Letter of the Month

Think you have what it takes to write the Letter of the Month? Send us your video game expositions and you could win a Logitech cordless controller for your PlayStation 2. Neat, huh?

Believe in the Magic

I just got done reading your October issue, and I'm ecstatic about the release of *Kingdom Hearts*. Now, some people may have been skeptical at first, thinking that Square and Disney could never work together on anything, let alone develop a great game. Some people still think *Kingdom Hearts* looks crappy, despite the hundreds of cameo appearances, the many references to past games and movies, the simply stunning graphics, the...well, you get the picture. I, on the other hand, have been thinking about how great it will be to side in the disk for *Kingdom Hearts*, wait for my PS2 to load, and watch the opening to a great game.

Ever since you first mentioned the game, I've been watching for more info about it. The first time you showed Cloud, I let out a squeal. When I found Yuffie in a screenshot, I jumped for joy. Then, when Aeris showed up in one of your previews, I must admit I had to wipe a tear: I'm not only thrilled at the concept of Final Fantasy characters showing up everywhere, but I can't wait to reminisce about past days when I used to watch those Disney classics. I'm looking forward to seeing Aladdin, the Genie, Ariel, Mickey and the loads of other characters Disney and Square crammed in. I can't wait to play a game that will dominate my life for a good long time, until I have collected everything, beaten every minigame and completed what will surely be a wondrous experience.

Chris
AshtonAnchors28@aol.com

Some people just get it. You, sir, are among them. Forget about all the doubters—*Kingdom Hearts* is pure magic that should be enjoyed in the exact spirit of your letter.

I recently bought *SOCOM: U.S. NAVY SEALs* along with a network adapter. I was really excited about playing online versus real human opponents, but that only came second to the thought of semi-realistic gameplay. No longer would I have to endure hitting another opponent with three rockets to the head in *Quake 3: Arena*. I didn't have to compete against 200% health and 200% armor and Quad Damage. I was looking forward to realistic one-shot kills.

When I play *Quake 3: Arena* online, I'm a "camper"—the really annoying guy who hides high up in a dark corner hiding a Railgun. Being a "camper" is looked down upon by many *Q3A* players, from newbies to purists. But now, in *SOCOM*, I have the chance to be a sniper, to pick from many different types of sniper rifles, to find a nice spot and to pick off the terrorists one by one—all to make things easier for the other seven guys on my team. I quickly earned a name for myself as a sniper, and was invited to join many clans. So, it came as a surprise when one day, while practicing with a random team of unknown young men, that over the headset I was asked to "please leave" because "I wasn't contributing anything to the team." I, of course, wanted to play my own game, and I didn't leave. I went up to my sniping point and made my usual one or two kills a round. I was almost always that last person on my "team" left alive. I had to put up with taunts of "Camper!" from my own "teammates." They would even follow me to my favorite sniping spots, firing their weapons at me to draw the opposing team's attention to me.

As a sniper, sure there are times when I can lay prone in a spot a whole round and not get a single shot off. However, more often than not, when the round is over, my stats show: 2 shots fired; 2 headshots; 100% hit rate. Even with these statistics, when I didn't leave I was voted off and kicked out of the game.

With a game made to be as realistic and faithfully devoted to the Navy SEALs as *SOCOM* is, being a sniper is something the game developer purposely meant to include, and a good sniper is going to be an integral part of any real *SOCOM* clan. You can either have a good sniper on your team, or get picked off by a good sniper on the opposing team. Either way, the person who is playing that part has just as much a right to lie there prone, keeping you in his sights, as you have to run around with automatic weapons firing at anything that moves.

To finish up, let me just say: I'm a sniper, not a camper and I've got your head lined up on my scope. So the next time your character drops down, dead, and there isn't another player anywhere in sight, check the messaging at the top of your screen, and you'll know that "REAPER" is on the opposing team, and I'm going to continue to take you out, round after round.

Gamers are talking about...

OPM's monthly roundup of hot topics, gathered from the OPM message board on www.gamers.com.

• **ONLINE AT LAST.** Not everyone managed to snag a network adapter at launch, so naturally the unlucky ones were curious about how it was going. "I haven't had time to buy an adapter, let alone play any games lately," **Xenoferrit** posted. "So, how is it? Half the board seems to be about all the problems people are having getting hooked up, but what about everyone who is already there? Are you having fun yet?" "I don't think there are THAT many problems, just misguided people," **SpideyBuddy** responded. **ps2payne** agreed: "I'm online right now...well I was playing...no problems here, it's very good. I was surprised that everything went fast and simple." **massive-grooves** counts himself among the many new *SOCOM* addicts. "*SOCOM* is just fantastic online. The headset is what really makes it great, being able to talk and strategize with your teammates. I played with some people today and one group in particular was just great about keeping people informed and using strategy...my kinda players! Anyway, it seemed like the server may be overloaded at times, got disconnected twice today, but other than that it has been just great." *SOCOM* wasn't the only show in town. "I haven't gotten *ONCE* yet. It's on back order or something," said **ohjbehaave**. "But the ones I've played have been sweet. *Madden* rocks. *NFL 2K3* is also pretty good, but I'm a *Madden* guy. And last but not least, *Tony Hawk 3* is fricken a blast and a lot of fun. Too bad I suck at it. So far, if you're a football fan or TH fan, it's awesome!" Even the 56k guys were able to join the party. "I only have dial-up for now, so *Madden* is terribly slow," griped **FP5Gamer**. "But *Frequency* kicks a**." I spent like two hours straight on it last night. And I will do more later tonight."

• **RAD.** Does *Robot Alchemic Drive* have what it takes to become a surprise hit? After we featured a demo for Enix's mecha game on disc 61, gamers have been talking "I just played the demo today, and I can say that was one of the coolest games I have ever played." **greensmudge** posted. "Though I couldn't get the camera to work. Was I doing something wrong? If I'm not doing things wrong, the camera needs serious fixing problems, or it might be one of the few games that are ruined by camera angles." **Fidius** agrees that the game has lots of potential. "My only gripe is the clunky controls (of the people, not the mechs)," he said. "The mechs behave the way mechs should, slow and cumbersome. Controlling the mechs from the perspective of the character is interesting, but I would like to move the character while still focused on the mechs. The unskippable cutscenes are a pain, but the game has potential to be great." Still, **Zach-o** was unimpressed. "I actually thought it was one of the worst games that I have played in a while. Well, at least since *Britney's Dance Beat*."

took four pistol shots to kill. Those who appeared to be less financially privileged, such as the homeless and blue-collar workers, usually took three pistol shots to kill. I was wondering if the people at Rockstar have some kind of prejudice against homeless people or the underprivileged? Or if they think that the lives of homeless people are somehow of lesser value?

Memo to Congress: Careful study has proven that the *Grand Theft Auto* series does indeed have socially redeeming values—the primary one being its subtle ability to teach gamers conservative Republican class distinctions.

We Still Don't Get It

Page 70, issue 60: You had questions about why people keep buying *Yu-Gi-Oh!*, so I asked my 8-year-old daughter.

I have answers (to some). Note: Anything in quotes is a direct quote from her.

Why buy the game? "Because it's fun."

Why play it? "Because most kids like monsters."

Why buy it? "Cause it's really cheap."

[Note here from mom—the kid doesn't have to fork out the money, hence it's very cheap.]

Why was it made? "Cause there is a TV show and they thought, 'Hmmm, kids really like this show, so how about we make it into a game?'"

Why do you watch the awful, cynical car-

toons? "Because, well, they're cartoons. And it's not really horrible; it's fun to watch." [Side note: When mom asked, "Don't you find it cynical?" kid answers, "No." When mom asks her, "What does cynical mean?" kid answers, "I don't know."] **Why is *Yu-Gi-Oh!* so short?** [Note: Mom omitted the "d" word.] "Because, um, I think that some heroes should be different."

I hope that helps your stumpedness. It did nothing for mine.
 Jo
 jgaudet@rogers.com

Despite your valiant but vain effort at uncovering an explanation, we are still overcome with stumpedness.

Military Intelligence

I am an intelligence officer in the J2 [intel] in the Pentagon. *OPM* gets passed around, and we are all DYING for the *SOCOM* game. But PLEASE check your information before you publish. Hey—I am not trying to be a jerk, but gun stuff is what we love. The P90 is made by the Fabrique Nationale Herstal SA of Belgium and is a submachine-gun. The FAMAS [Fusil Automatique, Manufacture d'Armes de St. Etienne] is a French assault rifle. Both fire different ammunition and have very different applications, although in the end both are pretty much made to kill the guy on the receiving end. The FAMAS is from 1973, and the P90 is from 1990. On page 106 [*OPM* 60] you said they were one and the same.

Well, thanks for listening to my rant—I do but rolled your eyes on this one. But thanks for a great article, a great pub, and here's to looking forward to killing some goons with you on the PS2! "Mark" in Wash, D.C.
 via email

Mark left his phone number with his e-mail, so we called to confirm that he's actually, um, a spy. And indeed he is. How cool is that! So be on the lookout for Mark and his Pentagon buddies while sniping away online. Just be sure to get the gun names correct—or else you're in big trouble.

QUICK HITS

BLAST THE BASTARD
 I just got up off of the floor, laughing, after reading your review of *SOCOM*. "You shoot Boomer in the head, is what you do!" Joe, those three paragraphs about that "insubordinate bastard" Boomer were the funniest I've ever read. I do that exact same thing when the A.I. does something stupid.

HEART BROKEN
 I recently purchased a game by Midway called *Shadow Hearts* and was amazed by how good it is. Your main dude is a stud, unlike that sniffling wuss Tidas from *FFX*. Yet I see no articles in your magazine about it. **HOW COME?!!**
 Brandon Soebes
 Springfield, S.D.

We reviewed it in issue 52. We liked it, too—we gave it four discs, in fact.

QUESTION OF THE MOMENT

Last month, we asked you to tell us if that whole '80s thing in *GTA: Vice City* is a good idea or not, and why you feel that way. Next month, tell us what you want to see next out of your online PS2 experience. E-mail us at OPM@rfdavis.com. Mark your notes ONLINE FUTURE.

Simply put, *Vice City* will make it officially cool to talk about the '80s.

Is the '80s thing a good idea? Are you kidding? Were leg warmers the best thing to happen to women? OK, bad example. But still, they are gonna make a fortune with this, so of course it's a good idea. First of all, they're basically using the same format and name from their other game that sold a few copies, and adding something that the core audience grew up in! I was born in 1974, and I'm pretty sure that most people who bought *GTA3* are around the same age, due to the rating.

We're the people who watched *Airwolf*, *Knight Rider*, *Growing Pains*, *Who's the Boss* [I love you, Ms. Milano] and, when the parents weren't looking, a bit of *Miami Vice*. So, here's my top 10 things that I'm looking forward to in *Vice City*:

1. Cocaine being used by everyone and their mother.
2. Hopefully coming across someone filming a cheesy '80s sex comedy.
3. Random people driving Lamborghinis ["Is he a drug dealer mom?" "No son, his parents are rich."]
4. Pink T-shirts under white sport coats.
5. Not having any seasons, except for hurricanes.
6. Feathered hair.
7. Someone in a Members Only jacket.
8. Knowing this game takes place when I was between 6 and 16 years old.
9. A soundtrack to rival my "Totally '80s" CD collection.
10. Billboards in the game containing ads for Atari 2600 games.

MPurhapz@cs.com

I don't think the '80s is a good place for a *GTA* game. We don't want to be reminded of the disaster that was the mullet. But the good thing about it is, it's *GTA*, so if you hate the hairdos [I'm comin' for you, mullet], clothes or music, just go kill whoever's wearing it or listening to it.

BEAUTY VS. THE BEAST...YOU BE THE JUDGE!

Britney and Axl photos from wireimage.com

So what did you boys think about the finale of the MTV Video Music Awards? Guys N Roses! Didn't I tell you they'd be back? Watch all the hosts of the show and all of America go crazy. Go ahead, nitpick. Talk about how you didn't like Axl's headband or something. Talk about his rusty voice, even though he was the only one there not lip-synching. It doesn't matter anymore. Put down that issue of *Tigerbeat* long enough to realize all the crap you've been listening to the last few years! By the way, your leather-clad Britney looked like a cheap '80s wannabe.

Welcome to the jungle, geeks.
 Pspower@aol.com

Wow. Still holding a grudge from our disparaging (but completely correct) Axl comments way back in issue 44? Still sore that we called your idol a "bloated, washed-up has-been"? Someone needs to get out of the house more. Once again, we offer you two pics of these stars, side by side, and we'll let our readers judge whom they'd rather see on these pages. (One hint: It should be the one who stars in a game titled _____'s *Dance Beat*.)

Media Roundup

Four pages of media fun!

Folks lined up at Sony's Metreon mall in San Francisco to be the first to get network adapters. *SOCOM* and *Madden* were top game sellers.

WAITING ONLINE

The PS2 finally goes online, but not for everyone

It finally happened. On Aug. 27, Sony Computer Entertainment of America launched the network adapter for the PS2, allowing thousands of eager gamers to get online and play against each other in standout titles like *SOCOM: U.S. Navy SEALs* and *Madden NFL 2003*. The launch was a major success for Sony, as approximately 250,000 network adapters were released into the market and immediately snapped up by PS2 owners across the nation. Unfortunately, this initial number proved far too small, as shortages were reported almost everywhere. According to Sony, the company didn't expect such a high demand for the peripheral and its hard at work trying to get retailers more adapters in the coming weeks and months. Another 150,000 network adapters will find their way onto shelves before the year's end, followed by an additional 100,000 by March of next year. Sony feels confident that these numbers should satisfy the demand at least through the upcoming holiday season. "We're finding the demand is quite high now, but we don't foresee any problems in the coming months," says Sony spokeswoman Monica Wik. "400,000 units for this year is a number we're quite comfortable with." Either way, the shortages so far have proven that every one—Sony included—has underestimated the eagerness of gamers to play online.

The PS2 network adapter is now available nationwide for \$39.99. Do you have yours yet?

A FEW GLITCHES

Unlike the launches of many online PC games, the PS2's online titles were rather stable and faced no server crashes in the weeks following the kickoff. There were a few unforeseen problems, though, as people

were often faced with server connection issues and network lag. In *SOCOM: U.S. Navy SEALs*, for example, we had difficulty connecting to the West Coast server because it was maxed out. The crowds of online gamers also slowed the network at times, a problem that was nonexistent when we were playing it up until the official public release. Sony apologizes for these slight glitches and claims they won't continue to plague the experience. "On the first day of full release we had a network router which was not operating at maximum performance," explains *SOCOM* producer Seth Luisi. "After researching the latency [lag] issue we found that this was the cause. This was fixed the following morning; the router just needed to be reconfigured. We expect that there will be some hiccups as large number of players connect and start playing online. And although we've thoroughly tested the *SOCOM* servers and network hard-

"We're finding demand is quite high now, but we don't foresee any problems in the coming months."

We caught up with a bunch of gamers at the PS2 network adapter launch event at the Sony Metreon in San Francisco and asked them the question...

WHAT ONLINE GAMES ARE YOU LOOKING FORWARD TO?

JASON ESTIOKO
Twisted Metal: Black Online at the start, because *SOCOM* may take a while to learn.

STEPHEN KRAUSE
"Believe it or not, but *Frequency 2*."

VINCE LAUREL
SOCOM. I just bought it and I can't wait to get home and play it.

BEN RAIT
Frequency 2 and *Tony Hawk 3*. My friends bought me *Tony Hawk 3* a while ago, and it's nice to be able to play that online now.

FARRIS DENNING
I can't wait to get on with *Tony Hawk 3* and then later with *Tony Hawk 4*.

TimeSplitters 2 Loses Online Play

Despite an overall successful launch of the network adapter, there was one major blow to the PS2 online plans for this year. Two weeks before the network adapter shipped, Eidos announced that *TimeSplitters 2*, originally supposed to be one of the flagship titles to support online play, would no longer include any online functionality. According to the company, the infrastructure was not yet in place for them to incorporate any online elements, and rather than delay the game, online play had to be removed.

If you're like us, this surely comes as a major disappointment—online play was one of the things we were most looking forward to with this sequel. If there's one consolation, though, the game will still feature iLink and LAN multiplayer support, so up to 16 players can still go at it at once. Actually, scratch that—one of the best parts about having the game online was that you wouldn't have to cram a bunch of guys into your pad for some crazy multiplayer mayhem. Let's hope *TimeSplitters 3* will give us what we've been really waiting for.

ware with 20,000 simulated clients and about 150 QA testers, there are always some problems that are only exposed when thousands and thousands of real players start logging on and play *SOCOM* at the same time. Rest assured, we are ready for any issues and they will be resolved in short order."

Worse for some were the problems of simply getting online with the network adapter (see poll to the right). According to Sony, though, most of the problems have been rather easily remedied by the tech support staff. "I'm quite pleased that most of the questions have been along the lines of 'do you support this ISP?' and not simply 'I can't connect,'" says Wik. However, if you're one of those still having trouble, head over to our Web site at opm.gamers.com for some tips on how to configure your setup.

A GREAT START

Despite any of the network problems and some of the connection issues, it seems that gaming online with the PS2 is off to a great start. There are plenty of killer titles in the pipeline (check out the chart on page 66), applications for Web browsing and e-mailing are on their way, and the PS2 hard drive ought to appear sometime next year. If you haven't played online yet, you don't know what you're missing—hunt yourself down one of those network adapters and get your butt online. You know, so we can take you out

ZOE'S WORLD

NO HELMET REQUIRED

Being Canadian, it comes as no surprise that I love ice hockey (*She shoots, she scores...*). I have dreams of playing an exhibition match with my local Vancouver Canucks (mimm... Todd Bertuzzi). I suppose my hockey fever is not unlike the Super Bowl-side hype that surrounds the American pastime of "football." Unfortunately, despite my best efforts, I can't bring myself to exude fervor over this seemingly mundane and slow-paced helmet-fest (not even the tight pants get me riled). Like most people, though, I do like those cheerleaders—spritely bunch! (Actually, I have a design for a cheerleading game, but that'll have to wait for another column.)

Suffice it to say, best-selling franchises like *Madden* and *GameDay* have little appeal to me. I lack the patience to learn how to pick plays and often find myself in the midst of a field kick on second down (did that sentence make sense?)—and soon after find myself snoozing on the couch during half-time. So when my selection of PS2 online titles arrived on my doorstep, I initially glazed over *GameDay 2003*, subconsciously placing it at the bottom of the pile with my *SOCOM* headset.

Alas, work called and I punted the *GameDay* disc into the PS2 end zone, preparing for an afternoon of frustration and boredom. I'm all set to go with my St. Louis Rams (I like the color scheme and logo), scanning various hiroglyphics in my playbook...when a cute little mail icon pops up on my screen! What's this? Help from my opponent? A message from Sony telling me its OK if I don't like football? But NO! I open it to read the following: "Yo mama. Yer gonna take a beatdown from the mastah of disastah!"

Surprise, surprise. I was being trash-talked by my anonymous online foe! Naturally this piqued my interest in continuing to play. Intent on responding, I soon discovered a plethora of programmed responses that can be scrolled through and smacked down even while running the ball down the field. Suddenly, the oafish game of football blossomed with an entirely new dimension of mental stamina. Three hours later I was yelling fervently as I sent a string of color commentary to my equally chatty opponent, a 14-year-old from Boise, Idaho, going for my jugular with a custom insult: "You play like a girl!"

Yeah, I lost. Badly. I still found myself running the wrong way occasionally and racked up an obscene amount of penalties (mostly because I was too busy trying to insult Idaho). But I was honestly having too much fun to notice the score! Who knew the network adapter could add so much spice to a gaming classic? I can only imagine the vocabulary I'll have developed by the time the NHL logs on.

ALL-STARS

Capcom's next big fighting game revealed

Remember that new Capcom 3D fighting game Clish spoke of last month? Well, it's finally been revealed, and there's good reason to get excited for this one. Titled *Capcom Fighting All-Stars*, this is the first true entry into the 3D fighting genre for Capcom (unlike the EX games). *All-Stars* is being developed by Capcom itself and not the external house Arkaik. The star-studded brawler is packed with classic Capcom characters, including Ryu, Chun-Li, Strider Hiryu, Charlie and Hagar, as well as several new combatants. The arcade version of *All-Stars* should hit sometime early next year, and since it's being developed on Sony's PS2-friendly System 246 board, expect a quick port to the PS2 shortly after!

BREAKING THE BAND

Ben Burnley, the singer/guitarist of the hit new band Breaking Benjamin, tells us about how his group's music wound up in Interplay's *Run Like Hell*

Most bands want to have their songs in video games because they're looking for exposure. You did it because the guy who played Biff in *Back to the Future* is in the game, didn't you? Biff's in the game? I didn't know that. That's really cool.

Uh, so was it because Lance Henriksen from *Millennium* and *Aliens* is in it? Or was it because Kate Mulgrew, who was Captain Janeway on *Star Trek: Voyager*, is in it too? I didn't know that either. This is just getting better and better. No, we did it because I'm real big on action adventure games. I go to Electronics Boutique and preorder all the ones that I know I'm going to like. What's cool is that when my manager called and said they'd gotten our songs in this game called *Run Like Hell*, it was a game I'd actually preordered.

Who made the decision to use footage from the game in your video for "Polymorous," like they do with songs from movies?

Check out Breaking Benjamin's new video at www.breakingbenjamin.com.

Interplay made a trailer for *Run Like Hell* that mixed shots from the game with clips from the video we'd originally made for the song. But when we saw it, we thought it looked better than our video, so we decided to use their version instead. The funny thing is, when a tape of it came to me in the mail, I wanted to see it because our song was in it, but because I was going to see shots from the game.

Had you seen any footage of the game before you were in it?

The only thing I saw was screenshots in magazines. But I knew from what I'd seen, and what they said about it in the magazines, that it was going to be a game I would like. What I think is cool is that this isn't the kind of game that usually has a band in it. Usually the games that have music are racing games or *Tony Hawk's Pro Skater*.

Who's the biggest gamer in the band?

Me and the bass player [Mark James Klepaski] are the only two guys in the band who own PlayStations, but he's more into the sports side of things. I'm definitely the most hardcore gamer in the band. I like those one-player games like *Metal Gear Solid 2*, *Devil May Cry* and *Max Payne*.

Breaking Benjamin's debut album, *Saturate*, is out now on *Hollywood Records*.

Enter the Animatrix

New media and information on the highly anticipated animated *Matrix* stories

With the second *Matrix* film drawing closer and closer, excitement over the franchise is on the rise again—not only because of *Reloaded*, but also thanks to *Animatrix*, the collection of short animated films based on the *Matrix* universe from some of the top Japanese anime studios. On the official *Matrix* Web site, whatisthematrix.warner-bros.com, the Wachowski brothers have finally unveiled a trailer for the collection [which will be released in parts online and as a full collection on DVD], and it has fans absolutely raving—us included.

Showing glimpses of the 10 different short

films, the trailer showcases a wide variety of styles [some feature traditional animation, while others use computer rendering]. It also shows just how cool anime can look when inspired by the stories and direction of the Wachowski brothers.

The film from Square Pictures, *Final Flight of the Osiris*, is completely CG-rendered and looks even better [dare we say it?] than *Final Fantasy: The Spirits Within* [see the shots above]. Interestingly, this film—along with five of the others—actually uses a storyline written by the Wachowskis, and acts as somewhat of a bridge between the events

of *The Matrix* and *Reloaded*. Another film in the series, called *Second Renaissance*, from director Mahiro Maeda [known for *Blue Submarine No. 6*], is said to actually serve as a prequel to the original *Matrix*.

A few of the other films in the set also caught our eye, notably *Program*, from Yoshiaki Kawajiri [best known for *Ninja Scroll* and *Vampire Hunter D*], and *World Record*, from Takeshi Koike, which apparently answers many questions about *The Matrix*.

Be sure to head over to the site to check out the trailer and get yourself prepared for when these hit next spring!

HERE COME THE HEROES!

Now more than ever, superheroes are saving the day on PlayStation systems

CRASH! KA-BOOM! SMACK! BLAM! SNIKT! THWIP!

The sounds of dueling men in tights have escaped their confinement to the pages of comic books in a big way, and those who wish they could live in Metropolis or see some guy in red and blue slinging through New York City have never been happier. Not only does Hollywood aim to please them with several superhero movies due by mid-2003, but the gaming industry has followed suit with the most comic-book-inspired releases featuring the since the 16-bit era. And here's something even non-fans can appreciate. Finally, you can't automatically assume that a superhero game will suck.

It's a difficult concept, to be sure. With a few notable exceptions (Marvel fighting games from Capcom, Activision's *Spider-Man* titles and Ubi Soft's *Batman: Vengeance*), PlayStation superhero releases have largely equaled nothing less than gaming Kryptonite.

In fact, our May "Worst Games Ever" feature, which centered around the PSone, included not only *Iron Man/X-O Manowar* and *Batman and Robin*, but also *Judge Dredd* and *Batman Beyond* (not that *The Fantastic Four*, *The Incredible Hulk*, *Danger Girl* and *Spawn: The Eternal* were anything special, either!)

"Just as movies like *X-Men* and *Spider-Man* inspire future Marvel film producers to up the ante in terms of quality while remaining true to the fans, so do great games," says Russ Brown, brand manager for Marvel Comics. "All of the upcoming games have great potential."

He's right even regarding the titles starring spandexed wonders at rival DC! The following pages highlight all of the superhero games you can expect in the coming months—some you might even want to play. Nuff said

THOUGH BASED ON SCREENS FROM THE FEATURED GAMES, THE MOCK COMICS YOU'LL READ OVER THE NEXT FEW PAGES ARE ONLY LOOSE INTERPRETATIONS OF THE EVENTS IN EACH. THEY DON'T NECESSARILY REPRESENT WHAT TRANSPIRES.

SUPERMAN: SHADOW OF APOKOLIPS

You've still got that sour taste in your mouth from the last Superman game you played, right? Well, there's good reason for that. Titus' N64 title singlehandedly embodies all that can go wrong with a superhero game. Thankfully, this one doesn't. Shadow of Apokolips—which Infogrames probably just delivered to a game store near you—utilizes all of the Man of Steel's powers for the first time in an adventure living up to the quality of an episode of Superman: The Animated Series itself.

Disney SQUARESOFT

YOU NEVER KNOW

BATMAN: DARK TOMORROW

Let's just forget about the P5one travesty that was Batman Beyond: Return of the Joker for a moment and give Kemco the benefit of the doubt for Dark Tomorrow. While we're still unsure about how the final gameplay will turn out, there's no doubt that the developers have fully captured the feel of the comic. The main reason? A script co-written by DC's own Scott Peterson and Bat-maniac

Kenji Terada (responsible for the stories behind Final Fantasies I to III). "In Dark Tomorrow, I know that the players can become Batman and experience the thrilling sensation of Gotham City," says Terada, who has included everyone from mainstream villains to such lesser-known fan favorites as Ra's Al Ghul and Mr. Zsasz. The bat signal finally shines this November

X-MEN: NEXT DIMENSION

If you've used a Dual Shock to control an X-Man, odds are you dig fighting games. For years, Capcom and Activision have thrown the X-Men into such titles, and fans have seemingly only clamored for more. For Next Dimension, Activision introduces Marvel's merry mutants to full 3D, with 24 fighters total and a strong emphasis by Paradox Development on putting the individual powers of each mutant to good use. Also cool: The eight arenas come multitiered so that one environment can actually appear as three different ones. Story mode has also been emphasized, acting as sequel to the comic's "Operation: Zero Tolerance" storyline.

HOWDY, KIDS! IF YOU DON'T ALREADY KNOW ME, I'M BAS-TION. AND I'M MORE THAN JUST A HEAD IN A JAR. I'M A THREAT TO MUTANTKIND!

"AND IF THERE'S ONE THING I KNOW, IT'S HOW MUCH MUTANTS LOVE TO FIGHT!"

DO YOU KNOW WHAT HAPPENS WHEN A LASERGUN SHOOTS A STORM? THE SAME THING THAT HAPPENS TO EVERYTHING ELSE.

AND NOW FOR SOME KNEE-STABBIN' PRACTICE!

AW, NUTS!

