses so far, with more on the way), the important thing to consider is that just because a developer has the license, it doesn't mean they have to make games right away. In fact, some of the licenses previously mentioned have not begun developing software yet and have taken a "wait and see" attitude with Katana. The good news is that the licensees who have begun Katana development are Capcom, Konami and Namco. In fact, Terry reports that the "Big Three" third-party licensees are looking to utilize coin-op versions of the Katana as well. Could this mean SF Alpha 4 and Tekken 4 would appear exclusively on Sega's new baby? Well, let's just say, truth is stranger than fiction and leave it at that....Back home in Indiana, our spies inform us that the first major U.S. developer to receive the Katana Beta development systems is Electronic Arts. Although other big U.S. third parties are ready to begin development, EA is the only one confirmed to be working on games at the moment (in fact, EA will be supporting the Katana in a big way with several sports titles due at launch or soon thereafter). Other details have emerged from within the development community. From what we understand, the Katana will feature 2 Megs of sound RAM, 8 Megs of video/texture RAM and a full 16 Megabytes of main system RAM for an unprecedented (for a console machine) 26 Megabytes of RAM (although that amount could change). Although the Katana is also designed to be used with a modem, Sega may choose to offer the device as an add-on (one positive byproduct of this is that consumers could use any modem they wish with the Katana). Sources close to the project reveal that the Katana was designed from the ground floor to be a developer-friendly, killer console for gamers. That mindset may explain why NEC/Sega's designers opted for as much RAM as possible rather than a standard modem with less RAM. The Katana's coming-out party will take place at the Tokyo Game Show this spring. Look for the U.S. rollout of Sega's new 64-Bit baby sometime in early 1999 with a Japanese launch later this year.

MORE PS64 DETAILS

(Foster City, Ca) According to our sources, Sony is seriously considering using the high-density version of their Mini-Disc format for the next PlayStation. When the Q first broke the news, the format was thought to be in the running with a rewritable version of DVD, but it now seems that the Mini-Disc HD drive is not as cost-prohibitive as a rewritable DVD drive. Both Sharp and Sony will launch an audio-only version of the Mini-Disc HD later this year in Japan, with a U.S. rollout later this fall. The format, (which, by the way, is incompatible with the original Mini-Disc which Sony calls the "Quadruple Density MD"), is very important to Sony. Not only does the QD-MD feature 650 Megabytes of infinitely rewritable storage, Sony foresees this format replacing floppy and Zip drives while costing less than a Jaz drive. How does the PlayStation successor fit into this Mini-Disc picture? Well, Sony regards the PlayStation (and its successor) as just one cog in their global corporate machine, albeit a vital one. The next PS will physically link several technologies Sony is actively involved with (Mini-Disc, video games, online gaming) into one neat, consumer-friendly box you can buy at your local Toys "R" Us. So what (other than play video games) does Sony want us to do on their next super console? For that answer, you'll have wait for an upcoming episode of Quartermann.

In Nintendo News...

There's a lot of stuff going on in the world of Nintendo. In January, Nintendo held their second Gamer's Summit at Nintendo HQ in Washington, where EGM got a chance to test out all of NoA's first-half releases.

After a lackluster fourth quarter '97 with only three major releases, two of which were licensed from third parties, Nintendo is back in business and ready to roll in '98. Banjo-Kazooie has improved considerably since E³, while Griffey, NBA Courtside and 1080 Degree Snowboarding (which Ricciardi won't shut up about, so it must be pretty darn good) are going to boost the N64's sports presence considerably.

Later in the year we'll witness the huge marketing push behind "Pokémon" (the official U.S. title for Pocket Monsters), with a daily cartoon show, loads of toys and other goodies, and buku bucks being spent on advertising. And then of course there's the big one—Zelda 64, which is now confirmed for a fall U.S. release (and rumored to be on a gold cartridge as well—a majorly cool little "extra" for long-time fans of the series).

Throw in Conker's Quest, two unannounced Rare games that'll be shown at E³ (Donkey Kong 64, anyone?) and whatever else NoA pulls out of their hat, and we're talking about a huge year. Now if only they'd get us Metroid 64. Hmm...

Finally, Baseball On The N64!

Major League Baseball Featuring Ken Griffey Jr.

In development now for well over a year, Angel Studios' Major League Baseball Featuring Ken Griffey Jr. is looking better than ever. Recently shown at Nintendo's Gamer's Summit in Seattle, Griffey was (according to Nintendo) only about 40-45 percent complete. Still, it played like a nearly finished game, and it looked like one too. The game provides an arcade-style (read: fun) experience without sacrificing any of the things serious baseball fans want: full stat tracking, official player and team licenses, all 30 stadiums and most important—realistic, smooth play.

Griffey features four different main modes of play: Exhibition, Season, World Series and Home Run Derby. In addition, there are three different skill levels to choose from, as well as multiplayer capabilities for up to four players. Of course, the game supports the Rumble Pak too.

The first thing we noticed when playing Griffey was the extremely polished batter/pitcher interface. The pitcher selects a target in or around the batter's strike zone and then chooses a pitch and unleashes. Sounds standard, right?

The innovation lies in the target cursor, which slowly fades in and out of the screen—in sync with your pitcher's heartbeat. As your pitcher's heartbeat gets tired, his heartbeat will increase, and the accuracy of the pitch will decrease. It's a unique feature that works quite well. As for batting, you have complete control over your swing—the analog control stick provides for extremely fluid movement, allowing you to swing in just about any direction you'd like. Fielding is simple too. The four C buttons correspond to the four bases, making it almost impossible to throw to the wrong base by "accident."

Obviously Griffey's got great graphics. But what you don't see here is the amazing animation, the lifelike crowds and stadiums and the

The batting interface isn't entirely new, but it works extremely well.

realistic sounds. Some of the camera angles (particularly fielding ones) are just sweet, too. You've definitely gotta see this one in motion.

MLB Featuring Ken Griffey Jr. is due out on May 25, and right now it's at the forefront of the N64 baseball games headed our way (development-wise, anyway). Hopefully there won't be any more big delays, as this is one game sports fans aren't going to want to miss.

As you can see, the game has come a long way since the version Nintendo showed at last year's E³.

Banjo-Kazooie

Strange Name, Great Game

Originally planned to be Nintendo's big holiday title last year for the N64, Banjo-Kazooie ended up going through two huge delays, pushing the game's release back from last November to this coming July. Fortunately the extra time that Rare's had to work on the game is obviously paying off—what we played recently at Nintendo was majorly improved over last June's already impressive version that was shown at E3.

Banjo-Kazooie could be simply defined as a Mario 64 clone and left at that, but it's just no longer true. There's so much depth to the game, so much variety and technique—and such amazing graphics (yes, Rare's topped themselves yet again), that BK is sure to keep gamers glued to their sets for far longer than Mario 64 ever did. In fact, the depth of gameplay is what really makes BK shine. For one, you've got two main characters (Banjo and Kazooie) who each have unique abilities and must help each other out throughout the game (combined, they have over 20 different moves and techniques at their disposal). That alone adds much to the game. But then there are the multiple objectives on each of the game's nine worlds. Not only must the pair search out and find special Puzzle Pieces that are hidden throughout (similar to the Stars in Mario 64, if you will), but they must also collect special Musical Notes, Mumbo Tokens, Jinjo Birds and more. To get past certain obstacles they'll have to rely on the help of a shaman named Mumbo who can transform them into different

Banjo and Kazooie will meet many oddball characters on their journey, like Bottles, a "well-informed" mole.

Red feathers allow Kazooie (and Banjo) to fly for a limited amount of time. Each "flap" costs a feather.

creatures that each have their own special abilities.

BK is looking incredibly promising right now, and with Rare's proven track record, we're confident that the game will be everything we've expected and more when it's released this July. We'll be back with more on this one soon. ☘

As one of the early N64 titles released, Cruis'n USA sold phenomenally well—over a million copies, in fact—despite complaints from gamers (and press) that the game was censored a bit from the arcade version. Now, the sequel is well into development (it's being handled by Eurocom, the folks behind Duke Nukem 64), and it's on schedule for a June release (and uncensored, too).

The biggest improvement Cruis'n World offers over the first game is the ability to travel through different parts of the world. But even more unique to the N64 version (as opposed to the arcade version) is the inclusion of the new Championship

Cruis'n World

Mode, which features all-new tracks that weren't in the arcade game. Other improvements over the original include tighter control, smoother animation, the ability to drift (which adds a ton to the gameplay) and Rumble Pak capability. In addition, up to four players can race at once on a split-screen.

Fans of the original will surely want to check out Cruis'n World. Our only complaint is that there's still a TON of pop-up on the tracks, but again, this was still an early version of the game. Hopefully Eurocom will be able to clean things up a bit before the final release, because Cruis'n World looks like it could be a nice improvement over Cruis'n USA.

This time, the races span the entire globe, to far-off exotic places, like this uh...desert place. Umh, yeah. That's it.

Cruis'n World features all of the arcade tracks, as well as a large assortment of N64-exclusive ones.

Rampage: World Tour

Big Ol' Monsters on the N64

The objective here is simple enough: Destroy everything.

Most gamers can remember back to the days of the original NES when Rampage first came out for that system. After slaving away at all 50 states, all you got was a "Congratulations." The game may have been fun, but it left you feeling kind of empty inside. Thankfully, Rampage has come a long way since then, and the Nintendo 64 version from Midway proves this.

Even though this version of Rampage: World Tour resembles its arcade father and PlayStation cousin, it has plenty of features that set it apart from both of them. The added Three-player Mode is arguably the best feature of the cart, and the selectable palettes for each character and other N64-style graphic effects certainly don't hurt it either. What's more is that the game supports the Rumble Pak. Now when you knock over buildings and swat down attack choppers, you can feel it in the palm of your monster hand.

The three main beastly stars of the game (Lizzy, Ralph and George) are back to demolish as much as they can in 131 cities. Since you're going on a "World Tour," you'll find your monsters taking trips to exotic places in Europe and Asia, among others. Wherever you may go though, what remains at this game's core is

that it's a fun smash-'em-up that should give gamers many hours of play.

Even big, annoyed monsters know how to have a good time.

One way around the world, you'll even take out capitol buildings.

All-Star Baseball '99

Player performance facts and 100 other individual stats are tracked per game.

All MLB and MLBPA licenses and all 30 stadiums are included.

Right off the bat (pardon the pun) the animation and high-res graphics in All-Star Baseball '99 are quite impressive to see. And, while it may seem like this game is an extract of the QB Club formula, it's actually driven by Acclaim Studios' new "Quagmire" engine—an improved (so they say) real-time polygonal 3-D motor.

Exhibition, Playoffs and Home Run Derby Modes give you the simple quick play option while Season Mode offers many more variations to select from. In Season Mode, you may trade players and sign free agents as well as tap the farm system up to 15 times a season. Use create-a-player to build the perfect individual player by choosing size, weight, height, facial hair and a few other unique attributes.

To break things up, All-Star '99 has a mid-season Home Run Derby as well as an All-Star Game. End your run with MVP Cy Young and Rolaids Relief Pitcher awards.

Finally, several weather effects including wind, clouds, rain, heavy rain and even snow are selectable. Night and day games are an option as well.

It's obvious All-Star Baseball '99 has the looks and option power to rival any baseball game on the market. The big question now is "how does it play?" Look to the Review Crew to answer that question and more in the coming months.

A floating camera will let you view from anywhere on the field.

Each batter has his own "sweet spot" within the hitting square.

Reckin' Balls

Not As Destructive As The Name Implies

A surprise game announcement from developer Acclaim Studios, Reckin' Balls is a quirky Nintendo 64 title that combines racing and platform elements, then wraps them into a cuddly package.

Designed with simplicity in mind, up to four players can choose between eight different balls that include a Jack-O-Lantern, an Iguana, a Space Alien and a Ninja (there are also an additional eight secret ones) to race on over 100 tracks in 30 differently themed environments. The 3-D raceways are complex, but simple to navigate—as long as you avoid the obstacles along the way. The goal of the game is to reach the top of each track by picking up useful weapons, and speedily using a grappling hook to pull yourself up to the next level of the track. This hook can also be used to grab and slow down your opponents.

Acclaim Studios intends to make Reckin' Balls a strong multiplayer title, and thus, plenty of options are available. There is a competitive Battle Mode with separate Battle Arenas, in addition to a Team Combo Mode and a Time Trial. There are also a few fancy bonus levels that

One look at this screen shot, and you can tell that this is probably one of the most harmless racing games ever.

can be opened up by accomplishing in-game feats.

While Reckin' Balls seems to be designed with a younger audience in mind, fun gameplay could certainly widen its appeal to everyone—and isn't that really the true test of a good game? ●

Reckin' Balls puts a strong emphasis on good multiplayer gameplay.

The goal of the game is to jump onto each successively higher ledge to get to the end of the race.

Bio F.R.E.A.K.S. is yet another interesting twist on the somewhat tired fighting genre. The game makes its mark with originality and shock appeal. And yes—this one just may shock you a little.

Eleven 3-D, in-the-round arenas featuring flashing lights, dangerous traps and multiple

platforms serve as the battleground for you and 10 other mutant fighters. Characters have a wide variety of weapons including: projectiles, guns, standard punches and kicks and the ability to mutilate. Take off an opponent's arm or leg and watch the blood pump out of the fresh wound...now that's entertainment. You may also use preset combos as well as double combos to inflict major damage. Heat-seeking missiles, grenades and even giant shredders figure into the mix as well.

We'll bring you more on this interesting title as it becomes available.

One of the more interesting characters, the "Psydown," adds a bizarre flavor to the game.

This first-person perspective is an interesting, if not quirky option.

You'll notice this fighter has just lost her left arm, yet still continues to fight. What passion!

Mike Piazza's StrikeZone

Can Piazza Match Up Well Against Griffey?

inevitably, one of the toughest baseball diamond match-ups of the year will not be fought in a stadium, but rather in stores between Mike Piazza and Ken Griffey Jr. on the Nintendo 64. Adding irony to the contest is that some of the people that created the excellent 16-Bit SNES version of Griffey years ago are now at GT Interactive making StrikeZone. Funny how the game industry works.

With plenty of serious baseball simulations on the way, the makers of StrikeZone have opted to create a realistic baseball game with an arcade flavor. There are plenty of exaggerated elements (super-fast pitches, exaggerated plays, and incredible light-trailed hits and home runs) that the developers hope will give this 3-D baseball game a unique swagger.

Eccentricities aside, StrikeZone will be packed with options to keep baseball purists happy. A Simulation Mode will be included in the game, in addition to full team drafts and

A simple pitching/batting interface makes StrikeZone easy to jump into.

management (create, trade, sign players). Wanna-be general managers and number freaks should have plenty of fun sifting through the 50 categories of "by-

the-book" player statistics.

Certainly, by adding arcade elements to a baseball simulation, StrikeZone is attempting to cater to a wide variety of baseball tastes. Hopefully, when it's finished, it will play well from both sides of the fence. ●

In Sega News...

It's all beginning to wind down in Saturn land, with only a trickle of new releases scheduled for the remainder of '98, and literally zero third-party support outside of Working Designs with their April release of *Maqic Knight Rayearth*. It's too bad things worked out the way they did for Sega, because there are some truly great games on the Saturn, and with the proper marketing, it

It's time to reward Saturn fans for sticking with Sega all the way. How about a translated *Dragon Force II* for the American audience?

could've done so much better here in the U.S. With all eyes on their upcoming "super system" that's in the works (which may be unveiled in March at the Tokyo Game Show, or at the latest E³ in May), Sega needs to do the best they can to keep whatever Saturn owners are left happy. If that means porting over games like *Phantasy Star Collection*, *Shining Force III* parts 2 and 3, *Dragon Force II* and more, then so be it. It's no secret that Sega has upset quite a few fans in recent years, so at the very least keeping their remaining supporters satisfied until the new machine arrives is an absolute must.

The Zombie Smash Comes Home

Sega Enterprises, Ltd.	Light Gun	N/A	
Web Address: www.sega.com			

House of the Dead

Games with horror themes have always been popular. Why, look at the success games like *Resident Evil* (and its sequel), *Splatterhouse* and *Castlevania* all share. Since this is the case, it's no surprise that the horrific arcade game, *House of the Dead*, is making its way home to the Saturn.

For those of you not familiar with the arcade version, *HotD* allows you to control one of two special agents as they search for a colleague in a very bizarre mansion that doubles as a laboratory. While you make your way through the joint, guns a-blazin', you're attacked by an array of different monsters ranging from flesh-eating zombies to insane monkeys and every creature in between.

With all of these beasts running about, it's smart to keep lots of ammo in your chamber and a keen sense of aim. In fact, well-placed shots can send undead limbs a-flyin' and leave holes the size of grapefruits where zombie brains used to be.

With all of the shooting that will undoubtedly be going on, be mindful of innocent scientists who may be running around, hiding

from zombies. In some cases, instead of a giant slug coming around a corner, it'll be a harmless scientist who just stopped by the lab to pick up his/her check. If you shoot them, you lose a point.