"YES, THEY ALL SEEM BENT ON DESTROYING ONE ANOTHER. AND THANKS TO MY EVIL PLAN..."

X-MEN: WOLVERINE'S REVENGE

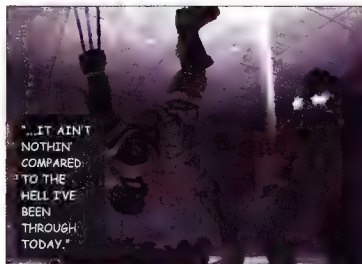

We'll go ahead and say it: *Of all the game's in this feature, Wolverine's Revenge will likely be the best. The story by Larry Hama, former scribe of Wolverine (the comic), places Wolveie in a search for the cure to a virus that will kill him in 48 hours, sending him back to Department H and examining his history. We just have to wait until spring's X-Men 2 hits theaters for Activision to release the game.*

SO, LOGAN, WE MEET AGAIN...

"...IT AIN'T NOTHIN' COMPARED TO THE HELL I'VE BEEN THROUGH TODAY."

"FUNNY, THE GUARDS AT DEPARTMENT H DIDN'T EXACTLY WELCOME ME 'HOME.' MADE THE SEARCH FOR A CURE TO MY VIRUS KINDA TOUGH."

"NEVER COULD GET THE BESTA ME, THOUGH. I'D JUST SNIFF 'EM OUT WITH MY MUTANT SENSES AND TAKE 'EM FROM BEHIND."

"AND THEY SAY NOTHIN' CAN STOP THE JUGGERNAUT..."

"...WELL, THEN I GUESS MY NAME IS NOTHIN'."

LET ME SHOW YOU WHY I'M THE BEST THERE IS AT WHAT I DO.

VOICE ACTING WITH FORCE

You might have a hard time believing that Mark Hamill, the man best known as Luke Skywalker, voices the perfect Wolverine for *Wolverine's Revenge*. But he does (alongside Patrick Stewart's Xavier). We had a chance to chat with the now-preeminent voice actor at a recording session.

QPM: At one point during your voice session, you said, "I love this character!" What is it about Wolverine that makes him so great?
Hamill: Well, I think he kind of personifies what Marvel did in the '60s, which was shake up that kind of complacency that had crept over a lot of the superheroes, where everybody was sort of well-rounded and adjusted and comfortable with who they were. Their lives were so messed up—just like the readers. It was revolutionary.

[This game goes] back to the roots of Wolverine's kind of outsider status. There's a lot of anger there. And his attitude! There's a kind of quiet menace in Wolverine's knowing that he can break you in half like a porcupine.

He's the best there is at what he does...

Yeah. You know, with Wolverine it's tough, because he's the first character I've done since Joker [on *Batman: The Animated Series* and most related portrayals since] where I feel the kind of weight of the iconic status looming over me. The world judges—everybody is an expert.

So, does that mean that previous portrayals of Wolverine influence yours?

I would imagine everything in my consciousness on this subject has influenced it. I loved the movie. It's like Joker, though, I had seen the Cesar Romero version; I had seen the Jack Nicholson version. What happens is, in both cases, I didn't know at the time that I'd ever be doing it. Then, of course, when you get the part you think, "Oh my God, can't I go back and look at these things!"

One of my friends called me up the night before the first recording for *Batman*, and he said, "Boy, I really admire you. You got some real balls." And I said, "What're you talking about?" And he said, "Well, I wouldn't want to follow Jack Nicholson in any part." And I went [*hits the couch*]. "No! Why did you say that?" And how I'm all thinkin' [in Nicholson voice], "Are they gonna want me to have that kind of inflection, or what?" As it turned out, it said at the top of the copy when we auditioned: "Don't think Nicholson." I thought, "That's a relief!" I'm thinkin' Nicholson has a lot of [late actor] Lee Marvin in him. He had no time for foolishness, or nonsense or games. Also kind of a seething Clint Eastwood thing going on.

Considering that a lot of your characters of the past—Joker, Hebbaldin and more—were villains, do you consider the hero Wolverine a departure?

Well, it's funny because you're all over the board. [There couldn't be a more iconic good guy than] Luke. And then for kids to say, "oh, you're Joker, too," it's a nice kind of yin-yang going on. The villains, I think, are fun because they are so colorful and they present whatever predicament is in the way of the protagonist. It's always fun dramatically because he can always be a real pain in the ass.

Wolverine's interesting because he's a protagonist who comports himself like an antagonist. He's got an incredible attitude. I like his sense of humor. He's kind of like

we wish we could be in real life. In fact, he's the opposite of being politically correct, or brown-nosing, or kissing up, or whatever it is we all have to do at some point in our lives to people we want to curry favor with. This guy could care less. Hey, if you had 12-inch claws, you wouldn't have to worry, either! He's the ultimate badass who's on the side of good. It's like, "he's a bastard, but he's my bastard."

Were you a big fan of his coming in to this?

Yeah! Sure. And it's really great to work professionally and bring my hobby along. It's not anything you would have anticipated as a kid. I always felt

semi-guiltily reading comic books. My dad thought they were just trash—for people who were not smart enough to read regular books.

One of the things I love about comic books is the sort of social aspect of developing friends who have like interests and, you know, "Here, you read my stack, I'll read your stack." I love them, the way they reflect history, whether they're World War II books or, like, Red Scare comic books of the '50s.

One last thing: Let's pretend the Joker somehow gets sucked into a vortex and ends up in the X-Menian in front of Wolverine. What happens?

[In Joker voice] I think the Joker would find mutants quite challenging—not like Batman [*in voice*]. I think he'd be turned on by the whole idea of mutants. Whereas in the DC universe, he's so clearly cut a villain, in the Marvel universe, there's just may be a place for him!

When I get into the head of the Joker, I totally understand his motivations. Yes, I'm a criminal, but I'm entertaining! I would think that Batman's a psycho in a mask who's fighting for self-aggrandizing reasons—and he's just a pain in the ass.

JAMES BOND: STIRRED BUT NEVER SHAKEN

There is no better-known movie moniker than "Bond...James Bond." After 40 years—50 if you count the Ian Fleming novels—the super-savage secret agent has effortlessly juggled a bevy of girls, guns and gadgets while saving the world from an eclectic collection of wackos, and he just goes on and on.

Agent 007 was first introduced on the big screen in 1962's *Dr. No*, and, in theory, should have gone the way of the Hula Hoop by now. Yet the twentieth film, *Die Another Day*, opens in November and Electronic Arts will ride the picture's marketing juggernaut with a new Bond release, *James Bond 007: Nightfire*. So, why does James Bond endure when the shelf life of other pop icons expires instantly?

It's not just the eye-popping effects and Bond girls that keep 007 alive and well (though Halle Berry was an inspired choice for *Die Another Day*). No, he endures because, first and foremost, he gets the job done—and we have a grand time watching him do it. Also, 007 never takes himself too seriously, and there's no whining or angst to slog through. Bad puns aside, he's cool, efficient and fun—all qualities attractive to men and women alike. There have been many pretenders to the throne, *XXX* being the latest, but no usurpers. Besides, Vin Diesel is no Sean Connery, or the even the current screen Bond, Pierce Brosnan.

Successful franchises live on because they attract new audiences. What better way to reach today's up-and-coming movie-goers than through games? The Bond gaming series was an important one for the interactive entertainment industry because it helped jettison the stigma that entertainment-licensed games weren't worth looking at, let alone playing. Because of their success, it has also been suggested that the Bond games can drive new viewers to Bond movies. Impossible to verify, but it could very well be the case.

Another key to franchise longevity is that they need to be refreshed without changing the original formula (remember *New Coke*?), and though both Bond games *Agent Under Fire* and *Nightfire* feature independent story lines, they stay true to the Bond mythology. Fortunately, both Hollywood and interactive publishers understand that though 007 has his roots in the last millennium, retro is cool if done with style—or in the case of *Austin Powers*, affectionate zinnies.

Nightfire is the first video game to include the "cyber scanned" facial features of Pierce Brosnan. Providing all goes well with both the game and movie, his participation sounds like a win-win situation. Gamers will get the opportunity to play as the same big-screen Bond plastered all over the media this winter, and Brosnan will introduce his screen presence to a new set of younger fans.

Can James Bond continue to beat the odds along with the bad guys? With both Hollywood and Silicon Valley in his corner, it seems likely.

VOICE OF EVIL

Actor Temuera Morrison—who played Jango Fett in *Star Wars-Episode II: Attack of the Clones*—talks about reprising his role for *Star Wars: Bounty Hunter*

With the exception of R2-D2, most of the actors in the Star Wars films don't do the voices in the games. Why did you decide to do the voice of Jango Fett in *Bounty Hunter*?

Because it was one of the best scripts I'd read in ages. It was like Clint Eastwood/*Dirty Harry* in space. Pity it wasn't a feature film. We should've made a movie called *Bounty Hunter* and then brought out the game.

Did you get to see any of the game before you signed on?

No, nothing. All I've seen was some stuff in a PlayStation magazine that I was on the cover of. But I knew with all the heavy artillery that I had, all the stuff I had in *Star Wars* to play with, I knew they could make a pretty good game.

How was doing the voice of Jango in the game different from acting in the movie?

Well, the whole game is based on me, so it was like doing my own little movie. But really, there wasn't too much difference; he's the same character. Though when you're doing the movie, you're on a big set and George Lucas is there—it's pretty exciting. But when you do the game, you go in a studio and all you see is a microphone.

Was there any difference between doing *Bounty Hunter* and the previous voice-over work you've done for TV commercials?

No, not really. All the technical things are pretty much the same. So I'd just think of Lara Croft and all that stuff. But there I was, doing it—doing the sideways movements. "Hup! Hup! Hup!" And now move to the right. "Hup! Hup! Hup!" And now you have to die, but not a big die, a little die. "Aargh!" I've never died in so many ways.

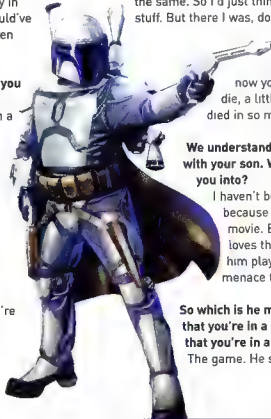

We understand that you play video games with your son. What kinds of games are you into?

I haven't been playing much lately because I've been away, shooting a movie. But he's been playing *GTA3*. He loves that one, but I don't like him playing it. He's becoming a menace to society.

So which is he more impressed with: the fact that you're in a *Star Wars* movie or the fact that you're in a *Star Wars* game?

The game. He says the game's cooler.

DREAM CAST

It's always tough to cast a fighting flick since no one fights anymore. All the big stars are soft, so we've had to stretch a bit to figure out who would fit. But our *Tekken 4* movie would be more of a love story than a huge show of pugilism. By the way, we're being sarcastic. So here's who you'll see on opening night. Action!

Got any ideas for a *Dream Cast* of your own for another game? Send them to us at epgm@ziffdavis.com with the subject **DREAM CAST**.

Kazuya: Jet Li

While we wanted William Shatner here, he wasn't available, leaving us with our second option Jet Li kicks ass, though, so he won't disappoint.

Paul Phoenix: Sean William Scott

Sean might need a follicle implant to fully realize the Phoenix role—but we couldn't pick Kid from Kid 'n' Play, now, could we?

Nina Williams: Nicole Kidman

Since she stunned us in *Moulin Rouge*, we've been at Ms. Kidman's mercy. Since we've been playing *Tekken 4*, the same goes for Nina.

Ling Xiaoyu: Zhang Ziyi

Maybe we want to see Zhang Ziyi in pigtail. Or maybe it's that we want to see her in those cutesy outfit-fits. Or maybe it's because we like the way she fights.

Heihachi: Terrence Stamp

Kneel before Zod, bee-atch! What else do we have to say?

Christie Monteiro: J.Lo

With a backside like Christie's, this one's obvious.

WHAT EVER HAPPENED TO...

PICTURE PARADISE

It seemed like the perfect bit of convergence—the kind of stuff the brass at Sony would hold up as evidence when chattering away about the PS2's Emotion Engine and “the future of computer entertainment.”

Tucked away in a corner of Tecmo's booth at the May 2001 E3 convention were a pair of Sony reps who were unveiling a middleware application called Picture Paradise. Using a digital camera, Picture Paradise let you load images into games, customizing your PS2 play-time with pics of yourself, possibly even mapping them directly onto a game's characters to create a virtual you. So why were the Sony people parked in Tecmo's booth? Because Tecmo's *Monster Rancher 3* was the first U.S. game to utilize Picture Paradise. Granted, the

application was a bit rudimentary; you could only upload images onto “masks” worn by monsters. But it was still pretty darn cool.

Since then, Picture Paradise has completely disappeared. No other U.S. game has utilized the middleware solution, and none has any future plans to do so. Why? According to a Sony rep, “The developers here in the U.S. weren't as excited about this as they are in Japan, where Picture Paradise is still being incorporated into new games. Sony has since decided to pull back its Picture Paradise program here, though the company plans to leave the door open if any new interest arises.

As for Tecmo, the publisher is undecided about including Picture Paradise in its next PS2 *Monster Rancher* game. “We didn't get as much praise for it as we thought we would,” says John Inada, Tecmo's marketing director. “If a significantly improved version of Picture Paradise-type technology became available, I'm sure we'd give it a hard look. We still think that the idea is good, but the execution and the education for the idea would have to be improved.”

THE WATCHDOG

JERK THE JERKS

A friend of mine was describing one of the more interesting strategies being practiced by some of the folks who are playing *SOCOM* online. Apparently what happens is that for kicks, a group of teammates turns on one of its own members and shoots up the guy's character until he bleeds. This maneuver is known as a "Bloody Mary." Why do they do it? Well, why not?

Welcome, PlayStation fans, to the dark side of online gaming.

This sort of behavior is something that PC gamers have known about for years. PC gamers have been online since the early days of *Quake*, and as soon as the first game servers hit the Net, some of the more obnoxious players were finding ways to cheat and to irritate their fellow gamers. As the PC online gaming world grew, bad behavior grew as well—and it's become enough of a problem that it's actually receiving mainstream attention. In September, the *Los Angeles Times* ran a story about "online bullies" in games like *EverQuest* and *Ultima Online*, who get online specifically to harass and annoy other online gamers.

These guys enjoy repeatedly hunting down and killing newer and weaker online characters, killing them over and over. The killing serves no purpose in the game itself—these guys just want to antagonize the guy on the other end of the computer connection. Some of the more organized bullies form gangs that block access to parts of the game map or hoard important game objects, jacking up the prices—again, not for any purpose other than to drive other players up a wall. Others simply fire off harassing messages based on a player's presumed race, sex or orientation.

PlayStation gamers have some advantages over PC gamers when it comes to diaphragms playing online. Console games are harder to hack than PC games, so many of the online cheats and tricks are harder to pull off. Also, the console and game companies maintain and monitor the network the games are played on, so game servers are in a more controlled environment than they are in the PC realm. However, as the "Bloody Marys" of *SOCOM* show, none of that will affect the guy who wants to go online solely to be the sort of anonymous jerk in the virtual world that he can't be in the real world.

Game companies are well aware that they won't make money if no one but jerks comes to play. But I think this behavior also has the potential for more serious repercussions. I've got a clock ticking on how long it takes before Sony or another company servicing online gaming gets sued. The complaint? Providing these jerks an avenue to humiliate, intimidate and harass others. Someone is bound to say his civil rights are under fire every time he goes to play online, and the companies running online games are just letting it happen. It won't take too many of those kinds of lawsuits to convince game makers that online games are more trouble than they're worth—or to draw the attention of those who believe video games are degenerating the moral fiber of the country. This would just be more fuel for the fire.

Anyone who has ever been in an online chat room or message board knows that left unchecked, jerks drive away everyone else. They can do it to online gaming as well. Game companies need to do their part to jerk the jerks, and many are. But more importantly, online players need to realize that by being the sort of obnoxious twit online they wouldn't ever be in real life, they just might kill off their online world entirely. So in short: Behave, folks.

John Scaizi always behaves politely online. You can see for yourself when you comment about this column on the *OPIN* message boards. Or drop him a line at He's.all.about.responding.to.your.comments.

SEAL OF APPROVAL

5 questions with the SOCOM development team

1 So *SOCOM* is finished, done, out the door. How do you think it turned out? What are you most proud of? What makes you cringe when you see it?

Overall, I think *SOCOM* turned out well. A lot of people are having a great time with it online and they're enjoying the single player missions, too, so I'm pleased. I'm most proud of the fact that *SOCOM* as a whole is a lot of fun. We paid attention to a lot of details, but the core of the game—the controls and the weapons—are very solid. Altogether it just feels good to pick up and play.

The one thing that makes me wince is when I see people complaining about the enemies sometimes just standing there. What most people don't know is that when you surprise, startle or stun an enemy, they can't move for a brief period and that's when you can most easily take them out. We didn't want to put punctuation marks over their heads to indicate their awareness states because that would be out of character for *SOCOM*. I wish we had made the enemy "I'm surprised" and "I'm suspicious" sounds and animations more obvious.

2 What would you like to implement in a sequel? Anything you planned for *SOCOM* but couldn't fit in? Any new ideas that came up during the development process? Any plans for, say, vehicles?

We managed to incorporate a lot of our ideas in *SOCOM*, but didn't have time for everything. On one hand I'd like to make the maximum length of a chat line longer, and on the other, I'd like to add more variety to the close-quarters battle aspects. As for vehicles I guess I should just say that just about everybody likes using them and that the next generation of tactical shooters will have to have them to be competitive

3 How do you expect the real-life SEALs and other members of the military to respond to the game? Do you think you've made it real enough for them?

Since we've made the game with the help of SEAL consultants and the Navy, I think there'll be general approval. When we designed *SOCOM*, we—both our team at Zipper and our SEAL consultants—tried to be realistic but knew that fun is more important. We asked ourselves questions like, "If I were an off-duty SEAL, would I want to spend three hours lying in mud doing recon?" You could say that the missions, enemies, weapons and so on are realistic, but we avoided the aspects of being a SEAL that would be least interesting to players.

4 What's your favorite level for multiplayer, and why? Blizzard, definitely. There are good sniping and hide positions, and it's totally serene and beautiful—until the shooting starts. Makes a nice contrast. Also, the game type for this map is Demolition, my personal favorite.

5 Have there been any surprises regarding the way people have been playing online? Any tactics you didn't plan for or feats you didn't think could be pulled off? So far we haven't noticed anything too surprising, but *SOCOM* has been available to the public for only a short time at this point. One thing we noticed immediately is that people are catching on to the importance of team play very quickly and their accuracy is improving at the same time. We thought we'd have an easier time as the developers, but I think our advantage won't last too long.

Cool Pads

Let's face it: Games just aren't as fun without a good controller in your hands. With that in mind, here are a few of our recent favorite pads.

1 Logitech Cordless Controller. At last! A cordless pad that won't do weird things, bug out, lag or cause problems. Although it was delayed, Logitech's new controller has definitely been worth the wait. It's a substantial, comfortable pad with solid-feeling and well-placed buttons. Four AA batteries will see you through 50 hours of play with the vibration function activated, or 100 with it switched off. The range is insane—you can still control the thing in another room. If you're looking to lose some wires from your gaming life, this is the best pad yet.

2 Colored Dual Shock 2s. Sony recently launched a line of see-through pads tinted with different colors. Sure, they're still the same as the regular Dual Shock 2s, but now they just look so darn cool!

3 Nyko AirFlo Controller. OK, this may sound like a gimmick at first, but it's actually quite cool (and refreshing!) once you get your hands on it. For anyone who gets sweaty palms from heated gaming sessions, this is the controller for you.

BALL BRAWL

Dragon Ball Z finally hits PS2

For Dragon Ball Z fans, the wait has been utterly interminable—but finally Intogrames has leaked out some actual info about its upcoming PS2 game. Titled *Dragon Ball Z: Budokai* (which means "tournament," by the way), the game will be a brawler similar in style to SNK's fighting games. We're also told that it'll likely hit stores early next year, but there's a chance it might even make it out in time for the holidays. Keep an eye on these pages for even more DBZ news as we get closer to release.

JET FUELED

Martial arts superstud Jet Li stars in a new PS2 action game

He's already a huge sensation in Asia, and with recent sideside hits like *Kiss of the Dragon* now under his belt, Jet Li is one of the fastest-rising action stars in Hollywood. He's strong, he's sleek, and he knows how to kick some serious ass. Which is why when Jet recently came to Sony to see if he could star in his own PS2 game, things were immediately set into motion. In fact, you could say that a partnership between the two was destined to happen all along.

"When we began the concept stages for *Rise to Honor* more than three years ago, we knew we wanted it to be based on the style of a Hong Kong action movie," says Jim Wallace, associate director of Sony's Foster City Studio. "We had Jet Li posters all over the studio and were referencing his movies for everything we had planned in the game. We were thrilled when we found out that Jet was interested in collaborating on a PS2 project, knowing that his creative input on *Rise to Honor* would help us to truly realize our vision for this ambitious game."

One of Sony's goals is to provide a new level of realism for action-adventure games. At the Foster City Studio, that means embarking on a detailed process of motion-capturing all of Jet's signature highflying maneuvers. But Jet's not going it alone. To help design the action sequences, Jet has called on fight choreographer Cory Yeun, who's partnered with him on several films, including *The One* and *Lethal Weapon 4*. "Working with the Sony Foster City Studio team has been an exciting experience—very different than making a movie," Jet tells us. "The motion-capture system allows for extremely realistic movements and, in addition, we were able to use a lot of actions in the game that we can't normally put in a film." Jet will also lend his voice to the game.

Although *Rise to Honor* isn't due out until fall 2003, what we've seen so far looks exceedingly cool. Jet seems pretty confident that it'll turn out well. "The final game should provide you with a genuine feel for action," he says. "You can finally feel what it's like to be Jet Li."

Rural Living-Tale of the Southern Island
Victor Interactive/Polygon Magic, PS2

A few months ago, we told you about a sleeper hit called *My Summer 2*, a touching little adventure about a young boy visiting his relatives and traipsing about on holiday by the seaside. Unfortunately for publisher Sony, Japanese developers do follow their Western counterparts in quickly copying the latest hits, so welcome to the first clone in the burgeoning, er, relative-visiting-vacation-sim genre. But developer Victor Interactive—of the *Make Your Dream Home* game, which we also featured a while back—has done things differently enough (much in the way *True Crime* is that crucial little bit different from *GTA3*) to merit our attention. The general premise is the same, with your character (this time a girl in junior high) sent off to grandmother's house on an island in the Okinawa chain. The setting isn't a token choice; to Victor's credit, the game really does milk it for all its worth. You can drink Orion beer, for one—an actual Okinawan brew. But the most notable native feature is the fact that everyone speaks a proper indigenous dialect—and you can even be tested on your understanding of it. Of course, for most of you reading this, that means absolutely nothing (it's still gibberish, just slightly different), but it's nice to note Victor's eye for detail. The rest of the game follows *My Summer's* lead, with various island-based activities available. You only have two weeks to partake in such fun minigames as swimming, cycling, and, er, sunbathing. Should you be interested in an Okinawan holiday, we recommend calling your nearest travel agent—this game isn't coming stateside anytime soon.

GAME WORLDS TO VACATION IN

LIBERTY CITY (GTA3): As long as you can handle yourself, why not? Sightseers can enjoy the slums, the red-light districts and the shipyards; shoppers can visit *Arma-Modo*; and thrill-seekers can try to drive through Saint Mark's until killing *Salvatore* without suddenly exploding.

TRAVERSE TOWN (Kingdom Hearts): How can you resist a Disneyland-esque town populated with Disney characters, *Final Fantasy* stars and moogles?

ICO: *Ico's* castle setting was ridiculously beautiful—a definite tourist-dialect...not for the whole imprisoning of horned children and ghostly white princesses, of course. And the evil dark shadows. And the birds.

AL BHED (FFX): It may be a hot and sticky desert, but it's Rikku's homeland and thus the last known whereabouts of Gary Steinman.

HEARTS AFIRE

Kingdom Hearts makes a splash

It's only fitting that Disney and Square's colossal collaboration see a massive kickoff in the States. Square held two major launch events for *Kingdom Hearts*, drawing in both hardcore fans and Hollywood stars. The first was at San Francisco's Sony Metreon mall, where Square fans lined up around the block to get a first chance to play the game. Voice-actors David Gallagher (Riku) and Hayden Panettiere (Kairi) made special appearances, as did game director and character designer Tetsuya Nomura. Our sister pub *Electronic Gaming Monthly's* James "Milkman" Mielke even popped in to do a DJ set. A few days later Square held a launch party in Los Angeles, drawing in some hot, young talent like Melissa Schuman of the pop group Dream, along with plenty of their up-and-coming teen stars.

ON LINE

It's here. Sony's online invasion has finally struck, and from what we've seen so far, many of you seem to be spending most of your waking hours getting your asses blown off in *SOCOM*. But what comes next? What's over the online horizon? A whole damn lot. Here are 10 of the most intriguing online-gaming titles slated to arrive in the next year. There are no doubt a whole lot more coming—we have a feeling the next E3 is gonna have our heads spinning, but for now you can savor these tasty tidbits of online goodness.

Title	The Game	Why Should I Care?	Possible Pitfalls
 ATV Offroad Fury 2 Sony CEA November 2002	Another dedicated racer gets a facelift, a bunch of new tracks, and a smattering of minigames.	The lobby system allows you to chat with other racers and show off your own customized ride.	Support for only four players online seems a bit slim; we'll have A.I. opponents online.
 Auto Modellista Capcom December 2002	Don't let the cartoony, cel-shaded graphics fool you: this game is more <i>Gran Turismo</i> than <i>Ridge Racer</i> .	The lobby system allows you to chat with other racers and show off your own customized ride.	Only two players can race online at one time—and even less, what we've seen seems kind of choppy.
 EverQuest Online Adventures Sony Online Ent. Spring 2003	This is the PS2's answer to the PC's massively multiplayer online RPG phenom: faster and easier to play.	Surely you've heard of "EverCrack"? People have gotten married on <i>EverQuest</i> , for chrissakes.	The PC version is no great beauty to look at, and it seems like the graphics aren't improving much on the PS2.
 Final Fantasy XI Square Spring 2003	Like <i>EQ</i> , it's an MMORPG, but this one's set in the <i>Final Fantasy</i> universe, moogles, chocobos and all.	Don't worry, Square will still make offline FFs—and they will work out the bugs before it hits here...	...trouble is, we're not sure when (does we say "it's")'s coming here. Check out <i>Gish's</i> column for more info.
 My Street Sony CEA December 2002	Here's a much more relaxed online experience: simple games like marbles, volleyball and R/C racing.	It looks like it'll be a nice way to relax after capping terrorists in <i>SOCOM</i> , and it's fine for all ages.	The simple games and the somewhat kiddie style may alienate those who don't like anything without blood in it.
 NBA 2K3 Sega Sports October 2002	Sega Sports' last offering easily wrested the first-place trophy from EA's <i>NBA</i> . Now it goes online.	Developer Visual Concepts looks online like few others, through its work on Dreamcast.	This year's <i>Live</i> is looking so much better than last year's that EA could catch that trophy right back.
 NBA Live 2003 EA Sports October 2002	Competition has proven fruitful for EA; this year's edition appears to be on track for success.	It's b-ball online; unless you dabbled in Dreamcast, this should be a rarity in and of itself.	Online play will be two-player only; you can't even bust out a multiball to flesh out the teams with human players.
 Resident Evil Online Capcom 2003	Blast away at the living dead with three other live-learnmates in a massive online Raccoon City.	Now it's not just you against an army of undead. You get to share the thrills and chills!	With so little info out there, we're having a hard time figuring how this'll work. Let's hope Capcom can pull it off.
 Star Wars Galaxies LucasArts 2003	Another MMORPG, this time from LucasArts. Will you be a humble moisture farmer or try to rule the Empire?	Duh. As if touting a galaxy far, far away weren't enough, you'll be able to pilot your own ship!	Rumors of delay of the PC version make <i>Galaxies'</i> PS2 release a bit of an uncertainty. But it'll come sooner or later.
 Tony Hawk's Pro Skater 4 Activision November 2002	Though the online mode in <i>Tony 3</i> seemed a bit of an afterthought, it should play a much bigger role here.	There's a mode where you can just skate around and slap people. Who doesn't love a slapping?	Those shut-ins who do nothing but build elaborate combos that last an entire match will kick your ass with ease.