Isn't this always the way? You're just minding your own business and some zombie thugs start throwing barrels at you. Boy, oh boy...stupid zombies.

Since this version of *HotD* is on the Saturn, you can adjust the game's parameters, including how many lives you get, crosshair style and number of continues. On top of these options, this *HotD* has a couple exclusive modes of play.

In the Saturn Mode, you can go through the game in a whole different way from the arcade, and have one of six characters to do it with. These characters feature unique attributes like health, chamber storage, aiming ability and reload time. For example, a character who has five health points and a powerful gun may only be able to hold two bullets in

the clip at a time. In addition, there's a Boss Mode where you can take a crack at the game's Bosses to better find their weak points.

We should have more info when we get an American beta in that's more complete.

Now kill the zombies to get back at them for that barrel thing.

Blowing away the undead hasn't been this much fun since RE.

Panzer Dragoon Saga

Sega's Answer
To Final
Fantasy VII

We promised you an update on this hot new RPG, and here it is. As we've said before, Panzer Saga is a role-playing game that takes place in the mystical Panzer universe (a sort of Mad Maxish futuristic world where wars are fought with ancient biological weapons). A long and well-rendered intro will immediately immerse players in this world.

When the game starts, you'll find yourself walking around in a 3-D world. To perform actions, you must pull up a targeting sight. You can move this sight over objects to check them out (a twist on the old cursor-

over-the-hot-spot gameplay of graphical adventures like Discworld).

After a while, you'll encounter your mount: a friendly dragon who saves you from certain death. From this point on, you can fly around anywhere you want (but you still use the targeting sight to look for items or activate switches and such).

The early levels are pretty straightforward. This means the game follows a linear plot line (yes, you have complete freedom of movement, but the game guides you along where the programmers intend you to go). Throughout your travels, in-game cinemas and full-

motion video will weave the story together, like in Sony's Final Fantasy VII.

Parts of the game play on foot, sans dragon, in a third-person perspective.

where you want (but you still use the targeting sight to look for items or activate switches and such).

The early levels are pretty straightforward. This means the game follows a linear plot line (yes, you have complete freedom of movement, but the game guides you along where the programmers intend you to go). Throughout your travels, in-game cinemas and full-

motion video will weave the story together, like in Sony's Final Fantasy VII.

Also, as in most RPGs, fights will interrupt your adventure. Panzer Saga's battle engine combines elements from the previous Panzer games with a unique half turn-based, half real-time system. Once an encounter starts, a three-step time meter will begin to charge up. When the first level is full, you can perform a simple action (like shoot your carried weapon). You can wait longer, however, for the second or third step. This will give you access to the more powerful attacks, like the dragon's berserk powers (which cost magic points and is earned through level raises). The downside? While you're waiting for the time meter to fill all the way up, you're susceptible to enemy attacks, which won't wait for you.

This is no ordinary crossover of genres. Panzer Dragoon Saga is a unique RPG with never-before-seen gameplay ideas. Fans of the two shooter/action games in the series should feel right at home with this spin-off. It has the same high-quality music, graphics and ambience Panzer I and II have. If you're looking for something different and epic, keep an eye out for this one.

Phantasy Star Collection

All four Phantasy Star games—from the Master System original to its three 16-bit sequels—are being rereleased on the Saturn, with some nifty extras and enhancements.

Some text improvements will only benefit Japanese players, but the new ability to walk at twice the normal speed (it's an option) is very cool for any fan of the games. There are some other minor improvements too, like the ability to save to four different slots in PS3 (so you can work toward each of the four endings separately), but overall these games are more or less the same as they were when you first played them many years ago.

In addition to the games, PSC will feature a Gallery Mode which has several pieces of artwork from the games, as well as some arranged music, commercial clips and more.

Is it too late for PS Collection in the U.S.? Unfortunately it seems that way, but we can always hope. After all, what better way could

Ahh, Phantasy Star. The classic series returns for one more go-round on the Saturn. Could PSV be on the way?

Sega treat their fans who stuck with the Saturn to the very end? Look for it in Japan in April.

In Sony News...

The PlayStation is off to a rocket start in '98, with quite a few big games already available or coming very soon (we've had more "B" and "9" ratings for PS games in the first four months of '98 than we had nearly all last year!). REZ has broken nearly every early sales record imaginable (380,000 copies in one weekend is no small task!), while games like Alundra and Final Fantasy Tactics have been enjoying brisk sales as well.

With numbers like these, don't expect to see any new Sony hardware for quite some time. The PS hasn't even peaked yet, and the best years are still to come. Instead, look forward to an alarming amount of great games in the next year or two, not unlike '93 and '94 (the glory days of the SNES and Genesis). Isn't it exciting?!

The Ultimate Racing Game

Gran Turismo

Publisher/Developer	Players/Genre	% Done	Release
SCEA SCEI/Polys Ent.	1-2 Racing	70	May 1998
Web Address: www.playstation.com			

First previewed back in EGM #102, Sony's Gran Turismo (the "Real Driving Simulator"), has finally been released in Japan. In its first month of availability, the game sold over 1 million copies, making it the hottest-selling game of the holiday season in Japan. Much to our surprise, we've already received an early U.S. version of GT, complete with some minor "improvements," and needless to say—we're impressed.

Gran Turismo was developed by Polys Entertainment, the same folks who brought us the Motor Toon Grand Prix games. But while the Motor Toon games provided more of a cartoony, arcade-style

In terms of overall depth, Gran Turismo could easily be dubbed the "Grand Canyon" of video game racers. This baby's got it all.

In GT Mode, you start out at home with only a few dollars and a dream. Go out and buy your first car!

Honda, Mitsubishi, Toyota, Aston Martin, Chevrolet and more. The U.S. version is likely to have less cars, due to licensing differences between Japan and the U.S., but the end total is still expected to be more than 100. In addition, you can customize and upgrade your cars to the nth degree in the Gran Turismo Mode, a feature that will undoubtedly win over any hard-core racing fan. The possibilities are truly endless, and chances are if you can do it to your car in real life, you can do it in GT. Heck, you can even get your car washed.

GT is split up into two main modes of play—Quick Arcade and Gran Turismo. The Quick Arcade Mode is (obviously) a more arcade-style mode, with Single Race, Time Attack and two-player Battle options. Doing well in the Single Race Mode will net you "Goodies" (like in Motor

Toon) which open up some cool extras in the game. The heart of GT, however, lies in the aforementioned Gran Turismo Mode. You can buy (and sell) new and used cars (and rare special editions) at any of the manufacturers on the Central Map Screen. These cars can then be used in any of the various events (GT League, with four different Cups, Special Events, Time Trials and Spot Races) to race for cash. In order to participate in certain events though, you'll need one of three driver's licenses (each progressively more difficult to earn) which can be obtained by taking special driving exams that test your ability to corner, brake and more. Obviously, this is one racer that's going to keep you occupied for a good, long time.

Gran Turismo is due out in May, and will support Sony's new Dual Shock vibrating analog pad, which is likely to be released the same time as the game. If you're a racing fan, you owe it to yourself to check this out—GT is going to be the racing event of 1998.

Two-player simultaneous play is supported via GT's amazingly smooth Split-screen Mode.

Blasto

Captain
Blasto to the
Rescue...
Finally

Game delays can be frustrating for us gamers. After seeing a game in *EGM*, thinking it's coming out sometime soon, and then hearing that it has been pushed back another six months, you may think the game isn't worth the wait. Well, in certain instances game delays can mean a more solid product than original versions. In *Blasto's* case, this is exactly what happened. But even with that, is the game all it's cracked up to be?

The game is set in a dramatically shaded, 3-D alien world. This 3-D world is then broken up into 11 or 12 unique environments. Some areas include a space port, a desert and an alien base. As Captain Blasto works his way through each of the different and thankfully lengthy environments, he encounters more than 30 different types of evil Bosc (the main bad alien dude) henchmen. These rather scrawny (but increasingly dangerous) troops do their damndest to drop the daring Blasto.

The demise of *Blasto* won't be an easy task, though, since he has plenty of weapons and moves to combat Bosc's forces with. If he's not grappling onto the edge of a platform, working his way to a power-up, he's pulling out his flamethrower and toasting some alien hide. Other upgrades include heat-seeking missiles, a jetpack, different lasers and a handy pistol-whip technique you can use when you're close enough to a green-faced goon. When the Review Crew gets their hands on this one, we'll let you know if it has been worth the wait.

Phil Hartman's comments gives Blasto his take-no-stank attitude.

How could anyone, especially a curious gamer, resist the temptation of a button that says, "Do Not Press!"?

Hot Shots Golf

Hot Shots Golf is a realistic game presented in a fun arcade-like manner.

A couple years have passed, and the slate of golf simulations on 32-Bit

console systems has been consistently unimpressive. Perhaps what is needed is a golf game that doesn't take itself so seriously. Enter *Hot Shots Golf*.

Originally created in Japan (where it sold more than a million copies), *Hot Shots Golf* is a cute game that stresses fun and simplicity over mind-numbing realism. However, this is not to say that there is no merit to the game as a simulation. Although shot power, ball spin, wind and selecting the right club are all important, *Hot Shots Golf* tries to present them in as painless a way as possible.

The feel of the game is lighthearted, as illustrated by the cartoony golfers and the minigolf holes that are also available. Packed with features, *Hot Shots* allows players to wage bets on holes, train their

golfer, and use six different play modes. One of these is a "VS Mode" that allows you to "acquire" your opponent for play after you beat him or her (there are so in all).

With unique features, and the strength of over a million overseas sales behind it, *Hot Shots Golf* could be the game that makes console golfing fun again.

Awwww... poor widdle golffy girl not like her score? Deal with it. It's called life.

As an added bonus, *Hot Shots* has a Miniature Golf Mode.

Silver Star Lunar: Story Complete

The Sega CD Epic Gets A Facelift

As you can see, there is a border on the anime sequences, but it's much smaller than on the Saturn version.

The upgraded graphics are beautiful, with lots of parallax and an extremely detailed, colorful design.

The battle system has been refined so that it plays out more like it did in Lunar: EB (which is a good thing).

Lunar: The Silver Star for the Sega CD was one of the best 16-Bit RPGs ever released. Unfortunately, because so few people owned Sega CDs, it didn't quite get the publicity it deserved. Now the 32-Bit update which was originally planned for Saturn is coming to the PS courtesy of Working Designs, and it's looking hot.

Lunar: Silver Star Story Complete features much-improved graphics and sounds over the original game, not to mention over 45 minutes of near-full-screen animation (it's two CDs now!). The video quality is much higher than that of the Saturn version (only released in Japan), which had a larger border and poor compression. There are quite a few actual gameplay changes as well. Most noticeable is the fact that there are no longer monsters in the overworld, and in dungeons and other areas, you actually see the monsters on the screen before running into them. Battle sequences are more in tune to Lunar: Eternal Blue (the awesome Sega

CD sequel), with smarter enemies and a better movement system that makes for more strategic battles.

The most intriguing part about Lunar SSS is in the story changes. Besides many areas being altered a bit (like ol' Black Rose St. in Meribia), some areas are now completely gone (the Lighthouse comes to mind), while new ones have surfaced as well. In the original, Luna stayed behind when Alex and co. got on the boat to Meribia—but this time, she actually comes with them, and from there things begin to branch out a bit differently, for an almost entirely new experience.

Working Designs is already hard at work on Lunar SSS, and expects to have the game on store shelves in August, just three months after the Japanese release. Check back next month when we go more in-depth on this potential blockbuster in our huge RPG blowout.

Despite looking much better, the overworld has been shrunk a bit and no longer has random battles.

NBA ShootOut '98

Better Late
Than Never

Arriving uncharacteristically late in the basketball season, Sony is finally ready to give gamers a good look at NBA ShootOut '98. Judging from this preview version of the game, the extra development time has definitely been well spent.

ShootOut '98 already looks better and plays smoother than the previous game. This is in part due to the numerous new player animations (now sporting 30 different dunks) added to the game, but even more so because of the technical improvements to the polygonal engine. Animations are faster, gameplay is speedier, and the transitions between motion-captured moves are much more fluent, bringing ShootOut '98 closer to mimicking NBA action than it's ever been before.

Sony Interactive also continues to add features to their game to make it cater better to the die-hard basketball fan. Building on the success of the "Icon Passing" system, ShootOut '98 also sports "Icon Cutting." This new system allows players to control cutters, screens and double teams at will. The play-book is also a little beefier, containing nine new offensive and four new defensive plays.

With these said enhancements, NBA ShootOut '98 has a legitimate shot to dethrone EA's NBA Live 98, currently the best console basketball simulation on the PS.

Hakeem Olajuwon adorns the package, and thus you can bet his stats will be juiced.

Tons of new dunks have been added to NBA ShootOut '98, and you might also notice that Shaq is now included.

Road Rash 3D

The feeling of asphalt scraping the skin off your knees is about to return, except this time it's in true 3-D. Yep, the Road Rash series finally takes the plunge into the 3-D pool in Road Rash 3D for the PlayStation.

Besides the obvious graphical changes, the game offers a system of interconnecting roads for you to race along. Upon completing one section, a new stretch of road is loaded in front of you so you can effectively continue along the same highway (the game apparently gives 50 miles of road).

Of course, on your way there the game lets you have run-ins with rival gang members (and their interesting outfits) at high speeds. The punches, kicks, whips, chains and overall mayhem of previous Road Rash games is retained, to keep things interesting.

As you watch your enemies flip over their bikes, and land on their skulls, you'll enjoy their fluid animation thanks to Electronic Arts' motion-capture technology. Tumbles, slides and other bodily movements look completely realistic,

proving again why there's no need to try this stuff at home.

Unlike its predecessors, Road Rash 3D features a realistic physics engine. When your bike slides during a sharp turn, it behaves according to the properties of that particular curve. And you'll be able to try out those physics with a good number of bikes in four different classes.

Is it just us, or is the guy on the motorcycle to the right wearing some sort of weird, black-leather brazier?

Triple Play 99

EA's Baseball Game Strikes Early

In an effort to get a running start on the competition and the new baseball season, EA is preparing to launch the newest edition of their Triple Play series earlier than ever before. Hopefully, this emphasis on timeliness won't hinder the development on the game. Judging from the early playable version that we have, it doesn't appear to be a problem.

Fans of the Triple Play series will immediately feel at home with the 99 edition. Some of the biggest changes include a faster interface and more intuitive controls. It seems EA is trying to make the game easy to control, while not sacrificing any of the realism or options the game has become known for. While some of this tweaking is a c o m p l i s h e d through the streamlining of options, other parts of it are done through incredibly customizable skill levels.

Many aesthetic enhancements have been made, mainly

All the stadiums are rendered in intricate detail.

ly achieved by the addition of new player animations (throw from the knees, running throws and a jumping throw) and smoother transitions between them. EA is also quick to point to their oddly named "Living Stadium Sound," which basically amounts to a lot of crowd chatter, two-man play-by-play commentary and random ballpark announcements.

Barring any huge gaffes, this array of subtle improvements to last year's solid (but not without flaws) baseball game should propel Triple Play 99 to the upper echelon of PlayStation baseball games. ●

Intelligent cameras attempt to give you the best field of view.

Forsaken

Isn't this always the way: A fusion experiment goes horribly wrong, kills pretty much everyone on the planet, and you're one of the lucky few who survives. Now all you have to do with your free time is go around and take what riches are leftover. Problem is, you're not alone.

The one-player game puts you in the cockpit of one of 16 bikes (each with its own driver). The bikes have various attributes like speed, turning ability and firepower. As you play through each of the 15 cavernous, subway-inspired levels there are plenty of obstacles and enemies that get in your way. Fortunately, that's when your cool-looking weapons come into play.

With over 20 weapons to find, blowing the enemy to bits shouldn't be much of a problem. Whether you use the heat-seeking missiles (complete with a camera mount) or the gravity-altering warheads, the result is the same: a dead bad guy. In addition to the one-player game, there's a Split-screen Two-player Mode for some hardcore deathmatch play. There are eight multiplayer levels to choose from.

All of the aforementioned features combined with a speedy frame-rate and incredible, colored lighting and huge explosion effects make Forsaken on the PlayStation a game to watch out for.

Forsaken has some of the nicest-looking graphics on the PS to date.

Tomba

A Different Kind Of 2-D Platformer

There can never be enough original 2-D platform games, and it looks like Tomba is well on its way to becoming one of those. How else could you describe a game whose plot involves trying to rescue a keepsake from a band of evil pigs?

Goofy plot aside, Tomba is a side-scrolling platform game that meshes 2-D and 3-D graphics together in a slick, colorful package. Your character freely moves throughout the foregrounds and backgrounds of levels, and when the terrain gets rough, he can often scale obstacles to get himself out of trouble. 3-D ledges, obstacles, buildings and plants sway, move and react to Tomba's movements as he climbs about the level, giving the game a distinct look.

Unsurprisingly, the combat is very strange—Tomba dispatches his enemies by leaping onto their backs, then somersaulting them into submission. Feisty opposition can be first stunned with Tomba's mace before he does the deadly pounce. There are plenty of different baddies to get rid of, and doing so often rewards Tomba with a variety of fruits and items.

It's good to see more 2-D platformers on the PlayStation. Such revelations can only please old-school gamers who wish to see such a loved genre revitalized.

Jumping on items then bashing them provides plenty of goodies.

Tomba is a beautifully vivid platform game that deftly combines 2-D and 3-D graphics.

Return Fire 2

The sequel to the console hit is finally coming to the PlayStation in late summer/early fall this year. The main difference between this one and the first is that Return Fire 2 is in true 3-D.

So does the flip over to an "in-the-action" view work? It's too early to tell, but what we do know is that this sequel puts you in the driver's seat of one of several different vehicles, in an array of locales. The vehicles include: A tank, a jump jet, an attack chopper and a good, old-fashioned Army jeep. Terrains range from the hot sands of a desert, and most others in between. Also expect a Head-to-head Mode where you can blow up your pals. Keep an eye in EGM for updates.

Return Fire 2 has a revamped look and a whole new style of play compared to the first one.

the final version is released in late April/early May.

Web Address: www.workingdesigns.com

Elemental Gearbolt

The story unfolds through between-level anime sequences that are extremely well done.

Working Designs' next PlayStation title came as a bit of a surprise to us. No, it's not an RPG or a shooter. It's not even a strategy title. Actually, it's Elemental Gearbolt, the Sony Computer Ent. (of Japan) light-gun game that was recently released in Japan.

Elemental Gearbolt does actually incorporate some RPG elements to its play, but obviously the base of the game is hardcore shooting action. There are several stages of play, broken up by anime sequences that explain the story. In each stage, the object is to (obviously) kill as many enemies as possible before they kill you, while freeing special fairies that are trapped inside green crystals throughout each area. At the end of a stage, after defeating one of the game's many awesome Bosses, you have the option to use your points toward your high score or your experience level (which, when raised, allows you to grow stronger). Your character (or characters—you can play with two people at once) can use three different weapons, each with its own unique abilities.

From what we've played of EG so far, we're quite impressed. The game just oozes with atmosphere, from the incredible graphics to the mystifying soundtrack. The game supports Namco's GunCon (as well as any other licensed PS light

After each level you can adjust your reward to get either more bonus points or more experience points.

gun), and will also support Sony's Analog Pad for those without guns. Watch for it this April—it's going to be another hot WD title.

VR Baseball '99

Attempting to improve on last year's 3-D polygonal effort, VR Baseball '99 promises to have a faster frame-rate, better graphics and smoother gameplay.

New, more detailed player models coupled with a larger library of motions should give the boys of summer a more realistic look overall. In addition, stadiums have been

retooled to display richer colors and a deeper 3-D appearance. Five play modes include: Exhibition, Season, Playoff, Home Run Derby and Batting Practice. Look for create-a-player with a custom uniform option as well as updated rosters for the '98 season. As the team manager you will also be allowed to

trade, sign and re-order rosters as you go along.

There's no doubt that the baseball genre has become very crowded in the last year. Let's hope VR Baseball '99 can make a strong showing among the heavy-hitting competition.

A game developed by people with racing in their blood.

Power Boat Racing

The varying environments make for some interesting, watery encounters.

When virtually every other type of sporty video game has been done, there isn't much left for a company that wants to make something new and different. This could very well be why Interplay is releasing Powerboat Racing in their VR Sports line.

The game is pretty straightforward. You control one of many powerboats, in both Monohull and Catamaran styles, on nine watery tracks. The tracks are set in major cities in different parts of the world. To throw a little action into the mix, obstacles like great white sharks, logs and floating cabs litter the waterways. Of course, the competition, whether it's the game's AI players or one of your pals, offers intense play.

As you make your way down each course, weaving in, out and around walls and tunnels, your second lap may have you stumbling from first to third place. While racing, some levels will actually change slightly in design. What was a straight-away before is now a tunnel veering off in another direction (then reconnecting with the original course).

When you make tight turns or splash down from a ramp, you might just get the feeling of really being in a boat. These sinking feelings would be due to Powerboat Racing's real physics model that calculates speed, mass, motion and resistance of your craft in the water.

The game's still in its early stages, but even now the framerate is on the speedy side.

WWF War Zone

In case you haven't noticed, pro wrestling is a hot ticket right now. WWF War Zone is the latest contender from Acclaim.

War Zone is a 3-D polygonal wrestling game. It has 13 selectable wrestlers (and a few secret ones), including Mankind, the Undertaker, Shawn Michaels, the British Bulldog and Bret Hart (who has moved on to the WCW—when the licensing deal was first sealed, Bret Hart was still with the WWF). War Zone will also allow you to create your own character. You can customize everything, from the face and build to the colorful tights. Each of the ringed warriors

will have over 60 moves (some common, some signature). WWF War Zone has several modes of play: Training, One-on-one, Tag Team, Cage, Ladder and Weapon Matches. The game, unfortunately, will only support two players. "There aren't enough multitaps out there—only about 20,000 or so—to make it worth it," said Thomas Bass, marketing coordinator at Acclaim. "We would have to delay the game another month to put in four-player support." Too bad.

Astrod 2000

It's an age-old rule: Every yesterday's hit must be updated for today's systems. Now the arcade classic Astrod is finally getting its due.

The basic premise hasn't changed from the 1981 hit. In Astrod 2000, you must save our world from impending doom by destroying huge astrods that are bearing down on our planet. Be warned: Shooting big astrods will only break them up into many smaller astrods. Small astrods are just as dangerous as big ones but are much harder to hit.

Astrod 2000 offers many different ships to choose from. You can pick the fast and agile Stryker (which is a modern version of the original ship, and bears an uncanny resemblance to the old Star Trek badges worn by the Starfleet members). Or you can pick the hulking Ramrod, which is heavy on armor and power but light on speed and mobility. You can also customize your ships by purchasing various upgrades. By completing each mission, you can earn credits to buy better armor, engines or weapons (like the Astrod Drill—useful for taking out astrods from behind).

This game has gorgeous hi-res graphics with all the trimmings—60 FPS action, light shading, etc. It's in complete 3-D with full freedom of movement. If you want to learn more about this hot title, check out the arcade files at Wet-Mat.net.

Batman & Robin

Something a
Little Different,
Old Chum...

It's no secret that the pages of nearly any comic book, or the scenes from most action movies can be transformed into the good guys, bad guys and story line of a video game. The hard part is to take either of those entertainment vehicles and make them into a *good* game. *Batman & Robin* from Acclaim could very well be one of those reconfigurations done well, but it's too early to say for sure since we don't yet have a playable version.

We can pass on what we know about the game though. *Batman & Robin* puts you into the crime-fighting shoes of either (you guessed it) Batman or Robin. Of course, the game based on the big-screen movie wouldn't be complete if you couldn't control the ever-luscious Batgirl. On top of the good guys, look for plenty of Mr. Freeze's cryo-chumps and Poison Ivy's screwed-up plant zombies to take down as you work your way through the game.

You should be advised that this one isn't just about fighting though. Besides the standard use of various kung-fu techniques and "wonderful toys," the Caped Crusader and his chums can drive around in the Batmobile (as well as other vehicles from the film) and do some hardcore investigating. Making a stop at the Batcave will help decipher some of the clues you pick up in Gotham City. Plus, since the game incorporates adventure into the action, you can change characters at any point during the game.

A *Batman* game wouldn't be a *Batman* game without thugs.

StarCon

The *Star Control* franchise has long been revered as one of the best action/adventure series of games on the PC. In an effort to tailor *StarCon* for the PlayStation, Accolade has placed an emphasis on combat and latest installment in the long-running series.

Old-school *Star Control* fans needn't worry, as they will find the game's 3-D graphics as recognizable-*StarCon* has many of the aliens found in previous adventures. Players can assume control of a host of races, and then battle rival Alliances in 3-D combat to earn promotions, gain technologies and upgrade ships. Two-player competitive and cooperative battle will be available, which has been a cornerstone of past *Star Control* games.

Taking this series into a different direction is a bold move, and while it may make some fans a little weary initially, Accolade would easily sway them if the new-look *StarCon* turns out to be a solid game.

Speed Racer

This game is very much a slice of the original cartoon it came from. An extended intro complete with scenes and music from the old series sets the stage for a healthy dose of *Speed Racer* nostalgia.

Reminiscent of *Rage Racer*, *Speed Racer* offers three courses complete with expandable tracks and pretty scenery to race through. Gradual shifts from day to night are also present and add depth to the unique racing environments. The "Mach One" is equipped with its trademark gizmos: the Auto Jack (jumping), Frogger (underwater maneuvering), Evening Eye, Defender, Chopper (personal favorite) and the Belt tire. These items come in handy on the secret shortcuts and alternate routes sprinkled throughout the courses.

Cutting down a lane of trees with the Chopper or driving underwater using the "frogger" option is all in a day's work for this high-speed racer. Fans of the series as well as speed freaks should enjoy this upcoming driving title for the PlayStation.

Shadow Madness

We don't have much more than screenshots and a story line on this upcoming RPG from Crave Entertainment entitled *Shadow Madness*. From what we gather, the game puts you in the adventuring shoes of Stinger as he searches for answers in his dying world. A strange disease is spreading over his land, driving its victims into insanity and eventually killing them. As hundreds die from the disease, and strange beasts carry it from town to town, Stinger meets up with other warriors in an attempt to stop this destruction. As you visit pre-rendered areas, and more magic, weapons and technologies are found, the mystery unfolds. We'll have more info on this one as it progresses.

Hudson Soft Hudson Soft	1 Strategy	100	January 1998 Japan
----------------------------	---------------	-----	-----------------------

Web Address: www.hudson.co.jp

Nectaris

What's with all the remakes these days? Some of you (most of you, I hope) may remember the classic TurboGrafx-16 strategy title, *Military Madness*. The game drew a fairly large cult following, but never saw a sequel here due to the untimely demise of the TG16. Now, Hudson is re-releasing the game (known as

Nectaris in Japan) for the PlayStation with a major graphical revamp (it's completely polygonal now) and many additions to play. Not only are there more maps (besides the 16 original ones, there are a total of 88 new ones!), but you can make your own ones with the new Construction Mode. Hudson has also hinted that a new Two-player Mode is hidden away in the game. Sounds cool!

Final Fantasy V

We all knew it was going to happen sooner or later. With last year's rerelease of *Final Fantasy IV* for the PlayStation in Japan (our *Final Fantasy II*), it was just a matter of time before Square announced a PS rerelease of FFV. Well, here it is. Like FFIV, the only addition to the game is the all-new opening and ending FMV sequences (what we've seen so far looks fantastic), but still—the game itself, despite being 6 years old, is incredible.

The characters in the cinemas are reflective of designer Yoshitaka Amano's beautiful style.

Final Fantasy V is widely believed to be the best all-around game of the series, despite the now-dated graphics and sounds. The gameplay is similar to FFIV and FFVI (our II and III, respectively), but the core of it all is the Job/Ability system (which is now used in *Final Fantasy Tactics*, ironically). By finding special pieces of the four elemental Crystals, your party can obtain the souls of past warriors ("Jobs") and utilize their talents in battle. By learning their Abilities, and then mixing and matching with others, you can customize your team in an unimaginable number of ways.

With a FANTASTIC story, great gameplay and equally amazing music, it's quite a surprise that this episode of the FF series never made it to the U.S. The PS version may not compare to FFVII in overall aesthetics and presentation, but the gameplay is unmatched, and no RPG fan should have to miss it. We strongly encourage Sony, Square—ANYONE to bring this title to the U.S. (market it as a "classic" or something). If you're a fan, definitely write to the above companies—this is probably the last chance of a U.S. FFV release we'll ever have.

Warning: This is a preview of a Japanese title that may or may not be released in the U.S. It is designed to run on a Japanese system. Import at your own risk.

ArCADE

PREVIEWS

- Harley Davidson & L.A. Riders
- Time Crisis 2
- Hyperdrive

In Arcade News...

A lot of cool new titles debuted at the ATEI (Amusement Trade Exhibition International) in England this year. Worthy games seen at the show, but not previewed in this issue include: Namco's Motocross Go (dirt-bike simulator) and Rapid River, Sega Rally 2 (which runs on two Model 3 boards and controls awesome)

and Konami's long-awaited Racing Jam on Cobra hardware. This is a taste of what will be seen at ASI (Amusement Showcase International) '98 and other shows this year. Other longshot hopefuls for upcoming shows include Street Fighter EX 2 (shown above, featuring BLANKAI), Street Fighter Alpha 3 and Namco's follow-up to Soul Edge called Soul Caliber. We'll give updates on these hot sequels as we receive new information.

More Than Your Typical Motorcycle Racing Game...

Harley Davidson & L.A. Riders

The first game to utilize Sega's new Model 3 Step 2 board is also a game that commemorates Harley-Davidson's 95th anniversary. Harley Davidson and L.A. Riders allows you to choose from five classic bikes: the FLSTF Fatboy, FL Panhead 1948, FXDWG Dyna Wide Glide, XL 1200S Sportster 1200 Sport and a Police Motorcycle. The controls on the bikes are simple enough and set up quite a bit like a real ride. The gear shift buttons are located on the left handle bar above the handle grip. There are two brakes: a hand brake located on the right handle bar and a foot brake just above the lower-right platform.

As far as gameplay is concerned, the objective is simple enough: to complete the number of checkpoints in the allotted time. The distance between checkpoints determines how much time you're given. The player must find the shortest routes while collecting Harley points along the way. Successful completion of all checkpoints will get the player on the ranking board, provided you have more points than the lowest-ranking player on that machine.

Harley takes place in a perfect CG rendering of Los Angeles. The game starts you off at the bikers' shack, where you choose your ride and transmission. At this point, the computer randomly selects the first checkpoint you must reach. If you reach the first check, the computer will select your next destination and so on (along each route are bonus point icons: including green Harley logos that vary in value from 1,000 to 10,000 points—collecting these icons is what ultimately gets you on the leader board).

The key to HD & L.A. Riders is the unpredictability of the computer picking out your checkpoint destinations. One game course may be from the biker shack to LAX to Beverly Hills to Santa

Monica to the 405 Freeway. The next game course may be from the biker shack to Beverly Hills to LAX

Publisher/Developer	Players/Genre	% Done	Release
Sega of America Sega of Japan	1-4 (via link) Driving	100	Now

Web Address: www.sega.com

One of the many areas you have to traverse is LAX Airport.

to the 110 Freeway to Santa Monica to the 405 Freeway. The checkpoints themselves have an element of surprise, too. Sometimes the points are not where they were in a previous game. There are also shortcuts in the game where you can make up some time and find more points.

The two-player experience is interesting as well. Players start at the same location and head for the same checkpoints. At any point, the players may break off and choose the path they feel is the quickest route and has the most point icons along the way.

Harley Davidson and L.A. Riders is an excellent title to launch Sega's new board with. The game sets a new standard for all future simulations.

HD & L.A. Riders offers a perfect CG rendering of Los Angeles.

Time Crisis 2

An Interactive
Two-Player
Gun Game

The best gun game to date is arguably the original *Time Crisis*. It offered all the graphics and fun of the *Virtua Cop* series at a faster pace and made reloading strategic with the use of a foot pedal. This innovative feature not only reloaded your weapon, it also made you duck for cover to avoid incoming fire (but because of the time limit, you couldn't hide forever). The upcoming sequel has the same foot pedal feature but also gives you much, much more.

Time Crisis 2 offers a new innovative feature of its own: a dual monitor two-player cabinet (you can still play a normal one-player game of course, but the two-player option is much cooler). When two people play *TC2*, each has his or her independent view of the action. At certain times, you'll even take separate paths and catch enemies in a crossfire! Yet another feature offered only on Namco games (including the ever-popular *Point Blank*) is a recoiling pistol. Nothing quite makes shooting bad guys more realistic.

TC2 has four stages including a special mode where you are given a machine gun to help take down tough targets like tanks. Yet another stage is a train where you and your partner chase down and have a firefight with a Boss. You eventually make your way to the roof where the baddie catches a ride with a killer gunship. *TC2* is also very cinematic, with a really cool story line; it's a definite improvement over the original in this respect. Look for it to hit second quarter this year. ●

Hyperdrive

What the *Hyperdrive* team is trying to capture is essentially "Daytona in space"—a futuristic lap-based racing game with an emphasis on flying and banking.

Hyperdrive has three vehicles to choose from, one for each difficulty level: Beginner, Advanced and Expert. The beginner ship handles very much like a car, with a strong "auto-pilot" to keep you level to the track. The expert ship allows fast, steep banking and power-slides.

The controls are a far-advanced version of the *Star Wars* (the *Vector* graphics classic from the '80s) X-Wing grip, with handles that move forward and back (to raise your vehicle up and down) as well as left and right. The lower you are to the track, the faster you will go.