Death is my business

Pure Solid Fun

We dig into every nook and cranny of Konami's *The Document of Metal Gear Solid 2* DVD

For those of you who haven't been keeping up with our coverage of Konami's *The Document of Metal Gear Solid 2*, here's a quick recap. It's basically the ultimate collector's item for any *MGS2* fan. Coming on a DVD that's only playable on your PS2, the disc has loads of goodies that should make any *MGS* fan go wild—stuff like behind-the-scenes "making of" photos and videos, storyboard illustrations, timelines and interactive bits, such as in-game 3D characters and environments that can be manipulated on the fly. The disc also contains a five-level demo of the VR missions that we'll see later on in *MGS: Substance*.

We recently got our hands on a final version of the DVD and have been fully exploring its depths. The interactive modes are definitely fun to toy around with (yes, changing Snake's hair color amuses some of us)—but what's most interesting on the disc was just reading back on how the whole project took form over the years and checking out all the behind-the-scenes snapshots and movies. Even the technical aspects of the game are quite interesting, such as how the A.I. works and how Konami is able to pull off those incredible visuals—budding developers are going to eat this stuff up. The VR missions add yet another nifty extra for fans who've been aching for more *MGS2* gameplay; they're diverse and actually somewhat lengthy.

Bottom line: At a mere \$20, and packed with tons interesting items, the DVD is easily worth the cash. If you're a big *MGS2* fan, don't hesitate to pick it up. It should be available in stores by the time you read this.

1. At one point the MGS team toyed with the idea of making the characters "toon shaded." 2. They also attempted characters that would match Yoji Shinkawa's original art-work. 3. The MGS team getting military instruction. 4. *MGS2* was originally called *MGSIII*. Why? You tell us. No, seriously, please tell us—Konami won't say.

Clish MacLaver's GOSSIP GOSSIP

Gossip, rumor and scandal. Gaming's biggest secrets dug up and served with gravy.

The run up to the holiday season is always full of juicy gossip. There are some big stories this month, both exciting and somewhat troubling (see the item on *Final Fantasy XI*). For more up-to-date info, check our Web site, www.gamers.com, regularly for more goodies.

BUFFY SLAYS THE PS2

My pals at Eurocom (the guys working on the *Harry Potter* and *Bond* games for EA) are working on a Buffy game for EA based on the third season of the show. It's actually been in development for about 18 months now and the project is said to be totally "top secret." Expect a third-person game with an emphasis on

be quite plausible. The original game was apparently in development for PSone before it was switched over to the PS2, so perhaps the team has gone back and finished the original project? As I dig around to try to find more info on *Ico 2*, I'll see what I can scrounge up on this for you, too.

GEX IS NO MORE

A while ago I heard that Crystal Dynamics was working on a PS2 update to its once-popular Gex franchise. I received word this month that the project has been cancelled now in favor of a new action/platformer. Some of you will likely be

"Rumors are circulating that we may even end up seeing XII before XI makes it!"

puzzle-solving but not stupid "pull the lever and get the key" type stuff—they assure me that they've put a lot of thought into the way the puzzles are structured.

ICO SLUMS IT PSone STYLE

Sounds odd, but rumors of a PSone version of Sony's beautiful game keep on surfacing, making me think that the whole idea could actually

disappointed by this, but those of you who had a problem with the repetitive wise-ass humor will probably be quite pleased.

ONIMUSHA IS A TRILOGY

If you check out the interview with the producer of *Onimusha 2* in the official strategy guide, you'll notice the following tidbit: *Onimusha 3* is the final game in the series.

BITS AND BOBS

Make sure to keep sending emails to Square about releasing *FFI* and *II* in the U.S! Apparently they've been getting lots of emails, and with enough interest they may actually release the things. • Capcom's already working on a *Gun Survivor 4* for the PS2 (No. 3 was released as *Dino Stalker*). It should be out in Japan next spring. • Sony's working on a new *Ghost in the Shell* game. Remember that? It was on the cover of *OPM*'s first issue! This one's based on the new animated TV show that has proved to be a big hit in Japan. • Namco's doing *MotoGP3* for PS2. • *Dynasty Warriors 4* is in the works and Koei is looking to release it in the U.S. next spring. Each episode apparently attracts more and more new fans to the series. You should definitely try No. 3 if you haven't looked at any of them yet.

FINAL FANTASY XI NOT COMING TO U.S.?

Word is that there are problems afoot with *Final Fantasy XI*'s release date here in the States. Whereas Square is a huge company in Japan, it's U.S. presence is still comparatively small—small enough, in fact, that it may not be able to shoulder the burden of hosting a massively multiplayer online RPG. So what's going to happen? The most likely outcome is that Square will attempt to partner with someone who can absorb some thing of this scale. If you're at all interested in who I think might join forces with Square, I'd have to say, that it'll probably be either EA or Sony. These may be the only players with enough clout to really make things happen here in the U.S., so if they don't step up to help, there's always the possibility that, *gulp*, *FFXI* may not be released here at all.

While all this is being sorted out, development on *FFXII* is continuing, and rumors are circulating already that we may even end up seeing *XII* before *XI* makes it! That would be a little weird. Also, the oft-rumored *Final Fantasy* X side-stories (commonly referred to simply as *Rikku* and *Yuna*) are pretty much assured for U.S. release. As long as nothing untoward occurs, we'll no doubt find out what happened to Tidus some time next year! Hopefully C.Bake will have some screens to show you in previews soon!

SOUND STATION

By John Scalzi

This month's hard-rocking (and mopey as hell, mostly) lineup comes to you courtesy of Need for Speed: Hot Pursuit 2, and EA's new EA Trax label.

Bush: *Golden State*

On one hand, Bush has a history of sounding like better bands in the last couple of albums, that band has been Radiohead, circa *The Bends*. Gavin Rossdale, bless his pretty little heart, isn't so good at those abstract, conceptualized lyrics, which come out more Simon LeBon than Thom Yorke. On the other hand, the rest of Bush seems to remember its job is to churn out jagged-but-hook-filled songs on time and they drag Rossdale back to the land of tuneful. End result: *Golden State* is the triumph of mutual competence over artistic wobbling.

Final Score ●●●●

The Buzzhorn: *Disconnected*

Maybe after the new rock bands like the Hives and Vines stop the likes of Britney and N'Sync, they might take a pipe to the whole group of miserable mopers that have been passing themselves off as rock artists for the last few years. This would be a good thing for us all. Buzzhorn is grinding and depressed and with the possible exception of "Holy Man," which is clearly Buzzhorn's "Stairway to Heaven," there's nothing here I haven't heard dozens of times before or would want to listen to more than once. I'm ready for this musical era to get flushed.

Final Score ●●●

Course of Nature: *Superkola*

More of the mopey stuff, but Course of Nature sounds like they got the classic '80s metal portion of their output DNA to a high enough level that by comparison they occasionally sound a bit more fresh than some of their contemporaries. Emphasis on "occasionally." Songs like "Garden" and "Someone Else to You" still seem like they were constructed out of rags made of Alice in Chains, Slaid, and POD, clapped on top of each other with a moderate level of skill, although with no real finesse. But a state sort of freshness is better than none at all.

Final Score ●●●

Pulse Ultra: *Headspace*

Holy Kurt Cobain on a jittery jumping bean—was an entire generation of musicians crammed like veal into wooden crates during their emotionally formative years? Yet more grind and white rock—a few nice jumpy drumbeats and a guitar lick, and I like "Never the Culprit," but enough already. Honestly, you could put the Pulse Ultra, Buzzhorn, and Course of Nature albums on a CD changer, hit "random" and not know one from the others. Someone please fire the A&R people at Atlantic and get some people who think it's okay to be happy once and a while.

Final Score ●●●

Rush: *Vapor Trails*

Now, here's a band with something to actually feel, and a better drummer and lyricist Neil Peart lost his wife and daughter within the same year, but *Vapor Trails* goes through its paces with an admirable sense of energy and even optimism. The album's title track glencingly essays the transitory nature of life, and follows it up with the thumping "Secret Touch" that admits that "There is never love without pain," but also "It is the power the remains." Rush fans will be thrilled—dude, it's Rush! But I'm personally enjoying it more than I did any of their previous

This month we have a couple of themes permeating Bookmarks. One appears to be "The Future Is Now—Or Nearly So." Here's a good jumping-off point to explore all those technologies you always thought were only science fiction—including a hoverboard a *la Back to the Future II*.

www.tecielestbleu.com

And here's the other theme: Flash and Shockwave, and what it can do for you. (More specifically, how it can wile away those long hours at the office or the computer lab.) LCEB is an absolutely extraordinary site which appears to focus on logarithmic animation. The puppetry tool you see here is pretty hardcore, but there are also tons of wacky games and time wasters. Don't miss the Eye ("Oeil") section. Creepy!

This site seems a bit odd, so we're not really sure if they're still making this. But if they are, we want one: It's basically an isolation booth for gaming. For \$75k you too can own your own private retreat, complete with surround sound and PS2. The question is, where are you going to hang the thing? Especially considering it has room for two. Wink, wink.

Buried in this site is another bizarre Shockwave puppetry device—this one with human skeletons as the puppets. Not terribly functional, but when you grab a handle and drag the poor sap across the screen, allowing him to bounce back to center, it's pervy-entertaining.

www.hubblelite.org

OK, so maybe Hubble wasn't so great back in the day. When NASA sent the thing up, it turned out to be ridiculously nearsighted. But after a particularly large set of bifocals, the Hubble Space Telescope is running at optimum efficiency. Check out the results of its deep-space investigations at this site. You can even get way-cool wallpaper for your PC.

We're starting to think Shockwave is going to become the gaming medium of the future. Even though Habbo isn't a game, *per se*—more of an online lounge environment. But it sure as heck beats AIM chatrooms for meeting people. At least there's a semblance of social behavior here...

DVD REVIEWS

by John Scalzi

BEAUTY & THE BEAST: PLATINUM SE

(Robby Benson, Jerry Orbach)

This is, hands-down, the best animated film of the last 40 years, and any of you *Princess Mononoke* fans who dare to disagree know which part of my anatomy you can pucker up to. It was significant in itself—great story and pacing, wonderful music, and production quality that signaled the return to the sort of lush, cinematic animation that the medium had not seen since the days of *Sleeping Beauty*—and it was also significant in that it was the first animated film to be nominated for a Best Picture Oscar. In short, the film put animation back on the map. This two-disc DVD offers the film in three versions: The original release, a special edition that

includes new animation and an additional song, and a "work-in-progress" that Disney originally presented at the New York Film Festival. This, plus commentary, games and a second DVD stuffed with making-of features that animation geeks will salivate over.

THE BROTHERHOOD OF THE WOLF

(Monica Bellucci, Samuel Le Bihan)

A very silly film that jams together the French aristocracy, werewolves and Hong Kong-style action scenes—but, you know, why not jam away just to see what happens? It probably won't be necessary to do it again, but in the grand scheme of Things That Only Get Done Once, this is kind of cool. And if you work on the premise that everyone on the flick was suffering from oxygen deprivation while making it, it even makes a twisted bit of sense. Oh, and it's in French. You decide if turning on the subtitles makes it better or not. Extras: Deleted scenes.

E.T. 20TH ANNIVERSARY EDITION

(Henry Thomas, Drew Barrymore)

It's a masterwork, there's no denying it, but one of monumentally manipulative proportions—as you get older you become aware just how deftly Spielberg was yanking on heartstrings. This version is the 2002 theatrical update, which adds a few scenes and dig-

THE SCORPION KING: SE

A surprisingly genial cheesefest that never quite explains what a Samoan dude (Roché), a Chinese babe (Hu) and a British bad guy (Steven Brand) are doing prancing about the Fertile Crescent 5,000 years ago. Hey, you want archeology, go watch them Indiana Jones flicks! The Rock acquits himself pretty well—he's a better actor in this than Ah-nold was in the first Conan film—and everybody else involved understands the concept that too much thinking would just spoil the fun. Turn your brain down to "simmer" and enjoy. The Rock offers commentary, and there's also an extended version of the film on the disc, along with the usual making-of bits, and a preview of The Rock's next flick, *Hamlet*. I kid, I kid! It's actually called *Hellorado*. Hey, they both start with "H."

HIGH NOON: 50TH ANNIVERSARY EDITION

(Gary Cooper, Grace Kelly)

This isn't just a Western; many film buffs see it as a metaphor for the cowardice showed by the film industry during the McCarthy hearings and the Hollywood

"blacklist" (the film's screenwriter was one of those blacklisted, in fact). Gary Cooper is the sheriff whose arch enemy is a-comin' to shoot him down and who can't get any of the townsfolk to help him out; Grace Kelly is his bride who has to decide between her pacifist beliefs and standing by her man. The DVD features a commentary track with relatives of the filmmakers, a Leonard Malin piece and a never-before-seen documentary.

INSOMNIA: SE

(Al Pacino, Robin Williams)

Al Pacino is a cop whose life is imploding; Robin Williams is the murderer he's trying

to catch. When the two meet in Alaska, it doesn't go the way either of them expect. Telling any more would ruin the fun of this film—directed by Chris Nolan, the guy who put together *Memento*, so you know that you're going to have more than a few twists and turns along the way. Just enjoy the ride, and the performances by Pacino, Williams and co-star Hillary Swank. Swank and Nolan show up on commentary tracks, and Nolan conducts an interview with Pacino for the DVD extras. There are also deleted scenes, production material and a documentary on insomnia (the actual ailment).

JAMES BOND COLLECTION #1

(Sean Connery, Pierce Brosnan)

This collection features seven of the Bond films, featuring the good (Goldfinger), the bad (Licence to Kill) and the cheesy (The Spy Who Loved Me). Each of these DVDs

comes with various extras, usually including director commentary and some making-of features. Each of the DVDs in this boxed set is also available individually, but I can't imagine that the sort of person who buys one Bond film isn't going to buy all the rest, so you might as well get the whole darn set and settle down to a Bond marathon with your vodka martini—shaken, not stirred.

JASON X: SE

(Kane Hodder, Lexa Doig)

Jason's in the 25th Century, hacking and slashing his way through teens as if to atone for the fact that his previous attempts to cull the young and stupid from the gene pool had failed, since the teens of the future are still doing all the stupid things that got their predecessors killed hundreds of years before. The movie is complete and utter crap, but there is one truly excellent reason to get the DVD: It comes with a "jump-to-a-death" menu feature (choose "Random Kill" or "Kill All") which lets you dispense with all the pointless exposition (such as it is) and go right to the culling. Now, that's what DVDs are for!

STRANGE BREW

(Rick Moranis, Dave Thomas)

Leave it to a couple of Canadians to do a drug comedy where the drug is beer. This film is an artifact of a [very] brief moment in which it was cool to wear a toque and say "eh?" south of the 54th parallel. *Strange Brew* shows why it didn't last: Two dummy white guys act like a drunken Cheech & Chong and try to save the world from mind-controlling beer. It's amusing, in a cut-humor sort of way, but better when you're full of Meisen, Tim Horton

cutters and about six pounds of back bacon. The movie also comes with "Great White North" skits from SCTV, which are pretty funny, no matter your sobriety.

WINDTALKERS

(Nicolas Cage, Adam Beach)

Sooner or later, John Woo's whacked out blend of action and melodrama was going to catch up to him, and this is where it happened. Fans of Woo-flavored action have no beef here: The bullets fly like insects and people (mostly the Japanese, because this is a WWII flick) die in droves. It's the usual bloody Woo ballet. But then there's the story line—about a white officer (Cage) assigned to protect a Navajo code-talker (Beach)—and that's more mush than most people were willing to put up with. Still, if it's action you want, this is veritable buffet of bullets. Dig in. No DVD extras.

I'm Never Gonna Dance Again

IN STEP WITH THE '80S: FOOTLOOSE AND FLASHDANCE

Footloose and *Flashdance* are hitting the DVD shelves this month, and for those of us of a certain age, watching either one is like cracking open the high school yearbook and wishing that someone could have come from the future to warn us that leg warmers and Members Only jackets were a bad way to go. Although they were big hits in their day, neither of these films has aged well—"dorky" is probably the best way to describe them both.

Mind you, *Footloose* was never actually cool, merely popular—not unlike a Rubik's Cube. Even at the time, the music from the film caused even moderately musically hip teens severe pain: There's only so much delusion that would allow one to think Kenny Loggins was speaking to the youth of the '80s. But *Footloose*'s entire secret was that it was a '50s movie in '80s time, with a fresh-scrubbed young rebel (Kevin Bacon) who just wanted to dance and listen to rock and roll, but moved to a town where the constitutional right for free expression was overruled by John Lithgow. In that context—the context that understood that 30 years earlier, Pat Boone would have been in the Kevin Bacon role—Kenny Loggins no doubt seemed fresh and hip. But outside of the girls who had a thing for Kevin Bacon (hey, it happened, once) and the guys who were going out with them, this one was an eye-roller then, and more so now.

Not so with *Flashdance*, which some believed to actually be steamy and hip, although much of that had to do with the scene where Jennifer Beals' body (or more accurately, the body of her dance double, Marine Jahan) was liberally doused from a bucket of water. *Flashdance*'s story was even more tissue-thin than *Footloose*'s (Beals was a

Pittsburgh welder by day, exotic dancer by night, and dreamed of going to classical dance school) and to be honest, it's more notable as the launching pad of director Adrian Lyne (*Fatal Attraction*, *Indecent Proposal*), writer Joe Eszterhas (*Basic Instinct*, *Showgirls*) and producers Jerry Bruckheimer and Don Simpson (too many bad, loud action films to count) than it is for its own qualities.

These guys took the elements of that made *Flashdance* "work"—gauzy eroticism, catchy but bad music, slimmed-down plotting—and made entire careers out of them. *Flashdance* is merely a proof-of-concept for the formula.

Neither *Footloose* nor *Flashdance* comes with DVD extras. Gag me with a spoon.

TV SHOW NEWS

THE DEAD ZONE RETURNS

Nicole deBoer, co-star of *The Dead Zone*, recently spoke about the show's season-one finale as well as the course of things to come in season two. And, yes, the show has definitely been picked-up for a second year.

The lovely Ms. deBoer, (whom you probably enjoyed in *DSS*, too) said that this season's finale will take aspects from the original Stephen King story and will continue them as a major plot thread next year.

"They introduce the character of Greg Stillson in the last episode of the first season," she said in a recent interview. "He's the politician who ends up being the evil guy in the book, who's basically Johnny's nemesis, and they met back when they were children. Sean Patrick Flanery [who played Indiana Jones in *Adventures of Young Indiana Jones*] plays him, and he's really, really good. So they're just starting to introduce that now."

24, ERM...2

Although things are extremely quiet on the subject in the Fox camp, it now seems confirmed that the second "day" of 24 will take place a year after the events of the first season. Elisha Cuthbert (who plays Jack's daughter Kim) said in a recent interview her character Kim has "made a big leap from 17-year-old to an 18-year-old." We're not geniuses at math, but if what she says is true, the timing of the new show seems fairly obvious!

NOT JUST VIDEO GAMES!

It's not just games that get the conservatives fired up. *Buffy The Vampire Slayer* is "the most immoral show on TV" according to right-wing group Parents Television Council (www.parentstv.org). The reactionary pressure group claims that last year *Buffy* "became more graphic in its depictions of violence and sex. (Which was exactly what we liked about it.) The organization also criticized *Friends* for its apparently obscene "depiction of promiscuous lifestyles" and *Will and Grace* was slammed for its depiction of a gay man and his straight female best friend.

MEDIA MIX

BLADE III TO FEATURE

OTHER MARVEL CHARACTERS

David Goyer, writer of the *Blade III* story, told

Comics2Film that Marvel Comics likes his initial story concept: "If things work out as planned, we may see a couple of other somewhat obscure Marvel characters make their appearance in the film."

Meanwhile, Goyer also said that Gornak, director Oliver Hirschbiegel (whom you've probably never heard of...we certainly haven't—and we still don't know who he is even after looking him up on *IMDB*) was being considered to helm the third installment of the vampire franchise. "I met with Oliver, liked his work, and we discussed the film a bit," Goyer said. "But it's no more than that at the moment."

ALIAS SEASON 2

Hopefully you remembered *TiVo* the season premiere of *Alias* on Sept. 29, but in case you didn't, Sydney's mother is back and played by veteran actress (and spooky Jennifer Garner look-alike) Lena Olin. After the spectacular confrontation in the first episode, what can we expect in the coming weeks?

Victor Garber, who plays Sydney's father, Jack Bristol, said that the appearance of Olin's character would profoundly change the show's dynamic. "It's thrown Jack for a loop, and he's not used to being out of control,"

Garber said in an interview. "And I think he's much more fragile and vulnerable this season than we've seen him be, and so it's very complicated what's going on for him." In particular, Olin's appearance affects Jack's budding relationship with his estranged daughter. "It's causing a great deal of tension, and there's a sort of sense [of], I guess the word is competition, of trying to...keep her, protect [her] and continue building up the trust that he has established," Garber said.

Alias co-star Kevin Weisman, who plays gadget-geek Marshall, told *Sci Fi Wire* to expect more spy toys, more Marshall action and more guest stars. In an interview at the ABC Primetime Preview Weekend at Disney's California Adventure theme park, Weisman revealed that David Bowie may make an appearance on the show next year, joining a list of guests from last season that included Quentin Tarantino.

"With me, there's a lot more weapons and gadgets," Weisman added. "And [creator] J.J. Abrams has promised me that I will be venturing out on a mission this year, so watch out for some Marshall ass-kicking, or for Marshall getting his ass kicked, which is probably more of a likely scenario. However, I'm looking forward to that."

SPIDER-MAN 2

Spider-Man 2 scribes Alfred Gough and Miles Millar (who also created *Smallville*) told *Wizard* recently that director Sam Raimi wants to see changes in hero Peter Parker (Tobey Maguire). "We can't really talk too much about the story—because the X-Men will be sent out to kill us—but you will see Peter grow and evolve," Gough said. "That's really how the story Sam wants to tell. You'll see him grow as a person, a superhero and in all his relationships."

TOP 10 CHARTS

PS2 Top 10

Call it the calm before the storm. With the holidays nearing and the online launch a roaring success, look for the next batch of big hits soon to dominate this chart. Our guess? *GTA: Vice City* will grab the top spot, with challengers like *Sly* and *SOCOM* lingering just below.

Now that the fall semester is well under way, it's more than apparent by the sales of <i>NCAA Football 2003</i> that a lot of work isn't getting done. Instead of reading Checco or studying the fundamental theorem of calculus, students are spending their free time locked in dorm rooms trying to bring the national championship to Kent State (or actually succeeding at it with Texas, Florida, State of Tennessee). And, with the game's great depth, not to mention its stellar gameplay—we certainly don't blame them.

While *Yu-Gi-Oh* maintains its *Svengali*-like hold on PSone gamers, and old standbys continue to pepper the charts, a few true-blue new games have quietly popped up. We like it as a sign of the PSone's staying power. You can't keep a good console down!

We didn't like the game, we don't trust the whole <i>Yu-Gi-Oh</i> phenomenon, and we're just stumped here. So instead of trying to be funny, we'll explain that "Svengali" reference in the above paragraph. Svengali was a villainous hypnotist in George du Maurier's classic novel <i>Trilby</i> . Did You Know?

Dante's trademark "juggle" attacks came as the result of an *Onimusha* bug where an enemy stuck in the air and was repeatedly hit. The *Devil* team loved it and turned it into a feature.

Lucia

The second playable character in *Devil 2* is Lucia, a devil hunter and the protector to a town. She fights with two small swords and martial arts, and is generally better at close combat. You can choose which character to play as at the start of the game, though you can save and continue with the other. At one point in the game, Lucia meets Dante and persuades him to go to her town. "She's one of the mysteries of the game," says Tanaka. "As you play through, you'll find out her relationship with Dante."

We can only imagine the witty taunts Dante has in store for the bosses in *Devil 2*. But can anything top the original's classic, "Flock off, feather-face!"? Only time will tell!

Whiteout

With all the snowboarding and skateboarding and thisboarding and thatboarding, you'd think a nice snowmobile racing game would make the little gaming boys and girls sing and dance. It seems that *Sled Storm* already made that happen, though, and with **Konami's** *Whiteout* you're getting more of the same—only this game features really bad character models. Luckily, the nine environments are way pretty. It also features a guy named Tucker Hibbard. Which makes us laugh.

Pro Race Driver

Codemasters' *Pro Race Driver* takes a different approach to traditional racing games by placing a heavy emphasis on story. After viewing his father's horrible death in an accident on the pro racing circuit, Ryan McKae made it his mission in life to do his dad proud and follow in his footsteps. Select between several leagues to join and experience NASCAR-style racing as you lead Ryan to greatness across 30 tracks. The game's great controls should satisfy all genre fans this **November**.

SHOX

HANDS-ON PREVIEW

Rally gets the Big treatment

While previous **EA Sports Big** games have been very much about personality and character interaction, *Shox* breaks from the mold and simply provides us with an incredibly arcade rally game. There are no white guys with afros, no sassy chicks with attitude, just 24 cars licensed from Audi, BMW, Toyota, Mitsubishi, Subaru, Lancia and Ford, plus some kick-ass tracks.

As with all other **Big** titles, the gameplay does have a bit of an edge over more traditional rally games. Due to the tight design of the tracks, the pack always stays close together, and there are challenges throughout the race that encourage you to be as crazy as possible as you enter "Shox Zones" that time you between waypoints. There's also the option to "race for pinks" and gamble your car away. Look for *Shox* in **November**.

Powerpuff Girls: Relish Rampage

It seems a little odd that a game aimed mostly at kids comes straight from Viz, developer of the controversial *State of Emergency*, but that's the case with Bam!f's first PS2 Powerpuff Girls title. Despite *Relish Rampage's* cel-shaded graphics that render it nearly indistinguishable from the cartoon, we're pretty sure it actually uses *State's* engine. And in that spirit, en route to thwarting Mojo Jojo you can even use the girls to destroy innocent civilian cars or attack hapless pedestrians!

Robin Hood: Defender of the Crown

Strategic conquests, gruelling sieges, majestic jousting tournaments—it's like it's 1986 all over again! That's when the original *Defender of the Crown* came out on the Amiga; we can hardly believe it's taken 16 years for a sequel. Cinemaware's legendary blend of turn-based strategy and action (picture a medieval Risk with sword-fighting sequences) returns, with a new starring character (Robin Hood played only a small role in the original) and lots more action. Enter Sherwood in early 2003.

CONTRA: SHATTERED SOLDIER

The big, bad bosses

Anyone who knows Konami's *Contra* games also knows they're all about the bosses. *Shattered Soldier* continues the tradition with some of the biggest meenies yet. Each brought to life with incredible graphics, their unique (often grotesque) attacks fill the screen with cool effects. Most of the bosses we've run into have been on the tough side, but that doesn't mean you can't defeat them all in due time. Similar to the previous *Contra* games, it often takes some patience to learn all of the intricacies of these bosses and how to best defeat them. Thankfully, the new Hit Rate meter often clues you in on which weapons to use on a certain boss so as to take them out in the quickest time possible.

Below are some of the bigger guys we haven't yet shown to you in previous issues. Some tend to be very mechanical in nature (such as a massive liquid metal head that shoots lasers) and some are quite organic, shooting puss everywhere when shot. Blast away at these baddies in November.

Bad Fishy

Check out this nasty tuna! He smashes his massive head against the wall of his fishtank and it bursts, spewing water everywhere. Then he attempts to eat you by constantly leaping out of the water with an open mouth.

LOTR: THE FELLOWSHIP OF THE RING

Straight from the pages of Tolkien

Peter Jackson had nothing to do with this video game. But J.R.R. Tolkien most certainly did. Unless you've been stranded in Mordor, you're probably well aware that **Universal** holds the rights to publish games based on the works of said dead English dude—and it shouldn't surprise even the dumbest orc that the first game to utilize the license follows the first book of *The Lord of the Rings*.