Hyperdrive's three tracks are very diverse and offer an awesome view of Martian landscapes. The Beginner track is essentially an "Indy 500" in outer space

near Earth's orbit, a simple oval. Advanced is an asteroid mining facility. It introduces basic track obstacles that require flying up/down and banking left/right. Expert is a deep-space outpost. It includes corkscrews, ramps and vertical drops. There will be hidden shortcuts in the game, and the tracks include completely interactive background objects. For example, in the asteroid mining facility, debris floats onto the track and hits your craft (this will not hinder gameplay, however, it's only there for a cool show).

Hyperdrive utilizes the same 3DFX system as Midway's arcade hit, *NFL Blitz*, but with a faster processor.

The game will be a stand-alone cabinet or will offer a minimum of four linked machines. *Hyperdrive* will debut at this year's ASI show in Vegas. ●

All of the vehicles in *Hyperdrive* have a NASCAR look and feel to them. Unfortunately there are no weapons in the game.

**IN THIS CITY, THERE IS NO
RUNAWAY CRIME RATE...**

TEKKEN

TRIUMPHANT

By Crispin Boyer

Think of it as a math problem. How do you cram a System 12 game—Namco's arcade version of Tekken 3—into the PlayStation, a console based on System 11 hardware? Since System 12 gear has more RAM than the PlayStation and can display higher-resolution textures and push more polygons, Namco was faced with an unthinkable solution: the first home Tekken title that would not be better than arcade perfect.

But the Tekken 3 development team isn't about to settle for a second-rate translation of Namco's flagship fighter—and, no doubt, neither are the more than 3 million PS owners who bought Tekken 2. With a conversion time of eight months (much longer than the easier porting process of the previous Tekkens), Tekken 3 is expected to hit U.S. stores on April 30, and in Japan March 26, with its gameplay and visuals fully intact. "We don't think there needs to be a sacrifice," said Hajime Nakatani, producer of the Tekken series. "Our goal is to create a PlayStation version of Tekken 3 that will satisfy players who are familiar with the arcade version in terms of both gameplay and graphics. Needless to say, this is our biggest challenge on this project."

And so far it looks like Namco has met that challenge; Tekken 3 is right on track for a nearly flawless translation. The drop in polygon count and background detail is nearly imperceptible, thanks to coding efforts that are squeezing every ounce of power from Sony's system. "We believe we are pushing the PlayStation to its absolute limit with Tekken 3," Nakatani said.

Development on the console version began immediately after Namco completed the arcade game early last year. Other than a few personnel changes, the Tekken 3 team is the same group of artists and programmers who created the home and arcade versions of Tekken 1 and 2. This group has worked exclusively on the Tekken series, while other Namco games have their own, independent development teams. So it's no surprise then that Tekken 3 will come with all the Namco extras we've seen in the console prequels: Practice Mode, CG movies, etc. (see the Sure Things sidebar for more Tekken 3 nitty-gritty). But more importantly, we're seeing a sequel that packs improvements where they're needed the most.

So what if it's the first Tekken that's not arcade perfect. When Tekken 3 hits the PlayStation on April 30, it'll still be the best in the series.

All the Right Moves

Aside from its punched-up poly count and enhanced lighting effects, what really makes the Tekken 3 coin-op and PlayStation version superior to previous Tekkens are the tweaks to its fighting engine. The most obvious additions are the ability to side-step and the new throws made possible by this tactic. Other features are more subtle. Fighters can now perform quick recovery rolls the instant they're knocked down, or they can briefly supercharge their limbs for an extra jolt of blocking damage. Certain characters can even perform insults.

But by far the most welcome additions are the reversal blocks slipped into each fighter's already enormous arsenal of moves. One of the most common gripes about Tekken 2 was that only a few characters could perform reversal attacks. Now, all fighters have reversals of one type or another. Most common are reversal blocks which—when timed correctly—stop an opponent's attack and cause damage at the same time.

It's a given that every move, counter and combo will make it into the PlayStation version, but what about new, console-exclusive moves? "No plans at the moment," Nakatani said, "but I can't say that we won't make some changes in the end." Whether we see these extras or not, one thing is certain—fireballs will forever be off limits in a Tekken game.

"We want the Tekken series to represent only pure fighting," Nakatani said. "That's why we never planned on projectile attacks in the game."

Character Assassination

While Tekken 3 features more moves and deeper gameplay, several characters are notably MIA. Gone are the individual Boss opponents that

For EGM's complete interview with Tekken series producer Hajime Nakatani, check our Web site, www.videogames.com.

CLOSE CALL

Want more proof that Tekken 3 will be as close to arcade perfect as technically possible? Take our screen-shot challenge. Two of the following screens are from the PlayStation version, while the others are from the arcade. Can you tell which is which? Find the answers at the end of this feature.

each fighter faced in Tekken 1 and 2 (these mid-Bosses became playable after you beat them in the console prequels). "For Tekken 3, we decided to focus on creating depth and added playability to the characters in the game, rather than simply adding a lot of Bosses," Nakatani said. "We think this creates a more well-rounded challenge. We have no plans to add Bosses to the PlayStation version either."

But that doesn't mean Tekken 3's roster is light. Counting the coin-op's time-release characters and the PlayStation-exclusive dino Gon, the PlayStation version will pack at least 19 characters—compared to 24 in Tekken 2. Nakatani hinted that more surprise characters may be in store. As of press time, we're still not sure how the coin-op's time-release characters will be accessed in the PlayStation version, since they no longer take the form of mid-Bosses.

Since much of the Tekken series' story is told by the home versions' CG finales, many of the cliffhanger details of Tekken 2 are still in the air. For instance, have we seen the last of Tekken 2 bad boy Kazuya Mishima? "We don't want to give away the end of the story," Nakatani said, "but I don't think that we are ready to say goodbye to Kazuya yet." And what about Jun, who according to Tekken mythos was supposedly

Motion capturing was used for 30 percent of the game's moves—mainly for Eddy and Jin.

THE MOST POPULAR RACING GAME. AVAILABLE IN A CONVENIENT TAKE-HOME SIZE.

killed by new mega-Boss Ogre, a.k.a. the God of Fighting? Again, Nakatani didn't offer any spoilers. "You'll

have to play to the end of Tekken 3 and watch all the movies to see if there's anything about Jun," he said.

Although young Jin Kazama is the star of Tekken 3's story line, it is perpetually moving Eddie Gordo who's the current fan favorite. Like every other character in the game, Gordo is the brainchild of Namco's artists, who actually dreamed up the Brazilian fighter long before work began on the third installment of the Iron Fist tournament. "Eddie Gordo uses the Capoeira style of martial arts that was developed in Brazil," Nakatani said. "We originally thought of having a Capoeira fighter back when we were working on Tekken 2 because it is so unique and different from other fighting styles."

And that's really what the Tekken series is about—varied real-world martial arts pumped out by a rapid-fire fighting engine (as opposed to the more paced combat of the VF games). If the PlayStation version is missing a few polygons, or if the textures aren't quite arcade perfect, so what. As long as the coin-op's ultra-frenetic gameplay is intact (and there's no reason to think it won't be), Tekken 3 will easily be the PlayStation's greatest 3-D fighter. ●

HAPPY ENDINGS

The phrase "FMV sucks!" has been repeated so many times in game-mag reviews and editorials that it has become an industry cliché. And yes, 90 percent of the time, FMV is a useless nuisance that you're quick to skip with a slap of the Start button.

Unless you're playing a Namco game. With the possible exception of Oddworld's, FFVII's and RE2's cinemas, Namco's CG movies are the best in the biz. But you already knew that if you've seen the jaw-dropping endings of Tekken 2, Soul Blade's amazing intro or Klonoa's tear-jerker finale. Better still—these FMV masterpieces are always exclusive to the home versions of Namco's arcade fighters, just another extra that makes the PlayStation ports even better than the coin-ops.

Tekken 3 will be no different. As in Tekken 2, this sequel will pack CG endings for each character and a rendered intro for the game

itself—and this time the FMV will even be slightly longer. Producer Hajime Nakatani explained that these mini-movies, most of which are created in-house at Namco, are certainly no small part of the development process. "A lot of work goes into these cinematic sequences," he said, "but the artists who work on this part of the game really enjoy

SURE THINGS

With the release of Tekken 3 still a little ways away, Namco isn't ready to spill the beans on every PlayStation-exclusive feature. Nevertheless, Namco has confirmed many of the console version's nitty-gritty details. Here's what we know for sure...

A Quest Mode's out; Gon the dino's in. Expect secret extras, too.

- As before, each character will have a rendered ending—and this time the FMV will be even longer.
- Tekken 3 will pack the standard Namco extras, such as Practice, Time Attack, Survival and Team Battle Modes.
- It will not—unlike the home version of Soul Blade—include a Quest Mode, although Nakatani said, "We will be putting in some other extras that have never been seen before."
- The PlayStation version will feature the same 3-D-ish backgrounds as the arcade game.
- The roster will include at least one PlayStation-exclusive fighter, prehistoric Manga star Gon. As for other new characters, Nakatani would only say, "There are still some surprises you'll find when the game comes out."
- The game will neither require nor be packed with any RAM expansion or other PlayStation upgrade. Simply put, it will push your PlayStation to its absolute limits.

Namco's renders of Gon hint at what we'll see in Tekken 3. Could they be from his ending?

what they do. The amount of time that goes into each character's ending really varies from character to character. Some are very easy to implement, but others take much longer."

Namco's obvious CG expertise has led to abundant rumors of forthcoming feature-film projects. Chief among them: An actual Tekken movie set between Tekken 3 and 4. But don't reserve an aisle seat just yet. When asked about the rumor, Nakatani's response was anything but a confirmation. "Is it true?" he said. "I'd love to hear more about it."

Oh well. We'll just have to make do with small-screen Tekken films.

ideo games are the great equalizer. No matter your size, age, IQ or tax bracket, you're gonna get taken down in a game sooner or later, by either a superior player two or the CPU. Trouble is, not all gamers prescribe to the philosophy that you should be a good loser, learn from your mistakes and prepare for the next foe. Such an ideal is fine if you're playing "gentlemen's sports" like hockey or roller derby, but in the world of video games we've found there's only one kind of loser—a sore loser.

We've spent the last few months observing the sore-loser species, and like Jane Goodall we're back from the bush to report on their strategies, tactics and behavior. After combing through hundreds of readers' letters and examining our own behavior around the office, our primary field work revealed two distinct classes of sore losers. The first group we like to call the Hulk-esque sore losers. This bad-tempered bunch simply resorts to acts of "physical" violence—sometimes even hand-to-hand combat—in response to losing. Perhaps you observed this type of behaviour (doesn't it sound that much more official if we use the British spelling?). Examples include throwing a controller, punching an opponent, or better yet throwing a controller at an opponent. These types of losers aim to actually hurt their game-playing buddy or their system.

The second class of losers we describe as Banner-esque (after the esteemed scientist Dr. Bruce Banner, the Hulk's alter ego). These losers are a conniving bunch who tailor their sore-losing tactics to the particular game they're playing. Their goal is to psychologically harm their opponent through mind games and other high-brow trickery.

Let's examine now the tactics and behaviours of these two distinct groups. Far and away the most common habit of the Hulk-esque sore loser

is controller abuse, which is similar to other forms of substance abuse in that it always starts out small. For instance, you might drop your controller or mildly bang it on the counter. The problem is after a few mild bangs on the counter, you're suddenly not satisfied. You begin to slam the controller, then you wham the joypad. Next thing you know you're heaving the controller against the wall. And then you start doing the hard stuff—dropping your controller in a vat of boiling oil, microwaving it, injecting your controller with the Ebola virus (for a complete list of common joypad abuses, see sidebar).

Controllers aren't the only items that get beat up. Consoles, game cartridges, peripherals, file cabinets, family pets—they've all taken their fair share of abuse at the hands of the frustrated Oddworld player. Some say video game manufacturers purposely encourage this type of behavior. After all, every time you slam a controller to the ground in disgust they see dollar signs. If your budget's tight, you might want to surround yourself with alternative items to thrash—perhaps your little sister's Beanie Babies or Spice Girls action figures.

We've also observed several sore losers who physically attack their opponents. If you fall into this category, you might want to seek professional help. You see, while attacking your opponent on the screen is perfectly acceptable, attacking your opponent in real life is not. In fact, we checked with our legal department and it seems that all 50 states have laws against physically harming someone. Such offenses, according to legalese jargon, are known as assault or battery or first-degree murder, but the common denominator is there's no video-game exemption. Judges, while perfectly willing to accept insanity pleas, have been known to frown upon excuses like "Your honor, he was kicking my butt in Tekken 2."

Teeth Marks:

Tomb Raider II got
me biting mad

poor losers

Written by Alex Gordon Photography by Michael Stassus and Dave Robinson

Professional Help

That seconds-long rush of relief you get when you suckerpunch your joypad after a particularly frustrating game may be the greatest feeling in the world. But where are you five minutes later? With sore knuckles splintered by the scattered shrapnel of a \$20 controller. So, to help those poor losers prone to bashing, tossing and even jack hammering their game gear to oblivion, we sought some expert advice.

"When you get frustrated, you're activating a program in the brain," said Dr. Matthew Leeds, a clinical psychologist who teaches a course on emotion at Harvard University. "The emotion is forcing you to get more involved, push harder, and maybe pick up that joystick and smash it. So the first thing you gotta do is notice what's happening, then interrupt it."

Catching yourself before you can do any damage is the key, Leeds explained, and all it takes to head off the anger are some old-fashioned relaxation techniques. "You literally do want to count to 10 and slow yourself down," he said, "but the best thing is to step back and leave the game for a few minutes. It'll distract you and start to change your emotional state." Of course, if you're having a really tough time coming to grips with your frustration, maybe all you need is to put things in perspective. "Part of the reason for the emotion is to get your system ready for action," Leeds said, "but the truth is you're not really about to go into battle, and smashing your joystick will just mean you'll have a bill to pay later."

...I turn off the power,
then smash the CD!
—jocko@mediaone.net

Not all Hulk-esque sore-losing takes on such brutish proportions. Some other tactics of this species include unplugging your opponent's controller, turning off the monitor, resetting the system and/or repeatedly pausing the game. And of course, when all else fails, a steady stream of profanities directed at the game, your opponent or the god of your choice is always an alternative.

The second class of losers, the Banner-esque crew, is less physically aggressive and resort to clever and unusually annoying tactics within the games themselves to manifest their self-disgust. It's usually the players who have no business being in the game with a more skilled opponent who have to resort to these nefarious tricks. We've played more than our fair share of games with these types of opponents and have wit-

nessed firsthand their irritating behavior. Some of them are so evil that we hesitate to share 'em with you (there's a sore-loser trick for Circus Atari that actually summons the hounds of hell, but you'll have to search the Web for that one).

Here then are some tactics guaranteed to prove you're a suave sore loser. When you find yourself falling far behind in a racing game like Mario Kart, simply turn your vehicle around and plow down the track in the wrong direction, taking out all the oncoming speedsters and prolonging the heat indefinitely. If you are playing a multiplayer first-person shooter game, such as Duke Nukem: Total Meltdown or GoldenEye 007, start killing yourself to screw up the scores. If you're lucky, you can blow yourself and your opponents to messy bits at the same time by firing a heavy artillery item like a rocket launcher in a confined space. The victors will be frustrated with their hollow victory when they realize you were able to inflict more damage on your own character in one game than they ever could.

One of the more frustrating loser tactics in a real-time strategy game like C&C: Red Alert is to hide one tiny infantry unit in the trees or in a hidden corner of the map. Your opponent will have to waste countless hours searching every last nook and cranny for your last unit—just like the Russians scanning the Colorado countryside for Patrick Swayze and the rest of the pesky Wolverines in the movie *Red Dawn*—so he can take out your lone gunman and finally be declared the victor.

Sports games let you take the art of being a sore loser to a new level. If you find yourself irrevocably down in a soccer or hockey game, remember this: Just like on the playground, nothing frustrates the other guy more than playing

...so I bit a chunk out
of the rubber Start button.

When losing, I have a peculiar habit of apologizing to my Sonic stuffed animal.

—Jeff B. Liu

keep-away. In basketball, for instance, intentionally foul every chance you get, and in baseball, nothing's more satisfying than alternating between intentionally walking and beating the other player's batters.

There's one sports series, however, that has created its own microcosm of sore-losing scumbags. The Madden Football series is the Super Bowl of sore losers. In fact, the popular gridiron game inspired one of our office's proudest, most despicable sore losers, creative director Mike Stassus, to prepare an entire manual of sore-losing tips. Among the highlights:

- No matter what mistakes you make, never admit them. Throwing an interception is always "part of the plan." Any penalties called against your team—such as pass interference and offsides—should be loudly pointed out as being cheap stuff created by the computer. On the other hand, mistakes the other player makes are ALWAYS due to your skill.

- The vaunted Michael Jackson Offense.

I unplug my opponent's controller during gameplay.

—Erik Iverson, Plover, Wis.

This particular piece of psychological warfare consists of putting a man in motion and making him cut back and forth as you yell "whoo" in a high-pitched Michael Jackson-like voice. Trust us—it'll drive your opponent into a near-suicidal frenzy.

- After missing a big tackle or giving up a lot of yards, loudly say any of the following: "My controller is broken. I'm not kidding—the X button's busted or somethin'." (You can even insist on trading controllers with your opponent if you like for extra style points.) Or, "What color is my team?" And lastly, "I forgot. Am I really on offense (defense)?"

In addition, brag endlessly about how you don't like to show your "real" offense until the second half. Also threaten to run your "Fake return Statue of Liberty play" on every kickoff—it doesn't matter if you are kicking or receiving.

- Jump offsides. It keeps stopping the clock and prevents frustrated opponents from calling plays.

- If the game is close and your opponent is running a crucial passing play, pause the game. When your opponent freaks out, tell him you were trying to call a time out or that your broken controller must be acting up again.

- Declare that the game is only being played so you can test some experimental new moves. Then tell your opponent you'd like to start the game

Fighters Destiny

Fighters Destiny will take everything you have, and throw it right back at you.

- ▶ More Fighting Options than any of the competition. Period!
- ▶ If you're a fight sim fan, this is your golden moment. Play the game NextGeneration calls "The BEST playing 3-D fighter for the N64."
- ▶ Dozens of moves/combo's tailored to each contestant.
- ▶ Five unique Special moves you can learn from "The Master."
- ▶ Rumble-Pak enhanced: Make your opponent feel the punishment your character dishes out.
- ▶ Save your character's combos to a Save Game pack and take them over to a friend and challenge their saved characters.

Available in a box
and online version too!

Safeguards Schm safeguards

If you bother reading the "Important Safeguards" pamphlet packed with your PlayStation, you'll see a list of no-brainer no-nos warning against everything from servicing the console yourself to playing with your PlayStation in the bathtub. Well, we see these not as precautions but as perfect poor-loser suggestions for getting back at your system. In fact, we've gone so far as to add a few more creative ways to abuse that perennial poor-loser scapegoat, the controller (we've even added illustrations that are similar to—but certainly not from—Sony's safeguard literature).

By all means, try this at home...

- Twist your controller, like you're wringing a towel.

- Dunk it in a variety of bailing liquids.

- Feed the joypad into a chipper shredder.

- Launch it into the sun.

- Inject it with numerous infectious diseases.

...so I threw the
Game Boy hard
on the ground,
causing the batter-
ies to fly out.

—wolfpup48@aol.com

over, since the experiment isn't going very well. If he or she refuses, just punt on first down or run into your end zone and wait to get tackled over and over. While you do this, keep letting your opponent know he or she "really" isn't beating you because you're not trying.

- If all else fails accuse, blame, accuse! Accuse your opponent of cheating as much as you can! You need to complain that he or she must know a secret fumble, interception or field goal code that lets him or her score at will. Also complain about his or her use of "money plays" he or she got off the Internet from some Madden geek. Last but not least, tell your opponent over and over you have better things to do with your time than to play Madden all day to learn how to win. Then go on and on about your high-paying job, hot-looking girlfriend or real athletic abilities that don't translate to video games. (Note, this last tip could be a problem if you're over 25 and still living with your mother).

We hope the lessons learned in this article will help you embrace losing as a necessary and ultimately enriching part of the video game playing experience. Losing can be just as fun as winning if done with the right élan. With a little bit of practice, creativity and perseverance, you too may someday rank up there with the Buffalo Bills, Napoleon and Tony Danza as one of the great losers of all time. ☹

I never lose!!

—rudyy300ok@aol.com

Review Crew

Our Philosophy

With this ish, we celebrate the return of...Game Boy reviews! All hail the immortal portable! Oh yeah—our routine: Each reviewer gives a game an overall score, which is displayed behind the review and based on how the game compares to other titles for the same system. In addition, the reviewers rate each game's graphics, sound, ingenuity and replay value. The averages of these scores are listed at the bottom.

Editors' Choice

Gold Awards go to games whose average score equals 9.0 or higher.

Games that average at least an 8.0 receive Silver Awards.

Rating Scale

10-Perfection

An absolutely flawless experience. It doesn't get any better.

9-Virtually Flawless

Drop what you're doing and buy this nearly perfect game.

8-Semiradical

Delivers everything you'd want in a game, despite minor flaws.

7-Worthy

A solid title that you won't regret buying.

6-Good, Not Great

Sure, it has its problems, but it's still fun to play.

5-Average

Not great, not crap. A ho-hum title that isn't for everybody.

4-Rent First

We have problems here. Definitely try before you buy.

3-Time Waste

Playing it for more than 10 minutes gives you a migraine.

2-Don't Even Rent

The only point in playing this garbage is to make fun of it.

1-Flush It

Run for the life if you see it, or use it as a coaster.

MYSTICAL NINJA

Publisher: Konami

Developer: Konami

Featured In: EGM #104

I really enjoyed the first *Mystical Ninja*—it was one of the first really good SNES games. Years later, a sequel has finally made it to the U.S. (there have been several Japanese sequels). But after all this time, I was skeptical as to how faithful a 3-D sequel could really be. Thankfully, **Konami has done a wonderful job of bringing the *Mystical Ninja* series to a polygonal environment.** The adventure-minded gameplay is a cross between *Mario 64* and what I envision *Zelda 64* to be. There's lots of exploration tempered with platform elements and plenty of combat. The game is well-paced because it offers some very humorous moments and unexpected action sequences that keep the adventure fresh. One of these diversions involves running over entire neighborhoods in a large, roller-skating robot in an effort to get to the end Boss of the area. Once you're there, the game shifts to first-person mechanical combat. You just can't beat the wide variation of gameplay this game provides. The only real problem with *Mystical Ninja* is that the camera is hard to manipulate and occasionally makes things hard to see. This becomes a problem when leaping around pit-filled castles. Regardless, *Mystical Ninja* is a must-have for adventure fans, and should provide some relief for those waiting for *Zelda 64*.

Kraig

The newest installment in the long-running series is plenty weird (lots of oddball characters, inside jokes—even music videos and a laugh track). It's also **one of the longest games you'll find on the N64.** The adventure starts slow, and I got lost a few times trying to find the right person to talk to. But it's filled with enough mini-games, cool Bosses and challenging 3-D platform action to keep you hooked until the end.

Crispin

Goemon has his shortcomings, but all in all it's a very cool game. **There's quite a bit of diversity in the gameplay,** and the mini-games and Boss battles are a ton of fun. The bizarre story and wacky Japanese humor is certainly a nice change of pace (the audience laughter just floored me the first time I heard it). The towns are a little too big IMO (I got lost a lot), but I don't have any other major complaints. Really nice music, too.

John

It's been a while since I've played a game this weird. *Mystical Ninja's* gameplay is real straightforward, but the Japanglish dialogue between characters and strange story line had me scratching my head. Aside from this, the graphics and variety of tasks and mini-games are smashing. The worst points are the awkward camera angles and the inability to easily control them. It's still worth checking out, if only because it's so unique.

Sushi

NBA IN THE ZONE '98

Publisher: Konami

Developer: Konami

Featured In: EGM #102

In *The Zone '98* may be the first (and therefore only) "realistic" basketball game on the N64, but that doesn't change the sorry truth—this game is sorely disappointing. Before I even get into the gameplay problems, what's the deal with the ugly graphics? The players animate nicely, but the courts look horrendous (washed out in an understatement) and the crowd looks equally terrible (is there a fog setting in?). The PlayStation version (which was developed by a different team at Konami) looks a million times better than this, and there's just no excuse for that. Anyway, gameplay, *ITZ '98* is completely offense-oriented. The Drive button in combination with the Dash button makes for an easy two points almost every time. Little guys will run through big guys—centers will drive from half court—whatever you want. It just adds up to a boring game with **absolutely no defense whatsoever.** I've got other minor problems too, like the lack of icon passing (I'm a big supporter of icon passing, as you know), the weak free-throw system and the various useless camera angles. Changing players is an exercise in frustration, too. As far as stats and options go, *ITZ* is loaded, but nowadays that's expected. From a company like Konami on a system as strong as the N64, I expect more.

John

I'm sorry to report that the first N64 basketball game is a bad one. *ITZ '98* suffers from so many flaws, I just don't have enough space to describe them all. Let's just say that too many aspects of the shooting, stealing, dunking, passing, free-throw shooting and (lack of) defense are unrealistic and/or frustrating. Then there's the blurry and sluggish 3-D graphics that are equally as bad, making this the **worst ITZ game in the series.**

Kraig

I may be a casual sports gamer, but I sure know a mediocre basketball game when I see one. After the first game, the problems become immediately apparent: Switching players on defense is a pain, the AI is non-existent and anyone (including short guys) can drive to the hoop with ease. The game looks pretty good but falters in the playability department. I'd wait around for a better N64 basketball game to come out.

Dan

I was really disappointed with this N64 game, because I thought Konami would do much better. **The horrendously blurry graphics gave me a headache that shook my cranium worse than a San Francisco earthquake.** If you can get past the graphics, the gameplay isn't too bad—especially if you don't mind being able to score a whole lot and whenever you want. If an N64 is the only console you own, this one's worth renting at best.

Kelly

NHL BREAKAWAY '98

Publisher: Acclaim

Developer: Acclaim Studios

Featured In: EGM #104

NHL *Breakaway '98* for the N64 may not be the perfect hockey game, but it's light-years ahead of its PlayStation counterpart in nearly every aspect. *Breakaway* is heavy on the simulation side of hockey. You've got players that act like their real-life counterparts. You've got a complex coaching system that lets you earn and use points toward improving various aspects of your team. You've got numerous systems like "Momentum-Based Checking" and "Total Team Management." Now, I am a huge hockey fan and I respect all this emphasis on detail and all—but frankly, it's not my main concern. What concerns me more are the gameplay issues. Once you've got that down, then go after the finer details. Fortunately *Breakaway* is almost there (the PS version wasn't even close). The AI is very nice—the CPU-controlled players know what to do and when to do it. The graphics and sounds are excellent too (nice animation!), though the crowd is way too tame for a hockey game. On the downside, the puck is a little floaty, which can get annoying, and the player control is a bit sluggish. More action in front of and around the net would've been nice. Still, ***Breakaway IS* (currently) the best N64 hockey game,** and aside from a few minor flaws, it's got what it takes to be a serious contender. Hockey fans check it out.

John

This is the best N64 hockey game I've played yet. Granted there are only three others (*Midway's Gretzky triplets*), but ***Breakaway* offers the most realistic and entertaining play.** On the downside, the "medium" res graphics don't quite live up to the QB Club standard but certainly aren't bad. Also, the goalie AI is a little weak (some of my games got out of hand). Still, *Breakaway* is solid enough to take the number-one spot.

Dean

What a difference a system has made for the Nintendo 64 version of *NHL Breakaway '98*. Whatever this title lacks in realism and AI, it easily makes up for in playability. The Season Mode of the game is cool, because in a way it's a sports RPG. You can take points earned from wins and then improve your team by hiring (and firing) new coaches and making stadium improvements. Nice to see a unique and fun hockey game come along.

Sushi

This game looks good. It has all the players and teams. It even has FOX's signature puck shadow and tracking streak. So, what's the problem? **The game, like many others before it, just doesn't feel enough like hockey.** The rendered players look great, but they have a hollow feel to them when you're knocking them down. While it may not be the champion of hockey games, it is a strong addition to the sparse N64 sports lineup.

QUAKE 64

EGM
SEVEN
M
MATURE
17+

Publisher: Midway
Developer: Midway
Featured In: EGM #101

Number Of Players: 1-2

Best Feature: Great Graphics

Worst Feature: No Four-Player Support

www.midway.com

Once again, the N64 gets a high-quality first-person shooter. Quake 64 is the best-looking one yet (yes, in my opinion, ever better looking than the almighty GoldenEye 007). The one-player game has great lighting effects and a smooth frame-rate. The enemies are all equally unique and frightening. It's awesome to open a door and see a demon run full speed toward you. In fact, the only complaint I have on the single-player game is the lack of variety. Each stage's textures look like the next, making them look pretty indistinguishable. **Almost every other Doom-type game on the N64 has more interesting level designs** (especially 007 and Duke). I'm really happy Midway decided to put in a Multi-player Mode (which was conspicuously missing from their Doom 64). It's rather fun, but it's not without its own problems. First, the frame-rate takes a big hit with two players. Second, the weapons are unbalanced, making every deathmatch a race to get the power weapons (like rockets). Third, it only supports two players! Midway didn't want to delay the game to put in four-player support, but I would've gladly waited for it. Two-player deathmatch is tame compared to the four-player games. On the upside, Quake 64's deathmatch-specific levels are very well designed. This is a solid buy.

Sushi

Dude, I am all over this version of Quake. On top of the sweet graphics and smooth one-player frame-rate, the control made it easy to take out every heispawn that came my way. The multicolored lighting effects and ambient soundtrack complete the package. **On the multi-player side of things, Quake 64 slips a little.** I mean, where's the Four-player Mode? I'm afraid that two-player just doesn't cut it for this hardcore Quake worshiper.

Kelly

This is the prettiest version of Quake yet (prettier even than the PC GL version, thanks to some texture-lighting ideas "borrowed" from Quake 2). But here's the problem: As in Midway's Doom games, you can only save between levels. Quake 64's ramped-up difficulty means you'll be replaying later levels many times until you can get past 'em. Deathmatch Mode's disappointing, too; DM levels are too big for two players.

Crispin

This is a great translation of Quake's Single-player Mode (especially graphically), but everyone knows that multi-player combat is what made Quake popular. Midway included a Deathmatch Mode, but it's limited to two players. Compounding this problem is that there aren't enough Deathmatch levels and what is there is too big for two combatants. If you don't mind its limited multiplayer capabilities, Quake 64 is a good game.

WINTER HEAT

EGM
GOLD
E
EVERYONE
10+

Publisher: Sega of America
Developer: Sega Enterprises, Ltd.
Featured In: EGM #104

Number Of Players: 1-4

Best Feature: Great Four-Player Fun

Worst Feature: It's Murder On The Hands

www.sega.com

I now believe that guardian angels exist. Why, you ask? Simply put, someone from above must have heard my prayers asking that a sequel to DecAthlete—my favorite Olympic game of all time—be made. OK, maybe it wasn't so much God's intervention as it was some smart person's decision at Sega. Whatever the case may be, what a great move. Winter Heat takes all of the good things of DecAthlete and adds a few aesthetic features that add up to produce one Kick-ass Winter Olympic title. The camera angles, sound and control are all virtually flawless. The game's graphics aren't quite as hi-res as other Saturn classics (Virtua Fighter 2, DecAthlete, etc.), but the dramatic camera panning especially makes up for it. Sound-wise the title makes you feel like you're really flying down the slopes or trying your damndest not to flip over in your bobsled. Then there's the control. Even though some of the events seem tricky, this doesn't stop that particular area from being a barrel of fun, and consequently a nice showcase for skill. Of course, the game has events that are nothing more than crazy tap-tap-tapping, too. **As fun as the one-player game is, the four-player Mode is where WH really shines.** Only with GoldenEye and Berserker have I had this much multiplayer fun.

Shawn

Winter Heat has it all: brilliant hi-res graphics, innovative control schemes for the 11 events, and the same polish and personality that made DecAthlete so cool. The Four-player Mode makes it another must-have multiplayer game. Unlike other recent Winter Olympics titles, Winter Heat doesn't emphasize realism or technical details. It's the pure arcade fun that'll keep you breakin' records long after the snow has melted in Nagano.

Crispin

Winter Heat is far and away the best of this year's Winter Olympics-style games. Each event requires different techniques with the control pad, and they're all a lot of fun. Button-tapping prowess is a must (Track & Field fans rejoice), but there's more than just that—timing is key, especially in events like the Aerials (my fav) or Ski Jumping. WH looks and feels very nice, and with four-player support, it makes for a great party game.

John

Quick quiz: 1) Do you like playing multiplayer games? 2) Are you extremely competitive? 3) Do you like button-mashing Track & Field-type action? If the answers are yes, then no doubt about it: Winter Heat is for you. It's a great party game for people who love shooting for high scores and breaking records. A couple of warnings: eventually, the game will get old as records become harder to beat, and it's not that much fun in one-player.