From Frodo's peaceful hobbit hole in the Shire to a not-so-peaceful battle at the shores of the river Anduin, *The Fellowship of the Ring* adheres to its source material as well as any video game can. With plentiful, fully voiced cutscenes helping to move the plot along, players can expect to strike up conversations with everyone from major characters like Gimli and Elrond to such lesser ones as Farmer Maggot and Lobelia Sackville-Baggins. All this chit-chat adds an RPG feel to an otherwise heavily action-oriented game.

As you might suspect, gameplay changes depending on whether you're Aragorn, Gandalf or Frodo. While each has his own respective sword for close-range attacks (a stick for Frodo until he acquires Sting), the long-range attacks differ: Aragorn shoots arrows, Gandalf's devastates with magic and Frodo's got a trusty bag o' rocks. As bearer of the One Ring, the heroic hobbit even has the ability to wear it and turn invisible in his levels (which rely more on stealth than those of his allies). The catch? He also has a "corruption meter" that depletes while wearing the Ring—and never regenerates—throughout the course of the game. If it hits zero, he's lost to darkness forever.

At this point, developer **Surreal** has a few minor gameplay snags to work out, but otherwise, Tolkienites should be counting the days until *Fellowship's* mid-November release.

License and Content	With the rights to the material of Tolkien's books, Universal's <i>Fellowship</i> follows the entire first book of the trilogy.
Starring Characters	You play as Aragorn, Gandalf or Frodo, with the rest of the Fellowship pitching in to help at times.
Story Presentation	In-game cinematics bring the story to life (though some dialogue is changed from the book to speed up the pace).
Voice Acting	Universal hired professional voice actors, and each seems quite up to the task. They're unfamiliar, yet effective.
The Early Word	<i>Fellowship</i> is definitely the underdog, but its deeper story could prove more immersive.

LORD OF THE RINGS: THE TWO TOWERS

**HANDS-ON
PREVIEW**

Straight from the celluloid of Jackson

Peter Jackson had a lot to do with this video game. Not only does EA's first *Lord of the Rings* title follow the first two movies of the lauded Tolkien-based trilogy he's directing, but Jackson himself played an integral role in the game's production. Whatever developers needed, he provided. But will it be enough to make *The Two Towers* the one game to rule them all?

Taking a look at the game's beautiful screens might make you think right away that this mission has been accomplished. And for fans of hack-'n'-slash gameplay, that might just be the case. Although, according to the game's product manager, there's a lot more to it than that: "It's more than just hack-'n'-slash," says Jon Harris. "You need to think about which combos to use, too."

While, based on the healthy portion of the game we've played so far, we certainly wouldn't hesitate to classify *Towers*' gameplay as hack-'n'-slash, Harris does raise a valid point—the moves you use as you proceed in the game prove integral to your overall success. By defeating orc after orc (not to mention the occasional troll, Warg or other malevolent Middle-earthling), your three characters (Aragorn, Gimli and Legolas) gain points to use toward purchasing moves. When it comes to selecting which combos to buy and when to pick them up, Harris suggests that Tolkien fans will have an advantage. "They know what's coming up!" he says with a smile.

If 10 hours of gameplay doesn't sound like much to you, keep in mind that EA has included lots of reasons to play through again, as utilizing certain characters often unlocks secrets like behind-the-scenes movies. And speaking of secrets, a really cool one actually awaits you at the beginning of the game—we just can't tell you what it is. Find out when you pick it up this **November**

Of the three warriors, Aragorn is the most well-balanced fighter.

Legolas' arrow-drawing animation is as smooth and swift as in the films.

When it comes to range skirmishes, he is more useful than Gimli.

NASCAR

Sure, the *Heat* is gone, but that doesn't mean **Infogrames** has forgotten how to make a good NASCAR game. In fact, its **fall** stockcar racer boasts—for the first time ever in a racing game—four different NASCAR racing series. In the game's Career mode, you can start in the Weekly Racing series and work your way up to the Modified, Craftsman Truck and—finally—Winston Cup series. Upgrade your car with more than 100 parts, and race on 31 detailed tracks.

NHL 2K3

Didn't dabble on the Dreamcast? For hockey fans, that's a cryin' shame. *NHL 2K2* was one of the reasons to own **Sega's** defunct system, but PS2 fans will now get tight sim hockey in **October** with *2K3*. This is the type of hockey game that will have you playing full seasons, the way you did in the Genesis days [there's a Franchise mode, too!]. The goalies are a big highlight, and the puck can actually go off the inside of his leg and into the net. Like in real hockey.

METAL GEAR SOLID 2: SUBSTANCE

More bang for your buck

How do you take one of the best games ever made and make it better? **Konami's** answer for this enhanced *Metal Gear Solid 2*: Add to what made it so cool in the first place. *Sons of Liberty* featured some of the best gameplay ever, and in this package, Konami offers a *lot* more of it. They've taken all of the original elements and used them for new scenarios—a quick way to add more gameplay without years of effort. After experiencing a few such scenarios, we've found ourselves rapt in *MG2* all over again. Short stories called Snake Tales, for example, require you to hunt down characters or items in the pre-existing *MG2* environments (with some cameos, as well). Meanwhile, the new VR missions allow you to really hone your skills and test out new gameplay mechanics, such as levels playable entirely in a first-person shooter mode. And for all you Raiden haters out there, just the fact that you can now play the game all the way through with Snake should have you anticipating **March**.

BURNOUT 2: POINT OF IMPACT

**HANDS-ON
PREVIEW**

Big, better, faster, more!

If there was one really, really cool thing about **Acclaim's** original *Burnout*, it was being rewarded for driving like a Lunatic with a burst of adrenaline-cranking speed boost. The only problem was, driving in such a totally insane fashion was really quite difficult, and you ended up seeing a bit too much of the game's other very cool feature, the spectacular crashes. The team at **Criterion** in the UK is clearly aware of this little dilemma and has proceeded to tweak the gameplay of this sequel such that a proficient player can spend the majority of each race trying to maintain insane levels of speed.

As with the original, the game includes no licensed cars, but everything looks pretty convincing in that "oh, that looks a bit like a Viper" kind of way. As you'd expect from one of the most respected code shops in the world (Criterion built the graphics engine that *GTA: Vice City* uses), the game looks gorgeous and is incredibly fast and smooth. Feel the *Impact* this **November**.

RETURN TO CASTLE WOLFENSTEIN

Shooting demons and Nazis has never looked better

The PC version of *Return to Castle Wolfenstein*, worked on by series-creators id Software with help from Gray Matter, was essentially two games in one package. The first was an extremely competent single-player experience that took the concept of the original game from the dawn of time and zazzed it up with *Quake III*-engine-fueled graphics. The second game was a fabulous online multiplayer experience that allowed teams of Allies and Nazis to battle in an extremely convincing selection of WWII-themed missions. Unfortunately, as the game moves to PS2 **early next year** from **Activision**, we miss out completely on the latter.

Don't be too disappointed, though; the single-player game is a great first-person shooter that mixes *Medal of Honor*-style Nazi bashing with *Resident Evil*-esque zombies and crazy demon creatures. The story deals with the whole mythology of Hitler and his cronies attempting to wake the dead with an assortment of theological instruments just like he did in the Indiana Jones movies. The result is a clever blend of believable and fantasy environments that has you blasting through things in an old-school fashion. If you're at all familiar with the PC game, you'll be pleased to know that some of the little quirks with last year's game have been fixed, and a number of extra bits have been bolted on to compensate for the lack of multiplayer levels. The PS2 version has been developed by **Raster**, a team previously known for the marathon job of porting *Quake III* to the Dreamcast, and they've done an incredible job. We can expect some extra single-player missions that PC aficionados won't have seen, and the team has also completely overhauled the spawning points for bad guys, as this was something raised by gamers as something of an issue previously.

WARNING: WHEN THE GAME TURNS OFF, SO DO YOUR POWERS.

You cannot fly. You are not stronger than a locomotive or faster than a speeding bullet. You have no business attempting to use superpowers outside the realm of *Superman: Shadow of Apokolips*. Any attempt to do so will undoubtedly result in broken legs, arms, fingers and toes, sprained ankles, bruised ribs and egos, loss of limbs, pride, and ultimately-life. Just remember sport, when the game turns off, so do your powers.

SHINOBI

**HANDS-ON
PREVIEW**

Best installment yet?

Sega's *Shinobi* series is one of the most revered in all of gaming, so don't take it lightly when we say that this is potentially the best installment yet. It obviously looks and sounds better than any of the previous games, but what we're focusing on here is the gameplay—and boy does it ever shine. We've been playing through a preview copy for the past few weeks, and Hotsuma's fanciful attacks have us absolutely hooked. The best game to compare it to would be *Devil May Cry*—you're constantly running, jumping, flipping, warping and spinning all over the place. It also feels darn cool to pull off a lot of the attacks, especially the tate (pronounced "tah-tay") moves, where you can slice multiple enemies in succession for seriously cool kill animations. The gameplay is so cool that we've pretty much overlooked the sometimes repetitive enemies and environments, the game's only real flaws so far.

We're already betting on this being one of the year's hits, so make sure you check back next month for our expansive cover feature on the game. In the meantime, though, enjoy these latest screens we've grabbed for you. But don't get too attached to them. Apparently, even at this stage in the game, Sega is going back and enhancing *Shinobi*'s graphics engine in time for the title's **November** release. So by the time you see it next month, *Shinobi* could potentially look even better. All we can say is wow.

Ninja Power

One of our favorite things about playing as *Shinobi*'s new hero, Hotsuma, is that he can hang on to and run along walls. Not only does it look really cool, but this ability can help you bypass ground-based obstacles or get to areas that are not normally attainable by walking or jumping. You'll even run into sequences where you fight enemies that are also maneuvering along the walls. Sadly, however, for those we remember *Revenge of Shinobi*, Spider-Man does not make a cameo.

The symbols at the top of the screen represent the enemies you fight at a given time. Manage to take them all out quickly, and an ultra-cool tate kill animation is yours to view.

GAME BOY ADVANCE

Tiger Woods PGA Tour 2003

Sadly, EA Sports is removing from *Tiger 2003* the intriguing "Street Golf" mode we talked about a few months back. But there are still a ton of nifty upgrades from last year's version. The player models look much better, for example. There are also a couple new courses, and the all-new SkillZone, which offers minigame-style challenges for a quick fix. Plus, you get extra cash for having a save from last year's game—or other recent EA titles. Cool! Tee up in **November**.

Legaia 2: Duel Saga

Good things come in ugly packages...at least that's the case so far with **Fresh Games'** *Legaia 2: Duel Saga*. But get past the crunky graphics and the dopey characters, and you'll find a pretty cool RPG lurking underneath. The star here? *Legaia*'s battle system, which lets you string together different attacks to pull off tons of unlockable special moves and combos. Tune in next month to find out if *Duel Saga* is good enough get you to look past its grody exterior.

MORTAL KOMBAT: DEADLY ALLIANCE

HANDS-ON PREVIEW

Totally reinvented classic

Unlike many of the recent fighting games that have seen to continue the tales of an aging franchise, the team behind Midway's *Deadly Alliance* has chosen to completely reinvent absolutely everything about the game. Not only have they pushed reset on the storyline, they've also dramatically overhauled the fighting system to the point that it's now arguably one of the most complex out there. By shifting between three separate stances, fighters can break out completely different types of moves (about 16 or 17 in each stance, by our count), depending on what style they use to fight. As with *Tekken* and *Virtua Fighter*, this game places plenty of emphasis on combos as well as throws and counters, which all go to prove how different *Alliance* is from previous *Mortal Kombats*. All Kombatants sport two unarmed and one armed stance, with everyone busting out weapons appropriate for their individual and unique styles. Get ready for "Fatality Friday" on **Nov. 22**, when the game hits stores

Fatalities

Although lots about *Deadly Alliance* is different from previous *Mortal Kombat* games, the franchise just wouldn't seem right if it didn't still sport some gruesome fatality moves. Although much of what will be in the game come November is secret, we have heard of some spectacular moves involving impaling, exploding and even, in this brutal case, ripping out someone's *entire skeleton*. Ick.

DEF JAM WRESTLING

Get yo' wrestle on, up in here!

Counterculture ultimately becomes pop culture—that's why you listen to hip-hop and why you've never listened to Diana Krall. It's also why **EA Sports Big** decided to partner with Def Jam Recordings to make a wrestling game. Rappers like game, EA makes games. Perfect marriage. Twelve artists enter this polygamous relationship, all under the Def Jam label. We know 11 of them: DMX, Ludacris, Christina Milian, Foxy Brown, Keith Murray, WC, N.O.R.E., Method Man, Redman, Scarface and Capone. As for the No. 12? Knowing that each is way into game, we're hoping for Ja Rule, L.L. Cool J or Funkmaster Flex. (Heck, why not add 'em all, EA?)

Even though that's quite a roster, the game's strength might lie in its gameplay over its soundtrack. It's being put together by the wrestling stalions who made the Nintendo 64 worth buying, responsible for *WWF WrestleMania 2000* and *No Mercy*.

So how's it all work? Well, you play through the game as a regular schmo (though, granted, your schmo has some seriously toned muscles). Once you reach a certain point, prepare to face off against Def Jam's stable during boss matches. Not a bad reward. Figure out the first rule of this fight club **early next year**.

RAD: ROBOT ALCHEMIC DRIVE

**HANDS-ON
PREVIEW**

Save the world—as soon as school lets out

Homework is tough when you have the weight of the world on your shoulders. As the chairperson of a top-secret defense committee, your duty in *RAD: Robot Alchemic Drive* is to single-handedly protect the cities of Japan from giant fighting robots called Volgara—and you're only 17. But your waifish, anime-style boy or girl character isn't truly alone; you have at your disposal your own giant fighting robot (not to mention a personal anigravity generator that allows you to fly to dizzying heights). Sucker-punching Volgara—via innovative controls that use each analog stick to move the corresponding arm of the robot—and leaping tall buildings in a single bound is all in a day's work in **Bandal's** homage to Japan's Giant Fighting Monsters film genre [complete with scurrying civilians and impassioned, laughably obvious news broadcasts]. Is it serious? Is it tongue-in-cheek? We can't tell; maybe you'll have better luck when the game releases in **November**.

Wreckless: The Yakuza Missions

Wreckless was a so-so Xbox game awhile back, and, from all initial appearances with our preview version, it looks to be a so-so PS2 game, as well. It'll likely turn into an amusing way to kill some time in a *Driver*-like way. Unlike on Xbox, however, the graphics won't blow you away, but an interesting PS2-exclusive two-player mode just might put you in this fall: **Activision** forsakes conventional two-player racing by putting both you and your opponent on one screen!

BloodRayne

If you don't like looking at the boobs and butts of female vampires, you're probably best off sitting *BloodRayne* out. We've only played a little of **Majesco's** prospective new franchise, but the in-your-face sex appeal (dare we say "gratuitous"?) is readily apparent after only a level or two. Fortunately, the promise of an enjoyable gameplay experience is there for **Halloween**, as well, with some really cool fighting maneuvers that almost make you forget about the iffy camera.

STAR WARS: BOUNTY HUNTER

**HANDS-ON
PREVIEW**

Kill a Jedi today!

Sure, they're cursed to die under the least glorious circumstances—but at least they look really, really cool while doing it. We're talking about the Star Wars universe's most beloved cult icons: the Fetts. This **November**, **LucasArts** suits up Jango for *Bounty Hunter*, the first game ever to focus on any of the aforementioned armored badasses. Though its look may suggest something of an adventure game, make no mistake—*Bounty Hunter* focuses primarily on intense double-fisted gunplay. Jango initially wields dual blaster pistols (and quite well, we must say), but don't go thinking that's all—expect all sorts of Jedi-snuffing armaments, including a sniper rifle, a rocket launcher, his trusty wrist-mounted flamethrower and, of course, thermal detonators galore. The action takes you through such notable locales as Tatooine and Coruscant, as well as some lesser-knowns, but one thing is consistent—long, intricate, action-packed levels. And lots of fun playing through them.

Wanna Fly?

A Fett just isn't a Fett if he isn't flying. Luckily, Jango can take to the sky in *Bounty Hunter*, and he does so with the utmost cool. His jetpack comes equipped with enough juice for several decently sized bursts at any given time, and it takes just a few seconds for it to recharge when not in use. So, the short of it: You should expect to do a whole lot of flying. And since you can shoot your guns while in the air, prepare to deal mad amounts of death from above.

RYGAR: THE LEGENDARY ADVENTURE

True to its name

Thanks to a recent trip to **Tecmo's** Japanese HQ, we've had a first-hand look at one of the big games for **November**. *Rygar's* super-sharp visuals and fully orchestrated soundtrack have been strong all through production, but now we've seen more of its awesome gameplay. There are loads of Diskarmors (spinning shields attached to a chains) to collect (each with super attacks), plus tons of combos to pull off. Consider us very impressed.

BMX XXX

Comedy for the humorless

The makers of *BMX XXX* claim this game features "immature humor for mature people." But we're not even sure the same low-rent pranksters who live and die by *Maxim's* "20 Ways to Score a Babe" list would even sink this low for laughs. Yes, there's cussing. Yes, there are boobs. Yes there's a peanut vendor shouting, "Hot salty nut sack, get your hot salty nut sack here!" No, it doesn't make the game cool or funny. Unless you're talking in that "oh, man, I'm embarrassed for the guys who made this" type of way.

As harsh as we sound about the content, there is a bright light: the gameplay. That's because *XXX* is *Mirra* without *Mirra* (nor any licensed riders or sponsors). The timer is gone, so you can wheel around one of eight freshly modeled areas without feeling rushed. Talk to the edgy locals (a pimp, a rumberling subtitled bum, vendors) to get assigned any one of 20 challenges. There's also an extensive Rider Edit mode for created riders. And, yes, that rider can be a topless girl. "The nipples are actually modeled, you know, for realism" we're told.

We don't know why **Acclaim** is risking its strongest franchise this **October**. The gameplay innovations are strong. But collecting coins around different levels to earn a 12-year old's wet dream—you can unlock a peep show with a real woman with real (maybe fake) breasts—feels like a half-assed idea not worth a laugh.

Create-A-Rider

Whether you want a backwards ball cap, a pair of knee-length shorts or a chick unafraid to bare all (like this one to the left), you can make it happen in *BMX XXX*. Create-A-Rider is the game's most admirable feature (unless you like potty humor—which nothing can "top"!). Seriously, though, you can do whatever you want, and the interface is snappy-quick so you won't have to wait for things to load. Since there are no pro riders, it really makes this feature stand out.

Colin McRae Rally 3

Sure, Americans may not dig rally racing as much as the rest of the world, but you'd never know that based on the influx of such games headed our way this fall. Our early pick for rally champion? *Colin McRae Rally 3* from **Codemasters**. Beyond its obvious lineage of great PSone rally titles, the fact that we've seen it in action only bolsters our prediction. In addition to great damage effects, the realism extends so far as actual player models of Colin's crew and navigator!

Legends of Wrestling II

If you didn't play the last *Legends of Wrestling* from **Acclaim**, don't pick it up now. The sequel will blow it away. The roster is the game's big plus, and now they've added Rowdy Roddy Piper, Hacksaw Jim Duggan and Big John Studd. Plus, Andy Kaufman. Yes, that's right, the king of mean comedy. There are also a few new match types (Ladder and Cage), plus previously unseen footage of the wrestlers that can be unlocked that makes use of the DVD. The bell rings in **October**.

AUTO MODELLISTA

**HANDS-ON
PREVIEW**

A lot more under this hood

Capcom just released *Auto Modellista* in Japan, so we haven't wasted a minute to dive right in. Our verdict? There's much, much more to this game than just those flashy cel-shaded graphics we've all been marveling at the past few months. Most importantly, it plays really well, somewhere in between *Gran Turismo* and a *Ridge Racer*—it feels both arcadey and simmy at the same time. *Tons* of customization exists in the game, too, allowing you to alter your vehicle in just about any way you could possibly see fit (see sidebar). One of the coolest aspects of this is that you can go online and trade your customized cars with others. People can check them out in a virtual *Destruction Derby*-style arena, where you can show off your vehicle and chat at the same time.

Racing against others online is pretty solid, though we noticed a few hiccups here and there [opposing cars tend to jitter a little]. It'll be interesting to see how well **Capcom** can pull off the online portions of the game in the States this **November**. But for those not interested in playing online, the Garage Life mode offers plenty of *Gran Turismo 3*-style challenges, as well as an incredibly in-depth replay mode that allows you to remix your replays with lots of video and audio effects

Customization

One of *Auto Modellista's* greatest accomplishments is the sheer amount of customization available to you. You can load cars up with all sorts of parts, then paint them any way you like. Then come the stickers and decals: Choose from a whole selection of auto makers, or even make your own [check out Sammy K's OPM-Mobile to the right]. And here's where you know they're taking customization to absurd levels: You can even decorate your garage with items that you unlock in racing!

IN THE DARKEST HOUR,
A HERO IS REBORN.

ATV Offroad Fury 2

We're expecting to have **Sony CEA's** online-enabled racer in Reviews next month (it does, after all, come out in **November**), but until then we figured we'd lay a couple more teaser screens on you. The big addition to this sequel is the selection of minigames, including Tag, Hockey, King of the Hills and Treasure Hunt. The engine has also been revamped to take advantage of dynamic terrain (mud, sand, water, etc., all affect handling). Plus: four-way online play!

Evolution Snowboarding

For the aggressive snow bunnies, **Konami** presents a sort of *Road Rash* meets *SSX*. We're not sure how many people long to roundhouse kick a fellow boarder while cruising down a steep hill, but this one demands that you strap on your best kickin' boot. At least it includes Salt Lake silver medalist Danny Kass, but it doesn't feature much more than fisticuffs. Maybe we'll get more excited about this non-*SSX* snowboarding game when it comes out in **November**. But we doubt it.

EVOLUTION SKATEBOARDING

HANDS-ON
PREVIEW

Skateboarding for non-skaters

You've been too locked down with action and adventure games (*Metal Gear Solid 2*, *Ico*, *Medal of Honor: Frontline*) to hop onto the *Tony Hawk* bandwagon. But that voice is persistent. The one saying, "Skate, baby, skate!" Many are there right now, and that same elbow-pad-and-helmet-wearing crew feels like it's too late to drop into the *Hawk* franchise. Understandable. Foolish, but understandable.

So if you don't eat, sleep and breathe rail slides, but you have a yearning to pick up hotties at the local skatepark with Solid Snake, **Konami**'s got just the thing. The catch is that there are boss fights. To progress through the 12 levels with any of the eight pro skaters (Danny Way and Arto Saari, to name a couple) you'll have to grind the turret off a pissed-off tank, or kickflip the legs off a creepy-crawly arachnid.

Each character you play as has his own storyline, which places each in only eight of the 12 levels, thus enhancing the replay value. Problem is, especially for *Hawk* experts, the number of challenges is limited—there are only five to seven missions per level (*Hawk 4* has boned-up to 21 per). Another shortcoming is the amount of tricks—only 70 total, which is sparse compared to the big boys. But since this is for the other skaters, it should be a comfy fit.

One super-dope feature lets you edit the replays of your run, meaning you can cut and slice and basically make your own skate video—a cool tool worth wasting your time on. Besides that, fully customizable skaters do their thing on fully customizable boards—you don't just get to place stickers on your board, you get to pick where you place them. Very cool.

Like we said, if you're not part of the *Hawk* camp, you've got to join the skate revolution somewhere. This might as well be the game. Drop in **Oct. 29**

Freestyle: MetalX

Believe it or not, there are still a few publishers out there that haven't given us a motocross game in recent years. Well, you can scratch **Midway** off that list come **next year**. As you might expect from the title, *Freestyle: MetalX* focuses squarely on the stunt-performing aspect of the sport, leaving the racing to games like *MX Superfly* and *Freekstyle*. As real and fictional freestylers, mix and link stunts while getting big air in the game's 10 huge levels.

Frequency 2

If you liked the original *Frequency*, you'll be completely psyched to hear that the sequel, tentatively scheduled for a **spring** release, offers many more features. Most notable is the fact that the musical tastes of **SCEA** and developer **Harmonix** have broadened dramatically. Instead of tunes with a more electronic bent, *Frequency's* new lineup is incredibly eclectic, including bands like Weezer and Garbage. You can also collaborate on mixes, chat and challenge other players online.

BREATH OF FIRE V

Capcom prepares for battle

"Up until now, all we've done is fantasy, so we wanted to try something new," says *Breath of Fire V's* producer, Hironobu Takeshita, regarding the new futuristic sci-fi look for **Capcom's** long-running RPG series. Featuring an underworld setting overrun with technology, plus a quest that sets a band of adventurers on a path toward their planet's surface, *Breath V* represents a massive departure from the rather traditional **Capcom** offerings of the past. Similar to what the futuristic *Final Fantasy VII* did for **Square's** benchmark series, it's also possible that *Breath V* could finally push the franchise into the spotlight. From the super-stylish, cel-shaded graphics to the new orchestral soundtrack (which ranges from cool rhythm-heavy dungeon tracks to very *Final Fantasy Tactics*-sounding melodies), this *Breath* finally feels like a quality product capable of standing next to its competitors.

Takeshita's team has even retooled the battle system for this new installment. "This time we went for something that incorporates action, RPG and simulation elements all in one," he says. While turn-based, the battles rely on a sphere grid that allows you to move freely inside for better positioning. Environments even come into play in that you can trap enemies, and you can still transform into dragon forms. What's also cool about the battles is that there's no transition between them and the real world—stumble upon an enemy and you'll fight right then and there.

Takeshita also plans to up the replay value in a rather innovative way. "This game is designed to be rather difficult," he says. "People may find that after playing halfway through the game, they'll need to restart completely from the beginning." Thankfully, it's not quite as bad as it sounds—you can restart the game with all of your earned character data and open up new areas a second time through. "We don't want to make people mad if they've played 27 hours in and have to start over, so we're going to make sure to balance this aspect correctly." It's an interesting concept, sure, and it'll be even more interesting to see if his team can pull it off. We'll just have to wait until **spring** to find out.

To Your Advantage

Since all of the battles take place on the main game engine, you can often take enemies by surprise before entering each fight. It's usually possible to get in an early slice with your sword, but more fun is when you distract enemies with meat (watch as they swarm around it) or toss bombs their way. Unfortunately, this can work against you, too: enemies can also get in the first hit.

RED DEAD REVOLVER

**HANDS-ON
PREVIEW**
Draw!

Similar to how *Maximo* remained true in spirit to *Capcom's Ghosts 'N Goblins* games of yesteryear, *Red Dead Revolver* is an homage to the arcade classic *Gun.Smoke*. It also attempts to re-create classic spaghetti western movies with lots of gunslinging, horse-back riding, and silly comedy sequences, all of which seem to be pulled off quite nicely so far. *Red Dead* is also quite a looker, with custom graphics engine created by Angel Studios (*Smuggler's Run*, *Midnight Club*). We like what we've seen of so far, but not so much as with what we've heard: the music just has this *perfect* western flair. You'll hear what we mean next **March**.

NBA 2K3

**HANDS-ON
PREVIEW**
The best keeps getting better

It's subtle, and you'll have to get into a few games to notice, but Ben Wallace has two different hair-styles in *NBA 2K3*: a fro and braids. This is just a small detail in a masterfully done game, but it's a sign of the care and attention being put into the little things. As most sports gamers know, the little things make a big difference.

The sweetest new feature is the ability to change your shot in mid-air. If you're going to get stuffed by Shaq while trying to throw down one of 200 dunks, just press X a second time and you'll try scooping it off the backboard. It makes a big difference when your tiny guard realizes he's bitten off more than he can chew. Another big play by *Sega Sports* and *Visual Concepts* was to incorporate diving into the game. While not seamless, the animation is much tighter than a goofy bellyflop. If the ball is headed out of bounds, your players attack the ball instead of watching it roll.

Probably one of our favorite features is the ability, on the street courts, to pick your team. Instead of getting stuck with Shaq, Kobe and the other guy, you can pluck Kevin Garnett off the Wolves for a serious three-man all-street team. The real hoops season begins **Oct. 22**.