Dan

GEX: ENTER THE GECKO

EGM
SEVEN
M
MATURE
17+

Publisher: Crystal Dynamics
Developer: Crystal Dynamics
Featured In: EGM #99

Number Of Players: 1

Best Feature: Creative Level Design

Worst Feature: Occasional Slowdown

www.crystald.com

The first half-dozen times Crystal Dynamics brought this game out to show us, I thought, "Hmm...it's just a so-so Mario 64 hopeful. No big deal." My mind quickly changed when I actually played the game. **Enter the Gecko is a lot of fun!** Ninety percent of that is due to the excellent level design. Each of the themed worlds carries a distinct and funny personality of its own, making you want to keep playing to see what the next stage has to offer. The creativity and thought put into this vast game is mighty impressive. Other good points: The control is right on par; the graphics are simple and clean, and the highly touted camera angles work...for the most part (I still haven't found a 3-D game whose camera worked perfectly). Gex's trademark humor also helps this game stand out. The numerous new wise-cracks will draw a chuckle or two (and they never seem to get on your nerves, despite the occasional repeat). I only wish GEX could scale any wall, instead of just the designated surfaces. I understand how that could be a problem game design-wise, but how cool would a 3-D gecko game be if you could climb anywhere you wanted? Be that as it may, Enter the Gecko gives you lots to do, lots to explore and lots to look at. Give it a shot. I think it's the best 3-D mascot/plat form game on the PlayStation so far.

Dan

Gex's gorgeous graphics really exemplify just how far the PS has come since its release. Loads of beautiful textures, seamless animation, great lighting effects—the game is just a joy to look at. But that's just the outside. On the inside lies a great 3-D platformer with tons of replay value and truly hilarious gameplay. **This game has loads of personality.** My one gripe is that the camera can get annoying at times, but it's not unbearable.

John

A fan of the first Gex, I was hoping the sequel would be 2-D. But after playing this polygonal rendition, I'm not disappo'nted at all since this is about as good as PS 3-D platformers get. There's a lot to do in Gex, partly due to the huge, diverse (and great-looking) levels. The one fault with the mission-based gameplay is that it lends to some unnecessary backtracking through levels. Still, this is a great PS platformer.

Kraig

Gex is as good as Mario 64 clones get on the PlayStation. It packs more than enough levels, all of which are unique. Like the mission structure of each level, since it keeps you exploring. Still, the game's not perfect. Despite the effort Crystal Dynamics put into the camera system, awkward camera angles are abundant, often making it hard to judge your jumps. You can usually adjust the camera to a workable angle, though.

MARCH MADNESS 98

Publisher: Electronic Arts

Developer: EA Sports

Featured In: EGM #02

Finally, EA has brought out a college hoops game for the PS. Unfortunately, it uses a modified version of the Live 97 game engine. This means that in addition to slightly outdated 3-D graphics, it's way too easy to beat the computer (unless you challenge a good team with a really bad one). March Madness 98's biggest problem is that you can bully or finesse your way to the bucket with ease. One of my favorite easy-to-do cheap plays is a dunk to the other side of the court for a pass before the computer players get back on defense. Playing against a good human opponent is much harder, at least. Still, there is a lot to like about this game. For one, atmosphere is a big part of March Madness, and unlike any other basketball title, it could affect the outcome of the game. The innovative (and optional) "Momentum Meter" is a very cool feature that pumps up or deflates your player's abilities according to how he is playing and how the crowd reacts. The less innovative, but appreciated college fight songs, and detailed basketball courts also contribute greatly to the collegiate flavor of the game—and hey, you can even play with women's teams. I like this game, but **EA should make their basketball games more challenging** so that you don't need a second player to make them fun.

Kraig

Another college addition gets a hand-me-down game engine. In fairness, the Live 97 engine is good enough to power this one but there are some flaws. Driving the lane like a steamroller, penalty-free is one. Another is the rampant breakaways after the throw-in. I forgive it though for the huge amount of teams available including the 11 women's teams. **It's not as flashy as the pro editions but it shouldn't be—it's college ball!**

Dean

In the month of March, I'm all over college basketball, baby. This title is just what the doctor ordered, especially since it's the only college game around. The graphics in the game are pretty good, but could be better—I just wish they would stop using recycled game engines from a year ago on their college stuff. Regardless, all of the features, options and solid play override most of its flaws, making MM 98 a worthy buy.

Kelly

March Madness is a fairly solid basketball game. While it comes up short in the audio department (the crowd and sound effects are lackluster), it looks great. But Madness 98 suffers from the biggest problem plaguing most hoops games today: It's way too easy to get into the paint for an uncontested layup or dunk. **Why do basketball games have so much trouble with defensive AI?** Looking past that, MM 98 is a decent game.

Dan

NEWMAN/HAAAS RACING

Publisher: Psygnosis

Developer: Studio 33

Featured In: EGM #02

Right after booting this game up, I thought I was seeing F-1 Championship Edition all over again. Luckily, I wasn't out of my mind—the feeling was justified when I found that this game uses F-1's revamped game engine with the addition of CART vehicles. This isn't a bad thing since Newman/Haas' 3-D graphics serve this racer quite well. **The biggest strength of this game is its versatility.** By changing a few key options the game can be transformed from an unrealistic and care-free racer to a brutal simulation where one slip of the wheel can send your car into a race-ending spinout. Although the game has a wide array of options and vehicle modifications, the effect is not overwhelming as is the case with many of these daunting, ultra-realistic racers. There are plenty of different racing teams, lots of different tracks, and I bet some hidden tracks (F-1 had some awesome ones) will also be included. The biggest beef I have with Newman/Haas racing is its difficulty. Even on its easiest settings, the game is very hard, especially on the less-forgiving tracks (such as those with hairpin turns). The sound is also somewhat annoying, partly because of the announcers' dialogue that dribbles on very repetitiously. Overall, I like Newman/Haas, I just wish it was more distinguishable from Psygnosis' other F-1 racers.

Sushi

Newman/Haas is a good racing game, but it just doesn't do much for me. See, I'm an average gamer and if you're like me, you may agree. I don't necessarily want all of the realism that this one offers, even though the game does realism incredibly well. The control, graphics and array of options are impressive, but I had more fun running into walls and exploring areas away from the track. In other words, it's for F-1 fans only.

Shawn

Newman/Haas is a decent "arcadish" racing experience. I wouldn't put it on the same level as NASCAR 98 or F-1: CE, but it does offer some good racing. Aesthetically it's solid. Nice-looking 3-D graphics, good frame rate and minimal pop-up go well with its Android racing-inspired gameplay. My one complaint—**computer cars in single-player mode are very tough to beat** on any skill level, yet in two-player they're dogs.

Dean

If you're a CART fan, and love racing games, this is a must-buy. If not, N/HR is simply a very respectable, realistic racing game. **M/HR has a rock-solid feel to it**, and the programmers did a great job of making the game easy to jump into with the default settings. The drawbacks are minor, including: only two views in Multiplayer Mode, a pair of annoying announcers and overly difficult gameplay in the One-Player Simulation Mode.

Kelly

PUNKY SKUNK

Publisher: Jaleco

Developer: Visit

Featured In: EGM #02

Punky Skunk may seem a few years late for the Sonic clone wars, but it really doesn't play like Aero the Acrobat, Bubsy or any of those other hedgehog copycats. Punky Skunk is an easy, slow-paced side-scroller that, when at its best, is reminiscent of Mickey Mouse: Castle of Illusion. But 90 percent of the time it comes across as no-frills platform rehash. Let's forget that the graphics—aside from being extra colorful—look straight out of a Super NES game (and not even get me started on the mega-happy marching band music). The big problem here is that the gameplay is too basic. Although you get more than 30 stages, they're all pretty short and modeled after a few simple styles. Some have you riding air currents with a parachute, some have you roller skating, snowboarding, bouncing on a pogo stick or clawing through dirt Dig-Dug style. It may sound novel, but **since most of the levels are ultra-easy, the game quickly becomes monotonous.** Even more strange: Some stages are super hard (fortunately, you can save before each level to make passing these trouble spots less frustrating). Now I know this game is geared toward a younger crowd. Trouble is, I'm in my late 20s. And while I certainly have nothing against old-school game play, Punky Skunk is a little too preschool for my tastes.

Kelly

Punky Skunk is definitely aimed at kids; it probably won't keep older players that interested. Shooting stink gas, bouncing on pogos, roller skating and parachuting is fine but I've seen it all before in years past. That said, I have to admit that while the levels aren't too original or complex they do provide just the right amount of variety to keep you interested. It's safe to say that for a kid it should be pretty damn enjoyable.

Sushi

Punky Skunk is a surprisingly decent 2-D platformer that's very obviously aimed at the 8 and under crowd. The average "older" gamer will romp through it in a day or two without much trouble, but I honestly think **the younger crowd will really enjoy the game's simplicity** and bright, vivid graphics. The power-ups are neat, but many of them aren't all that useful, and the mini-games are fun, but very easy. Good for children.

John

Punky Skunk is a PlayStation game, isn't it? For a while there I thought I was playing a 16-Bit side-scroller. True, there's nothing wrong with that, but at the same time using at least some of the PlayStation's technology can't be a bad thing, can it? The game is fun—leaning heavily toward the easy side of things—but that's just not enough to make this one stand out from other, more interesting side-scrollers already on store shelves.

TACTICS OGRE

Publisher: Atlas

Developer: Atlas/Quest/ArtDink

Featured In: EGM #104

Number Of Players: 1-2

Best Feature: Looooooooooooooooooooo

Worst Feature: Looooooooooooooooooooo

www.atlantis.com

This cult classic Super Famicom remake is being released at a rough time, considering the high-profile Final Fantasy Tactics just came out a month or two prior. Nevertheless, Tactics Ogre is still strong enough to stand on its own, even in the face of the graphically superior FFT. This epic game is huge. So huge in fact, I would only recommend this game to those who sincerely enjoy this sub-genre of strategy games. If you don't, you might find the game to be long and drawn-out. After all, Tactics Ogre involves a lot of repetitive battles and micromanaging of your troops. But if you're the patient type who can handle slow-paced turn-based games, then give Tactics Ogre a run. It has a great story line (one that's definitely easier to follow than FFT's) and a very intuitive interface (although I wish it had a few of FFT's shortcut features). The graphics are definitely 16-bit, but it doesn't affect the game in any way. The sound, however, is rich and beautiful. The only minor technical complaint I have is the CD loading of tiny sound clips. Sometimes, the game will pause just to load in a simple sound effect. Regardless, Tactics Ogre is a high-quality title. If you missed this game the first time around (in Japan only), here's your chance to see what the buzz is about. Just don't expect it to blow you away if you're an FFT fan.

Dan

In a nutshell—TO is a fantastic S/RPG, and in some ways even better than FFT. But it's got some drawbacks. Larger battlefields (and in counts) are a major plus, but the lack of 3-D hurts. FFT's engine with these big fields would've rocked. The music is great, as is the story (with multiple endings, too), but the game moves rather slowly and the interface seems dated next to FFT's. Still, this is a must for fans of the Strategy/RPG genre.

John

Here's the big question: Which is better, Tactics Ogre or FFT? Tactics? TO has a better story (it's much easier to follow than FFT's cast-of-thousands yarn). And it definitely has longer battles. Since you can assemble bigger parties and fight on larger battlefields, some battles drag on for hours. Yet I thought the battles got a little too long—and tedious—after a while. I prefer the better-developed job system in FFT, too.

Crispin

Tactics Ogre is one of those games that just plain takes a lot of time to play—there's no way around it. Since it's such a good game though, this time is well spent. Although TO may come off as being average at first (and it is to a certain extent), it still provides plenty of solid gameplay. The battles can be a little tedious, but the easy control and excellent music make the time pass quickly. Overall, it's a solid title to check out.

Shawn

JAMES BOND 007

YOU ARE VERY SUSPICIOUS.

Publisher: Namco

Developer: Saffire

Featured In: N/A

Number Of Players: 1

Best Feature: Inventory System

Worst Feature: Doesn't Feel Like A Bond Game

www.nintendo.com

You've gotta be pullin' my leg. I can't see how anyone could take this "James Bond" game seriously. Now if Nintendo is positioning it as a kid's game, I can totally see where they're coming from—I would probably give the game a 6.5. Of course, I'm sure this James Bond title is for the mass-market and not just for kids. In this case...well, you see my score. Why am I being so hard on it? How can I not be?! First, this Game Boy title could be any action/adventure game—it just so happens that it's called James Bond 007. Sure, the cart has some 007 tunes and lots of snappy Bond-inspired sayings, but other than that it could be any generic game. Next we have the mini-adventure game SECRET AGENT goes on, like retrieving a hammer for a guy who's fixing a bridge, and a pad of paper for another guy who makes a fake pass for James. Maybe the game takes place when James Bond first started with the Special Branch, and he needed to work his way up the Secret Agent ladder. Any good points, you ask? The interface is super easy to use, and the "save at any point" feature is awesome. Of course, this same save feature makes the game even easier than it already is. Funny how this works: GoDenEye is the perfect way to use a Bond license, whereas this little jobbie is the absolute worst way.

Shawn

absolutely, positively cannot recommend this game to anyone. I can list about 50 more Game Boy titles I'd rather play than this simplistic, moronic, sorry excuse for a game. The "action" is repetitive, the dialogue is ridiculous, the clues are overly simplistic ("Boy, I sure wish I had a [insert next clue here]..."), and the secrets are obscure. Damn, the cart isn't even big enough to act as a doortop or a coaster. What a waste of silicon.

Dan

This is one of the worst uses of a movie license I've seen. 007 is a simple, straightforward Action/RPG that makes James Bond complete tasks such as finding a hammer so someone can build a bridge in China, check jungle weeds, and search everyone's homes for medi-kits. I'm surprised they don't have him wash dishes to pay for business expenses. Only get this game if you've played every other good Game Boy Action/RPG.

Kraig

Bond for GB comes across to me as sort of a wanna-be Metal Gear, only stripped down, extremely straightforward, and of course, with Bond characters. The RPG-ish elements of the game are appealing, but the execution just isn't there. Rather than offering distinctive challenges, Bond just offers up more of the same "search everywhere, find key stuff, move on" play mechanics that get old very quickly. Not horrid, but not a keeper.

John

CAMPER'S KNIFE

Publisher: 1-800-CAMPMOR

Developer: Coghlan's

Available For: Your Mouth

Number Of Players: 1-20

Best Feature: High-impact Molded Handles

Worst Feature: Checks—Even Camper Checks—Unimpressed

www.camper.com

Science tells us that all we need for life to flourish are water, oxygen and a few friendly rays of solar energy. Well, the eggheads need to add the Camper's Knife to this list. After all—you gotta eat. And with this handy ultra-combo of a spoon, fork, knife and bottle opener, you can eat anywhere and anything (except scorpions. Too tangy). I spent three days using nothing but this gizmo godsend, and—although it never once came close to saving my life—I declare the Camper's Knife an indispensable tool for the progress of humanity. Here's a for instance: After a snowstorm killed the power in my apartment complex, I used the gadget's spoon extension to eat snow from my balcony. Then I thought how much better the snow would taste if I were flavored. Then I went to 7-11 and bought a Slurpee. Oh, and there was the time I struck out into the wilderness (more of a vacant lot, really) behind our offices with nothing but my camper's knife and wits to survive the elements. Fifteen minutes later, I returned to the office shaken but triumphantly unscathed. The tool's sole drawback: No matter how deftly I wield it at the food court, it fails to impress the local mall chicks. If only the Camper's Knife came with an attachment that could increase its user's sex appeal. How about that, one, science?

Crispin

Now I'm no board-certified commissioner of Swiss Army-like eating utensils, but this heavy-duty contraption scores pretty high on the fancy meter. Very rarely is food-out silverware this sturdy or useable as this gem is, and to think it even includes a working spoon! If you're into eating on the go, or just want to look like a tough guy to impress the women, I strongly recommend checking out this piece of hardware.

Kraig

I don't understand how this thing works. I put it in my PlayStation, but all it did was skip around and stutter. I put it in my M64, and everything went blurry. I put it in my Saturn, and no one wanted to make pocket dinnerware tools anymore. It's a mysterious little gadget indeed. Maybe I'll have better luck with it when the next generation of systems arrives in our offices. If I'm lucky, Project X will snow me a use for this silly thing.

Dan

It's about time we finally got a product like this. The Camper's knife not only freed me from numerous bear traps, it also helped me pick up a few chicks last weekend. On top of this, it was great when used for eating. Be aware that it works better with cereals and sliced sausages than it does with fruits and rice dishes. The 1 1/2 tigger is durable, too! I dropped it in my toilet three times and it still worked. Was I surprised to wash it? Shawn

NFL Blitz

By Arcade Editor Mark Hein

1

NFL Blitz is essentially NFL lam. We're talking 7-on-7 football where 30 yards will get you a first down and you can body slam a tackled opponent. It seems like an easy game to play, and it is to a point. However, you'll find a good defense is the best offense. If you can stop your opponent from scoring even once, it will force a comeback situation that's not easy to beat.

It is pretty easy to score a touchdown in NFL Blitz. You just have to remember some important rules (or lack thereof). This football game has no Pass interference, nor any out of bounds. Passes seem to be more effective than running plays as they can cover a huge amount of yardage. Don't count out rushing. A stiff-arm or a spin can be what you need for a quick six points. If you spin too much, though, it might cause a fumble.