Dunkadelic

There's nothing funkier than a big ol' slam dunk that embarrasses your opponent, fires up your team and, least of all, puts two points on the scoreboard. With *2K3* there are over 100 dunks in all, way more than last year. We saw Kevin Garnett throw down a series of big dunks, like the one to the left. There are different dunks for power dunkers than there are for flashy dunkers.

WWE SMACKDOWN! SHUT YOUR MOUTH

**HANDS-ON
PREVIEW**

Less yappin', more grapplin'!

While solid in pure gameplay, the last *SmackDown!* disappointed when it came to just about anything else. This **November**, *Shut Your Mouth* maintains *Just Bring It's* great playability and juices it up with more superstars than ever before. Hollywood Hulk Hogan, Diamond Dallas Page, Rick Flair, the nWo and the rest of the WWE have been jammed into THQ's virtual locker room. Even more welcome, you can now journey through a multiple-path Career mode where the outcome depends not solely on defeating opponents, but whether or not a wrestler can win over the crowd. And Create-A-Wrestler? Better than ever, now with an interface freeing you from the difficult series of menus and options.

Maintaining fan momentum remains paramount, and THQ has added several match types to hype the crowd into a fury, including Elimination Tag, Six-Man Tag and the Slobber Knocker, a falls-count-anywhere brawl where the entire building becomes a weapon. Even traditional contests like handicap matches get a facelift, as one player can control all wrestlers.

Starting with a draft, Career mode re-creates the last year of actual *SmackDown!* right down to the different costumes worn by the superstars, then evolves into a Franchise where anything can happen. Fans concerned that their favorite *Raw* wrestlers won't be a part of this title since the WWE employed its "Brand Extension" shouldn't worry, as THQ keeps the entire roster intact. And, perhaps more importantly, Stacy Keibler now wears pink panties.

Relive classic moments like the Rock's introduction of Vince McMahon to Rikishi's ass.

The Rock and Y2J frolic in the snow.

The recently head-shaven American Hero shows the American Badass who's boss.

Crank the Weasel

Think platformers are too family friendly? Is Sly Cooper's wry grin a bit too precious for ya? Then **Midway**'s got something right up your alley. Out **next year**, *Crank the Weasel* is a hop-and-bopper with an edge, packed with all kinds of naughty behavior. Yet despite his twisted demeanor, all Crank really wants is some peace and quiet—so it's up to you to help him lie, cheat and steal his way through nine urban settings, all on his way to retirement on plush Pleasure Island.

FIFA Soccer 2003

After this year's World Cup, the U.S. is definitely soccer hungry. But that doesn't mean we'll support the MLS. Especially when we can confidently dabble in **EA Sports**' next footie game. The best new part of the game: how you control the ball. When you're dribbling upfield, it no longer sticks to your foot. Also, when you're in close for a free kick, you get to aim it with purpose. It really changes the game. Unfortunately, only 40 international teams will be in there. *FIFA* kicks off on **Nov. 5**

NBA LIVE 2003

**HANDS-ON
PREVIEW**

This one's got vert

Say what you want, but the blind purchasers of **EA Sports** products got cheated with last year's *NBA Live*. *NBA 2K3* was a far superior basketball experience. Thankfully, EA noticed, so we're happy to see that *Live* has rebounded in a big way. The entire game has been reworked. It feels good, it looks good and...well, it's playable.

Use of the right analog stick is the game's biggest innovation, and don't be surprised to see it take hold across the EA universe. You can hold the stick in certain directions and then push it to do special moves. For instance, if you take a pass, then hold down, you'll hold the ball away from the defender. Then you can do a crossover (pressing left than right) or a spin move (circling the stick) or a variety of moves within. It's great for getting to the hole, but is just as good to open up space with a killer jump shot. It makes the guards seriously dangerous.

Though nothing its competition can't boast, online playability should sell a few more copies of *Live* in **late October**. The problem is that you can only play one other person online. No multitap involvement. Not even two-on-two with your controller ports. Bummer.

Gimme a Break!

Running the fast break has been near-impossible in video game hoops. Guys haven't cut at the right time, or they wait for defenders to catch up. The whole system is lame. But *Live* has made a huge push to make the fast break a part of the game. Now you can drive it up the middle, kick it out to the wing, and then bounce-pass across the key before the lay-up finish. It's subtle, but it's further proof that *Live* has made huge strides this year.

WAR OF THE MONSTERS

**HANDS-ON
PREVIEW**

Monsters whaling on each other '50s style

When SCEA first showed *War of the Monsters* at E3 in May, it was with very little fanfare. Folks who played it thought it looked cool, but it was hardly touted as the "next big thing." Know what, though? Now that we've spent some time with the game (which is out in **January**), we're pretty convinced that it actually is the "next big thing." A recent event hosted by Sony to roll out its fall/winter lineup revealed the game to be imaginative, enjoyable and light-hearted.

The basic premise is simple. Big, '50s-style B-movie monsters fight to the death in huge cityscape arenas. A suitably kitsch back story holds the whole thing together, but ultimately it's fairly irrelevant. The important thing is that these guys are *huge*. Think King Kong; think Japanese giant robots; think *Rampage* for the 21st century mixed with wrestling and the old Neo-Geo game *King of the Monsters*. Smash buildings, throw the rubble, even pick up cars or buses and use them as weapons. It's out-and-out mayhem, and it's incredibly fun. The monsters all have an extremely wide variety of moves that allows them to kick, punch, throw, grapple and zap their opponents—the ensuing destruction is nothing short of spectacular. In one game we played, the crazy-looking Kineticlops (looks like a walking lightning bolt with an eyeball) picked up the rock monster dude, zapped him a couple of times, then threw him *through a skyscraper*. He proceeded to wander up to the rubble, grab some rebar and beat seven shades out of him. Is that cool or what?

Risk

If you haven't huddled around a Risk board within the last five years, you haven't lived! Is there anything more empowering than a big fat X on your homeland of Yakutsk? We think not. But for those more interested in video than board games, **Infogrames** has struck the perfect balance. The game supports up to six players, and there are varied modes: Classic, Mission Risk and Capitol Risk. We'll know if the transition from board to screen works **late this year**.

Treasure Planet

Set in the future, *Treasure Planet* takes the classic *Treasure Island* tale by Robert Louis Stevenson and Disneyfies it. You control hero Jim Hawkins in a game combining adventure and space-flying elements, as he fights the evil forces of a cyborg John Silver. Examine mines, caverns and planets (which you'll recognize from the movie), and fight enemies with your laser gun. Clearly targeted at the younger PS2 audience, *Planet* is released by **Sony CEA** this **November**.

SILENT HILL 3

Meet Heather

If there's one thing that the developers of **Konami's** upcoming third installment in the *Silent Hill* series really want to impress upon you, it's that the new heroine is just your average, everyday girl. Her name is Heather and she likes to shop. She doesn't know anything about undead creatures—let alone what to do when one's staring her in the face. Which is why, when she is suddenly placed into these absolutely horrific environments, the intensity is apparently greatly increased for *Silent Hill 3*.

But that's not to say she can't kick a little ass. From what we've seen of the game so far, it's apparent that Heather can hold her own. She may be a little freaked at first, but just wait until you see this girl once she gets her hands on some automatic weaponry. Be sure to check her out next **spring**. We will.

THE SIMS

Reality for the rest of us

Why bother with any of that reality TV nonsense when you can create your own on your PS2 this **November**? *The Sims* is the way to live the life you've always imagined without the pain of hard work and commitment. Become a millionaire, then starve yourself as a way to stand up to big corporations, then burn down the kitchen because you're not quite happy with the color of the cabinets.

No longer will you have to leave the water cooler when the PC dorks start boasting about their big *Sims*-date the night before. Now you can join in! But since we trust that you're cool (since you're wise enough to own a PS2 and all), you can condescend them and make *them* feel foolish! Thanks, **EA Games!**

Here's a conversation we expect you'll have, in fact: *Sims*-dork No. 1 says, "Dude, did you get your *Sims*-babe in the hot tub last night?" Then you say, "You're a dork. Plus, I have a real girlfriend. Who actually talks to me."

Of course, that's not true, because you'll have stayed up all night trying to convince the *Sims* girl to give you the time of day. But the PC dweebs won't know the difference, because they'll be crying! How fun!

Hoopin' It Up

All work and no play makes for a dull Sim, so remember that leisure is imperative. The great part is that you just don't press the Leisure button or press on an icon, you actually have to get your Sim out of the house to get them a workout. We wonder: Can basketball in *The Sims* top last year's *Live!*?

EARLY LOOK

Dungeons & Dragons: Heroes

No doubt inspired by what Interplay achieved with *Baldur's Gate: Dark Alliance*, **Infogrames** treats 20-sided-dice rollers to a similar adventure **early next year**. In *Dungeons & Dragons: Heroes*, as many as four players (be they Fighter, Wizard, Cleric or Roguel) engage in the never-ending quest against evil, hacking and slashing their way through hordes of monsters straight from the pages of your third edition of the *Dungeons & Dragons Monster Manual*.

Dr. Muto

Outside of Mario and pals, it's hard to think of many mascot characters these days who aren't some sort of furry mammal. **Midway's** solution? Dr. Muto. "Instead of some kind of fuzzy bandicoot, he's a different kind of hero," says Scot Amos, senior producer on the game named for the humorous mad scientist. But the real catch for this one? Depending on the situation, Dr. Muto can change into animals like a mouse (to get small) or a fish (to swim). Mutate in **November**.

RATCHET & CLANK

HANDS-ON PREVIEW

Featuring all the tools for a hit

The PlayStation 2 faces a virtual mascot cavalcade this fall, but **Insomniac's** *Ratchet & Clank* stands apart from the pack. In fact, it stands a good 10 paces out, with a surly look in its eye while packin' an arsenal of over 30 heavy-duty weapons and gadgets. You can snag these toys by hoarding a currency called Bolts and then outfit Ratchet with your desired implements of destruction via an almost RPG-like inventory system. By focusing squarely on gun-toting gameplay, the developers aim to expand the platformer market beyond the scope of little brothers.

Also, while most run-'n'-jump games file you through a linear path, *Ratchet* lets you blaze your own path. Explore 18 expansive planets during your quest, and tackle them in an order that's mostly up to you.

The developers also sought to spice up the character interaction. Don't expect the standard buddy-buddy team dynamic between these heroes—after a few levels of cooperation, a serious philosophical rift begins to erode their fragile friendship. The squabbles get pretty serious...you might even see some solo missions before the quest is over. Watch the sparks fly this **November**.

IT'S TIME FOR A LITTLE URBAN RENEWAL

There's a new fight in town and this time it's huge. Take command of 120ft. tall, fully armored, fully loaded Meganites and stop the apocalyptic Volgara invasion from rampaging through our cities. If that means you have to knock down a few buildings and crush some pedestrians, well, such is the price of victory. We didn't say it would be easy to save the world, but hey, nothing ever is.

FIRST LOOK

TONY HAWK'S PRO SKATER 4

Stripped, but still worthwhile PSone.

The reason people still like owning PSones? **Activision.** It seems they'll never abandon the system that kicked off the *Pro Skater* franchise. This year it's the same story as last year: a stripped-down version of the PS2 game. We have heard rumblings that there will be a different level in this one that you won't find on PS2—but we've also heard that the PSone can't go online, so don't get cocky.

If you've only read the PSone section of Previews because you're too good for the PS2 *Hawk 4*, then we'll reiterate. Instead of having a two-minute time limit, now you're in free skate once your wheels hit concrete. If you feel like making cash and opening up new levels, then you can go to goal icons (in the PS2 version you talk with pedestrians, but there are no cars or peds here, which also means no skitching). You get missions, and if you complete the missions, you earn a reward. We're not sure if there are still 21 missions per level on PSone as there are on PS2, but we're guessing there will be fewer. Sorry, Charlie.

One cool addition to this year's game is the return of Bob Burnquist. He went to skate for ESPN, but now he's back where he belongs. With us. Give him a virtual hug this **November**.

HARRY POTTER AND THE CHAMBER OF SECRETS

PSone

Talk about licensing magic!

With a surefire hit movie sequel on the way and a new book coming—*someday*—Harry Potter is still quite a powerful property. EA Games is prepared to take advantage of that with its own sequel this **November**, expanding on the original PSone game with new spells, characters, locations (reportedly both larger and more interactive) and minigames. Most notable of these are the newly revamped Quidditch matches and training; players are now expected to perform more complicated maneuvers, including flying under the stands to evade a charmed Bludger—just like in the book. But don't worry, the controls are rumored to be tighter, and the different levels of training (there are four, overseen by Oliver Wood like in the book) are expected to be easier. For example, now if you miss one of the rings, the game creates another at the end rather than forcing you to turn around and go through the ring you missed. So dust off the Nimbus and get ready to fly!

ROCKSTAR MOTORS INTO THE '80S WITH THE FOLLOW-UP TO GRAND THEFT AUTO III

Grand Theft Auto III changed everything. It was the first 3D sandbox and set a new standard. Then the genre got wild in your neighborhood. Now it's about to get wilder. GTA's changed what games are, how they play. There just aren't any like them (and when you're in it, you're it). It turned the line between games and films, and defined forever the entertainment's love of immobility. It proved that literally anything can happen in a PS2 game. It introduced the best American of aspects (hoodlum) in the most useful of places (Liberty City). So how, exactly, can Rockstar improve on the greatest game ever made? Welcome to Vice City, where all your shenanigans are new.

By Todd Zava

Lance Vance

It's a shame he didn't get back behind the wheel of his favorite sports car, the yellow and black '67 Chevy. But he's got a job to do. As the head of the Vice City Police Department, Vance is the only cop who can take down the city's most powerful and dangerous criminals. And that's exactly what he's doing. In the game, Vance is the only cop who can take down the city's most powerful and dangerous criminals. And that's exactly what he's doing.

Last year, when we entered Rockstar Games' urban castle to see *Grand Theft Auto III* for the first time, we immediately sensed anxiety about their soon-to-be-released creation. They were proud parents, but nervous parents, too. Was their game going to work? Would people like it? Would people get it? Would they come to love it? Funny how that works. A year later *GTA3* is the best-selling PlayStation 2 game (7 million sold as of Sept. 1), the entire franchise has amassed 12 million in sales (5 million of the *GTA* PSone titles have now sold), and it's on a very quick pace to become the greatest-selling video game of all-time. Get this: 100,000 copies of the game sell each week.

Which makes us wonder: What took those other people so freakin' long? It's all just numbers, of course. We know that. But herein lies one of the great phenomenons of our time: *Grand Theft Auto's* leading the charge that's putting video games on the

mainstream map. The game's meteoric rise and ongoing popularity is a testament to the fact that anyone and everyone will play a game if it's brilliant, accessible, hilarious and more than anything, fun to play. We remember sending an e-mail to the creators of the game last year, after we had seen it, thanking them for making *GTA3*, for taking the chance to make something so vastly fascinating and so layered and rich with detail. When we sent that e-mail last August, Rockstar was worried that their game might not find an audience. This year

they're confidently releasing *Vice City*, a game so magnificently rich, so superbly detailed, it doesn't just improve on the amazing *GTA3*, it puts it to shame. "It's an obvious thing for us to say this is just a start. But we mean it," says Sam Houser, president of Rockstar Games. "We're really into it, and we want to make these f—king cool games and put people in these brilliant places." Because of the shocking brilliance of the *GTA* PS2 universe, it means that *GTA3* has done what we were

THE BUDDY SYSTEM
In *GTA3* there was 8-Ball; in *Vice City* there's Lance. "8-Ball was a fun character, but he didn't pop up enough," says Dan Houser, after admitting "Bomb Da Base" was his favorite mission in *GTA3*. "So we've added a character named Lance. In some missions he's alongside you shooting while you drive, or driving while you shoot." Wondering how you and Lance meet? In the game's opening sequence, when hell breaks loose and you lose the drugs and the money, Lance's brother gets whacked. So you work to figure out what went down and who's gonna pay.

Ken Rosenberg

Though Ken's been working with the mob since 1978, he's always on the outside looking in. A low-rent lawyer who strives to achieve "gangster chic," Ken is high-strung, whiny-voiced and constantly over-excited. He was part of the drug deal gone bad in the opening sequence, and if Vercetti doesn't fix things, Rosenberg knows he'll be sleepin' wit' da fishes.

dreaming of when the PS2 launched. It's stomped through the games industry with a puffed chest and a piss-off attitude and a sense that if you want to make something way above and beyond anything else on the store shelf, you can.

"You don't have to go that deep into a game to make it really fun," says Terry Donovan, chief operating officer/VP of marketing for Rockstar Games. "I spent \$300 online, buying games the other night, and all of those games are going to be really average, but I'm going to get some fun out of them. I don't think people put as much attention or care into any one of those games as we did with *GTA3* or *Vice City*, and on one level I don't really care. Because I can go have a little bit of fun with them. But if you put some of the stuff we do in context, it takes a different level of care and a different level of understanding."

Putting it in context is the hard part. Try explaining *GTA3* to someone.

Go on. On-the-fly gangster film? Living, breathing city? These are terms we've used, but they don't give the scale of what's happening. The scope is too big. Consider that scope expanding to about two and a half times the size for *Vice City*. In every way there used to be three hours of audio; now there will be 10. There used to be less than 20 songs; now there are more than 80. There used to be 50 vehicles; now there are 120. There used to be 25 weapons; now there are over 40. But again, just numbers. Until you've actually played

Vice City, you can't truly know what we know, which is that it's more complete, more refined, more stylized, more detailed, more shiny, more, more, more.

"I think *Vice City* is above and beyond all the gangster and street stuff," says Houser. "It's brilliant, immersive interactive entertainment, and that's what I like about it. It's a compelling way to tell an interactive story."

"Try the word *epic*," says Donovan "Given the Rockstar philosophy, it's slightly more than a film now. You

Ricardo Diaz

One of the true snakes in Vice City, Diaz bribed the INS for his Green Card back in '78. The Columbian native now has his hand in every narcotics cookie jar around town. While he's publicly generous and hands out big wads of cash to charities, this sleaze-ball features unpredictable behavior, a Napoleon-complex and a massive gun collection.

don't want to be too cocky about it, but you've got to be honest. A linear 120-minute film experience no longer, I feel, competes with a video game. I think it's about time we said, 'You know what, films are great, and I like going to the cinema—I'll even see crap, just because I like going—but it's not the same as a 100-hour video game.'"

If pictures are worth a thousand words, then *Vice City* is one million palm-treed postcards, easy.

LIFESTYLES OF THE RICH AND CRIMINAL

In *Vice City* you're no longer some no-name Mafia ladder-climbing schlub. This time, among many other things, you get a name: Tommy Vercetti. You also get a full-blown identity, a rap sheet longer than a Miami sunset, a fashion-sense stripped from *Scarface*, an itchy trigger finger and a bile-spilling mouth. That's right, with a name comes a voice box. And it's none other than *Goodfellas* star Ray Liotta doing the talking. Say what you want about star power, but Liotta's grainy voice peaks and flows so well with the script, you feel it's not Liotta at all, but Vercetti.

You're not the only personality with a million dollar voice, though. Much like last game, you'll intersect with the rich and soulless, the greedy and

desperate, and the drugged-out and scandalous. There are over 20 celebs pitching in this time (including Dennis Hopper, Jenna Jameson and Lawrence Taylor), and those larger-than-life characters will put you up to no good, stab you in the back and continue the corruption in the neon-streaked grime of *Vice City*.

So how does Vercetti fit into all this? Just out of the big house—a free man after 15 years of prison-time—the family sends him to Vice City, Rockstar's equivalent to Miami. There to take care of some business, the quick-tempered loose cannon will have to wait to get back to the hustle and bustle of his home town, Liberty City. Heard of it?

Problem is, things go wrong for Vercetti right out of the gate. He and a small crime team, including back-alley lawyer Ken Rosenberg, are sent to pull off a monster drug deal. Things go wrong, and only some nimble driving by Rosenberg gets both of them out alive, while the rest of the crew becomes part of a 6 o'clock news story. The whole mess leads to missing money, missing drugs and a crime boss up north spitting threats. So instead of kicking back with a Mojito (that's a joke, since Mojitos weren't invented yet—don't you know this whole story's set in the '80s?), Vercetti's scrambling to save his rep and keep bullets out of his brain.

Dan Houser: "The script is about 1,000 pages, and with *GTA3* it was about 400. So where we're spending the extra pages is cut-scenes. They're significantly longer. There's about an hour and a half of cut-scenes, but in a 100-hour game it won't feel like you're watching and not playing. We keep them short enough to give you a bit of information, a bit of character, tell you what you need to do, then kick you out into the game. But because there's more talking, you're kicked into the game with more motivation, more of a sense of the personalities you're dealing with and more under-

GTA: THE MOVIE

Want to know about the *GTA* movie? Then ask *OPM*.

"I've been banging on the door in Hollywood, trying to get a movie made for *Grand Theft Auto* for five years," says Sam Houser. "And you know what? No one was answering. Then [after *GTA3*], they started calling us. And I'm like, wait, I was out there months ago, sitting in these bad meetings doing a pitch. When you start meeting with these companies they start saying, 'Well, we're going to get this director with this writer with this actor and that and that and that. *That* equation equals *this*. And no, that's not how things work!'"

"So, after five years the door was opened, but it wasn't what I wanted.

"A bad movie, a commercial movie, would damage our game. There's no upside. So, we're keen to explore, but it's something that'll be more of a hands-on indie approach. Even if it's a little thing, it'll be more interesting than a blockbuster."

"If you have the filter to download creativity to someone else in a more interesting way, obviously you'll apply that to other genres, like film," says Donovan. "But when we start talking about making films of our own stuff, it's like, 'Shouldn't we just roll with what we're doing right, for the moment?'"

Steve Scott

A film director who is a fan of the finer things in life—namely sharks and mashed potatoes—Steve Scott rubs elbows with anyone involved in *Vice City*'s organized crime ring. His sole purpose in life? To score barrels of cash for his latest film. But with all the buxom babes in *Vice City*, we figure he has an eye out for a willing, doe-eyed beauty for his next flick.

PERIOD PIECE

James Cameron can have the *Titanic*. Martin Scorsese can figure out New York City in the 1800s, but Rockstar has laid serious claim to the 1980s, and has done it in superb fashion. Remember the '80s? That unwholesome decade of excess and sin? Marked by a booming economy, a numbskull actor-turned-president, cocaine in droves, car phones (not cell phones), mullets, the *A-Team*, leg warmers, big hair and Michael Jackson playing the role of a musical god, the '80s were so full of cringeworthy cheese that it's easy to forget there was—trust us—some cool stuff going down. *Miami Vice* is a prime example.

"It was out of control how big *Miami Vice* was," says Sam Houser. "They were the biggest stars in this country, and if you go back to watch it, it's like a mission in our game. It's very well put together; I'm a massive fan of Michael Mann, and when you

watch it, the gadgetry, the detailing, the cars, the way they hold the weapons, a lot of that style is in *Miami Vice* and now in *Vice City*."

But as cool and as popular as *Miami Vice* was, it still comes off as comical when viewed in hindsight. Rockstar is applying that exact formula to *Vice City*, making humor (again) a big part of their game. Remember how funny *GTA3* was? Those commercials could get a chuckle even after you've heard them 65 times. It was splendidly subtle, and therein lied the guffaws. So gleaming a decade known

for bad hair and worse clothes, there's plenty of source material to score laughs.

"You know, there's no way *Scarface* or *Miami Vice* or *Less Than Zero* or *Goodfellas* set out to be particularly funny," says Donovan. "They seamlessly integrated style and fashion and they made those layers work together. Yet, in the middle of every *Miami Vice* there's almost always a full pop video. It's insane. *How did they get away with that?*"

The trick for Rockstar to achieve their clever, ironic pasting of the '80s

THE FAGGIO AND THE SANCHEZ

There are motorcycles. *Everyone* knows that. But what you won't know, until you buy the game on Oct. 29 at least, is that there are more hogs than the Harley clone you've seen sprinkled about the Web. The Faggio, a moped-style Vespa clone (shown to the right in magnificent fashion), is one bike that might not be on your radar. The best part about it is that, when doing drive-by's, you can actually shoot straight ahead.

The biggest secret this side of two-wheeled transportation is a dirt-bike called the Sanchez. Where'd they get the name? Do the math.

WHAT THE OTHER GUYS DIDN'T TELL YOU

Before *GTA3*'s release, Rockstar was gunning to get the *Goodfellas* star into the fold, but they couldn't get a deal together in time. For the sequel, they weren't going to let him slip through the cracks. In *Vice City*, Liotta plays the lead role as ex-con Tommy Vercetti. His soft, haunting voice reminds us of what a badass he was in *Goodfellas*.

Filmography

If you don't know the name Ray Liotta, shame on you. But instead of belittling you the way you should be belittled, we offer up a list of Liotta's most noteworthy flicks, splitting them between the ones you should see, and those you should definitely avoid.

THE WORTHWHILE

- *Goodfellas* (1990)
- *Cap Land* (1997)
- *Field of Dreams* (1989)
- *Heartbreakers* (2001)
- *Muppets From Space* (1999)

THE TO-BE-AVOIDED

- *John Q* (2002)
- *Hannibal* (2001)
- *A Rumor of Angels* (2000)
- *Blow* (2001)
- *No Escape* (1994)

Liotta's Revenge

If you were sensible, you figured *Vice City* was Liotta's video-game debut, and for the most part, you're right. While his voice wasn't a part of the 1994 Genesis and SNES title *No Escape* (based on the awful film), his likeness was used. He's even featured in full photographic glory on the game box.

Auntie Poulet

Of all the personalities and characters swarming around Vice City looking for their piece of pie, we have it on good authority that you don't want to make the mistake of double-crossing Auntie Poulet. This larger-than-life Haitian matriarch knows a thing or two about a thing or two, and she's a dangerous fang of venom if you get on her bad side.

is that they don't feel they're at the mercy of their influences. They're merely using those wacky 10 years as a backdrop for stylizing the game and giving them a contemporary slant.

"The '80s are only used to give the game a spin, to make it feel different," says Houser. "We're going back in time and we're telling a story, a story that *happened*. Though *Vice City* is clearly set in the '80s, it's very clearly a 2002 reflection on the '80s. It's clearly hindsight being used here. It's not like, *You are in 1986!*"

"The game is very funny and sensitive to the time, but you can only make those jokes because it was 15 or 16 years ago," Donovan says. "If you don't couch stuff in black humor, you lose taste. And you can't do GTA without a sense of taste, without a boundary line, without the over-protection of pastiche."

Understand, though, that Rockstar's take on the '80s is more than just quips about mullets and social commentary on outdated

leisure suits. There's some deep-seeded stuff at work that subtly authenticates their efforts

"*Less Than Zero* captures the horrible cocktail of success and depression and depravity," Donovan says. "Arguably, my favorite moment in any film is when Jamie Gertz says, 'Are you happy?' And she says, 'No. But do I look good?' You know, that's so *Vice City*. I look f---king phenomenal and my soul is in threads."

That sense of depravity and success is fueled by a seemingly never-ending soundtrack that adds a whop-

ping layer to the game. From leather-and-studs rock to hilariously synthesized new wave pop, Rockstar is filling the airwaves with some of the best and worst hits of a decade that skilled musicians seemed to avoid.

"In the first game there were about three-and-a-half hours of music, this time there will be nine hours," says Houser. "We're very confident that it'll be better than anything any game or any film has ever done. Partly because of sheer size, but also because, well, we have confidence in our taste in music."

'80s FLASHBACK: DO YOU REMEMBER...

EVEN MORE INSANE

It's logical to expect the Insane Stunt Jumps to return. After all, they were such a badass element of *GTA3* that you couldn't resist doing them. There was little better than taking cars over elevated train tracks in slow motion, and figuring out the best way to use the city's other dropped-in ramps. But what about doing new jumps in a new city with a motorcycle? Or on, *aww yeah, a boat?* You'll be able to do both, with that same cinematic camera to get that silver screen effect. We're hoping to figure a way to barrel roll the choppers, too.

'80s FLASHBACK: DO YOU REMEMBER...

When Michael Jackson was black? The King of Pop used to have a little more pigmentation before his thousandth skin-lightening treatment. At that point, Michael's face also featured a nose and lips. No longer.

Comedy: Just coming off the heels of a comedy album, the game's soundtrack is a mix of humor and pop. "The music is from every label on Earth," says Donovan. "It's just been six months of hard, grinding work. Because you're talking about tracks that have four members, four management teams, anything up to four publishers, one record label and all of those people have approval over what you do. We avoided this in the past, but for this we couldn't."

The diverse soundtrack features mustachioed talents like Hall & Oates, Rob Halford from Judas Priest "singing," one-hit wonders galore, and MTV savior Ozzy Osbourne from his "Bark at the Moon" days. Yowser.

"The music is from every label on Earth," says Donovan. "It's just been six months of hard, grinding work. Because you're talking about tracks that have four members, four management teams, anything up to four publishers, one record label and all of those people have approval over what you do. We avoided this in the past, but for this we couldn't."

The music-picking process was simple: Rockstar bought every album they thought might work for *Vice City* and listened to tunes while driving around in *GTA3*.

"There's a certain tempo of record that works well in the game," says Dan Houser. "It can't be too fast, because this isn't a pedal-to-the-metal driving game, so there has to be a certain swing to it."

A lot of music, a ton of music actually (look for particulars about their seven-album mega-deal with Sony on page 175), is outstanding, but radio stations make their money on advertising. With more tunes than ever, the number of witty, high-concept commercials has tripled from 20 to 60.

"One of the things about *GTA3* that spurred us on was that if you're going to play a game for 100 hours, we wanted to make that experience as rich as possible," Donovan says.

If you wonder if people bother listening to the commercials, consider that Rockstar sold out of T-shirts for the fake companies created for the

game. Pogo the Monkey was inarguably our favorite.

In Rockstar We Trust

What was your favorite part of *GTA3*? Discovering the Insane Stunt Jumps, finding the hidden packages, punching out clueless pedestrians, flipping the channels on the radio, stuffing your car full of prostitutes, meeting with immaculately voiced bad guys, flying the Dodo? Expect even more facets with *Vice City*. There are now planes, helicopters and boats, which allow for an altogether new dynamic. The boats are much more integral because of all the waterways. Plus they're a hell of a lot faster. The whole city is bigger, but more importantly, it's not Liberty City plus. It's a new city for you to work, play and steal in.

"We could've added 30 or 40 or 50 missions in Liberty City and most people would've been happy. It would've been very straightforward to do, and it would've been accessible," says Houser. "I think a lot of people are just expecting a mission pack. But that's bollocks. *GTA3* had a great impact on people, and we wanted to recreate that impact. It was difficult, but we had to do it. You can't keep everyone happy all the time, but the

cool things about *GTA3* have been taken to the next level."

The "next level" means some kick-ass, all new surprises. Think about the Dodo. Apparently Rockstar just threw it in there, but even they didn't anticipate that it would gain such a huge following. But that's exactly the point. The user defines the experience. It's a product of freedom. It's a wonder why other game makers haven't busted their humps around the clock, figuring out how to follow Rockstar's lead.

"With *GTA3*, we just made a world and let people do what they wanted," says Houser. "While you're in a mission you don't have to go around whacking innocents and cops. But if you want to, you can. And that's always been the angle, since very early on. I don't want to do a mission, I just want to fart around doing a sub-

Stealing a car is such tedious work: tug the handle, pull out the innocent, get in, close the door, press on the gas, pull away. *Booooooring*. That's so *GTA3*. Stealing bikes, on the other hand—now that's fun. Not only can you shoot some clown who's driving by with his feathered hair flapping in the breeze (which sends the bike beautifully spinning), now you can get close enough to drop kick him off! That's right! You can do a seriously sweet roundhouse kick, putting a big boot to the sternum, and it will put the driver in serious misery. You'll have to retrieve the bike, but who cares?

game or riding around on a bike or driving a car. Or maybe I'll get a flamethrower."

Creating freedom in an interactive experience and constructing a world where anything goes is quite a feat. Adding to that seems like the greater challenge. But that's what Rockstar loves to do.

"We hardly ever get an idea sent into the Rockstar mailbox or on a message board that we haven't already had," Donovan told us. "Because if you've had a group of people living with the game for seven or eight years, obviously, all you do is dream about the things you haven't done yet."

So, what's the secret? How do they decide what goes in and what gets cut? "If it's fun, it's going in," says Houser. "We go online and read what people want, and it's a little out there. Most people just want what we want, but someone on the site said they want children and animals in the game, and we're like, 'Why?' They're

not fun; they're not funny. We're trying to depict the same kind of stuff you find in similarly relevant gangster movies and TV shows and popular culture. The mass-market stuff."

The *GTA* rip-offs are starting to roll in, and some companies are aiming to create more mature titles because they think they'll sell. But they're all missing something.

"*The Getaway* and games like that are missing what's cool about *GTA3*," Houser continues. "The *GTA* series has a lot of personality and vibe about it, it's just that *GTA3* showed it off

[graphically]. It's a game that's really in your face and reacts to you. It talks back to you. The other games don't do that. I don't talk about the competition, but it surprises me that now there are people that are saying, 'Wow, I guess we should do mature titles. Let's add in X, Y, Z, now focus test and boom, here's the game!' And I say *no, no, no*. You can't make games like that! Do I want to go down the path or do I want to stray from it? In our game you have that choice. That's what people aren't getting."

Apparently. But we raised our hand

SELDOM STOPPING POWER

Shooting out car tires was the next logical step (we've seen it in every action movie since muskets were invented), but you had to know that Rockstar would push that envelope to the table's edge in their newest game/film. Another way to slow down that runaway ride is to pull out your sniper rifle and put a bullet through the windshield! That's right, folks, if you're about to get a mouth full of grisly car grille, you can curb the vehicle with a bit of accurate aim. If you miss, of course, you can forget about walking for six to eight weeks.

This big-belt buckle wearin', bolo tie lovin', strong willed Southerner don't cotton to thug-ish locals. At 51, he figures when the Lord's ready to take him to heaven, he'll be ready to go. But that time ain't come just yet. A man of immovable principles and absolute faith (both of which he shared with his beloved "Daddy"), this is one of *Vice City*'s most dangerous men.

with one concern: Will it be fun to do all the old stuff in a different landscape? So, if you're asking that question, you're not alone.

"I wondered: How fun is that going to be in a new city? But the things I thought I was tired of doing in the original game, I'm pumped about doing again," says Houser. "It became very fun because of all the new toys and people and things that go with it. If the impact is there for someone like me, who spends a lot of time with it, I think people will really get into it. I was playing, and I pulled out this big handgun and I saw a guy riding by on a bike so I shot him. He fell off and the bike went spinning. I was like, yeah, that's quite fun."

"We have the luxury of being in such a pathetically young industry that there's no one around to say, 'That's probably not a good idea,' or, 'People probably won't like that,'" says Donovan. "We've met a lot of people in the last year from outside this industry, because the phone started ringing somewhat. And they're like, 'How do you do it?' And our answer is, 'We just do what we like.' No one wants to buy our answer."

THE '80S ARE AROUND THE CORNER

You feel a sense of ownership. You bought *GTA3* the day it came out. You learned to fly the Dodo before any of your buddies, and you found all 100 hidden packages without a cheat sheet (which took a few minutes longer than infinity). You're still playing the game three hours a week, and you can't wait for a sequel. You and everyone else.

Grand Theft Auto III made something amazing happen. Rockstar created an interactive world that you lived in at your house, that we lived in at our apartments, while 7 million other players were having a unique experience while living inside that same world. Some people play for three hours sniping innocents without ever bothering to complete a mission. Others are so polite they slow down so they don't run over pedestrians.

Now it all gets to start over with *Vice City*. Bigger, better, faster, more. Everything applies. It's everything you've been waiting for, and everything you don't expect. We are often very picky about the games we play at home, because where's the cultural impact? Who are we going to talk about games with when we hit a bar to have a drink? But we can't wait to spend our 100 hours with *Vice City*, just so we can trade adventures at the local tavern. That's what *GTA* has effectively done: It's penetrated our culture in such a way that it's something to talk about, the same as Tom Cruise's latest average performance or Madonna's most recent chart-topper. Hallelujah

"Liberty City was the worst city on Earth. *Vice City* is very different, it's simply *not* the worst city on Earth. It has glamour, underbelly, and the two live together in a very interesting cocktail of emotion. *Vice City* will be

bigger than *GTA3*," Donovan says. "It's that simple. *Why* is it now? *It should* be now. The technology's there, the enthusiasm's there, now let's f—king get on with it."

Meet the critics

JOHN DAVISON
John bravely bowed to the '80s theme of the issue by dredging up this pic from his glory days of progressive metal. Dig those locks, ladies!

GARY STEINMAN
For Gary, fashion and music began and ended in the '80s. Which is why he might visit *Vice City*, despite all the icy violence there.

JOE RYBICKI
In 1983 Joe's dad brought home an IBM PC and a copy of *Zork II*—the rest is history. He's still stuck in "maximum verbosity" mode.

CHRIS BAKER
Often clad in IZOD, Chris regularly used his Laser Tag gun to pretend he was Luke Skywalker... and this month, he actually met him!

TODD ZUNIGA
Infinite video-gamin', feathered hair and tight-rolled jeans defined '80s Todd. And chick-lessness. The more things change...

SAM KENNEDY
In the mid-'80s, titles like *Shinobi* and *Contra* were what got Sam so hooked on games. Playing them now on PS2, he feels just like a kid again.

Something happened while playing *Sly* that I've never experienced before. Maybe it's just because I'm a bit lazy, but most platform games that lean heavily on the collection mechanic leave me pretty cold. I liked *Jak* and *Daxter*, but I had no real inclination to finish it with 100 percent cleared. *Sly* is different, though. I'm obsessed.

spotting neat little touches. This keeps the game interesting to watch even when you're revisiting a level for the umpteenth time to unlock one of the final extras.

The meat-and-potatoes of the game is probably pretty much what you're expecting. It's a slick platform adventure that presents you with a series of hubs from which to visit specific levels, collect the necessary goodies and leave the level. Beating levels

gives you keys, keys open up new areas, and new areas offer new challenges.

Like its spiritual predecessors, *Spyro* and *Crash*, the gameplay isn't just hopping and popping. Aside from the jumping, collecting, running, swinging, sneaking, stealing and hitting things with a big hook on the end of a stick, the game also features a plethora of simple but incredibly fun mini-games. Variations on *Super Sprint*, *Robotron*, *Asteroids*, turret-based shooters and, erm, a thing where you run around catching chickens while avoiding bomb-toting roosters, keep the pace of the game varied and exciting. None of the levels are too long.

"None of the levels are too long, but they all offer challenges that let you grow with the game."

(beat the main portion of the game fairly quickly, but for once that wasn't enough—I had this uncontrollable urge to go back and find everything. I haven't been this hooked on a platformer since *Crash Warped*.)

So what's different? At first you may think it's just because it's a very pretty game. There's no denying that the visual style Sucker Punch has established is absolutely stunning. The art itself is distinctive and unique, while the animation is slick, cartoon-like and filled with humor. The guys behind this little really seem to have a handle on how to pull off subtle visual gags, so much so that you are constantly

but they all offer challenges that let you grow with the game.

The real hook for me was the unlockables. Aside from simply beating a level, there are two other significant challenges for you to meet. First, dotted around most levels are bottles containing clues. Collect all of the clues and you can break into a safe where a page from the *Thievius Raccoonus* (the book that teaches young Sly how to be a thief) is stashed. Each page provides a

"Like its spiritual predecessors, *Spyro* and *Crash*, the gameplay isn't just hopping and bopping."

new skill, that in turn makes collecting further clue bottles easier. Again, the pacing and structure of the game means that the process of achieving goals and being rewarded is sufficiently frequent that you always feel like you're doing something new. Once you've collected all the pages of the *Thievius Raccoonus* you then get to go back to each level to try to beat it within a set time limit. Beat the clock and you get to open up a

special "commentary" track for that level, just like the director's tracks found on most DVDs these days.

Control is tight and instantly accessible. Some of the seemingly more complex moves—the ones that involve leaping off a wall, hooking onto something with your stick, swinging, jumping and then landing with a flourish on nothing more than a twig—are actually easier than they look. The control system

evolves with you as you open up all the new skills, and pretty much everything that would be otherwise complicated is context-sensitive. If Sly needs to sneak up against a wall, Solid Snake-style, he'll know that's what you want to do when you walk up to a wall and hit the Circle button. Simple design thoughts like this just don't show up as often as we'd like.

If there are any complaints, the only thing I can think of is that you can "beat" the game in less than 10 hours. There's no way you'll have opened everything up in that time, but you will have seen all the levels, fought all the bosses (each of which provides a dramatically different challenge, from traditional "hit him lots 'brawls to *PaRappa*-style memory games) and seen the first end sequence. The extra stuff really helps stretch things out, though, and if you're anything like me, you'll happily sit for another 10 hours to do so.

Blade II

Publisher Activision
Developer Muckyfoot
Web Site www.activision.com
If there's one thing I've learned from *Blade II*, it's this: **Vampires love monotony.** I guess it's to be expected from a species damned to eat and drink the same thing every day, but who'd have known that within the walls of their inner sanctums—no matter how big they may be—lie multiple rooms and hallways that look almost exactly the same? In Karkov Tower, for example, go through a hallway lined either with golden dragon heads or a series of identical glass-encased statues, and you'll usually encounter a large room perfectly symmetrical in its balance of computers, servers and soda machines. Vamps even take delight in saying "the Daywalker!" or "freak!" every time they see you.

Being half vampire himself, Blade appreciates the art of repetitive speech almost as much, be it letting you know this is "so exciting" or quoting Pacino with "keep your friends close, keep your enemies closer." He does vary things up with a cool arsenal (the boomerang-like glave works particularly well—mostly due to poor A.I.), but when it comes to the awkward combat (which you control with the right stick) Blade continues to avoid diversity with a **limited assortment of punches and kicks.** Using his sword exhilarates you and kills enemies quickly—but you can only use it for short stints. You know... to avoid monotony

If I had any hair, I would have pulled it out by now. In fact, *Commandos 2* actually had me flailing at my scalp, grabbing fistfuls of imaginary hair in an extremity of frustration. I was stuck, and when you get stuck in *Commandos 2* you get really stuck. The trouble was, I was stuck on only the second level. No, wait, scratch that! It was the second training level—the actual game hadn't even started yet.

How, you may ask, is it possible to get so stymied by what appears to be a real-time strategy? Simple: **It's not a real-time strategy at all—it's a puzzle game in camouflage.** You are given very specific goals, and you need to divine the

very specific path to these goals that the programmers had in mind. And if you happen to guess wrong, or happen to misinterpret the vague instruction you're given, or happen to miss one tiny element in the densely detailed prerendered environments, you're screwed. It's like those segments of *ICO* you just could not figure out, the parts that made you feel like your brain had hit a wall at Mach 5. Only with this game, you're not expecting it.

However, as with many puzzle-solving games, when you **do** get it right, there's a profound feeling of accomplishment. And as you build up your cadre of nine different commandos and you learn how to use each of their unique skills efficiently and competently, you'll begin to feel like a true armchair general. The question is, will you have the patience to stick with it?

For me the answer was "no." If I hadn't had to review the game, I would have returned it halfway through that second training mission. (Speaking of which, I'd like to pause for a public service announcement: There are anti-tank mines in a crate inside the house pictured in the bottom screen at left. You're not likely to find them on your own. I didn't.)

It's an interesting concept for a game—a war-based puzzle solver—but **for my money, it's far too frustrating.** And the fact that it looks (and loads) like a PSONe game doesn't help matters.

I can't help feeling like this game was designed by sadists, for masochists. It's that frustrating.

With *Spy Hunter* last year, Midway set the standard for reinvented '80s games. While *Defender* doesn't quite equal the year-old benchmark, it still **manages to satisfy any modern gamer out for some good ol' alien blasting in futuristic spaceships.** Those who can answer "yes" to all of the "Do You Remember?" events seen in this month's *Vice City* feature will love how closely the game sticks to its granddaddy, while those who consider the Sega Genesis days as "way back" can still jump in and enjoy *Defender* as though it were an entirely new franchise.

As part of the PS2-era reinvention, you've got a hangar full of different, upgradeable starfighters that you can upgrade throughout the course of the game. Not surprisingly, the *Defender* is your most well-rounded ship, and you've just gotta love how its main lasergun sounds exactly like it did in '80. Though each ship comes equipped with many weapons, I still usually found the most basic ones the easiest and most fun to use.

For the most part, the ships control well, and each seems to have its own personality as it whisks through the air (or trudges in the Guardian's case). However, heading them toward exact spots where there might be a power-up or a colonist falling to his doom often proves a bit too tricky.

Despite its negative tone, the sentence you just finished reading likely still managed to thrill *Defender* veterans. Yes, rescuing colonists from the insectoid enemies that would otherwise eat

them and become more powerful is a very important element to the game. Not only must you free and catch the captured as you did in the original, but you can also grab stranded colonists and return them to your base before the badies get to them, an action that often rewards you with firepower to bolster defenses.

The new story for the game has its positives (I especially like having to work through our own solar system en route to reclaiming Earth)—but did Midway really have to call me a "Freaky Flyer" or throw in a character named "Dr. Mudo"? **And two-player? Awful.** Some additions to a reinvented classic just shouldn't be made.

I've always been a big fan of the *Grandia* series (even despite the awful PlayStation 2 version of *Grandia III*). And the reason why is the unique battle system it employs. Although it's a turn-based setup, similar to almost any other traditional RPG out there, it's done in such a way that it **feels almost like real-time combat.** You have to keep track of who's moving next and be aware of what they're doing, whether they're charging up to cast a spell or reading a quick attack. The great part is that you can directly affect what your enemies will do by how you act, do a quick attack to stop them cold for a few seconds, or a heavy attack to

make them lose their turn altogether. Of course, the forces massed against you have the same advantages, so **even the most basic encounter requires loads of strategy.**

So if the fighting system's so good, why not base an entire game on it, right? Unless, of course, things like an intricate plot and large world to explore in an RPG are important to you. Make no mistake; *Grandia Xtreme* is a dungeon crawl. All you're really going to do in this game is fight, fight and fight. Oh, and solve a quick puzzle or three.

But don't think the game is monotonous—far from it. The various levels all have different, distinct themes and unique enemies to fight, so the game stays at least somewhat fresh throughout. Of course, you'll be spending hours upon hours in said dungeons, so

you may be a tad bored from time to time. But still, **there's enough variety here to keep you interested in what amounts to doing the same thing over and over and over again.**

The point is that if you're not the type of RPG player who wants to endure battle after battle, leveling up your party and squirreling away gold for the best weapons and items, then don't even consider buying *Grandia Xtreme*. However, if you're one of those types who have to get to the highest experience level and customize the crap out of your party members, *Grandia Xtreme* is one of the best dungeon crawls you're likely to find.

Last year's *Thunder* was an awesome game. It was the first time NASCAR fans were treated to a title that felt more like a sports game and less like a lame racing game with a big license attached. Well, you ain't seen nothin' yet.

Thunder 2003 takes last year's game and blows the doors off it. The Career mode alone is enough to justify buying this version. Not only are you charged with taking your home-grown race team through a 20-year dynasty, but you also have to keep tabs on things like team performance and payroll. It's a level of depth I've never seen before in a NASCAR game.

But don't let that scare you rookies away. *Thunder 2003* also contains a bunch of cool, helpful play settings to get you up to speed in comfort—particularly the licenses that help you learn each track and the Thunder Challenges that introduce you to various drivers and put you in their shoes.

Of course, all this is moot if the game plays like crap. No worries: *Thunder 2003* handles smooth and fast, making three-wide racing at 200 mph a pleasure. If I have one complaint, it's that the race-day setup isn't really what it should be. The addition of a multi-car practice session before each event (like in real life) would put *Thunder* in the winner's circle. But still, you can't do any better than this for NASCAR racing on your PS2.

The operative words here are "speed" and "hot"

Publisher EA Games
Developer Black Box

It's entirely possible that my boundless enthusiasm for *Need for Speed* got a little boring around here lately. It's no secret that I'm a sucker for a good driving game and equally fickle when it comes to anything packed with desirable vehicles that cost as much as a small (or indeed, quite large) house. *Hot Pursuit 2* has everything I've ever wanted from a sports car racing game: Cool rides, some of the best engine noises ever committed to a gaming soundtrack and most importantly, a sense of incredible speed and power. I don't know about you, but if I'm behind the virtual wheel

of a car that's packing 500hp, I want to get a sense of the stool-loosening torque when I floor the gas. If I'm cruising at 150 mph and then easing into a long left-hander, I want the feeling of velocity to really scare the crap out of me as the tires slide across the asphalt. **Everything about the control system in the game feels absolutely spot-on.** It may not accurately simulate exactly how each of its cars handles in real life, but it instead provides you with the

look and feel that you really want that car to exhibit. If this were just an incredible selection of cars served up with the *Need For Speed* driving engine and a bunch of races, I'd probably be reasonably satisfied. What really pushes things over the edge, though, is the fact there's just so much for you to do in this game. Racing and winning is important enough, but you also have to contend with the cops, who take exception to you pushing your car north of 200 mph. If they clock you busting the limit—and let's face it, if you're not going at least twice the legal limit, you're hopeless—they'll throw everything they've

got at you. First they'll just try and catch you, then they'll try to run you off the road before eventually resorting to roadblocks, tire spikes and even a helicopter that drops flash bombs. Sounds pretty heavy, I know, but as with everything else here, this is just a small part of the overall experience—it encourages you to be very tactical about the way you race.

Road blocks can be avoided, flash bombs can be dodged and cop cars can be out-driven, but

thning up, which invariably means a new car to add to the garage.

Although the car selection isn't as extensive as *GT3's*, the rides offered here are all certainly desirable. Things kick off with small, lightweight speedsters like the Lotus Elise and soon move up to small coupes and high-powered sedans like the Holden GSV or BMW M5. American muscle comes in various forms including the awesome Corvette Z06, and Grand Tourers are ably represented by the Jag XJ-R and Mercedes CL. From there on things get even crazier. Three big names that never appear in other games (unless they're all alone) are Ferrari, Lamborghini and Porsche. Here you get to play in the F360 (and others), the Diablo AND Marcielago as well as the 911 Turbo. It doesn't end there, either: The game hits gearhead spunk material when it dishes up the Mercedes CLR, multiple variations on the McLaren F1 and even the Porsche Carrera concept.

I'm not often moved to make really bold statements about games, but I honestly do think that this may be one of the very best racing games ever made. The combination of desirable rides, the fantastic feel, the wonderful sounds and the awesome visuals make the visceral experience thrilling enough. Throw in the fact that it's as much a varied and objective-oriented game as it

while you're doing this, you're also required to beat the guys you're racing against—and they all seem to have a pretty good handle on what's going on, too.

As with any racing game, there are a variety of different modes to play through, but *HP2* mixes things up more than most: If you want to open up every car and every track in the game, you're going to have to work through a complicated competition "trax" that requires you to race a huge range of cars, go against the clock, achieve certain results and even race as the cops from time to time. Every time you beat an objective in the competition, you open some-

is a car-lover's experience and you have something that will keep you amused for a lot longer than most driving games. I still haven't opened everything up and I've been playing as much as I can for the last few weeks.

If I could think of something I didn't like about the game, believe me, I'd say so. Looking at a review that's this glowing I'd often think, "There must be something wrong with it—what's he missing?" but I honestly can't think of anything I don't like here. Wow—that's quite a statement.

Wow, I'm impressed. One of my favorite games last year, *Hitz 20-02*, has grown up in a big way. In fact, *Hitz 20-03* has become everything that *Blitz* could've been. I'll be happy to say that this is the best hockey game on the PS2.

Bring on the arguments, but *NHL 2003* is too bogged down with animations. *NHL 2K3* is too serious and *FaceOff 2003* looks like it's still on the PSone. The door is wide open, and *Hitz* has stomped through on sharp skates.

Do you remember the first time you picked up *ATV Offroad Fury* and it just felt right? That's the same experience sports gamers will have with *Hitz*. It feels like hockey, which is the kind of inexplicable thing that separates it from the other puck efforts. But it's deep, too. Even though it is only 3-on-3, it makes me feel like I'm playing hockey back in 1994, when no amount of hot co-edds could convince me to put down my Genesis controller.

And isn't that what hockey gamers really want? A game so good that you'll swear everything on your dry erase board so you can sit in your apartment and play until 3 a.m.—work, girls, social life be damned!

Hitz makes it possible. The Franchise mode alone is worth 50 bucks, since you can create a team of six guys to battle against the big boys. You can name each player (it was fun for me to have all of my old roller hockey buddies back on the ice with me), then you can give them attributes. Better yet, the attributes are much deeper than

last year's game. To earn more points you'll have to bust your hump on the ice, too.

One problem I have with the new game is that the mini-games, unlike last year, don't have a conclusion. Which stinks. But now you can play two players, which doesn't. Also, I wish they'd have kept last year's mini-games in. Why not? Give us more for our buck.

I rarely will mention how good a game looks, because it's PS2 and I figure all quality games look about the same, but *Hitz* is seriously sharp. If you're into that sort of thing.

When the puck drops, *Hitz* proves it's everything every other hockey game wants to be: fun.

The mechs, the characters, the visuals and even the music will make any Robotech freak giggle in delight. But since I'm not really one of those people, I can judge this game purely based on what it is at its core—a pretty darn cool shooter.

The intensity that comes from the fantastical dog-fights—filled with swarms of missiles whizzing every which way—is simply too cool. And the fact that your Veritech can change into three different forms (each with certain strong and weak points) adds strategy and helps mix up the gameplay. I enjoy how the game forces you to change forms in order to perform better in situations, although I sometimes wish it were a little more apparent which form was best for what.

Battlecry also looks friggin' amazing—here's yet another game where cel-shading does wonders. Just wait until you see some of the space levels that are simply littered with on-screen mayhem.

My only big concern with the *Battlecry* was its rather uneven difficulty; certain missions border on frustrating. Still, when you've got a game that look and plays this good, you're not going to mind playing areas over and over again. Fan or no fan, *Robotech* will delight.

"The Rock says being able to block a sword with a naked forearm is a big load of monkey crap!"

Indeed, Rock. But beyond the little complaints (like the troublesome camera), there's a much bigger problem: The game is so mind-numbingly boring I drifted asleep while playing. The dynamic is cruelly simple. You kill all the guys in a room by hitting the same buttons over and over and over...then the lock on the door mysteriously lifts and you can enter a new room with new adventures where you'll have the exciting chance to hit the same buttons over and over and over.

Luckily the Dual Shock 2 is built to last, because it's taken some prime punishment over the last few hours. But it's all I can take, and I can't take no more.

I'm trying to figure out what kind of audience chooses to spend \$50 on a game like this over something like *Metal Gear Solid 2*. Someone who doesn't enjoy stealth in their gameplay? A meat-head who lives and dies with every one of the People's Champ's Rocky Bottoms? Regardless, it's certainly not sensible gamers with free time, and it's certainly not me.

Zzzzzzz—huh? Wha? Oh, sorry, must have dozed off there. But come on—a fishing game. Can you blame me?

Fishing games are notorious for not exactly being the most exciting genre in the whole gaming pantheon [and, let's be honest here, fishing itself isn't exactly a burn-barn-or-a-sport]. In fact, of all the fishing games I've played, there's exactly one that hasn't bored me out of my wits within the first hour or so.

Ironically, that one was *Bass Fishing Duel's* predecessor, *Sega Bass Fishing* on the Dreamcast. The reason why the original was so stimulating (stimulating, it must be said, as compared to the rest of the fishing games on the market) is that it tried in no way to be realistic. It was all about cast and reel, bab, and the focus was on the eternal struggle between a man and his dinner.

Duel, on the other hand, makes an obvious effort to up the realism a bit—and the results, while not disastrous, are certainly underwhelming. Far too much time is spent trawling around the lake looking for the naughty, hiding bass; far too little time is spent actually catching the buggers—even in the Arcade mode.

Plus, if realism is your aim, how about not letting fish swim through solid objects? That'd be a step in the right direction.

After the World Cup reminded me to fall in love with soccer all over again after four loveless years, I thought I'd become enough of a footy fan to like even the crappiest soccer games that came my way. But *Soccer Slam* does its best to be the exception to that rule.