Strategies To Get You Started On The Hottest Games

JUMP START

See future issues for more arcade strategies

Coaching Tips

QB Jump Pass

To run away from blitzing defenders, hit Turbo and Jump. While in the air, choose a receiver and press the Pass button—it helps the QB to avoid sacks (plus there are no penalties, so no intentional grounding to worry about!)

Spin Move

Quickly tap the Turbo button to perform a Spin move. Spin moves cause the defender to miss his tackle. Watch it though—your Turbo Meter can't be empty.

Stiff Arm

While carrying the ball beyond the line of scrimmage, hold Turbo, then press the Pass button. This will knock down a would-be tackler.

Push Downs

When on defense, hold Turbo and press the Change Player button to knock down your opponent—meant to knock a receiver down before he gets the pass (remember, NO PENALTIES).

Strong Tackle

Hold Turbo and press the Tackle button to perform an aggressive tackle. Strong tackles will cause more fumbles to happen.

Onside Kick

After any score, press Up on the stick and press all three buttons. This will cause the kicking team to perform a dangerous onside kick.

Codes

Right now there are almost 30 codes found. To enter a code, press the required button (the number of times stated: Turbo (WHT), Jump (BLU), Pass (RED)). The letter to the right of the three numbers is the direction you have to push the joystick to actually enter the code (Up, Down, Left, Right). A * next to the name means the code only works on an 1.21 version of the game.

If on offense, try short passes then rushing moves to evade tacklers. If on defense, try to anticipate your opponent's moves: Run or Pass.

3

Offense in this game is usually a simple matter of running down the field with the ball and a single defender. It's a matter of closing in, run right at him and stiff-arm him onto the turf. This will usually open up a hole and allow at least a 20-yard gain.

Stiff-arm

When running downfield with the ball and a single defender, it's a matter of closing in, run right at him and stiff-arm him onto the turf. This will usually open up a hole and allow at least a 20-yard gain.

Advancing down the field

The deep pass is mostly a desperation move. It is far too easy to fumble or intercept. Instead, try throwing short passes, then use spin moves and stiff-arms for yardage. However, always remember that too much spinning can lead to fumbles as well.

Good plays

Use the Backsplit play to dish the ball off to the side in the event of a blitz. This still leaves two men open to the sides to pass the ball to.

Offense

Working with receivers

As previously stated, there are a couple things you can do to change up your offense. Before the snap, push the stick left or right to reposition one receiver. Often this confuses the defense and creates holes. On top of that, when you press Turbo+AB, the man in motion becomes an extra blocker. This can be extremely helpful in blitzing situations so guard the quarterback. Lastly, you can use the man in motion to back up your intended receiver. This gives multiple targets to throw to and is especially helpful when your receivers are well-covered.

Other ways to punch it in

When on offense near the goal line, try to go up and over the line of scrimmage by hitting Turbo + Pass. To dive forward and try for that extra yard at any time, hold Turbo and double tap Jump.

Hidden Cursor

Push the stick up twice on the Play Select Screen to hide your cursor. This keeps your opponent from seeing which play you pick.

Swat Ball

When on defense, and the ball is in the air, the jump button will cause your man to jump up and swat the ball down into the ground.

Spin Fumbles

If a player performs multiple spins during one play, he is more likely to fumble when he gets tackled.

Lateral Ball

When carrying the ball and a teammate is near, press the Pass button to lateral the ball to him. Works downfield as well!

Stop Clock

When carrying the ball, jump out of bounds (just like in real football) to stop the clock. You cannot just run out of bounds (except with the code).

Defense

Tricks of the Trade

Trickman Terry eagerly waits to thaw his brain!

As the showers and spring weather begin to thaw out the rest of the world, Trickman Terry's brain remains frozen. It will take some warmer days to get Terry back to normal (whatever that is). Still, April is one of the Trickmeister's favorite months. First, there's April Fools' Day, which Terry loves; but only a fool would try to trick the Trickman! Also, it's his birthday this month. Can you figure out the day? One gift that he wants from his loyal readers more than anything, is a huge batch of new tricks. We think he just wants an excuse to frolic and play in the mail bin again. Anyway, you can give Terry a big ol' grin by sending in a gift of the best of your newest tricks, codes and cheats to this address:

Tricks of the Trade
1920 Highland Avenue, #222
Lombard, IL 60448
or send e-mail to:
tricks@z2d.com

Win Games and Accessories for your Tricks!

If your trick is selected as the Trick of the Month, you will win a free GameShark provided by the kind people at InterAct. If you are given credit for submitting a hot trick in this section, you will

win a free game. Gaze at the tiny text below, so you can get all the details on the free stuff.

NOTE: If you send your trick by e-mail you must include your real name, address, city, state and zip code.

Contest Rules

No Purchase Necessary. To enter send a letter a standard size postcard with your best trick to the address given to the Trick of the Month contest. Send to: Tricks of the Trade, c/o Z2D, 1920 Highland Avenue, #222, Lombard, IL 60448. Or e-mail to: tricks@z2d.com. We will randomly select your name, address and phone number. You must have a government ID on file, a residence in the United States, and be at least 18 years old. Prizes will be awarded to the winner of the contest. Prizes will be awarded to the winner of the contest. Prizes will be awarded to the winner of the contest. Prizes will be awarded to the winner of the contest.

NOTE: If you send your trick by e-mail you must include your real name, address, city, state and zip code.

Restrictions: Not valid where prohibited by law. No cash prizes. Prizes will be awarded to the winner of the contest.

Trick of the Month Jet Moto 2

USE TRACKS, RACE AS ENIGMA

This trick is very long-winded, but it's worth it to enable all the tracks. From the Title Screen, go into the Options and put the Difficulty on Master and set the Laps Per Race to 5. Exit and go into the One-Player option. Choose L1! Dave at the Select Rider Screen (Press X). Now press Triangle until you go back to the Title Screen. Press Up, Down, Left, Right, R2, R1, L2, L1 (this must be done quickly). Go back into Options and set the Difficulty to Amateur and turn Turbo Off. Go into the One-Player option and pick Bomber. Go back to the Title Screen again and press R2, R1, L1, L2, R2, R1, L1, L2 (this must be done quickly). Now choose your racer and pick Single Track at the Choose Race Type Screen. You will see that all the tracks are available including the alternate tracks!

To race as the mysterious Enigma, go into the Options and set the Difficulty to Master and the Laps to 6. Go back to the Title Screen and press Left, Square, Down, Triangle, Right, Circle, L1, R1 (this must be

After doing the incredibly long and cumbersome, begin a game.

At this screen, all the normal and alternate levels will be open!

done quickly). Enigma will now be available from the Select Rider Screen.

Todd Kelley
Philadelphia, PA

Set the difficulty and laps to reveal the racer, Enigma!

Resident Evil 2

SECRET CHARACTERS AND COSTUMES

To get Hunk you must beat the second scenario with the best rating. When the rating comes up on the screen you will be able to save the scenario with Hunk as the character.

To get Tofu you must beat six scenarios in a row and get Hunk by the end of the first or second scenario.

To get the alternate costumes you must first go and kill the Brad Vickers zombie. To meet him you must play through most of the beginning without picking up a single item. Make your way all the way to the front of the police department. When you get to the gates of that place take the lower stairs around the front yard. There you will find the zombie. Once you encounter him you can try to kill him with what you have or go past, pick up

some weapons and come back. Once you kill him, search the corpse and you will find a key. Take that key to the first floor of the police department and go to the west wing save point. In the room below the stairs you will find a locker that is locked. The key will open that, and you will find your new costumes. For Claire you have one choice but get a new gun; Leon has two choices and he will fire faster.

Beat the game with the best rating and you can play as Munk.

NFL Quarterback Club '98

On the Main Menu, access the Enter Cheat Option. Now enter any of these codes for various results:

SDWNRD9 - Player gets eight downs.

RNLDSWZNGR - Strength attribute for all players is at maximum.

BRDWNMTH - Pass accuracy is set to maximum for all QBs.

WLRPYTN - Agility attribute is set to maximum for all players.

CRLLWYS - Acceleration attribute is set to maximum for all players.

SMLMDCGT - All player heights are reduced to 5'6" and weights are decreased to 145 lbs.

GLYTHMD - All player heights are 7'7" and weights are set to 400 lbs.

BBMNTBL - All player heights are 7'7" and weights are set to 145 lbs.

BGBBYFF - All offensive players have maximum attributes.

BGBFYDF - All defensive players have maximum attributes.

GYNMNSD - Everyone fumbles the ball.

PWRYRMD - All player attributes are

decreased to zero.

SPRTBMD - All players run in Turbo Mode.

FRMBYFRM - Players move in slow motion.

NBCTCKLS - Tackle ball carrier is turned off.

SPRPRTCKL - Always tackle.

TGHTGRP - No turnovers.

SPRTMMD - All player attributes are at maximum.

LDSTRTRK - When QB throws the ball, it appears in the receiver's hands.

YNSTYNS - Discipline and Awareness is set to maximum for all players.

BGTWSTRK - Ball carrier spins around constantly until he's tackled.

TRNTDLFR - QB accuracy is set to zero for all QBs.

LLDFSK - All defense attributes are set to zero.

LLFSCK - All offense attributes are set to zero.

BGSPRDV - Dive distance is greater.

SPRGRMS - QBs throw the ball 100 yards; Kickers kick the ball 100 yards; Punters punt the ball 100 yards.

STNTXTM - Access the Acclaim, Iguana, AFC and NFC teams for quick play.

MFLNDMD - Players do a dive every three seconds.

Auto Destruct

CHEAT MENU

In the middle of your game, press Start to pause. At the Pause Menu, press Up, Down, Left, Right, Down, Right, L1, R1, R3. This will reveal the Cheat Menu.

Now you can do these codes from the Cheat Menu unless otherwise noted:

Extra Nitros - L1, Circle, Down, L1, Up, Square, Circle, R1.

Extra Money - L1, R1, Up, Circle, Down, Square, Right, R1, L1.

Add 1 Minute to Time - Down, L1, L1, Circle, Circle, R1, Up, Square, L1.

Invulnerability - L1, L1, L1, L1, Left, Circle, Circle, Square, L1.

Infinite Fuel - L1, Circle, Left, L1, Circle, R1, L1, Up, R1, Down.

PBYBYMD - All players crawl around the field during play.

LWYSTPSS - Players always fly the ball in the air on passes.

YLCTRCFB - Players move around like an electric football game.

SNWSLDS - Sted Mode.

LLCHTSFF - Turns off any cheats that have been set.

Car Tuneup Menu - L1, R1, L1, Up, Down, Circle, Down, Right, Left, Square, R1.

Car Select - In the Car Tuneup Menu press Left, R1, Right, R1, Left, R1, Right, R1. **Blood Mode** - L1, Down, R1, Left, L1, Right, R1.

Angels - (works when Blood Mode is enabled) Up, R1, Down, L1, Up, Left, R1, Right, L1.

Choose Mission - Up, Down, Circle, L1, R1, L1, Circle, Down, Up.

Next Mission - Square, Circle, L1, L1, Circle, Down, L1, Up.

All Time Trials Available - R1, L1, Circle, Left, Circle, Circle, Left, L1, Circle.

New York Time Trial - Under the Main Menu's Time Trials option, press L1, Right, Down, Left, Up, R1.

Tokyo Time Trial - Under the Main Menu's Time Trials option, press L1, Left, Right, R1, Left, L1.

The game is even more graphic with the blood and angel codes!

WCW Nitro

SECRET CHARACTERS, RINGS, ETC.

Hidden Characters: To get all of the secret characters start the game and go to the Title Screen. Once there press R1, R1, R1, R1, L1, L1, L1, L1, R2, R2, R2, R2, L2, L2, L2, L2, and Select. If done correctly you will hear a noise.

Hidden Rings: This code will give you a couple new rings to play on. To start you must be on the Options Screen and have the ring option highlighted. Then press R1, R2, R1, R2 or L1, L2, L1, L2 and Select. This will scroll the ring over in a direction and eventually give you access to a new one.

Swelled Head: To make your fighter's head grow each time that you get hit or hit someone, press R1, R1, R1, R1, R1, R1, R2 and Select on the Character Selection Screen.

Big Head: To start the match with a big head press R1, R1, R1, R1, L2 and Select on the Character Select screen.

You will hear a sound after entering the code correctly.

You will now have access to an incredible amount of weapons.

Street Fighter Collection

PLAY AS AKUMA AND CAMMY

To play as Akuma, pick Super Street Fighter II Turbo on Disc 1 and choose the Arcade or Versus Mode. Now highlight Ryu. Press and hold L1 and then immediately press R1. Akuma's shadow will appear. Cammy is hidden on Disc 2 of the collection. To get her you must first play through with M. Bison and get a first-place score. Enter your initials as CAM. She will now be available for VS. and Training Mode only. To get her, highlight Bison and press Start twice on him.

In either Arcade or Versus Mode, you can play as Akuma.

Enter your initials as CAM after beating the game with Bison.

Mortal Kombat Trilogy

QUESTION MARK TRICK

At the Main Menu Screen, choose Options. In the Options Menu, press Up, C, D, B. The screen will shake and you will now be able to move over and access the

Question Mark. This menu contains One Button Fatalities, Instant Aggression and Low Damage options that you can turn on or off.

Steep Slope Sliders

HIDDEN GAME

This trick will get you a hidden game called Steep Slope Sliders. To get this, go to the Title Screen and hold X, Y, Z, B, C, L button and R button. While these held, press Start. While still holding them, move down to the Options and press button A. In the Options, use the D-pad to highlight Exit and while still holding the designated buttons, press A. Now, Steep Slope Sliders will appear. Press A or C to start the game

or B to exit. This is a silly game that will remind you of some of the first video game shooters.

Avoid the trees and you'll eventually get a gun, suit and shield!

GoldenEye 007

PLAY AS DIFFERENT BONDS

To do this trick, you must first have every one of the Cheat Options opened, but none of them activated. Now access the Aztec Stage and set the Difficulty to 007. On the Special Options Screen, set the Enemy options as follows: Enemy health -200%, Enemy damage -100%, Enemy accuracy -100%, Enemy reaction speed -100%. You must beat the Aztec Stage in under nine minutes for this trick to work. Once you beat it, go back into the Cheat Options Menu and the last cheat: All Bonds (Multi) will be revealed! Turn this option to ON and then go into Multiplayer from the Menu Screen. Pick the "Characters" option. Scroll past the question mark characters to reveal the four new Bonds from all the previous movies!

Set up the Special Options Screen as shown to do the trick.

In Multiplayer, go past the 7 characters to see every Bond!

Beat Aztec, and the Cheat Options will reveal All Bonds!

In a four-player game, you can pit all Bonds against each other!

Red Asphalt

SEVERAL AWESOME CHEATS

There are several codes that will give you some specials while in the game. Each must be entered in specific places while playing. Enter these at the In-game Pause Menu:

- Invincibility - Hold R1 and R2 and press Up, Triangle, Square, Circle, X
- Infinite Weapons - Hold R1 and R2 and press Lc, Square, Triangle, Circle, X
- Unlimited Nitro - Hold R1 and R2 and press Down, Down, Down, Circle, Circle

Enter these codes at the Main Menu Screen:

- Big Cars - Hold R2 and L2 and press Up, Up, Square, Square
- Play as Boss Cars - Hold down L2 and press Left, Right, Down, Up, Square, Circle, X, Triangle
- Unlimited Cash - Hold L2 and R2 and press Left, Left, Right, Right, Square, Square, Circle, Circle

These codes are entered exactly as you will find them listed in order.

How you can dominate the race by using the cheat!

Test Drive 4

WITH BEST SMALL CARS

There are even more codes you can use from a Single Race game. You must race a track and get a course record (the Drag Race is the easiest). Then enter these

codes as the names: To get a nitro boost every time you honk your horn enter - WH0000SH To get small RC cars enter - MJCM.RC

Use a Course Record and enter MJCM.RC as your name.

Use Single Race, play race with radio-controlled cars!

Micro Machines V3

AWESOME DEBUG CHEATS

To get a Debug Mode in the game, pause and press Square, Up, Down, Down, Square, Circle, Circle, Triangle, X. Now you can do any of the cheats shown: Blow up cars (including yourself) - Press X+Triangle+Circle+Square.

Make your car computer controlled - Press and hold Select and then press Square.

Change the zoom feature - Press and hold Select and then hold L2 or R2 to zoom in and out.

Change the angle feature - Press and hold Select and then press the D-pad in any direction to rotate the screen.

Quit the race and get first place - Press and hold Select and then press X (not in Time Trials).

Behind the car view - Press Start to pause and then press Left, Right, Square, Circle, Left, Right, Square, Circle.

To get a view behind the car, pause and do the trick as shown!

Chico and the Man

Not since the storming of the Bastille have the masses been so moved! The EGM offices were throwing feces with excitement when a little guy named Chico stopped by and said hello (that's right, the monkey actually spoke). And although we didn't really buy the monkey (Bob's his owner), it was almost like we owned him. Yes, it was a great day for the staff of EGM—we laughed, we cried, we even diapered that little screamin' primate.