The concept is interesting: You play three-on-three with a goalie. The moves are outlandish (to avoid a slide tackle you actually do a flip with the ball in between your feet) and the shots are radical (you can pull off a *Matrix* moment if you press the right button combination). But the game looks so bad I can't begin to like it. I feel like I'm playing a really good looking PSone game.

While the game modes are cool, and the control is fine, the awful graphics just burn me out so badly I have to question getting up at 5 a.m. to see the Germany/U.S. match in SoHo.

The animations look half-assed and the goalies are overly willing to get out of position and stay out of position. I'm really ticked, too, because I thought this game would be the high-flyin' crazy character soccer game that would prove that *Red Card Soccer* isn't all that and a bag of soccer balls. But apparently, comparatively, it is.

Considering that our major beef with the first two *Silent Scope* was that there wasn't enough gameplay in them, Konami was wise to include both the arcade game of *Silent Scope EX* and the brand new *Silent Scope 3* in this package. You're basically getting two games in one here, and both are a lot of fun, not to mention loaded with replay value.

Not only is the action totally pumped up in these (there are a lot more fast-paced areas, such as helicopter and boat chases), but there is a new health bar that makes a lot more sense. The timer is even diminished in this one—it's built into your health bar and will nibble at it ever so slightly. There's also a lot more strategy, with areas

that require you to take water or wind into account and spots where you need to keep your eye on multiple targets (such as one scene that asks you to stop a presidential assassination not unlike JFK's).

It's just too bad that the games are still plagued by cheesy dialogue and characters. I understand the need for it to be arcadey, but this really lessens the experience.

But I'll say this: taking on the terrorists in these games means more to me now, post-9/11. There's one scene in particular that I didn't mind playing a couple of times—one in which you take out a bunch of terrorists trying to hijack a plane. What a shame that *Metro3D* didn't hype this game at all! Here's one of the year's biggest surprises.

Set in a futuristic world where most of the earth has been submerged in water, *Sub Rebellion* places you on the side of a rebel alliance taking on a military empire and fits you with a highly advanced sub called Chronos.

What's so great about this game is that it delivers a true sensation of underwater combat without getting all hung up on the details that would normally lead to frustration. For example, there's no damage from bumping into walls and you don't have to constantly keep an eye on your ammo. It's all very straightforward and fun.

Your sub's also equipped with what is easily one of the coolest sonar systems ever—triggering it will map out your surroundings with a wireframe that points out enemies and secret items. And speaking of the secret stuff, there's lots of treasure to collect as you go, which not only allows you to earn money for new weaponry, but also adds a ton of replay value.

Plus, there's a good amount of gameplay diversity here, as combat will also often extend to above the water's surface. This adds a new level of intensity—focusing on what's above could leave you open to attacks from below. The unsettling feeling you'll get just proves how good this game is.

The first *Summoner* was a game that only the most RPG-desperate gamer would enjoy. Despite the rich storyline, strong characterization and the "Summoner Geeks" movie, the game's problems were practically unbearable. The bright side to this story is that two years later, Volition has taken the criticisms to heart, and *Summoner 2* is a far better game for it.

In *Summoner 2*, you control [initially] Maia, a sturdy, strong-minded warrior who also happens to be the queen of Halassar. Some folks think that she's the reincarnation of the goddess Laharah, and to her snobby credit, Maia kind of likes the idea. But in case you tire of playing as a bitchy she-warrior, you can cycle between two other allies (out of your pool of characters) with the flick of a button.

Each character's tendencies can be fine-tuned in the deep customization menus. Allies can be instructed to heal others automatically when damage is suffered, or to aggressively attack enemies. Weapons, armor and status-affecting accessories can also be tailored to taste. Much more action-intensive than the first game, *Summoner 2* showcases the improved combat, but it also highlights the engine's many flaws.

Blocking, for one, is not nearly as effective as it should be, and the controls suffer from a slight delay that reduces melees into a button-mashing frenzy. Spell-casting in battle is also half-pointless, as characters are vulnerable to attacks while they finish their healing-spell animations. Sadly,

for a game with so much combat, the game offers no efficient solution for when hordes of enemies surround you. This is an easy recipe for death in most instances.

Graphically, *Summoner 2's* visuals are a considerable improvement, with sprawling vistas, good texture variety and wildly imaginative worlds in which to do your questing. But the reality is that this game still looks like a PC title with harsh angular edges and odd-looking characters. The ultra-linear storyline doesn't enhance replay value either, but you can live with these sorts of bumps. *Summoner 2's* action-heavy focus will keep all but the nit-pickiest gamers happy for hours on end.

I'm so thrilled that someone has finally broken the apparently iron-clad formula of survival horror games that I'm almost prepared to forgive *The Thing* its snarling horror of flaws. Almost.

But not quite. See, for every thing *The Thing* does right, it does two things wrong. The good news is that the things it does wrong aren't as momentous as the things it does right, so the balance ends up slightly in the game's favor.

Let's start with the good. *The Thing* bears nearly no resemblance to *Resident Evil*, and that's such a shocking change within this genre that it earns big points for that fact alone. The engine is fully 3D, with

crisp graphics and solid controls. Item and weapon management is handled on-the-fly, and when you do have to use the menus, you'll find them sensibly laid out and generally quicker to access than the clunky genre-standard item screen. Their uniqueness makes for a steeper learning curve than you'd expect, but once you get familiar with the systems it becomes second nature.

This extends to the system by which you distribute orders (and items) to your team, whose existence is another significant innovation in the genre. You'll need to interact with your compatriots regularly to get a sense of their state of mind; neglect them too long and they could turn on you.

But this innovation is also one of the game's flaws: While it's a notable addition to the game, it has very little bearing on the actual gameplay. I can count on one hand the number of times I had to really tend to a team member. It feels like a great idea that they forgot to use.

The game feels similarly rushed in dozens of other ways, from the lack of music to the strange sound glitches to the bizarre, non-sequitur-like jumps between certain levels. (One minute I'm in a sub, then with absolutely no transition I'm running across a snowfield. *Huh??*) I can't help feeling like the game would have benefited from another six months or so of development. At least that gives me some hope for a sequel.

I was a big fan of *Turok* back on the first-person shooter, and it sold by the truckload. But the sequels each deteriorated somewhat, and the trend has continued, culminating in what we have now: *Evolution*, a sad, painfully executed experience that can't hold a candle to the former glory.

The saddest thing about *Evolution* is that it's brimming with good ideas that are poorly executed. The movement from fantasy-meets-sci-fi FPS levels to dinosaur-riding 3D-shooter levels should be a fun and rewarding experience—but it isn't. The flying levels suffer from appalling controls, jerky animation and frustrating objectives, while the FPS sections are mired by dumb A.I. You can't kill a creature until it's registered your existence...even if you throw 10 grenades at it! and graphics that make it impossible to see ledges that can easily kill you. It's also filled with frustratingly unnecessary platform-jumping sections, and you can't look around when you're climbing ladders. The sound is atrocious, with a water effect that sounds suspiciously like what my cat does when she pukes.

Multiplayer, once a staple of the franchise, is terrible. It only supports two players, and there are some insane glitches whenever you shoot at your opponent.

In other words, not better.

Ty the Tasmanian Tiger

Publisher EA Games
Developer Krome Studios
Web Site www.eagames.com

Aside from some of the most lush visuals ever seen on the PS2, Ty is a completely average, unremarkable platformer. It has all of the basic genre mainstays, such as catchy music, a standard set of environments (forest, snow, water, etc.), and lots of hopping and bopping gameplay, but there's not a hint of originality here. Well, aside from the Aussie theme, which isn't, erm, something to get excited over.

A platformer is usually only as good as its star, and Ty is basically on the level of your average mascot (I think: Croc). He's likeable, sure, but only to a degree. His only major pluses are his boomerangs, which serve as nifty weapons.

Gameplay-wise, Ty is fairly solid, though it's one of those titles that centers around collecting objects. It's not all that exciting, but there's at least moderate fun to be had in the process.

I think the main problem I have with Ty is that it's coming out at a time when there are so many other games in its genre that are really pushing things forward. I mean, it's really hard to recommend something like this when there are such incredible games as *Sly Cooper* and *Ratchet & Clank* coming out. But you know what? I will. Because even though I'm going to play those titles, I'm still going to go back to hunt for more stuff in Ty before I do. And that has to be at least *say something* about the game.

TRIBES AERIAL ASSAULT

The action is fast, the battles are brutal, and the learning curve is steep

Publisher Sierra
Developer Inevitable
Web Site www.sierra.com

Like *Tribes Aerial Assault*, the polar opposite of *SOCOM*, *SOCOM* is gritty, realistic, tense—and also disappointingly limited in its multiplayer feature. Here, at the other end of the spectrum, is *Tribes*: fast-paced, futuristic, breezy in its approach to deaths and respawns...and loaded—fairly posing—with multiplayer options. Whereas *SOCOM* is a uniquely console-based shooter land by that I mean one that undoubtedly makes PC online veterans cringe at the lack of options), *Tribes* is one of the flagship online franchises from the PC, and shows that lineage from every heavily armored angle.

But what does this mean to the average player? Well, for one thing, *Aerial Assault* slaps you in the face with a fairly steep learning curve. Basic controls are first-person-shooter standards, but there are some more advanced

techniques and options that take some serious getting used to. One of these is "sking": By holding down the jump button and judiciously engaging the jetpack, you can slide across the hilly terrain quickly—but it's a technique that

outs of the enormous levels. And then there are the vehicles: four different styles, each with their own quirks. The Grav Cycle is nimble but defenseless, the Bomber is devastating but lumbering, and so on.

"There's a whole damn lot to learn before you can become proficient with the game."

will take some time to pick up. And then there are the weapon load-outs: You have three types of armor (light, medium and heavy), and each one of these has a selection of weapon and item presets that can be customized to your heart's content. And while the weapon selection isn't spectacularly varied, there are a ton of extra items—repair packs, remote turrets, extra inventory stations, etc.—to contend with. Figuring out your ideal setup will be a chore in itself, much less learning the lay-

in other words, there's a whole damn lot to learn before you can become proficient with the game. And that means, if you happen to come into an online game against players with a lot more experience, you're going to get your ass handed to you on a very uncomfortable plate. I suppose that's the case with nearly any game where large groups of people (*Aerial Assault* supports up to 16 online) go head-to-head. But that's not going to make it any easier on the newcomers.

It also doesn't help that online play has its own quirks. Yes, you can play 16-way matches—but whoever's hosting had better have a damn fast connection; the game suggests a T1 (i.e., commercial-quality connection) to host a 16-player game, and don't even try to host more than four players on a dial-up. And even in the smaller games there's a slight lag when firing that never seems to go

away. It's not excruciating, just annoying. And then there's the communication: there isn't any. You can't use a keyboard for chat (and there's obviously no *SOCOM*-style voice chat), and the game doesn't even include taunts—just positive ("Whoohoo!") or negative ("Shazbot!") comments.

What's odd is that, in spite of all this variety in weapons, vehicles, game modes and options, the game feels strangely bland to me. The levels, for one thing, are really hit or miss. Some have extensive indoor areas, but these tend to be confusing and poorly designed; others have huge outdoor areas that just feel empty and barren (though I have to say I dig the up-and-down gameplay the jetpack allows quite a lot). Furthermore, maybe I've played too much *SOCOM*, but the ultra-fast-paced action of *Aerial Assault* seems kind of...pointless.

But I also don't feel like the game is aimed at me; I feel like it's aimed at PC devotees who want to take the action to the living room. And that's fine, I suppose. But I

think the rest of us are going to pop in, fly around for awhile, and quietly slip away. I think this is going to prove a matter of taste for a lot of people; I'd suggest renting it first before you buy.

1. Why do I keep saying "Shazbot"?
2. Why do two of the weapons (Plasma Rifle and Spinifcor) seem identical?

It was a dark and stormy night...

So begins *Wild Arms 3*—with perhaps one of the biggest clichés out there. Indeed, the latest chapter in this long-running franchise [the original *Wild Arms* was among the first PSone RPGs] is baldly unabashed about cramming in as many showporn story and game-play ideas as it possibly can.

Which might be just fine for the old-school role-player seeking a change from all those nouveau RPGs of late. After all, sometimes tradition is a good thing, and *Wild Arms 3* is as traditional as it gets. The story? Same old stuff: A band of unlikely heroes is thrown together and reluctantly embarks on a quest to save the world from doom and gloom. The gameplay? Typical turn-based fare that narrows all the way back to the 16-bit days, with realms of repetitive random battles, plenty of puzzle-packed dungeons and a stifling town-dungeon-town-dungeon setup. In fact, the only thing different about this game is the spectacular cel-shaded graphics complemented by a visually striking cross-hatch texture-shading technique [in other words, it looks really cool.

Wild Arms 3

This lack of innovation isn't necessarily a bad thing, though Cliché or not, *Wild Arms 3* does what it does very well. For grumbly, old-school types unfulfilled by today's cinematic offerings and thumb-numbing action/RPGs, *Wild Arms 3* is like comfort food—a tasty return to what you once loved.

But for new-school gamers—or anyone whose tastes have simply evolved—*Wild Arms 3* is like serving up granny's special meatloaf to a vegetarian. No matter how good it may be, it won't go down easy. Basically, if you have the *slightest* concern that you might fall into this latter category, then rent the game first. *Wild Arms 3* just isn't interesting enough to overcome its retro-ingred, formulaic game-play [the bone-dry localization doesn't help]. Sure, it's solid, it's fun—it's even absorbing at times—but ultimately it falls flat.

On the other hand, if you're one of those rare *Wild Arms* fanboys, then No. 3 will surely please. It's got more of what its predecessors offered—and best yet, it finally gets the Wild West theme right.

Publisher Bandai

When *Gundam: The Battle Master* first appeared in Japan, it was a visual innovator of the time. Its characters were jointed, 2D constructs whose fluid animation was unmatched, resulting in a remarkable grace that put sprite-based fighters to shame.

Now Bandai is squeezing the most out of its unique engine for *Gundam Battle Assault 2*, packing this PSone gem with everything a **Gundamite could ask for**.

Every mech is capable of a devastating array of special moves and attacks, filling the screen with an orgy of shell casings, hyper-extended plasma swords and all manner of energy-based gunfire. Control is responsive, but given the nature of huge mechs, don't expect Chun-Li levels of swiftness.

The graphics are uniquely *Gundam*'s own. As the mechs go at it, their armor deteriorates with each blow, until interior workings are exposed and the loser either overheats or suffers enough damage to warrant a K.O. **Being able to see [without need of a life bar] how much damage you're doing is one hell of a sweet payoff.**

GBA2 isn't the most groundbreaking game, nor is it the most deeply featured. It is, however, built with the target audience in mind. So if you're a *Gundam* fanatic, you'll find more than enough in this package to wage your own personal war.

I'm tempted to copy and paste last year's PSone *Madden* review into this space. **Besides updated rosters, the game features little else.** But, because because I want to "look" busy so I don't get canned, I'll just ramble on for a bit about how this is the best PSone football game out there. I'll also talk about the weather.

Madden 2003 plays, feels and looks exactly like it did last year. There's no difference at all.

In San Francisco, right now, it's windy and cool. About 66°.

The Mulligan—last year's lamest feature—returns, allowing you to trade a timeout for a do-over. *What?!* can't imagine that this is the lesson we want to teach kids (or adults) who can't afford a PS2. Whatever happened to life's hard knocks? With this feature, I have to wonder why there's even a reset button on the system!

In London, it's 59° and rainy. Big surprise!

The game's only new feature is the play editor, which allows you to make up your own formation and put people wherever you want. It's a recipe for endless money plays, but that shouldn't stop you.

What's that? Oh, it's 50° and mostly cloudy in Reykjavik, Iceland. **If you're stuck playing PSone football, Madden still reigns supreme.** If you're just looking for a shout-out to meteorology in a review, you're welcome in advance.

I imagine there are still some PSone gamers struggling to figure if they should buy *Madden* or *GameDay*. So I'll simplify the situation for you: *GameDay* is no *Madden*. **Like Madden, it's the same game as the year before, and the year before GameDay wasn't as good as Madden.** Straightforward enough for you?

GameDay is fine but nothing exceptional. *Like last year*. It's not like they were going to take great pains to fix this game when they were putting all their petrot into their PS2 version. Smart move.

Speaking of *GameDay*, I remember struggling into the playoffs in the '98 version of the game. I battled and battled and my entire season—and a shot at the Super Bowl—was on the line. It was all up to my kicker. I was nervous and excited, and I got to the 2-yard line. But I was on the far right hash mark. Not a big deal, except that you couldn't aim your kicks in that game and my kicker booted the ball and turned a sure field goal into a miss. The good news is that you won't have that problem with this game. You won't suffer the way I suffered.

I also really don't like that the **quarterbacks in GameDay take too damn long to throw the ball!** Get rid of it already, will ya! Oh, and the loading times suck.

In short, *Madden*'s the only game for PSone footballers. Got it? **Final Score** ●●●●

MAT HOFFMAN 2

So you want to know how to master Oklahoma City? We figured the best people to ask were the players on the team that made *Mat Hoffman 2*. Here are their tips, with some visuals to make your life a touch easier.

• Just got into town?

Jump off of the light fixture [the one after you grabbed the bus key] and grind onto the rail behind it. Keep grinding around the corner and jump from there onto the next rail so you can grab the CD with the track, "Free Styler." You can do the rest without us holding your handrails, right?

• Semi-pro flow

The crooked bench shouldn't be a problem. It's, get this, the crooked bench. After that, do your Eggbeater from that same manual.

Find the two toolboxes in the far left and near right corners of the room, then scour the warehouse for the other three (one in between the two garage doors leading from the park to the warehouse; one on the near right corner of the warehouse; one on the far left corner).

After knocking the last toolbox down, head toward the conveyor belt. See the green ramp-shaped machine with a yellow light on top of it? Jump over that and hit the switch on the wall to unlock the ramp to the hidden garage.

When that's all done, figure a way to score 40,000 points (we figure you can find a ramp to do this one), and you'll be all squared with your semi-pro challenges.

• Are you all Pro?

Jump off and go to Gap One [located just forward and to the right of the start point]. Land a perfect 360 Nothing over Gap One. Now position yourself below the previously mentioned light fixture and face to the left of where the start point is [about 10 o'clock]. Ride in that direction and up that vert, jump at the top and grind onto the rail above it. Grind around until you've gotten the Connor.

As for the fire alarms, follow these steps:

- Go into the warehouse and go to the middle of the room. Turn right. Ride up and over the vert ramp on the right wall and take a quick left. Ride up the two wooden ramps and jump and grind onto the yellow rail. Follow that around and hit the second fire alarm.
- Jump off of the rail and go to the far corner where one of the toolboxes used to be. Ride up the ramp (here and you'll see a fire alarm up in this area). You can hit it by riding up the vert ramp and jumping really high. Ride back down out of this area and get along the right wall where the green machine with the yellow light is. Jump the machine again and grind onto the ledge above it to hit the fourth fire alarm.
- Jump off the rail and go directly to the other side of the warehouse, where the ramp to the secret garage is. Ride up the ramp and hit the fifth fire alarm.

There's 80K and you're done. Well, done but not done. There are secrets to be discovered, young biker!

• Secret riders

While you're up in the secret garage go to the far end of it and transfer to one of the elevated quarter pipes with kickers.

Jump off of a kicker and grind on top of the big black machine with the Hoffman Bikies logo on it. This will open a big mechanical half pipe.

Above the half pipe there is a helmet floating. Grab this to unlock a padded outfit. Now go back to the same transfer you used to jump onto the top of the half pipe and do it again.

Grind along the edge of the half pipe, jump off, and grind onto the bull's horns. Jump off of the horns and into the area above it to unlock Day Smith.

The other secret characters that you can unlock include Vanessa, a female BMX rider, in Los Angeles. Just perform an adrenaline trick in front of her. Bigfoot can be unlocked by performing an adrenaline trick while transferring the kicker ramps in the outdoor BMX park in Portland. Volcans can be unlocked by defeating the Thai God in Hawaii. Unleash the Mime by finding every gap in the entire game.

KINGDOM HEARTS

Seven keys to getting the most out of this game, plus walk-throughs of some tricky spots.

Blast Cerberus and other bosses with Thunder

Seven Painfully Obvious Yet Utterly Relevant and Remarkably Useful Tips for Maximizing Your Enjoyment of Kingdom Hearts

1. SLOW DOWN

Rush through the game and you can beat it in less than 25 hours. But we guarantee you won't enjoy it as much as we did. Part of the fun in Kingdom Hearts is doing all the extra stuff—finding the Dalmatian puppies, fighting in the tournaments at Olympus Coliseum, building up your characters, unleashing the power of all the different Keyblades, and much more. Plus, the story is much richer when you take the time to immerse yourself in it—and you'll often find extra story tidbits along the way.

2. FOCUS

Early on, you'll probably lock on to enemies more than you need to. Once you get the hang of combat, though, try to avoid locking on—it tends to whipsaw the camera around for a dizzying effect, and it often forces you to chase after enemies that can easily outpace you. Do yourself a favor and let the game naturally lock on to whichever enemy is closest at hand; you can still chase after a specific Heartless foe, but you've got a better chance of tracking it down without having to tussle with the camera as well. The exception here: bosses that have multiple attack points [you'll want to finish off one section of the boss before moving on to the next] and enemies in areas like

Atlantica (since you're underwater and have full freedom of 3D movement, locking on helps you target a foe without swimming completely out of range).

3. GET SOME HELP

No, it's not just you—Donald is, in fact, utterly useless in combat early in the game. But guess what? You can swap in other more-powerful characters while visiting different worlds. And here's the best part: Donald will gain just as much experience, even when he's not part of the party. Here's what we suggest: Put Donald on the sidelines in Deep Jungle and Agrabah, but start using him again once you reach Atlantica. By then, his magic is a lot stronger, and it helps to have him around when squaring off against those underwater meanies.

4. GET SMART

Be sure to fiddle with the A.I. settings for Donald and Goofy. Here's what we found works best: Start with their overall settings on "Personal," but then adjust the HP items and MP items to read "Only in emergency." Yeah, they'll still use up far too many potions and ethers, but at least they won't be nearly as wasteful about it.

5. TAKE SHORTCUTS

Don't forget to set your magic shortcuts, which you can trigger with a tap of L1 along with X, Square or Triangle. Though you'll eventually have a range of spells at your disposal, we found only

Tarzan kicks ass!

Use Donald in Atlantica

three to be truly useful: cure, fire and thunder. Use these three often [especially cure], and you'll whiz through battles.

6. ROLL AROUND

The Dodge Roll ability is a lifesaver in certain boss battles. There's no way we would have beaten Cerberus without rolling past his many devastating attacks! Of course, once you gain the ability to fly [much later in the game], the Dodge Roll isn't quite as useful...

7. GO BACK FOR SECONDS

There are so many reasons to come back to Traverse Town, be it a visit to the Dalmatians' mansion to pick up a thank-you gift, or a stop off at the moogle's Item Workshop to synthesize new accessories, or a quick check of Merlin's study to add missing pages to Pooch's book and maybe even gain a new summon spell. While you're at it, be sure to head back to all the different worlds when you gain new abilities; you'll finally be able to reach some of those out-of-the-way chests, which contain some great goodies.

It's in the item workshop, boss. We're researching item synthesis and a super-weapon for a job.

Visit the Synthesis shop

You shouldn't have too much trouble finding your way through Kingdom Hearts, but the game's got a few spots that'll have you turning in circles. Following are quick walk-throughs for three of the trickier areas.

AGRAHAB: CAVE OF WONDERS

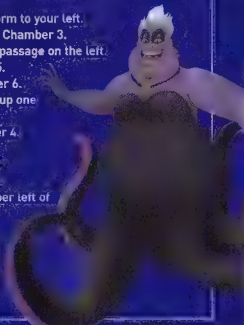

1. After entering the cave, stay to the left side and walk forward. Go through the doorway that's in front of you.
2. Enter the Dark Chamber, which is down the stairs located between two torch pillars.
3. Head to the Silent Chamber, which you can reach by swimming upstream to the right of the save point.
4. Swim downstream on the right side.
5. Activate the Monkey Statue. You need Aladdin in your party to do so [if you don't have him, head back to the last save point and swap him in].
6. Head back to the previous area, go up the stairs, then swim to the Hidden Room on the far right.
7. Swim to the stairs, where you can examine the stone pillar. Then blast it with fire magic.
8. Now go all the way back to the Silent Chamber, then go upstairs.
9. Go to the Bottomless Hall, which is through a door on your right.
10. Go forward, jump the gap, then enter the doorway to the Treasure Room.
11. Enter the Lamp Chamber.

MONSTRO: CHASING PINOCCHIO

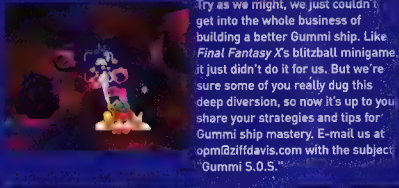

1. Start off in Chamber 1.
2. Enter Chamber 2 on a platform to your left.
3. Go straight through to enter Chamber 3.
4. Enter Chamber 2 through a passage on the left.
5. Go right to get to Chamber 5.
6. Go straight to get to Chamber 6.
7. Head toward your right and up one step to get to Chamber 5.
8. Go straight to enter Chamber 4.

ATLANTICA: URSULA, AGAIN!

1. Go back to the Sunken Ship.
2. Swim to the cave on the upper left of the ship.
3. Make sure you have the Mermaid Kick equipped, then use it to swim through the raging currents to the cave across the way.

Try as we might, we just couldn't get into the whole business of building a better Gummi ship. Like *Final Fantasy*'s blitzball minigame, it just didn't do it for us. But we're sure some of you really dug this deep diversion, so now it's up to you share your strategies and tips for Gummi ship mastery. E-mail us at opm@ziffdavis.com with the subject "Gummi S.O.S."

Next month: Grab all the Keyblades. Find all the Dalmatian pups. Get through the last level's massive maze. Plus, some of your tips and tricks for the game [oh, yeah—that means you'll have to e-mail them to us at opm@ziffdavis.com with the subject "KH Tips"].

TWISTED METAL: BLACK

If you're going to play *Black*, you're going to want all the best stuff. We deliver all the secret cars. And if you're having problems, just scan the last few lines to figure out how to make yourself invincible.

HIDDEN CARS

YellowJacket

Junkyard

Shoot down the airplane circling the level. It'll crash into the gully. The wreckage will open up a secret passageway that spans the level. Inside the tunnel is a control panel and a weird-looking concrete structure. Shoot the panel until it blows up, then YellowJacket is yours.

YellowJacket's Special Attack

This Special will surround the Taxi Cab with spikes. Trigger the attack to fire the spikes in four directions as the primary attack. As a secondary attack, you can ram other cars while the spikes are deployed. In addition, use Turbo when ramming the enemy. The damage will be even greater!

Axel

Freeway

Grab some Gas Cans and head to the construction site. Find an incline so you can aim your weapons at the crane holding a small building. Shoot the Cans into the crane's control room to force it to drop the building. Then blast the walls of the dropped building inside. Axel.

Axel's Special Attack

Axel can send a burst of energy out from his wheel to blast enemies around him. This attack can hit multiple enemies, making packs of cars a tempting target. By tapping U while your Special is selected, you'll trigger the second attack. Then he can roll right over opponents.

Warthog

Suburbs

There's a hill overlooking the factory district. Leap off the hill (marked with a Gas Can) into the building "A & L Transportation." Shoot out the small raise to open a hole into the building. Drop inside and shoot the control switch.

Warthog's Special Attack

Warthog can fry opponents with his cutting laser. Try to immobilize an opponent with a Freeze before using the beam. This attack does severe damage, and you can increase your victim's plight by firing your machine guns to do a little bit more hurting.

Manslaughter

Prison Ship

Exit the Prison Ship and take a right. Follow the path outside of the boat until you find the crates with a Health Power-Up on top of them. Shoot the crates until they form a ramp, then ride up and shoot the hull of the ship to reveal a secret passage into the Detention Center.

Manslaughter's Special Attack

This truck can lob giant explosive rocks. The more that impact, the more damage done. If the rocks hit the ground they'll scatter and bounce a bit before exploding. This attack can hit over such a wide area that it is ideal for exploring levels and finding what you can and cannot destroy.

Punt Block

You can go with the Punt Return formation, but it'll cause more heartache than a gory go with Punt Block and take the strong safety. Once the ball is snapped hold down L1 (strafe) and push down to intercept the defender who wants to scoot down the field! After that, take control of the punt returner. Once you catch the ball, cut immediately to your left or right and speed burst to get away from the defenders.

Beware, though: if you miss your block consider calling for a fair catch. Otherwise you might get kicked and fumble.

SOCOM: DESERT GLORY

Excuse me while I kiss the sand

Desert Glory is one of the most intricate, detailed and densely designed multiplayer levels in SOCOM. This means it can be hell on newcomers, but it also means there are plenty of nooks and crannies in which to take cover—or flush out your enemies when they try to take cover. Most Extraction (i.e., hostage rescue) missions tend to be a bit better balanced when the SEALs outnumber the Terrorists, and this level is a particularly good example. If you have a full eight-man team of SEALs, you probably don't want more than five or six Terrorists or the Terrorists will most likely dominate (alternately, put the weakest players on the Terrorist team—it's a natural handicap). Here's a few more specific suggestions.

FRIENDS IN HIGH PLACES

Here's how to teach your enemies to be afraid of heights. In the building where the hostages are kept, take the stairs up to the top level. Off this room are two balconies joined by a wooden plank over their railings:

Climb up onto this plank and turn toward the building. You'll notice that another Climb icon shows up here. Go ahead and climb up onto the top of the building. To discourage pursuit, drop a grenade down on the plank, or one of the balconies; it'll blow up the plank, making it impossible for anyone else to follow you up to your easily-defended position.

Now, you've got some options here. If you plop down right above those balconies, you'll get a view of a sizeable portion of the battlefield.

Alternately, you can head to the back of the building and drop down onto the lower platform. This places you right above the only entrance to the room which contains the hostages, and also gives you a bead on enemies trying to sneak in through the basement. Just be aware that you'll make quite a noticeable target in this position.

THE BEST OFFENSE IS A GOOD DEFENSE

Here's why we recommend that the SEALs outnumber the Terrorists on this level: The area that houses the hostages is spectacularly easy to defend. With just one entrance and a convenient L-shaped passageway to get into the room, the area could conceivably be held by a single Terrorist for the entire length of the game. (Well, he'd have to be a pretty smart Terrorist, but it certainly is possible.) Lobbing grenades out the door and sniping from the window are both viable options—or lobbing grenades out the window onto SEALs trying to infiltrate through the basement tunnel—but our favorite method is a little more sneaky. If you place claymores just inside the door on both sides (push hard into the corner before placing them and you'll get the best placement), you can

be ready with a nasty surprise when the enemy comes a-knockin'.

Try to lure the enemy through the doors by squeezing off a few rounds and ducking behind the wall. When he starts coming toward you, switch to the detonator. Wait for it...wait for it...NOW. If you plan to go this route, it's a good idea to set the detonator as a quick key, so that you can react quickly if an enemy surprises you by popping out the side door.

SMOKESCREEN

Have you noticed that smoldering campfire right near the center of the arena? First-time players will often mistake that smoke for a smoke grenade, but as a player becomes familiar with the level he'll start to ignore that smoke. Use that to your advantage: Lob a smoke grenade into the middle of the campfire pit.

This will give you a place to hide in plain sight. Sure, the smoke will be thicker and more billowy than usual, but this will likely fool the intermediate players the first couple of times. And once they start to notice you're hiding in there, throw the smoke grenade but run in the oppo-

site direction. You can circle around and take out the guys who are coming toward what they think is your hiding spot.

CUTTING CORNERS

We've been focusing on Terrorist strategies for most of this level, but we didn't want you SEALs to feel left out. Here's a quick way to penetrate into the heart of the Terrorist stronghold quickly. You know that raised wooden boardwalk that runs around the building that houses the terrorists? At the innermost "elbow" of the platform is an area with the railing missing. Not coincidentally, this happens to lead to a ledge that will give access to the back door of the hostage building. They're not as likely to watch that entrance—right near one of the most common Terrorist start points, and they're not likely to expect SEALs to show up so early in the game—so make the most of your secret arrival.

AND ONE TO GROW ON

There's a building just across from the building in which the hostages are restrained that looks like it's been nearly demolished. You may think it, but if you thought that you'd be wrong. Just head to the broken stairway and push toward it—a Climb icon will pop on-screen, allowing you to jump on up. Use the balconies to rain down fire upon thine enemies.

DARK CLOUD

You've got tough questions? Well, we've got competent answers. If you've been trotting through Dark Cloud, congrats, but if you're in a slow trudge, these answers should be a big help.

I've collected all the Alta and completed all the events in Norune Village. But I still don't have 100% in the Request column. What now?

Now comes the fun part. Wander through the town and chat with all the residents. They'll have all kinds of requests, from the simple (put me near the windmill) to the challenging (put me somewhere where I can exercise). The goal is to set up your village so that each and every request is fulfilled. While you're at it, throw in some of those extra pieces, just to make things look purty. Below is how we set up Norune Village—although what you do may look drastically different (though we've done something beautiful, haven't we?). Going forward, just apply this same kind of logical urban planning to future villages.

My characters are all a bit wimpy—and they get thirsty all the time! How can I build them up?

Have you been searching the villages for those random chests that pop up after you complete a few levels in the local dungeon? If so, you've likely stumbled upon Gourds (which increase your Thirst meter), Fruits of Eden (which increase your Health meter) and Fluffy Doughnuts (which increase Toan's defense—the other characters also have their "favorite" foods that boost their defense, like Fish Candy for Xiao and Carrot Cookies for Osmond). But here's a nifty-neato [did we just say that?] trick that's not mentioned anywhere in the game: When you pop into first-person mode [tap R2] while in a house, you can move around, much like a first-person shooter. Doing so will allow you to see areas in these houses that aren't normally visible. Do a thorough search [be sure to look down toward your feet] in these houses, and you're sure to find a wealth of items. Also, remember to check areas outside of the houses; in Matataka Village, for example, you'll find chests by the pond and near the entrance to Goro's area. Finally, once you've fully finished rebuilding a village, do one last sweep through the entire area. You're bound to find a few more choice items that'll boost your health, defense and water capacity.

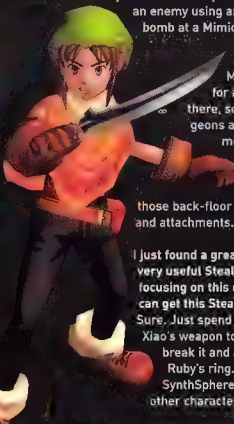

I can't find any Mimic Breaker attachments—and I need them to build up my weapon. What gives?

Forgive us for scolding you, but did you sell those Mimic Breakers you acquired early on because you needed a quick cash fix? Then shame, shame. As you get further into the game, you'll encounter several new stores that sell various attachments and gems, but since Mimic Breakers aren't among them, you'll have to get your hands dirty and earn them the old-fashioned way. Did you remember that

you can often acquire an attachment by defeating an enemy using an item? Meaning, if you toss a bomb at a Mimic, rather than slaying it with your sword, chances are good that it'll leave behind a Mimic Breaker. That also goes for all the other enemies out there, so head back into the dungeons and collect those attachments. If you're looking for Mimics, try the third level of the Sun/Moon Temple. And don't forget to troll

those back-floor areas for extra gems, items and attachments.

I just found a great slingshot for Xiao with this very useful Steal function. But I'm not really focusing on this character. Is there any way I can get this Steal function on Ruby's weapon? Sure... Just spend an extra hour building up Xiao's weapon to at least level five, then break it off and attach the SynthSphere to Ruby's ring. You can use any SynthSphere from any character on any other character.

SOCOM: BLIZZARD

No business like snow business

Demolition levels like Blizzard offer the greatest range of defensive tactics. It's easier to lay traps than it is in Suppression maps, because you have three separate focal points in the level: the bomb, the SEAL base and the Terrorist base. This makes Demolition maps a haven for snipers and campers. You know what this means: Don't ever stop moving, not unless you're well covered. Read on for more specific tactics.

NO ESCAPE

One of the cruelest methods of dispatching the enemy is to booby-trap your own base. If you lay in wait (especially if you have teammates making noise elsewhere), allow the enemy to pick up the bomb, then blast them just as they're about to plant it, you're dealing some serious psychological damage. They get so close...only to watch victory slip from their grasp at the final moment. Of course, the best tool for such torment is our old friend the claymore. One option is to position your four claymores inconspicuously in strategic locations in your base. Here's one useful placement for the SEAL base:

Now, you can either retreat to a safe distance and zoom in, waiting until the enemy is within reach, or you can be particularly nasty and actually let them plant the bomb before you detonate the claymores. The advantage of this second option is that you can move around freely, since the computer will inform you when the bomb has been planted. Keep in mind, though, that you'll need to be close enough to your base to get back there within 20 seconds or so. Make sure you position a claymore near each entrance to the room,

since the enemy is likely to make tracks as soon as the bomb is planted; this will also give you a better chance of taking out any support the enemy has brought along. If all goes well, the deal should go down like this:

If your enemy tries this tactic on you, you have a few options. If you keep your eyes open, you can note the locations of the claymores; if you can't find a safe route through them, call in support to back you up. If you're the last man standing, you'll need to just hunt down the enemy. You don't have to blow up the enemy base to win; taking them all out does the job just as well.

BOOM

A similar approach (one which requires a great deal more speed and stealth) is to surround the bomb with claymores like so:

It's likely that once your enemy decides to make a dash for the bomb, he's not going to be watching where he's going as much as he's going to be hauling ass in and out of the building that shelters the bomb. Take advantage of that by positioning the claymores in the dim environment of this level's bomb shelter.

INCOMING!

While we're on the subject of the bomb shelter, here's another tactic guaranteed to help keep the enemy on their toes: If you make a practice of lobbing grenades into the bomb shelter from a safe

distance, you can generally make your opponent wary of dashing for the bomb.

Remember that with friendly fire turned off, your grenades will *not* damage your teammates. If you have a couple people alternately lobbing grenades, you have a virtually impenetrable shield to cover a third person heading in for the bomb. If your enemy tries this on you, don't even attempt to head in. Just wait for them to run out of grenades.

DISTANCE MAKES THE HEART GROW FINDER

Yet another way to prevent the enemy from picking up the bomb altogether is to get a bead on the bomb shelter with a sniper rifle. The SEALs have a nice wooded rise on their side of the bomb that makes a good snipe point:

Be aware, though, that your enemy will probably catch on to this tactic pretty quickly.

HIDE AND GO DIE

Blizzard has a few excellent hiding spots, perfect for popping out like a wild-eyed, gun-toting jack-in-the-box. Most fun are the two out-houses, one at the SEAL base and one at the Terrorist base:

You can get inside one of these and close the door, and

there's enough of a crack around the door that you can get some idea of what's going on. Be careful of standing too close to a wall, though, because the steam of your breath may come out of the wall, giving away your position. Be aware, as well, that an out-house isn't exactly the most substantial cover; one well-placed grenade will take it down, and you with it.

(Also, whenever going into hiding, remember that the snow will hold your footprints for quite awhile. Solution: Run around in a tight circle, making a mess of the prints; alternately, walk backward.) Another great spot is this long thing sticking out of the Terrorist base:

Exit the upper level of the base onto the roof, walk around and head out to the end of whatever that thing is supposed to be, and hit the deck. It's very difficult to see from below. And don't forget about that pipe in the Terrorist base:

It makes a great hiding spot, and you can even lob grenades out the side if your enemy tries to plant the bomb. Remember, though, that there's only way into the pipe—if you get caught there, you've got nowhere to run to, baby, and nowhere to hide.

ITALIAN JOB: PIZZA GUY.
 Hey all you Italian Job lovers out there...here's a trick to get a free ride. Enter "Free Ride mode" and choose a car (preferably the Min Cooper or a cop car), and go to Turin. Drive around and soon find a parking garage and you'll find a Destructor Mode. Knock over all the cops in time and a man will come down the ramp and tell you about a job. Follow the arrow to a pizza parlor to get the job. The owner says if you deliver his pizza on time he will give you a new ride. You must deliver eight pizzas. You can go full speed the whole time except when delivering pizza number five. If you deliver the pizzas in time you will go back to the pizza parlor and will be given directions to your new ride which is a very very small VW Bug. Enjoy

 Hey, Man, You Cuban?
 Looking for the secret car in Havana? No problema, señor. Drive to the tunnel on the city's west side. Before you go into the tunnel, take the exit to the left and follow the curved road until you literally hit a wall. At the one-third point of the street, turn right and you'll find a switch on your right near some trees. Get out of the car and hit the switch. A secret area will just open. Get back into your ride and drive back down the road you were just on. The gate will be open, so break on through to the other side. Drive to the end, take a right, and take a left. When you get all the way down, turn left and then right and then left again. Follow the tunnel to the end to find the secret car on a platform. You'll find the switch to the right of the platform on the wall.

Rio Is Better With Invincibility
 Start along the highway, then turn 180 degrees and go the other way. Take the third street on your right and pass the big lake. After the lake there'll be an intersection. Turn left and find a building with a garage and a normal door. You'll see a barred-wire fence. Go to the building that's black with white windows. On the left side of this building find a door. Press Triangle at that door to enable the Immunity cheat (there'll be no cops). To activate the cheat, choose Gameplay and then Secrets in the Options menu.

DVD EGGS

American Pie 2 DVD
Here's your frickin' egg!
 Who can resist *American Pie 2*? Apparently you can't, so slip in the disc and sweep over to the Bonus Materials. There yet?
 • Go to the second page of bonus materials, which will make "Bonus Materials" at the top of the page selectable.
 • Select it.
 It'll play a quick clip with sexy Mena Suvari and Jason Biggs being ironic. Useless, but worth a watch.

Usual Suspects Special Edition DVD
Four photographs
 This is one of those rare movies that you can say is perfect. At least it makes for a good argument. As for eggs, follow the dots:
 • Stick in the disc on the second side.
 • Highlight the logo at the main menu then press X. This will make a screen with a slather of photos appear.
 • Highlight and select the photos in this order: Quartet, Guatemala, Big Woman, Broken Mug. You'll be privy to two clips of interviews.

The Sopranos: The Complete Second Season DVD
Bada bing!
 One of the best TV shows around, *The Sopranos* is *Grand Theft Auto III* without the controller. So when you're in the mood to watch someone "swim with the fishes," try this egg for size:
 • Put in Disc 4 and head to the Special Features menu.
 • Push U until an outline of one of those wholesome Bada Bing guys shows up in the lower right hand corner.
 • Press X and bada bing! You'll be able to watch a short montage from your favorite HBO gangsters yucking it up.

Moulin Rouge: Special Edition DVD
Cause you can-can-can
 This is one of the best movies going, and it's packed with eggs. There are 15 on the second disc. Here are three:
Zidler's Cancan
 • Go to the second submenu.
 • Highlight Back and press Right.
 • When the fairy appears, press X.
You and Ewan
 • Enter The Stars.
 • Once the intro has ended, type in nine and 17 (might need to press X between the numbers).
Giggling Nicole
 • Go to The Cutting Room.
 • Highlight Main Menu.
 • Press Left to make a red windmill appear.
 • Press X.

Hard Eight DVD
Track change
 Look, it's a slow month for eggs, alright. Here is a cult favorite from the guy who made *Boogie Nights* (it's actually better than the porn expose). Follow these steps:
 • Fast forward to the ending credits and press. Select to get to change the audio.
 The song normally heard will be different. Cool.

FINAL FANTASY X: EASY AP

By using the method below you can get nearly 99 levels in just one fight.

1. Select the character you want to level up. You need to equip him/her with a weapon that has the following abilities: Triple Ap, Triple Overdrive and Overdrive-Ap. You can win items with at least one of these abilities already attached to them in the Arena, west from Calm Lands. That same character must also learn the

Comrade Overdrive mode. You'll obtain this one by letting enemies attack your allies. 2. Go to the sunken cave located halfway between Mt. Gagazet and the Calm lands. Once there capture at least one specimen from inside the cave. Once you're finished with that return to the Arena, a new Area Conquest monster should be available (Don Tonberry).

3. Before fighting Don Tonberry equip the character you want to level up with the special weapon you made for him/her in step one and set his/her Overdrive mode to Comrade. He/she will act as the

NFL 2K3: OPENING DAY TIPS

If you're going to dominate at NFL 2K3, you might need some help

Catch it all in stride

Stay tight to the man...

...or he's going to have an easy time catching the ball

Hand off the ball

Getting sacked stinks

Get rid of the ball!

PRESEASON PLUS

Be sure to go through the rigors of your preseason schedule. Getting the guys some work can result in significant rating gains. Who wouldn't want Drew Brees at an 82 instead of a 77? Focus on getting a role player some decent stats and see what happens. We've had some great results with that.

SLIP-SLIDING AWAY

Here's a little known fact about the sliders used to tweak NFL 2K3's gameplay. Most people assume that if they want better catching, they turn the catch slider to the right. Wrong. Moving sliders to the right make that particular skill harder. Thus, if you're concerned with the amount of dropped passes, move that thing to the left.

RUN WITH IT

NFL 2K3 has one of the most realistic run games ever seen. The chaos, violence and mayhem of real football is depicted artfully with each play. Bodies twist and fly, holes open and close, and people come out of nowhere to shut you down, or to make the block that springs you. Keeping this in mind, it's no wonder a lot of people are finding 2K3's running game hard. It's not a given that you'll get 100 yards just because you carry the pill 20 times. You have to earn it. Here are some simple tips that'll have you churning out bigger chunks of yardage on a more consistent basis.

• Don't speed burst right away. In fact, don't use it at all until you're really through the line or not being pursued. Speed burst is a love scent for opposing tacklers. They smell it and track you down—quickly. Hunt to the line, with patience and purpose before going for the speed and you'll be much better off.

• Some of the better special moves don't even require you to charge your arrow. By pressing the right and left triggers simultaneously, you get a surge that increases your chance of breaking tackles. It also almost always guarantees that you'll have forward momentum when being tackled, which can add a yard or two to every run.

• Charge your icon (when in the clear) by pressing X, and your player will get an enhanced speed burst while lowering his head to protect the ball. Do this with bigger backs and you will typically run over one or two guys and possibly even give a joyride to a couple more.

DON'T DROP IT

Passing is one of the more exciting parts of NFL 2K3, but wide receivers dropping the ball with regularity is a quick turn off. Don't get discouraged. Here's a quick primer on how to up that completion rate and get your receivers in synch with the program.

• First off, look for your primary (highlighted in the playcall) receiver at the line. What's the matchup? Can he beat his man? Analyze the situation at hand and

be ready to know where else to go if he's covered.

• Before you throw, get the QB's feet set and planted; very few NFL quarterbacks throw with much accuracy when firing off their back foot. Even fewer can swing it while on the run. Unless you're Donovan McNabb, try to stay in the pocket and step into the pass.

• This might seem too hardcore, but 2K3 actually thrives on you playing real football. That even goes for the amount of steps you take with your quarterback's drop. Here's how you can tell what drops go for what plays. If an offensive play begins with: 50: The QB should take a five- to seven-yard drop. 90: Quick three-step drop and get rid of it.

100: Play-action pass. QB will fake the handoff, hopefully freezing the D and buying some time. 200: QB will roll out toward a particular side of the field, usually a "flood" side with plenty of receivers.

How you execute these drops and reading the D is crucial to your success. If you don't fire quickly on plays designed for three step drops, receivers are not prepared to catch the ball, if that makes sense. If you're gunning the ball right away on the five to seven yard drops the wide-outs will be like, "You weren't supposed to do that yet."

GET SOME SACKS

Recording sacks in this game is a monumental task. It's rare that CPU quarterbacks hold the ball

too long and even when they do, they rarely take the hit that should be coming to them. Here's a few pointers to help you get in the QB's mug a little more often.

• Control a DL and hold X prior to the snap. This will charge your guy up and make for some extra potent special moves. Accomplish those by holding L1 or R1 and tapping face buttons on the PS2 pad.

• Timing is key. Charge in right after the snap and just before making contact with the OL, engage one of the special moves. Follow-up with another and you'll most likely be en route to the QB.

• Work stunts to your advantage. Dive inside other DL or rip outside the offensive tackles. A varied approach will pay dividends.

Enter Kelly Flock as a player name at the player creation screen. He will hit a homerun every time you hit it with power.

Better curve ball
Hold Triangle while the pitcher is throwing the ball and it will drop farther.

Easy hits
When your opponent pitches the ball, hold Down and swing. You'll get on base safely 90% of the time.

Easy steals
When you steal second base, go about halfway to the base (or before the catcher throws), then turn back so the catcher throws to first base. Press Square immediately after he begins to throw. Do the same when going to third base. You will be safe about 70 percent of the time to second base and 60 percent to third base.

Recommended team
Go to "Trade Player." Then, trade your starting pitchers for Randy Johnson, Pedro Martinez, Greg Maddux and Tom Glavine. Keep most of the relievers and trade one for John Rocker. party healer for this fight so make sure you have enough Phoenix Downs with you. The two other Characters: your party should equip their strongest weapons and armor (Celestials weapons are recommended). Start the fight against Don Tonberry, cast Haste on your healer and keep attacking Tonberry with your other two Characters. Tonberry never attacks until he's close enough to use his *Chief Knife*, but everytime you attack him he will counter with Karma. The more enemies a character has killed, the more damage this attack will inflict, so it's very likely that your fighters will go down with one hit from Karma, just use your healer to revive them. By the end of the fight, if you didn't summon Aeons, your healer will obtain an massive amount of Ap ISO plus levels depending on how much damaged your fighters received. To attach Triple Overdrive to a weapon, you need 30 Wining Formulas. To attach Triple Ap to a weapon, you need 30 Wings of Discove. To attach Overdrive-Ap to a weapon you need 10 Doors to Tomorrow. talked about 'Yeyon's Curse. It's a mental break to lower the effectiveness of Yeyon's healing, but I discovered a way to beat it in two moves. First, use the ability Zombie Attack, which you should at least have with Auron and then either cast Life on him or use a full healing item like Phoenix Down or PK-Potion. This should cause instant death. But if you want to toy with him you can always attack wither using Zombie Attack, and when it attempts to heal itself it will do damage instead.

DARK CLOUD: POTATO CAKES!
I found a secret in *Dark Cloud*. Grab some potato cake and head to the caves in Muskeo Racks. When you start fishing, look for a really huge fish. If it doesn't appear at first, exit and re-enter fishing mode until it does. When you catch this fish (who's name is Baron Garayami) you get 100 fishing points! Plus, when you try to guess the trap on a treasure chest, Baron will show you which one!

We want your reviews of your PlayStation games. So write a review and send it to: omg@ziffdavis.com. Get on with it!

We can't publish everyone, so keep it short, be witty and remember that not every game deserves a 5-disc rating because you like it!

Spider-Man PS2

What you said: "Treyarch's *Spider-Man* is a flop. I recognize their hard work, and they're effort is noted, but *Spider-Man* just goes to show that movie tie-ins suck. I developed a serious case of boredom from the second level. That tells you something. And if you want frustrating, try those stealth levels out. There are some amazingly detailed graphics and particle effects, not to mention aerial bat-

tle with cars and toys. There are also driving games, and they're fun to do—especially the speed tests. The problems are the unforgiving career mode, no multiplayer and the often lengthy load times. But, the positives make up for it. It's a solid if you can stand the difficulty. Your Score **★★★★**

McGloogan2@aol.com

What we said: "The problem is that the game itself is so utterly unforgiving. Our Score **★★**

Virtua Fighter 4

What you said: "I bought VF4 because of all the hype you guys over at *OPM* keep giving. Unfortunately I'm sadly disappointed in it. I

"The villains seem thrown in to make things longer, and combat now makes Spidey look incredibly weak."

was expecting a much better game—faster, paced at least. I'd bought VF4 because of all the hype you guys over at *OPM* keep giving. Unfortunately I'm sadly disappointed in it. I

Final Fantasy X

What you said: "I played *FFX* and was very impressed. The voice acting is excellent (except Yuna's), the graphics are sweet, and the music is great! The puzzles are a welcome addition, and Blitzball is fun. The only real problems I have with the game is that it's very linear and the bosses are too easy or cheesy. Your Score **★★★★**

*Nick Riley
SpideyBuddy@msn.com*

What we said: "Martial arts fans will be thrilled at the degree of realism this offers. Our Score **★★★★**

*Lara Atkinson
deviouslywicked_17@hotmail.com*

The Italian Job

What you said: "The *Italian Job* consists of crappy graphics, poor control of the car (you can't even lock backwards) a weird police system and plenty of action-packed levels. If there is any better way to spend a summer, I haven't found it. You can peel around London, Turin and the Alps in Mini's and other funny-looking European cars. What a blast! The loading times suck, though. And so does the control, but otherwise I believe this game should be in everyone's PS2 this summer! Your Score **★★★★**

*Scott Curtis
Tricia_deGruyter@awsb.on.ca*

Tony Hawk's Pro Skater 3

What you said: "This is a good game that lacks replay value. If you want to unlock everything you're going to have to play the game through so many times. The multiplayer games get boring since the games aren't that different from prior *Tony Hawk* games. Your Score **★★**

*Dante Strife
DanteStrife@aol.com*

What we said: "If you're looking for a great drive with cinematic wit, give this a whirl—even if you're a graphics snob." Our Score **★★★★**

What we said: "Final Fantasy X is among the most entertaining overall experiences in a video game." Our Score **★★★★**

Stuntman

Parasite Eve 2

What you said: "Wow, where do I start? I just picked this up a week ago. Big mistake. I should have picked it up a lot sooner! Even after being spoiled by the PS2's graphics, I still marvelled at *Parasite*'s visuals. The gameplay is amazing, albeit difficult at times. The story line seems a bit watered down and almost rushed, but character development is definitely a redeeming factor." Your Score **★★★★**

DORK GIVES UP

Drunks force Jason to give up marathon wait

1. I'VE TITLED this issue Jason Reed has thrown in the towel on his long wait outside a shop to buy a new computer monitor.

2. Last October Jason Reed says drinks pushed by a friend forced Reed to give up his wait for a new computer monitor to be the first to buy the game, *Lord of the Rings*.

3. Jason, 25, from Bradlevy Lane, Newburgh, picked up his new monitor. He says he bought the monitor through the shop on any day game in the afternoon (around 4 p.m.). It was about 10:30 p.m. when the day (the bar) there was full too many. Jason, drinks type in (the bar) was "out" and had of people holding the bar and drink people out of sightless place part. I got the feeling it could!

Remember that guy we reported on last issue who was trying to break the record for longest time ever waiting in line for a game (for *Turok: Evolution*, of all games)? Well, he didn't make it—not even close. According to U.K. newspaper reports, after enduring much [justified] ridicule from drunken pub-goers, he simply gave up. We're also betting whatever cash Acclaim must've been handing him for the publicity probably just wasn't enough.

HI, MY NAME IS...

Believe it or not, the wacky folks pictured here are all named Turok. They were the winners of a contest held by Acclaim UK to nab roughly \$800 for legally changing their names to Turok for one year. A contest, mind you, that apparently 10,000 people entered—10,000 people who would willingly walk around with the name Turok for a year. According to *Ananova.com*, the winners will now have everything from their passports to their telephone bills changed to carry the name "Turok" on them. Oh, but it gets worse. Acclaim U.S. held a similar contest awarding \$10,000 in savings bonds for college tuition to the first baby named Turok over Labor Day weekend. We don't know about you people, but if our parents named us Turok when we were kids, there would be some hell to pay later on in life. Hell to pay!

GAMING BANNED IN GREECE

If you think we've got some messed up laws here, check this out: The government of Greece recently banned all forms of electronic gaming, including video games. That's right, people there couldn't play arcades. PS2—they weren't even allowed to fiddle around with solitaire on their PCs. Why, you might ask? Well, in an effort to crack down on Internet gambling, the government outright banned all forms of electronic gaming. Funny thing is, the law lasted only for about two weeks—a court later found it unconstitutional when two Internet cafe owners were prosecuted for allowing people to play *Counter-Strike* and online chess on their computers. Sheesh—and we thought we had it rough with Sen Lieberman!