Down-Home Fun

When mowing down zombies and running over pedestrians on the consoles just doesn't seem to quench your hunger for destruction, it's time to take a ride over to your favorite software store and pick up Deer Hunter and Wild Turkey Hunt for your PC. These two titles, both by Sunstorm Interactive, claim to give you an "Interactive Hunting Experience" by putting you into the boots of a hunter, complete with weaponry and other tools of the trade. As strange as the wares may seem, they've been doing quite well. In fact, Deer Hunter made it into the top 10 of PC Data's top-seller list earlier in the year. Go figure.

If so, how many games do you intend to buy this year? Send the postcard to "EGM-Blasto Sweepstakes, c/o Linzee International, 1306 Old County Road, Belmont, CA 94002. Entries must be received no later than May 8, 1998. Sony Computer Entertainment America (the "Sponsor") is not responsible for lost, late, mutilated, illegible, incomplete or misdirected entries.

2. Prizes: One (1) Grand Prize winner will receive a Leather Blasto Letterman Jacket, a PlayStation game console, and a copy of the Blasto software title (approximate retail value of \$485.00). One (1) First Prize winner will receive a Blasto T-shirt and a copy of the Blasto software title (approximate retail value of \$70.00). Five (5) Second Prize winners will each receive a Blasto T-shirt and a PlayStation branded hat (approximate retail value of \$35.00). Sponsor reserves the right to substitute prize of equal value if prize is unavailable. Prizes are non-transferable and no substitutions allowed.

3. Winners: Winners will be determined by a single random drawing of all valid entries received by the Sponsors, whose decisions are final. Drawing will be held on or about May 15, 1998. Winners shall be notified by mail and/or telephone.

4. Odds of Winning Sweepstakes: The odds of winning depends on number of valid entries received.

5. Eligibility: Promotion open to residents of United States only. Return of any prize/prize notification as undeliverable will result in disqualification and an alternate winner will be selected. Winners must be required to sign an affidavit

of eligibility/release of liability/prize acceptance within 7 days of receipt or forfeit prize. If the winner is a minor, then prize may be awarded to winner's parent or legal guardian. By acceptance of prize, winners agree to the use of their name and/or likeness for purposes of advertising, trade or promotion without further compensation, unless prohibited by law. Employees of the Sponsor and its parent and affiliated companies and their families are not eligible. Neither the Sponsor nor its affiliates, subsidiaries, division or related companies are responsible for any damages, taxes or expenses that winners might incur as a result of this sweepstakes, or receipt of prize.

7. Winners List: To obtain a list of winners, send a stamped, self-addressed envelope to "EGM-Blasto Sweepstakes Winners List," c/o Linzee International, 1306 Old County Road, Belmont, CA 94002. Requests for winners list must be received by May 29, 1998. Please allow four (4) weeks for delivery of winners list.

8. Restrictions: Void where prohibited or restricted by law.

EGM's own gaming guru bids a fond farewell

The hardest question I had to ask myself was, "Why leave?"

There's an old expression that states all good things must come to an end. It's one of those never really thinks about until they are ready to make a change. And in my case, after several months of deliberation, I have decided to move on and explore other career options.

It's been an exciting eight years, and as I reminisce I realize that this was a dream job. Where else could a person get paid to play games and travel to dozens of exotic countries? The hardest question I had to ask myself was, "Why leave?" That's what took the longest to explain.

I believe it all boils down to goals, and how they change as time goes by. You accomplish some of the things you want to do and then add new challenges. In my case I am a "doing" kind of person who thrives on things that haven't been done yet. That is what the past eight years have been all about.

When I joined Sendai I was coming from a very boring job of writing technical documents, and I wanted to broaden my journalism career into the consumer-magazine market. I had a hobby that I loved (games) and thought, "What would be better than a brand-new game magazine?"

The early years were fun but very challenging. Each issue presented new problems to overcome, as desktop publishing and screen-grab boards were still only a dream. Screenshots were taken the old-fashioned way—with video tape and 35mm photographs. Those were also the days when the fate of the entire magazine hinged on whether a fragile SyQuest disk could be read by the prepress company. One read error and whole sections of the magazine had to be

redone. Still, when you're dealing with your personal goals, nothing can't be overcome.

After EGM became established, the next goal was to expand into other magazines. *Mega Play*, *Super NES Buyer's Guide* and *EGM* were our most famous spin-offs, but how many players remember *Super Gaming* or *Turbo Force*?

In our quest to always get the news first, I was able to accomplish another of my goals—world travel. Perhaps it's the gypsy in me, but I really enjoyed the challenge of going to a trade show in a foreign country and coming back with the first information on a new system or game. Now, after about 100 trade shows in Tokyo, Singapore, Hong Kong and London, that goal has been fulfilled.

Jon and Joe at Ziff-Davis helped me get back into my first love—journalism—and as chief correspondent I was able to pick and choose the feature stories I wanted to work on. My final piece on worldwide gaming perhaps represents the best I've ever done.

I got to travel around the world several times and interview game players in Russia, China and other countries. Look for this feature soon.

Now I believe it's time to move on. I've accomplished many of my goals in life here at Sendai/Ziff, and while it is very difficult to leave, there are still other things I feel I must do. I want to thank the great staff, both present and past, who made my job so easy; all of my friends in the industry with whom I thoroughly enjoyed working; to all the loyal readers who read our magazines; and especially to Steve, who gave me the opportunity to work at my dream job.

Goodbye sounds so final, and it's an old joke that no one in the game industry really ever leaves. So it's probably best just to say thanks for the memories.

WIN A TRIP TO E3 OR THE LAMBORGHINI FACTORY IN ITALY

automobili **Lamborghini**

GRAND PRIZE-

A trip to the E3 Expo in Atlanta, GA (May 28 to May 30, 1998) with the Titus team, or a trip to the Lamborghini factory in Italy (date to be determined), including two days at the Lamborghini driving school, where the winner will drive several Lamborghinis.

FIRST PRIZE (5 winners)*

Lamborghini Leather Jacket

SECOND PRIZE (5 winners)*

Mad Catz Steering Wheel

THIRD PRIZE (50 winners)*

Lamborghini T-shirts

To enter, send in a picture of your "Automobili Lamborghini" screen, including the victory code and total time, plus the Official Entry Form in this magazine, or print your name, address and telephone number on a plain 3 1/2" X 5" card, and send with the picture to: Titus Software Corporation, 20432 Corisco Street, Chatsworth, CA 91311 ATT: "Automobili Lamborghini" Contest.

No purchase necessary. To enter, send in a picture of your "Automobili Lamborghini" screen, including the victory code and total time, plus the Official Entry Form in this magazine; or print your name, address and telephone number on a plain 3 1/2" X 5" card, and send with the picture to: Titus Software Corporation, 20432 Corisco Street, Chatsworth, CA 91311 ATT: "Automobili Lamborghini" Contest. On or about May 31, 1998, the Grand Prize Winner will be determined as the person who won the race with the best time, in the Championship Mode at the expert level, driving the Lamborghini car. In the event of a tie, the winner will then be selected by random drawing. The selection of all other winners will be determined by their best time in relation to the Grand Prize Winner. All entries must be postmarked no later than May 1, 1998. We are not responsible for lost or misdirected mail. By accepting their prizes, winners consent to the use of their names, photographs, or other likenesses for the purpose of advertisements or promotions on behalf of Titus Software Corporation or its affiliates, without further compensation. Prizes are limited to one per household. No substitution of prizes is permitted, except at the option of the sponsor. All prizes will be awarded. To receive a list of winners, send your request to the address above after May 31, 1998. GRAND PRIZE: There are two parts to the Grand Prize: There are two choices for the grand prize: One will be a trip to the E3 Expo in Atlanta, GA (May 28 to May 30, 1998) with the Titus team or a trip to the Lamborghini factory in Italy (date to be determined), including two days at the Lamborghini driving school, where the winner (or if a minor, an accompanying adult) will drive several Lamborghinis. The driver must have a valid U.S. driving license. If under 25, the winner will be accompanied by a parent or guardian (or other designated adult) from the departure city to Atlanta or Paris (the two Grand Prize destination cities). Hotel accommodations and roundtrip airfare are included. Estimated total value of all prizes in this "Automobili Lamborghini" Contest is \$23,500. Some restrictions apply. Valid only in the U.S. and Canada. Void where prohibited by law. Not open to employees, representatives or agents of Titus Software Group, its agencies or their immediate families. This contest is subject to all federal, state and local laws and regulations. Titus reserves the right to reduce, modify, suspend or prorogue their performance of the contest, by reason of circumstances beyond its reasonable control. Any changes or modification shall be communicated prior to be effective as and when it is possible.

Titus will publish every two weeks on its Web site a release updating the contest ranking to keep the competition challenging (www.titusgames.com).

Next Month

Yoshi, former *EGM* coverboy and platform game hero, will finally be put through the paces.

Remember the RPG feature we mentioned last month that was supposed to be in this month's issue? Well it's really gonna be here next month and this time we mean it!

Late features aside, plenty of new games are piling up, just waiting to be put into *EGM*'s May issue.

Among them are previewable versions of Quest 64, Konami's *Azure Dreams*, *HardBall 6* and *Psygnosis'* *Psybadek*.

Those waiting for their judgement day with the omnipotent *Review Crew* are Yoshi's *Story*, *Diablo*, *Need For Speed III* and *Bloody Roar*.

How can anyone not like a fighting game with the lovely name "Bloody Roar?"

Alright, so the RPG feature was late. Think of it this way—we've had that much time to make it better by adding games such as *Namco's Tales of Destiny*.

ELECTRONIC GAMING MONTHLY

May 1998

EGM²

April 1998

Blast off to the next level with Sony's hottest 3-D game, *Blasto*. We'll have the first full strategy so you can find all of *Blasto*'s babes.

The second part of our *Gex*: Enter the *Gecko* strategy reveals the locations of the toughest TV remotes to find.

The coolest fighter in recent years hits the PlayStation: *Bloody Roar*. We profile the most vital fighting tactics.

Yes, it might be the month of fools and pranksters, but the strategies we've got in store are definitely no joke.

It all kicks off with the witty-yet-intense 3-D adventure *Blasto*. This game has gotten all the hype, but is the gameplay there? You'll know for sure after checking out our first

hands-on blowout. Other featured games include *Gex*: Enter the *Gecko*, *Tactics Ogre*, *Skullmonkeys*, *Klonoa* and much more.

Finally, check out the start of something big: The largest, most complete tricks guide we've ever done. Why settle for just tricks and tips when you get it all in *EGM*!

You got an eyeful of *Dead or Alive* in our *March* cover story, now play it yourself, along with *Blasto*, *Gex 2* and others on our latest demo disc.

OPM is going all the way to Lake Tahoe, site of the ESPN Airwalk Freeride Championships, to bring you the latest on *Psygnosis'* off-beat new racer, *Psybadek*. Also, check out our first hands-on coverage of the "Death Star" of PlayStation fighters, *Namco's* stellar *Tekken 3*!

Find out how *Crystal Dynamics'* wise-crackin' *gecko* fared in our extensive review or play the game yourself on our demo disc. Also included are playable demos of *Blasto*, *Dead or Alive*, *Running Wild*, *Jeremy McGrath's Super Motocross* and *TOCA* plus videos of *Tomba* and *MLB 99*!

Official U.S. PlayStation Magazine

April 1998

OPM blows the lid off *Tekken 3* in our first hands-on preview of *Namco's* latest iron-fisted fighter.

Playing games is fun...

Game Programming Fundamentals, the latest innovative course from the NRI Computer Learning Center—a leader in at-home education—gives you real, hands-on experience using a computer language to write your own game.

As you analyze *Alien Attack*, a game commonly known exclusively for the way you discover how a typical computer game is written, from storyboarding to coding. Plus, you cover game design, performance and debugging.

Best of all, you'll learn how to make direct modifications to *Alien Attack* while you master your choice of programming language: Visual Basic, C++ or Java. There's no other course like it.

Creating them can be out of this world!

Train With the Leader

At the NRI Computer Learning Center, you get training that puts the emphasis on *you*, with real-world technology, hands-on training, attentive customer service, and the convenience of studying *when* you want to, *where* you want to, and *how* you want to.

Enter the exciting world of game programming without ever leaving your living room.

Find out more today!

(In order to take this course, you must own or have access to a 486/D12/66 or better PC.)

The Hardware You Gotta Have!!

PUZZLE ME CONTESTS

A Dolby Digital Surround Home Theater System!

Win all these Video Game Systems, Plus \$1,000.00 worth of games, too, yours, as a bonus option!

A 300 MHz Pentium II MMX computer with everything you need for amazing game play!

WIN!

Finally a contest you can win! In this contest you don't rely on the luck-of-the-draw. You determine if you win or not. You win by outscoring other players in a game of skill. Can you solve the puzzle below? It's simple, but it's only the start. Five more puzzles (which come to you by mail) will get harder. But this time it's all up to you. Make it to the final puzzle and you'll win a consolation prize just for playing. Get the highest score on the final puzzle and the Grand Prize is yours. With whatever options you want. Do you have what it takes? Then play to win!

You have the POWER!

What happens next? There will be four more puzzles at \$2.00 each and one much tougher tie-breaker at only \$1.00, all of which will be sent to you by mail. You will have 3 weeks to solve each puzzle. We don't know how many will play but typically 55% will have the highest score possible to Phase I, 43% to Phase II, 36% to Phase III, and 32% to Phase IV. The tie-breaker determines the winner. If players are still tied they will split the value of the Grand Prize they are playing for.

Directions. Fill in the Mystery Word Grid with words going across that spell out the Mystery Word down the middle. Hint: use the Mystery Word Clue.

GAMERS!

One lucky winner who finds the April Fools' gags in this issue will win a game system of their choice. The second-care package from the kooky editors of *EGM*...oh boy!

Send us a postcard identifying the gags and where they appear in the mag to:

April Fools' Sweepstakes
To Ziff-Davis Video Game Group
1120 Highland Avenue, Suite 712
Lombard, IL 60148

Entries must be received by APRIL 15, 1998

EGM APRIL FOOLS' SWEEPSTAKES

- Sweepstakes Rules:**
- No Purchase Necessary. To enter, identify the four hidden gags in this issue of *EGM* (including the page numbers on which they appear) and mail your answers on a standard sized postcard containing your name, address, and phone number to "EGM April Fools' Sweepstakes," 1120 Highland Avenue, Suite 712, Lombard, Illinois 60148. No purchase or payment of any money is necessary to enter. All entries must be handwritten. Mechanically reproduced entries will not be accepted. Entries must be received by April 15, 1998. All entries become exclusive property of Ziff-Davis, Inc. and will not be acknowledged or returned. Ziff-Davis assumes no responsibility for lost, mutilated, late, illegible, incomplete, postage-due or misdirected entries.
 - Prizes: 1 Grand Prize: Grand Prize winner will receive one (1) video game system of their choice (approx. retail value \$150). 1 First Prize: First Prize winner will receive one (1) box of stuff from the *EGM* offices (approx. retail value \$40). Winner will be determined by a random drawing from all valid entries by Ziff-Davis whose decisions are final. Drawing to be held on or about April 16, 1998. All prizes will be awarded. All prize winners will be notified by mail. Prize(s) are non-transferable. No substitutions of prize(s) are allowed, except at the option of Ziff-Davis should the featured prize become unavailable.
 - Odds of Winning: The odds of winning will be determined by number of valid entries received.
 - Eligibility: Sweepstakes open to residents of United States and Canada only. Void in Quebec. Non-compliance with the time parameters contained herein or return of any prize/prize notification as undesirable will result in disqualification and an alternate winner will be selected. Winners or their legal guardians shall sign an affidavit of eligibility/release of liability/prize acceptance within 30 days of receipt of forfeited prize. Neither Ziff-Davis nor its affiliates, subsidiaries, divisions or related companies are responsible for any damages, taxes or expenses that consumers might incur as a result of non-acceptance or refusal of prize. Winner accepting prize agrees that prize is awarded on the condition that Ziff-Davis, its representatives and employees will have no liability whatsoever for any injuries, losses, or damages of any kind resulting from acceptance, possession or use of the prize(s). Winner further acknowledges that Ziff-Davis has neither made nor is in any manner responsible or liable for any warranty, representation or guarantee express or implied, in fact or in law, relative to any prize, including but not limited to its quality, mechanical condition or fitness.
 - Winners List: For a list of winners, send a stamped, self-addressed envelope to "EGM April Fools' Sweepstakes Winners List," 1120 Highland Avenue, Suite 712, Lombard, IL 60148. Requests for winners lists must be received by May 30, 1998. Allow four weeks for delivery of winners list.
 - Restrictions: Void where prohibited or restricted by law. All federal, state and local regulations apply.

Well, let's see...
You are an almighty force
who knows no boundaries.
You are invincible, relentless
and immortal.
Duh.
